many the miracles wrought at Our Lady's shrine. Henry III came on a pilgrimage to Walsingham in 1241, Edward I in 1280 and 1296, Edward II in 1315, Henry VI in 1455, Henry VII in 1487, and Henry VIII in 1513. Erasmus in fulfilment of a vow made a pilgrimage from Cambridge in 1511, and left as his offering a set of Greek verses expressive of his piety. Thirteen years later he wrote his colloquy on pilgrimages, wherein the wealth and magnificence of Walsingham are set forth, and some of the reputed miracles rationalized. In 1537 while the last prior, Richard Vowell, was paying obsequious respect to Cromwell, the sub-prior Nicholas Milcham was charged with conspiring to rebel against the suppression of the lesser monasteries, and on flimsy evidence was convicted of high treason and hanged outside the priory walls. In July, 1538, Prior Vowell assented to the destruction of Walsingham Priory and assisted the king's commissioners in the removal of the figure of Our Lady, of many of the gold and silver ornaments and in the general spoliation of the shrine. For his ready compliance the prior received a pension of 100 pounds a year, a large sum in those days, while fifteen of the canons received pensions varying from 4 pounds to 6 pounds. The shrine dismantled, and the priory destroyed, its site was sold by order of Henry VIII to one Thomas Sidney for 90 pounds, and a private mansion was subsequently erected on the spot. The Elizabethan ballad, "A Lament for Walsingham," expresses something of what the Norfolk people felt at the loss of their glorious shrine of Our Lady of Walsingham.

JOSEPH CLAYTON

Ferdinand Walter

Ferdinand Walter

Jurist, born at Wetzlar, 30 November, 1794; died at Bonn, 13 December, 1879. After studying at the Latin school of Muhlheim on the Rhine (1805-9), and later at Cologne (1809-13), he fought against Napoleon in 1814, as a volunteer in a Russian regiment. In autumn, 1814, he began to study jurisprudence at Heidelberg, where he graduated, 22 November, 1817. He remained at Heidelberg as *privatdozent* until Easter, 1819, where he was called to the newly founded University of Bonn. He taught various juristic branches there until 1875, when he resigned on account of blindness. Though a layman, Walter was a strenuous champion of the rights of the Church against civil encroachment. He was a member of the Prussian National Assembly in 1848 and of the First Chamber of Deputies in 1849. In a special pamphlet (1848) he opposed the incorporation into the criminal code of an article allowing the State to deprive the clergy of ecclesiastical rights, and on 4 October, 1849, he delivered a famous oration in defense of ecclesiastical independence in the management of church affairs. But

Walter's greatest achievements are in the field of juristic literature. All his literary productions are remarkable for thoroughness as well as literary finish and some of them have become classics in their sphere. His most famous work is his "Lehrbuch des Kirchenrechts" (Bonn, 1822). The eighth edition was translated into French and Spanish, the ninth into Italian. A fourteenth edition was prepared by Canon Gerlach, one of Walter's disciples (Bonn, 1871). The sources of canon law, which were added as an appendix to the sixth edition of the "Kirchenrecht", he materially enlarged and published separately as "Fontes juris ecclesiastici antiqui et hodierni" (Bonn, 1862). His other important works are: "Corpus juris Germanici antiqui" (3 vols., Bonn, 1824); "Romische Rechtsgeschichte" (Bonn, 1836); "Deutsche Rechtsgeschichte" (Bonn, 1853); "System des deutschen Privatrechts" (Bonn, 1855); "Das alte Wales", (Bonn, 1859), on the history, laws, and religion of ancient Wales; "Juristische Encyclopadic" (Bonn, 1856); "Naturrecht und Politik" (Bonn, 1863); "Aus meinem Leben" (Bonn, 1865), an autobiography; "Das alte Erz stift und die Reichsstadt Keln" (Bonn, 1866), a civil history of the former electorate of Cologne, left unfinished.

WALTER, Aus meinem Leben (Bonn, 1865); GERLACH, in Der Katholik, LX (Mainz, 1880, II, 511-15.

MICHAEL OTT

Walter of Chatillon

Walter of Châtillon

(GAUTIER DE LILLE, GUALTERUS DE INSULIS; also GAUTIER DE CHATILLON, GAULTERUS DE CASTILLIONE).

Poet in the second half of the twelfth century, born at Lille; died of the plague, probably at the city of Amiens, in the beginning of the thirteenth century. He studied at Paris, where his master was Etienne of Beauvais. Having afterwards settled at Châtillon, he changed his name, *de Insulis*, into that of *de Castillione*. From Châtillon, where he had charge of the schools, he went to Bologna to study law, and on his return to France was appointed secretary to Henry, Archbishop of Reims. He kept this office under Henry's successor, William, who was Archbishop of Reims from 1176 to 1201. It was at that time that Walter wrote his "Alexandreid", at the request of Archbishop William, to whom it is dedicated. His "Alexandreis, sive Gesta Alexandri Magni" is a Latin poem of 5464 hexameters in ten books, based on Curtius's account of Alexander's expeditions. It shows a great familiarity with Virgil and the later Latin poets, but it is full of anachronia, one of the most startling being the Passion of Christ mentioned as something that had already taken place in the time of Alexander. In spite of its defects, however, this poem is considered superior to those composed at that time and at the

end of the thirteenth century; it was even preferred to the "Æneid" for school work. The well-known hexameter, "Incidit in Scyllam qui vult vitare Charybdim" (He falls in Scylla's jaws who would escape Charybdis), is taken from the "Alexandreid". Other works of his are: "Libelli tres contra Judaeos in dialogi formam conscripti", published by Casimir Oudin in his collection. "Veterum aliquot Galliae et Belgii scriptorum opuscula" (Leyden, 1692), and "De SS. Trinitate tractatus", published by Bernard Pez in his "Anecdota".

OUDIN, *Commentarii de scriptoribus et scriptis ecclesiasticis*, II; *Histoire littéraire de la France*, XV; BAUGARTNER, *Die lateinische und griechische Literatur der christlichen Volker*, I.

P.J. MARIQUE

Walter of Merton

Walter of Merton

Bishop of Rochester and founder of Merton College, Oxford, b. probably at Merton in Surrey or educated there; hence the surname; d. 27 Oct., 1277. He came of a land-owning family at Basingstoke; beyond that there is no definite information as to the date or place of birth. We know that his mother was Christina Fitz-Oliver and his father William, and that in 1237 both parents were dead, and Walter was a clerk in Holy orders. In 1241 Walter already held a number of livings in various parts of the country; in 1256 he was an agent for the Bishop of Durham in a law-suit; in 1259 prebendary of St. Paul's, London; and in 1262 prebendary of Exeter and canon of Wells. Walter was also prothonotary of the chancery in 1258; and in 1261 Henry III made him chancellor, in place of Nicholas of Ely. It was in this same year that Walter first set aside two manors in Surrey for the priory at Merton, for the support of "scholars residing at the schools". This was the beginning of Merton College. In 1264 Walter drew up statutes for a "house of the scholars of Merton", at Malden in Surrey; ten years later these scholars were transferred to Oxford, and a permanent house established.

Merton College, thus founded and endowed by Walter, is the earliest example of collegiate life at Oxford. Walter's statutes provided for a common corporate life under the rule of a warden, but as vows were to be taken and scholars entering a religious order forfeited their scholarship, the college was really a place of training for the secular clergy. While labouring for the establishment of Merton College, Walter was removed from the chancellorship when the barons triumphed in 1263, but was restored again on Henry III's death in 1272. He is mentioned as a justiciar in 1271, and three years later (21 October, 1274) he was consecrated Bishop of Rochester. While fording the Medway, Bishop Walter fell from his horse and died two days later from the effects of

the accident. He was buried in Rochester cathedral, and is described in the "Annales monastici" as a man of liberality and great worldly learning, ever ready in his assistance to the religious orders.

Annales monastici in R.S.; Flores historiarum in R.S.; HOBHOUSE, Sketch of the Life of Walter de Merton (1859); BRODRICK, Memorial of Merton College, Oxf. Hist. Soc.; FOSS, Judges of England; KINGSFORD in Dict. Nat. Biog., s.v. Merton, Walter de.

JOSEPH CLAYTON

Walter of Mortagne

Walter of Mortagne

A twelfth-century Scholastic philosopher, and theologian, b. at Mortagne in Flanders in the first decade of the twelfth century; d. at Laon, 1174. He was educated in the schools of Tournai. From 1136 to 1144 he taught at the celebrated School of St-Genevieve in Paris. From Paris he went to Laon and was made bishop of that see. His principal works are a treatise on the Holy Trinity and six "Opuscula". Of the "Opuscula" five are published in d'Achéry's "Spicilegium" (Paris, 1723) and the sixth in P.L. (CLXXXVI, 1052). A logical commentary which is contained in MS. 17813 of the Bibliotheque Nationale and which was published in part by Haureau in 1892 is also ascribed to him. Finally, there is extant a letter written by him to Abelard in which he expounds the Platonic view that the body is an obstacle to the higher operations and aspirations of the soul. On the question of universals, Walter, according to John of Salisbury, was the leader of the Indifferentists, according to whom the universal is in itself indifferent, but becomes the predicate of an individual subject by the addition of various *status*, that is determinations or, at least, points of view. Socrates, for example, is an individual, a species (man), or a genus (animal) according to the *status*, or point of view, which we adopt. The significant thing about this theory is that it explicitly declares all real existence to be individual existence and implies that whatever unity there is in the universal (specific or generic) is a product of thought. It is, therefore, a protest against the exaggerated realism of the school of William of Champeaux, and, at the same time, prepares the way for the moderate realism which was definitely formulated in the thirteenth century.

P.L., XLCCCVI; D'ACHERY, Spicilegium (Paris, 1723); HAUREAU, Notices et extraits (Paris, 1892), 313; DE WULF, Hist. of Medieval Phil., tr. COFFEY (New York, 1909), 188; TURNER, Hist. of Phil. (Boston, 1903), 284.

WILLIAM TURNER

Walter of St-Victor

Walter of St-Victor

Mystic philosopher and theologian of the twelfth century. Nothing is known about Walter except that (about the year 1175) he was prior of the monastery of St-Victor that about the time of the Third Lateran Council (1179) he wrote the celebrated polemic, "Contra quatuor labyrinthos Franciae", and that he died about the year 1180. Du Boulay in his "Hist. Univ. Paris." (1665) first called attention to Walter's treatise and published excerpts from it (republished in P.L., CXCIX). More recently Denifle has described the manuscript And Geyer has published a critical text of the second book. The "four labyrinths" against whom the work is directed are Abelard, Gilbert de la Porrée, Peter Lombard, and Peter of Poitiers. It is a bitter attack on the dialectical method in theology, and condemns in no measured terms the use of logic in the elucidation of the mysteries of faith. Walter is indignant at the thought of treating the mysteries of the Trinity and the Incarnation "with scholastic levity". Discarding the best traditions of the School of St-Victor, he pours abuse on the philosophers, the theologians, and even the grammarians. "Thy grammar be with thee until perdition", he cries. This violence, however, defeated his purpose, which was to discredit the dialecticians. Not only did he fail to convince his contemporaries, but he very probably hastened the triumph of the method which he attacked. Four years after his polemic was published, Peter of Poitiers, one of the "labyrinths", was raised by the pope to the dignity of chancellor of the Diocese of Paris, and before the end of the decade Peter Lombard, another of the "Labyrinths", was recognized as an authority in theology, his method adopted in the schools, and his famous "Books of Sentences" used as a text and commented on by all the great teachers -- a distinction which it retained all through the thirteenth century.

DU BOULAY, Hist. Univ. Paris., II (Paris, 1665), 402 sqq.; DENIFLE, Archiv f. Literatur-und Kirchengesch. des M.A., I, 404; GEYER, Die Sententiae Divinitatis (Munster, 1909); GRABMANN, Gesch. der schol. Methode, II (Freiburg, 1911), 124.

WILLIAM TURNER

Walter of Winterburn

Walter of Winterburn

An English Dominican, cardinal, orator, poet, philosopher, theologian, b. in the thirteenth century; d. at Genoa, 26 Aug., 1305. He entered the Dominican Order when a youth, and became renowned for learning, prudence, and sanctity of life. Edward I,

King of England, chose him as his confessor and spiritual director. He was provincial of his order in England from 1290 to 1298, and was created cardinal, 21 February, 1304, by Benedict XI. In 1305, after having taken part in the election of Clement V, Walter set out from Perugia with several other cardinals to join the pope in France, but at Genoa he was seized with his last illness, during which he was attended by the dean of the Sacred College, Nicholas de Prato. His remains were first buried in the church of his order at Genoa, but were later transferred to London, as he had ordered, and interred in the convent to which he had formerly been assigned. Nicholas Trivet, his intimate friend, assures us that Walter was a man endowed with many superior qualities, natural and supernatural. Thoroughly versed in knowledge, graced with rare modesty and a kindly disposition, he was a model of religious piety and of mature crudition. Despite numerous duties in the cloister and at the imperial Court, his hours of prayer were never shortened. He left several works of real worth on philosophy and theology, chief among them: "Commentarium in IV sententiarum libros"; "Quaestiones theologicae", much in use at that time; "Sermones ad clerum et coram rege habiti".

CHAS. J. CALLAN

Waltham Abbey

Waltham Abbey

The Abbey of Waltham Holy Cross stood in Essex, some ten miles to the northeast of London, on the Middlesex border. In the reign of Kent, one Tofig, a wealthy landowner, built a church at Waltham for the reception of a miraculous cross, discovered through a vision in Somerset, and gave endowment for two priests. On Tofig's death his Waltham property lapsed to the Crown, and King Edward the Confessor granted the estate to Harold. the latter enlarged the foundation of the church and established a college of secular canons. In 1060 the church was solemnly dedicated to the Holy Cross by Cynesige, Archbishop of York, and Wlwin became its first dean. It is said that Harold's body was brought to Waltham for burial after the battle of Hastings, but the story has been disputed. The secular canons were displaced in 1177 by Henry II in favour of Augustinian Canons, and a prior was appointed. Seven years later Walter de Gant was made the first abbot, and Waltham became the most important Augustinian house in the country. Its abbot was mitred, sat in Parliament, enjoyed peculiar exemption from episcopal visitation, and received at various times special favours from Rome. The abbey also obtained a number of valuable privileges and

charters from the Crown. At the dissolution of the monasteries in 1537, Waltham was assessed at a gross annual value of £1079 2s. 1d., and was the richest religious house in Essex. It outlasted every other abbey in the country, and was only formally surrendered on 23 March, 1540, by its last abbot, Robert Fuller, who retired with a pension of £200 and with several manors and church advowsons. The abbey lands were leased to Sir Anthony Denny, and were subsequently purchased outright by his widow in 1549. The choir and transept were destroyed, but the west end of the abbey church was set apart as a parish church for the new service of the Church of England, and remains to this day as a place of worship for Anglicans.

JOSEPH CLAYTON

Walther von Der Vogelweide

Walther von der Vogelweide

Minnesinger and old poet, born about 1170; died in 1228. Only one old document mentions the name of the poet and an unimportant event of his life; in the record of the travelling expenses of Wolfger von Ellenbrechtskirchen, Bishop of Passau, there is an entry under 12 November, 1203, which says that five solidi for a fur coat were given as a present to the singer Walther von der Vogelweide. The only authorities for anything more than a conjectural decision as to his place of birth are his poems, especially two in imperfect rhyme. As he was in other cases very exact as to rhyme, this faultiness can only be explained on the theory that they are in the Bavarian-Austrian dialect. Austria, therefore, is probably his birth-place. On one occasion also Walther speaks of Duke Leopold VI as the ruler of his native country, and proclaims the fact that he learned to read and sing in Austria, and that he always feels himself drawn to go to Vienna. The Tyrolese, however, claim him as a countryman, as do also the Bohemians, and both have erected monuments to his memory. It is not possible to arrange his songs in chronological order with any certainty; consequently they cannot be interpreted with reference to the poet's life. All that is certain is that Walther developed artistically the knightly *Minne* poetry, and introduced the real love song into the artistic court poetry, and this is his particular merit as a minnesinger.

Walther's didactic poetry, a form of the poetic art that generally belonged to the wandering scholar, stands on the same high level as his love lyrics. Ruler and people listened attentively to his earnest words of exhortation. Unfortunately, in this era of violent struggle the volatile poet allowed himself to be carried away by his passions.

He was especially severe against the pope, and frequently unjust to his policy. Otherwise, these apothegms give an animated picture of the tumultuous era of the unhappy struggle over the imperial election. In this way Walther's didactic poetry is of value both for the history of his times and for that of civilization. He composed also a number of didactic apothegms that might be styled gnomic poetry, which show many sides of the poet's character. Dr. A. Schönbach, Walther's latest biographer and the best critic of Middle-High-German literature, devotes a special section of his work to "Walther's religion". This is necessary to confute the Protestant conception and account of Walther, but for the scholar without prejudice it is needless because entirely self-evident. The great singer probably did not live to see the Crusade of Frederick II, for which he had written so devout a song. At least he ceases to sing in the year 1228. Where he died and where he was buried are as little known as the place of his birth.

In the latest edition of his *Walther von der Vogelweide* (Berlin, 1910), Schonbach gives a bibliography of his subject not only complete, but provided with valuable critical notes. The most important works of the bibliography are: UHLAND, *Walther von der Vogelweide* (1822); LACHMANN, *Die Gedichte Walthers von der Vogelweide* (1827), tr. into New-High-German by SIMROCK (1833); HORNING, *Glossarium zu den Gedichten Walthers von der Vogelweide* (1844); PFEIFFER AND BARTSCH, *Deutsche Klasiker des Mittelalters* (1864); BURDACH, *Reimar der Alte u. Walther von der Vogelweide* (Leipzig, 1880); WILLMANNS, *Leben u. Dichten Walthers von der Vogelweide* (Bonn, 1882); PAUL, *Altdeutsche Textbibliothek* (1882); SCHONBACH in *Zeitschrift für deutsches Altertum*, XXXVIII, 1 sqq.; IDEM in *Sitzungsberichte der Wiener Akademie*, CXLV (1902).

N. SCHEID

Brian Walton

Brian Walton

Biblical scholar, editor of Walton's Polyglot Bible, born at Seymour, or Seamer, near York, in 1600; died in London, 29 November, 1661. He was educated at Cambridge, where he graduated B.A. in 1619-20, and M.A. in 1623. Ordained in the Anglican Church, he became a curate and also schoolmaster in Suffolk; in 1628 he was promoted to the rectorship of St. Martin's Orgar, London, to which was added, in 1636, that of Sandon, Essex, and, perhaps, the title of chaplain to the king with a prebend in St. Pal's. He took the degree of D.D. at the University of Cambridge in 1639. Having become involved in the troubles of the times, he was accused of "subtile tricks and popish innovations", deprived of his two rectories, in 1641, and in the next year imprisoned. In no way disheartened, he went, on receiving his freedom, to Oxford, then the capital

of Royalist England, and there planned the great Polyglot (see POLYGLOT BIBLES) which was to render his name familiar to every student of the Scriptures. After the surrender of Oxford in 1646, he betook himself to London, where, in 1652, he issued his prospectus of the Polyglot. Subscriptions were put at £10 a set, and in a short time the sum of £9000 was subscribed. Walton's Polyglot was the first book published by subscription in England. To carry out his work successfully, Walton secured the aid of nearly all the contemporary English scholars, particularly Edmund Castell, Edward Pococke, Thomas Hyde, Dudley Loftus, Abraham Weelocke, Thomas Greaves, and Samuel Clarke, but the editorship devolved upon himself. While the Polyglot was in the press, he published as an aid to the perusal thereof an "Introductio ad lectionem linguarum Orientalium" (London, 1655; Deventer, 1655, 1658).

This was a time when English theologians were much divided as to the extent of the Divine inspiration of the Scriptures, some going so far as to adopt the narrow view that even the vowel-points and accents of the Massoretic text "must come under our consideration as being such from God" (Owen, "Works", XVI, 303). John Owen had just prepared to that effect a tract on "The Divine Original Authority and self-evidencing Light and Purity of the Scriptures", when he was confronted by Walton's "Prolegomena", in which a much more liberal view was held. He set out to refute it, and published to that purpose a new tract: "Of the Integrity and Purity of the Hebrew Text of the Scriptures, with Considerations of the Prolegomena and Appendix to the late Biblia Polyglotta" (Oxford, 1659). Brian Walton, whose saner view of the subject was inspired by deeper scholarship and was endorsed by "the chief Protestant Divines, and greatest linguists that then were", was not long in repelling Owen's Quixotic attack: to his opponent he addressed his "Considerator considered: or a brief View of certain Considerations upon the Biblia Polyglotta, the Prolegomena and the Appendix" (London, 1659), which should at once have ended the controversy, were the weight of the arguments the only factor in ending controversies. But, consoling himself with the thought that his work could not be expected to share better than Origen's Hexapla, S. Jerome's Vulgate, the Complutensian Polyglot, Erasmus's Greek Testament, and the Antwerp and Paris Polyglots, all of which had met with opposition, he abandoned the controversy, leaving it to time to vindicate him. The dawn of the day of vindication was not long delayed, for at the Restoration he was made chaplain to the king, and soon after (2 December, 1660) consecrated Bishop of Chester in Westminster Abbey.

BRIGGS, General Introduction to the Study of Holy Scripture (Edinburgh, 1899), 222-25; TODD, Memoirs of the Life and Writings of Brian Walton (London, 1821); ELLIES DU PIN, Table universelle des auteurs heretiques du xvi et du xvii siecles, IV (Paris, 1704); FELLER, Dictionnaire historique, XVIII (Paris, 1829); REUSCH, Der Index der verbotenen Bucher, II (Bonn, 1885), 124, 125.

CHARLES L. SOUVAY
Wandelbert

Wandelbert

Benedictine monk and theological writer, born in 813; died at Prüm after 850. Little is known of his personal history. He was apparently a native of France, and in 839 he was already a monk at Prüm. About this date Abbot Markward commissioned him to rewrite the old life of St. Goar and to supplement it by an account of the miracles worked by the saint. The life Wandelbert wrote is not without historical value. He composed his second work, a martyrology in verse that was finished about 848, at the request of Otrich, a priest of Cologne, and with the aid of his friend Florus of Lyons. The martyrology is based on earlier ones, particularly that of the Venerable Bede. The arrangement follows the calendar, and a brief account is given for each day of the life and death of one or more saints. Together with the martyrology are poems on the months and their signs, on the various kinds of agricultural labour, the seasons for hunting, fishing, cultivation of fruit, of the fields, and of vineyards, and the church Hours. The poetry is, in general, uniform and monotonous, the most graceful passages are various descriptions of nature. Wandelbert also wrote a (lost) work on the Mass.

P.L., CXXI, 575-674; Histoire Litteraire de la France, V (Paris, 1740), 377-83; MANITIUS, Gesch. der lateinischen Literatur des Mittelalters, I (Munich, 1911), 557-60.

KLEMENS LOFFLER
Heinrich Wangnereck

Heinrich Wangnereck

(WAGNERECK).

Theologian, preacher, author, born at Munich in July, 1595; died at Dillingen, 11 November, 1664. The extant sketches of his life give no uniform information respecting the dates of events; it is, however, unanimously stated that when sixteen years old he entered the novitiate of the upper German province of the Society of Jesus, at Landsberg, took the usual course of instruction, and in addition was for a time teacher of the lowest class at the gymnasium. His chief occupation was that of a professor of philosophy and theology at the University of Dillingen, where he was chancellor, according to one statement, for twenty-four years. In addition to teaching, he was also a noted preacher. In 1655 he was sent to Lindau as superior and missioner, but after five years

returned to Dillingen where he was chancellor until his death, which followed a sudden stroke of apoplexy at table. It is said that his reputation for learning and ability was so widespread that many secular and spiritual princes, bishops, and prelates of Germany asked his advice in the most important matters. His works, of which twenty are known, are chiefly on theological subjects. He also took part in the political controversies of the period, but not always to the satisfaction of authority, as there is record of a punishment inflicted upon him by the general of the Society because he had spoken disrespectfully of the Duke of Bavaria. His first small work, "Notae in confessiones S. Augustini", published in 1630, has retained its popularity up to the present time; in 1907 a fourth edition of it appeared.

SOMMERVOGEL, Bibl. de la Comp. de Jesus, 979-86; THOLEN, Menologiumoder Lebensbilder aus der Geschichte der deutschen Ordensprovinz (Roermond, 1901), printed for private circulation. A brief sketch of Wangnereck's life is given in the fourth edition of his first treatise on the "Confessions" of St. Augustine, pp. xv-xvi: see also STEINBERGER, Die Jesuiten und die Frieden frage in der Zeil vom Prager Frieden bis zum Nurnberger Friedensexekutionshauptrexess, 1635-1650 in Studien und Darstellungen aus dem Gebiete der Geschichte, ed. GRAUERT, V (1906), 2, 3, which gives a sketch of Wangnereck's political activity.

N. SCHEID

War

War

War, in its juridical sense, is a contention carried on by force of arms between sovereign states, or communities having in this regard the right of states. The term is often used for civil strife, sedition, rebellion properly so called, or even for the undertaking of a State to put down by force organized bodies of outlaws, and in fact there is no other proper word for the struggle as such; but as these are not juridically in the same class with contentions of force between sovereign states, the jurist may not so use the term.

However, a people in revolution, in the rare instance of an effort to re-establish civil government which has practically vanished from the community except in name, or to vitalize constitutional rights reserved specifically or residuarily to the people, is conceded to be in like juridical case with a State, as far as protecting its fundamental rights by force of arms. Grote insisted that war was a more or less continuous condition of conflict between those contending by force; and so indeed it is; but even Grote, when seeking to determine the grounds of right and wrong in such a condition, necessarily moved the question back to the right to acts of force in either contending party,

and so justified the more accepted juridical definition of a contest at arms between contending states. The judicial condition of the contending parties to the war is spoken of as a state of belligerency, while the term *war* more properly applies to the series of hostile acts of force exercised in the contention. To present here the position of Catholic philosophy in this regard, it will be convenient to discuss in sequence:

- I. The Existence of the Right of War;
- II. Its Juridical Source;
- III. Its Possessor;
- IV. Its Title and Purpose;
- V. Its Subject-matter;
- VI. Its Term.

From these we may gather the idea of a just war.

I. THE EXISTENCE OF THE RIGHT OF WAR

The right of war is the right of a sovereign state to wage a contention at arms against another, and is in its analysis an instance of the general moral power of coercion, i.e. to make use of physical force to conserve its rights inviolable. Every perfect right, i.e. every right involving in others an obligation in justice a deference thereto, to be efficacious, and consequently a real and not an illusory power, carries with it at the last appeal the subsidiary right of coercion. A perfect right, then, implies the right of physical force to defend itself against infringement, to recover the subject-matter of right unjustly withheld or to exact its equivalent, and to inflict damage in the exercise of this coercion wherever, as is almost universally the case, coercion cannot be exercised effectively without such damage. The limitations of this coercive right are: that its exercise be necessary; and that damage be not inflicted beyond measure -- first of necessity and secondly of proportion with the subject-matter of right at issue. Furthermore, the exercise of coercion is restricted in civil communities to the public authority, for the reason that such restriction is a necessity of the common weal. In like manner the use of force beyond the region of defence and reparation, namely for the imposition of punishment to restore the balance of retributive justice by compensation for the mere violation of law and justice, as well as to assure the future security of the same, is reserved to public authority, for the reason that the State is the natural guardian of law and order, and to permit the individual, even in a matter of personal offence, to be witness, judge, and executioner all at once -- human nature being what it is -- would be a source of injustice rather than of equitable readjustment.

Now the State has corporate rights of its own which are perfect; it has also the duty to defend its citizens' rights; it consequently has the right of coercion in safeguarding

its own and its citizens' rights in case of menace or violation from abroad as well as from at home, not only against foreign individuals, but also against foreign states. Otherwise the duty above indicated would be impossible of fulfillment; the corporate rights of the State would be nugatory, while the individual rights of citizens would be at the mercy of the outside world. The pressure of such coercion, it is true, may be applied in certain circumstances without both parties going to the extreme of complete national conflict; but when the latter arises, as it commonly will, we have war pure and simple, even as the first application of force is initial warfare. Catholic philosophy, therefore, concedes to the State the full natural right of war, whether defensive, as in case of another's attack in force upon it; offensive (more properly, coercive), where it finds it necessary to take the initiative in the application of force; or punitive, in the infliction of punishment for evil done against itself or, in some determined cases, against others. International law views the punitive right of war with suspicion; but, thought it is open to wide abuse, its original existence under the natural law cannot well be disputed.

II. THE SOURCE OF THE RIGHT OF WAR

The source of the right of war is the natural law which confers upon states, as upon individuals, the moral powers or rights which are the necessary means to the essential purpose set by the natural law for the individual and the State to accomplish. Just as it is the natural law which, with a view to the natural purposes of mankind's creation, has granted its substantial rights to the state, so it is the same law which concedes the subsidiary right of physical coercion in their maintenance, without which none of its rights would be efficacious. The full truth, however, takes into consideration the limitations and extensions of the war-right set by international law in virtue of contract (either implicit in accepted custom or explicit in formal compact) among the nations which are party to international legal obligation. But it must be noted that civilized nations, in their effort to ameliorate the cruel conditions of warfare, have sometimes consented to allow, as the less of two imminent evils, that which is forbidden by the natural law. This is not strictly a right, though it is often so denominated, but an international toleration of a natural wrong. In the common territorial or commercial ambitions of great powers there may be an agreement of mutual toleration of what is pure and simple moral wrong by virtue of the natural law, and that without the excuse of it being a less evil than another to be avoided; in this case the unrighteousness is still more evident, for the toleration itself is wrong. The original determination of the right of war comes from the law of nature only; consent of mankind may manifest the existence of a phase of this law; it does not constitute it.

The agreement of nations may surrender in common a part of the full right and so qualify it; or it may tolerate a limited abuse of it; but such agreement does not confer

a particle of the original right itself, nor can it take aught of it away, except by the consent of the nations so deprived. The usage of the better part of the world in such a matter may be argued to bind all nations, but the argument does not conclude convincingly. The decisions of American courts lean toward the proposition of universal obligation: English jurists are not so clearly or generally in its favour. Of course, for that part of the international law bearing on war, which may be justly said to be the natural law as binding nations in their dealings with one another, the existence of which is manifested by the common consent of mankind, there can be no controversy: here the international law is but a name for a part of the natural law. Suarez, it is true, is inclined to seek the right of war as a means not precisely of defence, but of reparation of right and of punishment of violation, from the international law, on the ground that it is not necessary in the nature of things that the power of such rehabilitation and punishment should rest with the aggrieved state (though it should be somewhere on earth), but that mankind has agreed to the individual state method rather than by formation of an international tribunal with adequate police powers. However, the argument given above shows with fair clearness that the power belongs to the aggrieved state, and that though it might have entrusted, or may yet entrust, its exercise to an international arbiter, it is not bound so to do, nor has it done so in the past save in some exceptional cases.

III. THE POSSESSOR OF THE RIGHT OF WAR

The right of war lies solely with the sovereign authority of the State. As it flows from the efficacious character of other rights in peril, the coercive right must belong to the possessor, or to the natural guardian, of those rights. The rights in question may be directly corporate rights of the State, or of which, of course, the State is itself the possessor, and of which there is no natural guardian but the sovereign authority of the State; or directly the rights of subordinate parts of the State or even of its individual citizens, and of these the sovereign authority is the natural guardian against foreign aggression. The sovereign authority is the guardian, because there is no higher power on earth to which appeal may be made; and, moreover, in the case of the individual citizen, the protection of his rights against foreign aggression will ordinarily become indirectly a matter of the good of the Commonwealth. It is clear that the right of war cannot become a prerogative of any subordinate power in the state, or of a section, a city, or an individual, for the several reasons: that none such can have the right to imperil the good of all the state (as happens in war) except the juridical guardian of the common good of all: that subordinate parts of the state, as well as the individual citizen, having the supreme authority of the state to which to make appeal, are not in the case of necessity required for the exercise of coercion; finally, that any such right in hands other than those of the sovereign power would upset the pace and order of the whole

state. How sovereign authority in matter of war reverts back to the people as a whole in certain circumstances belongs for explanation to the question of revolution. With the supreme power lies also the judicial authority to determine when war is necessary, and what is the necessary and proportionate measure of damage it may therein inflict: there is no other natural tribunal to which recourse may be had, and without this judicial faculty the right of war would be vain.

IV. THE TITLE AND PURPOSE OF WAR

The primary title of a state to go to war is:

- first, the fact that the state's right (either directly or indirectly through those of its citizens) are menaced by foreign aggression not otherwise to be prevented than by war;
- secondly, the fact of actual violation of right not otherwise reparable;
- thirdly, the need of punishing the threatening or infringing power for the security of the future.

From the nature of the proved right these three facts are necessarily just titles, and the state, whose rights are in jeopardy, is itself the judge thereof. Secondary titles may come to a state,

- first, from the request of another state in peril (or of a people who happen themselves to be in possession of the right);
- secondly, from the fact of the oppression of the innocent, whose unjust suffering is proportionate to the gravity of war and whom it is impossible to rescue in any other way; in this latter case the innocent have the right to resist, charity calls for assistance, and the intervening state may justly assume the communication of the right of the innocent to exercise extreme coercion in their behalf.

Whether a state may find title to interfere for punishment after the destruction of the innocent who were in no wise its own subjects, is not so clear, unless such punishment be a reasonable necessity for the future security of its own citizens and their rights. It has been argued that the extension of a state's punitive right outside of the field of its own subjects would seem to be a necessity of natural conditions; for the right must be somewhere, if we are to have law and order on the earth, and there is no place to put it except in the hands of the state that is willing to undertake the punishment. Still, the matter is not as clear as the right to interfere in defence of the innocent.

The common good of the nation is a restricting condition upon the exercise of its right to go to war; but it is not itself a sufficient title for such exercise. Thus the mere expansion of trade, the acquisition of new territory, however beneficial or necessary for a developing state, gives no natural title to wage war upon another state to force that state upon her, or to extort a measure of her surplus territory, as the common good of one state has no greater right than the common good of another, and each is the judge and guardian of its own. Much less may a just title be found in the mere need of exercising a standing martial force, of reconciling a people to the tax for its maintenance, or to escape revolutionary trouble at home. Here, also, it is to be noted that nations cannot draw a parallel from Old-Testament titles. The Israelites lived under a theocracy; God, as Supreme Lord of all the earth, in specific instances, by the exercise of His supreme dominion, transferred the ownership of alien lands to the Israelites; by His command they waged war to obtain possession of it, and their title to war was the ownership (thus given them) of the land for which they fought. The privation thus wrought upon its prior owners and actual possessors had, moreover, the character of punishment visited upon them by God's order for offenses committed against Him. No state can find such title existing for itself under the natural law.

Furthermore, a clear title is limited to the condition that war is necessary as a last appeal. Hence, if there is reasonable ground to think that the offending state will withdraw its menace, repair the injury done, and pay a penalty sufficient to satisfy retributive justice and give a fair guarantee of the future security of juridical order between the two states concerned -- all in consequence of proper representation, judicious diplomacy, patient urgency, a mere threat of war, or any other just means this side of actual war -- then war itself cannot as yet be said to be a necessity, and so, in such premises, lacks full title. A fair opportunity of adjustment must be given, or a reasonable assurance had that the offence will not be rectified except under stress of war, before the title is just. Whether the aggrieved state should consent to arbitrate differences of judgment before resorting to war, is within its own competency to decide, as the natural law has established no judge but the aggrieved state itself, and international law does not constrain it to transfer its judicial right to any other tribunal, except in so far forth as it has by prior agreement bound itself so to do. None the less, when the grievance is not clear, and the public authority has sound reason to think that it can arrange for a tribunal where justice will be done, it would seem that the necessity of war in that individual case is not final, and even though international law may leave the state free to refuse all arbitration, the natural law would seem to command if not to command it. Towards this solution of international differences, in spite of the difficulty of securing an unbiased tribunal, we have in the last fifty years made some progress.

Again, the question of proportion between the damages to be inflicted by war and the value of the national right menaced or violated must enter into consideration for the determination of the full justice of a title. Here we must take into account the consequences of such right being left unvindicated. Nations are prone to go to war for almost any violation of right, and its reparation absolutely refused. This tendency argues the common conviction that such violation will go from bad to worse, and that, if sovereign right is not recognized in a small thing, it will be far less so in a great. The conviction is not without rational ground; and yet the pride of power and the sensitiveness of national vanity can readily lead, in the excitement of the moment, to a mistaken judgment of a gravity of offence proportionate to all the ills of war. Neither is force a successful means of securing honour, unless it be to assure the due recognition of the rights of the sovereign power behind that honour; while in the calm forum of deliberate reason the loss of one human life outweighs the mere offended vanity of a king or a people. The true proportion between the damage to be inflicted and the right violated is to be measured by whether the loss of right in itself or in its ordinary natural consequences would be morally as great a detriment to the common good of the state aggrieved as the damages which war conducted against the aggressor would entail upon the common good of the same, throwing into the balance against the latter the additional amount of damage due him as the punishment of retributive justice. Finally, a state going to war must weigh its own probable losses in blood and treasure, and its prospect of victory, before it may rightly enter upon a war: for the interest of the common good at home inhibit the exercise of force abroad, unless reasonably calculated not to be an ultimate graver loss to one's own community. This is not properly a limitation of title, but a prudential limitation upon the exercise of a right in the face of full title. The proper purpose of war is indicated by the title, and war conducted for a purpose beyond that contained in a just title is a moral wrong.

V. THE SUBJECT-MATTER OF THE RIGHT OF WAR

This will cover what may be done by the warring power in exercise of its right. It embraces the infliction of all manner of damage to property and life of the other state and its contending subjects, up to the measure requisite to enforce submission, implying the acceptance of a final readjustment and proportionate penalty; it includes in general all acts that are necessary means to such damage, but is checked by the proviso that neither the damage inflicted nor the means taken involve actions that are intrinsically immoral. In the prosecution of the war the killing or injuring of non-combatants (women, children, the aged and feeble, or even those capable of bearing arms but as a matter of fact not in any way participating in the war) is consequently barred, except where their simultaneous destruction is an unavoidable accident attending the attack upon the contending force. The wanton destruction of the property of such non-

combatants, where it does not or will not minister maintenance or help to the state or its army, is likewise devoid of the requisite condition of necessity. In fact the wanton destruction of the property of the state or of combatants -- i.e. where such destruction cannot make for their submission, reparation, or proportionate punishment -- is beyond the pale of the just subject-matter of war. The burning of the Capitol and White House at Washington in 1814, and the devastation of Georgia, South Carolina, and the Valley of the Shenandoah during the America Civil War have not escaped criticism in this category. That "war is hell", in the sense that it inevitably carries with it a maximum of human miseries, is true; in the sense that it justifies anything that makes for the suffering and punishment of a people at war, it cannot be ethically maintained. The defence, that it hastens the close of war through sympathy with the increased suffering even of non-combatants, will not stand. The killing of the wounded or prisoners, who thereby have ceased to be combatants, and have rendered submission, is not only no necessity, but beyond the limits of right because of submission, while common charity requires that they be properly cared for.

A doubt might arise about the obligation to spare wounded and prisoners, the guardianship or care of whom would prevent immediate further prosecution of the war at perhaps its most auspicious moment, or their dismissal but replenish the forces of the enemy. The care of the wounded might be waived, as its obligation is not of justice but of charity, which yields to a superior claim of one's own benefit: but the killing of prisoners presents a different problem. All practical doubt in the matter has been removed among civilized nations by the agreements of international law. The canons of the natural law of necessity and proportion this side the limit of intrinsic moral wrong are so hard of application by the contending forces that the history of wars is full of excesses; hence international law has steadily moved towards hard and fast lines that will lessen the waste of human life and the miseries of warfare. Thus the use of ammunition causing excessive destruction of human life or excessive suffering, incurable wounds, or human defacement beyond the requirements for putting the combatants out of the conflict and so winning a battle are excluded by international agreement based upon the obvious limitation of the natural law. Poisoning, as imperilling the innocent beyond measure, and assassination, as associated with treachery and the personal assumption of the right of life and death (to say nothing of its want of a fair opportunity of defence and the cowardice commonly implied therein), have met with common condemnation, thus closing the loophole of obscurity in the natural law. The natural law is clear enough, however, in condemning as intrinsically immoral lying and the direct deception of another, as well as bad faith and treachery. The phrase, "All is fair in love and war", cannot be taken seriously; it is a loose by-word taken from the reckless practices of men, and runs counter to right reason, natural law, and justice.

No end justifies an immoral means, and lying, perjury, bad faith, treachery, as well as the direct slaughter of the innocent, wanton destruction, and the lawless pillage and outrage of cruder times, are, as far as the worst of them go, a thing of the past among civilized nations. That states are not always nice in conscience about lying, deceit, and bad faith in war as in diplomacy is occasionally a fact today; and the defence of lying and deceit in the stratagems of war, where good faith or common convention is not violated, is a sequence of the erroneous doctrine of Grote that lying is not intrinsically immoral, but only wrong in as far as those with whom we deal have a right to demand the truth of us; but as such teaching is almost unanimously repudiated in Catholic philosophy, the practice has today in Catholic thought no ethical advocate. The hanging of spies, though commonly said to be merely a measure of menace against a peculiar peril of war, would seem to have behind it a remote suggestion of punishment of a form of deceit which is intrinsically wrong.

In the terms of readjustment after victory, the victorious state, if its cause was just, may exact full reparation of the original injustice suffered, full compensation for all its own losses by reason of the war, proportionate penalty to secure the future not only against the conquered state, but, through fear of such penalty, even against other possibly hostile states. In the execution of such judgment the killing of surviving contestants or their enslavement, though, absolutely speaking, these might fall within the measure of just punishment, would today seem to be an extreme penalty, and the practice of civilization has abolished it.

Here we are confronted with the appalling destruction of the vanquished in the Old-Testament wars, where frequently all the adult males were slain after defeat and surrender, and sometimes even the women and children, unto utter extermination. But we cannot argue natural right from these instances, for, where justly done, this wholesale slaughter was the direct command of God, the Sovereign Arbiter of life and death, as well as the Just Judge of all reward and punishment. God by revelation made the Israelites but executioners of His supernatural sentence: the penalty was within God's right to assign, and within the Israelites' communicated right to enforce. The appropriation of a part of the territory of the vanquished may quite readily be a necessity of payment for reparation of injury and loss, and even the entire subjection of the conquered state, as a part of, or tributary to, its conqueror, may possibly fall within the proportionate requirements for full reparation or for future security, and, if so, such subjection is within the competency of the last adjudication. The history of nations, however, would indicate that this exaction was enforced far oftener than it was justified by proportionate necessity.

VI. THE TERM OF THE RIGHT OF WAR

The term of the right of war is the nation against which war can justly be waged. It must be juridically in the wrong, i.e. it must have violated a perfect right of another state, or at least be involved in an attempt at such violation. Such a perfect right is one based upon strict justice between states, and so grounding an obligation in justice in the state against which war is to be waged. Here there is call for a distinction between the obligation of an ethical and a juridical duty. A juridical duty supposes a right in another which is violated by the state's neglect to fulfil that duty; not so a merely ethical duty, for this is one proceeding from some other foundation than justice, and so implies no right in another which is violated by the non-fulfillment of the duty. The foundation of the right of war is a right violated or threatened, not a mere ethical duty neglected. No State, any more than an individual, may use violence to enforce its neighbour's performance of the latter. Hence a foreign state may have a duty to develop its resources not for its own immediate or particular need alone, but out of universal comity to help the prosperity of other states, for one community is bound to another by charity as are individuals; but there is in another state no right to that development founded in justice. To assume that one state has the right to make war upon another to force it to develop its own resources is to assume that each state holds its possessions in trust for the human race at large, with a strict right to share in its usufruct inhering in each other state in particular -- an assumption that yet awaits proof. So, too, the need of one state of more territory for its overplus of population gives it no right to seize the superabundant and undeveloped territory of another. In the case of extreme necessity, parallel to that of a starving man, where there is not other remedy except forced sale or seizure of the territory in question, there would be something upon which to base an argument, and the case may be conceived, but seems far from arising. Similarly, a government's neglect of a juridical duty towards its own people of itself gives no natural right to a foreign state to interfere, save only in the emergency, extreme and rare enough, where the people would have the right of force against its government and by asking aid from abroad would communicate in part the exercise of this coercive right to the succouring power. Lastly, in the case of a state's wholesale persecution of the innocent with death or unjust enslavement, a foreign power taking up their cause may fairly be said reasonably to assume the call of these and to make use of their right of resistance.

In conclusion, a war, to be just, must be waged by a sovereign power for the security of a perfect right of its own (or of another justly invoking its protection) against foreign violation in a case where there is no other means available to secure or repair the right; and must be conducted with a moderation which, in the continuance and settlement of the struggle, commits no act intrinsically immoral, nor exceeds in damage done, or

in payment and in penalty exacted, the measure of necessity and of proportion to the value of the right involved, the cost of the war, and the guarantee of future security.

CHARLES MACKSEY

Hugh Ward

Hugh Ward

(Irish, AEDH BUIDH MAC-AN-BHAIRD).

Hagiographer, born in Donegal, about 1590; died 8 November, 1635. His father, Geoffrey, was Toparch of Lettermacward, and head of the Tirconnell branch of the ancient family of Mac-an-bhaird. From remote time this family cultivated literature and filled the office of *Ollav* or chief historian to the O'Donnells. In 1607 he left Ireland for Spain, and entered the University of Salamanca. Here he made the acquaintance of Luke Wadding, under whose guidance he joined the Franciscans in 1616. After taking his degrees and receiving ordination, he was sent by the general of the order to lecture on philosophy at Paris, and soon after was appointed professor of Divinity at St. Anthony's College, Louvain. On 21 April, 1626, he was elected rector of the college. Wadding states that Ward possessed great intellectual powers and a profound knowledge of the Irish language and antiquities; and John Ponce praises highly his lectures on Scholastic philosophy and theology, affirming that in these sciences he was second to none of the great writers of his time. But Ward's chief interest was centred in the history and literature of Ireland. The plan of publishing the lives of the Irish saints and other ancient records of Ireland was his; he was pioneer and founder of the school for Irish archaeology that arose in the seventeenth century, with its centre in the College of St. Anthony. At Salamanca he discussed his project with Luke Wadding, who promised him all help from the libraries of Spain, and in Paris he met Father Patrick Fleming, a distinguished Irish scholar, whom he urged to visit the libraries of France and Italy in search of Irish documents. At the time Ward reached Louvain, St. Anthony's numbered among its inmates several accomplished Irish scholars: MacCaghwell, Hickey, Colgan, O'Docharty, and shortly afterwards Br. Michael O'Clery.

Ward laid before his associates his plan for a comprehensive history of Ireland -- civil and ecclesiastical -- a "Thesaurus Antiquitatum Hibernicarum", and how the work

was to be carried out. The first step was to procure original ancient Irish manuscripts or to have transcripts made of them. Father Patrick Fleming had already begun work in the libraries on the Continent, and it was decided to send Br. Michael O'Clery (Belonging to a family of hereditary scholars) to Ireland to collect Irish manuscripts. In the meantime Ward was employed in arranging and examining the documents which had been transmitted to St. Anthony's. He investigated the sources of the ancient martyrologies and chronicles. He was in constant correspondence with the early Bollandists Henschenius, Rosweydis, Papebroch, etc. on matters regarding the history and the saints of Ireland. John Bap. Sollerius styles him "Vir doctissimus ac hagiographus eximius", and says that Ward's arguments in proof of the Irish birthplace of St. Rumold are unanswerable. At the time of his death Ward had ready for publication several treatises which he intended as "Prolegomena" to his great work. The late Protestant Bishop of Down and Connor, Dr. Reeves, writing on Ward and his fellow-labourers, pays an eloquent tribute to the Irish Franciscans for their services to Irish archaeology. Ward was buried in the college church. The following are the works he left ready for publication: "De nomenclatura hiberniae"; "De statu et processu veteris in Hibernia reipublicae"; "Martyrologium ex multis vetustis Latino-Hibernicum"; "Anagraphen magnalium S. Patricii"; "Investigatio Ursulanae expeditionis"; "S. Rumoldi Acta". These works were accompanied by critical dissertations and notes on historical and topographical questions. The "Acta S. Rumoldi" was published at Louvain in 1662, by one of Ward's disciples, Thomas O'Sherin. Ward wrote Latin hymns and epigrams with elegance; also many poems in Irish of great beauty and feeling. Some of the former were printed in the "Acta S. Rumoldi".

WADDING, Scriptores Ord. Min. (Rome, 1650); JOANNES A S. ANTONIA, Bibliotheca Univ. Franciscana (Madrid, 1732); COLGAN, Acta SS. Hiberniae (Louvain, 1645); preface; Sir James Ware's Works, ed. HARRIS (Dublin, 1878); O'CURRY, Lectures on MS. Materials of Ancient Irish History (Dublin, 1861); Annals of the Four Masters, ed. O'DONOVAN, I (Dublin, 1857), preface; O'HANLON, Lives of the Irish Saints, I (Dublin, 1875), introduction; DE BUCK, L'archeologie irlandaise au couvent de S. Antoine de Padoue a Louvain (Paris, 1869). MSS. in Burgundian Library, Brussels; St. Isidore's, Rome; Franciscan Convent, Dublin.

GREGORY CLEARY

Commander James Harman Ward

Commander James Harman Ward, U.S.N.

Born in Hartford, Connecticut, 1806; killed in attack on Matthias Point, Virginia, 27 June, 1861. He was the first Union naval officer to fall in the Civil War. One of the

founders of the United States Naval Academy under its present system, his books on naval science had an important effect on the modern development of the service. He was a convert to the Catholic Faith, and his funeral from St. Patrick's church, Hartford, was made the occasion of a memorable war-time demonstration. Educated at the Vermont Military Academy, and at Trinity College, Hartford, he was appointed a midshipman in the navy 4 March, 1823, and promoted lieutenant 3 March, 1831. In this rank he served several years on the coast of Africa and there compiled is "Manual of Naval Tactics" (1858). He gave a course of lectures on gunnery in Philadelphia in 1842, and urged the establishment of the naval school, in which, when it was opened, he was an instructor (1845-47). His series of lectures, "Elementary Instruction on Naval Ordnance and Gunnery", attracted much attention, as did also his book "Steam for the Milion". In 1853 he was promoted commander, and in 1857 appointed to the charge of the receiving ship "North Carolina" at the Brooklyn Navy Yard. When the Civil War broke out he was called to Washington to counsel the navy department, and organized the Potomac flotilla, of which he was given command, 16 May, 1861. In directing its operations against the batteries the Confederates had erected along the river banks he was killed at Matthias Point.

THOMAS F. MEEHAN

St. Margaret Ward

St. Margaret Ward

Martyr, born at Congleton, Cheshire; executed at Tyburn, London, 30 Aug., 1588. Nothing is known of her early life except that she was of good family and for a time dwelt in the house of a lady of distinction named Whitall then residing in London. Knowing that William Watson, the priest who wrote the work known as the "Quodlibets", was imprisoned, she obtained permission to visit him. After several visits she disarmed the vigilance of the gaoler and furnished him with a cord whereby he could make his escape. At the appointed time the boatman whom she had engaged to convey the priest down the river refused to carry out his bargain, and in her distress she confided her difficulty to a young man, Ven. John Roche (or Neele), who undertook to assist her. He provided a boat and exchanged clothes with Watson, who made good his escape. But the clothes betrayed John Roche, and the rope convinced the gaoler that Margaret Ward had been instrumental in the flight of the prisoner. They were both arrested and loaded with irons. Ven. Robert Southwell wrote to Father Acquaviva, S.J.:

She was flogged and hung up by the wrists, the tips of her toes only touching the ground, for so long a time that she was crippled and paralyzed, but these sufferings greatly strengthened the glorious martyr for her last struggle.

She was tried and condemned at Newgate, her liberty being offered her if she would attend Protestant worship.

[Note: Margaret Ward was canonized on October 25, 1970 as one of the Forty Martyrs of England.]

EDWIN BURTON

Mary Ward

Mary Ward

Foundress, born 23 January, 1585; died 23 January, 1645; eldest daughter of Marmaduke Ward and Ursula Wright, and connected by blood with most of the great Catholic families of Yorkshire. She entered a convent of Poor Clares at St.-Omer as lay sister in 1606. The following year she founded a house for Englishwomen at Gravelines, but not finding herself called to the contemplative life, she resolved to devote herself to active work. At the age of twenty-four she found herself surrounded by a band of devoted companions determined to labour under her guidance. In 1609 they established themselves as a religious community at St.-Omer, and opened schools for rich and poor. The venture was a success, but it was a novelty, and it called forth censure and opposition as well as praise. Her idea was to enable women to do for the Church in their proper field, what men had done for it in the Society of Jesus. The idea has been realized over and over again in modern times, but in the seventeenth century it met with little encouragement. Uncloistered nuns were an innovation repugnant to long-standing principles and traditions then prevalent. The work of religious women was then confined to prayer, and such good offices for their neighbour as could be carried on within the walls of a convent. There were other startling differences between the new institute and existing congregations of women, such as freedom from enclosure, from the obligation of choir, from wearing a religious habit, and from the jurisdiction of the diocesan. Moreover her scheme was put forward at a time when there was much division amongst English Catholics, and the fact that it borrowed so much from the Society of Jesus (itself an object of suspicion and hostility in many quarters) increased

the mistrust it inspired. Measures recognized as wise and safe in these days were untried in hers, and her opponents called for some pronouncement of authority as to the status and merits of her work. As early as 1615, Suarez and Lessius had been asked for their opinion on the new institute. Both praised its way of life. Lessius held that episcopal approbation sufficed to render it a religious body; Suarez maintained that its aim, organization, and methods being without precedent in the case of women, required the sanction of the Holy See.

St. Pius V had declared solemn vows and strict papal enclosure to be essential to all communities of religious women. To this law the difficulties of Mary Ward were mainly due, when on the propagation of her institute in Flanders, Bavaria, Austria, and Italy, she applied to the Holy See for formal approbation. The Archduchess Isabella, the Elector Maximilian I, and the Emperor Ferdinand II had welcomed the congregation to their dominions, and together with such men as Cardinal Federigo Borromeo, Fra Domenico de Gesù, and Father Mutio Vitelleschi, General of the Society of Jesus, held the foundress in singular veneration. Paul V, Gregory XV, and Urban VIII had shown her great kindness and spoken in praise of her work, and in 1629 she was allowed to plead her own cause in person before the congregation of cardinals appointed by Urban to examine it. The "Jesuitesses", as her congregation was designated by her opponents, were suppressed in 1630.

Her work however was not destroyed. It revived gradually and developed, following the general lines of the first scheme. The second institute was at length approved as to its rule by Clement XI in 1703, and as an institute by Pius IX in 1877.

At the express desire of Pope Urban Mary went to Rome, and there as she gathered around her the younger members of her religious family, under the supervision and protection of the Holy See, the new institute took shape. In 1639, with letters of introduction from Pope Urban to Queen Henrietta Maria, Mary returned to England and established herself in London. In 1642 she journeyed northward with her household and took up her abode at Heworth, near York, where she died. The stone over her grave in the village churchyard of Osbaldwick is preserved to this day.

For the history of the institute subsequent to the death of Mary Ward, see INSTITUTE OF MARY.

CHAMBERS, *Life of Mary Ward* (London, 1885); SALOME, *Mother M. Mary Ward, A Foundress of the Seventeenth Century* (London, 1901); MORRIS, *The Life of Mary Ward in The Month*, LV. The oldest sources for the history of Mary Ward are the MS. lives by WIGMORE (English), PAGETI (Italian, 1662. Nymphenburg Archives). BISSEL (Latin, 1667 or 1668, of which there is a copy in the Westminster Diocesan Archives), LOHNER (German, 1689, Nymphenburg Archives). The most important of printed Lives are: KHAMM (1717); FRIDL (c. 1727), and BUCHINGER.

M. LOYOLA
Thomas Ward

Thomas Ward

Born at Danby Castle near Guisborough, Yorkshire, 13 April, 1652; d. at St-Germain, France, 1708. He was the son of a farmer and was educated as a Presbyterian at Pickering School. Henry Wharton asserted that he had been a Cambridge scholar but this is not certain. Having acted for a time as private tutor he was led by his theological studies to become a Catholic. He travelled in France and Italy, and for five or six years held a commission in the papal guard, seeing service against the Turks. On the accession of James II (1688) he returned to England and employed his learning in controversy. His most popular work, "England's Reformation", is a poem in four cantos in the metre of "Hundibras". It first appeared posthumously in 1710, and since then in several editions. His "Errata to the Protestant Bible", based on Gregory Martin's work on the same subject, has been frequently republished since its appearance in 1688, once with a preface by Lingard (1810). Bishop Milner wrote a pamphlet to defend it from one of the Protestant attacks which its republication early in the nineteenth century provoked. His other works were: "Speculum Ecclesiasticum" (London, 1686?); "Some Queries to the Protestants" (London, 1687); "Monomachia" (London, 1678), written about Archbishop Tenison, as also was "The Roman Catholic Soldier's Letter" (London, 1688). He also published in 1688 in two broadsheets an epitome of church history, under the title "The Tree of Life". "The Controversy of Ordination truly stated" (London, 1719) and "Controversy with Mr. Ritschel" (1819) were posthumous works. He left two unpublished MSS. on the Divine Office now in the British Museum, one on the pope's supremacy in the possession of Mr. Gillow, one of the history of England, and others.

Life of Thomas Ward, prefixed to the Controversy with Mr. Ritschel (Manchester, 1819); DODD, Church History, III (Brussels and Wolverhampton, 1742); Catholicon, IV, 195; COTTON, Rhemes and Douay (Oxford, 1855); COOPER, in Dict. Nat. Biog., s. v.; GILLOW, Bibl. Dict. Eng. Cath., s.v.

EDWIN BURTON
Ven. William Ward

Ven. William Ward

(Real name WEBSTER).

Born at Thornby in Westmoreland, about 1560; martyred at Tyburn, 26 July, 1641. He was over forty when he went to Douay to study for the priesthood but no details have been preserved of his earlier life. He arrived there on 18 September, 1604; received the minor orders on 16 December, 1605; the subdiaconate on 26 October, 1607; the diaconate on 31 May, 1608; and the priesthood on the following day. On 14 October he started for England, but was driven on to the shores of Scotland, arrested, and imprisoned for three years. On obtaining his liberty he came to England where he laboured for thirty years, twenty of which he spent in various prisons as a confessor for the Faith. He was zealous and fiery temperament, severe with himself and others, and especially devoted to hearing confessions. Though he had the reputation of being a very exacting director his earnestness drew to him many penitents. So mortified was his personal life and so secret his numerous charities that he was even accused of avarice. He was in London when Parliament issued the proclamation of 7 April, 1641, banishing all priests under pain of death, but refused to retire, and on 15 July was arrested in the house of his nephew. Six days later he was brought to trial at the Old Bailey and was condemned on 23 July. He suffered on the feast of St. Anne, to whom he ever had a great devotion. An oil portrait, painted shortly after the martyrdom from memory or possibly from an earlier sketch, is preserved at St. Edmund's College, Old Hall.

Third Douay Diary in Cath. Rec. Soc., X (London, 1911); CHALLONER, Memoirs of Missionary Priests (London, 1741-2), using contemporary account written by one of Ward's penitents.

EDWIN BURTON

William George Ward

William George Ward

An English writer and convert, eldest son of William Ward, Esq., born in London, 21 March, 1812; died 6 July, 1882. He was educated at Winchester College and at Christ Church, Oxford, matriculated at the university in 1830. Though he confessed to a lack of appreciation of the finer branches of letters and poetry, he took a second class in them as well as in mathematics in 1834. He was a musician of no small attainments, a distinguished mathematician, and a profound philosopher. Indeed, though there is no lack of a straightforward and rugged elegance in his writings, especially in those of later date, his metaphysical bias may be always recognized. In 1833 he was elected to a scholarship at Lincoln College and, in the following year, was admitted to the degree of B.A. and became a fellow of Balliol College, subsequently taking orders. As mathematical tutor at the latter college he found himself in a position in which his strong intellectual influence soon became a power in the university. His keen perception and

logical faculty, trained to no small extent by debates in the Oxford Union, gave weight to his opinions, while his growing power in the metaphysical sciences was fitting him for the unique part which he had to play later. The Tractarian Movement began in 1833. At this time Ward was a follower of Dr. Arnold, a latitudinarian in his principles, and thoroughly out of touch with the views of the newer school. But, in 1838, he definitively changed his position, and, from standing aloof with suspicion and almost with contempt, he became a fervent supporter of the movement.

He joined the party then led by Dr. (afterwards Cardinal) Newman; and, when the famous Tract XC appeared in 1844, he joined issue with the army of critics who attacked it, by writing two pamphlets in defense of the principles it advocated. What he did he did thoroughly; and, having taken his place among the Tractarians, he lost no occasion of employing his skill as a dialectician. Not only among men of his own standing, but even in his mathematical classes, which not seldom ended in religious discussions, was the force of his trenchant logic felt. So much so that the authorities took fright, and after the appearance of the famous tract he was deprived of his tutorship. Thenceforward, his attitude was one in which ultimate submission to Rome seemed to be inevitable. When Newman retired to Littlemore, Ward became the most prominent figure among the Tractarians. In his contributions to the British Critic (1841-3) he advocated a policy of gradual assimilation of Catholic doctrine by which the way should be paved for corporate reunion. In 1844 he published his work entitled "The Ideal of a Christian Church considered in comparison with existing practice", in which he further elaborated his views. From this work he acquired the sobriquet of "Ideal" Ward. Shortly after the appearance of this book, on 13 Feb., 1845, he was deprived of his university degrees; and seeing the hopelessness and illogical nature of his position and the impossibility of realizing his ideal in the Establishment, he made submission to the Catholic Church in September, 1845, the month before that in which Newman was received. Ward retired to Old Hall, near Ware (1846); and after holding the chair of moral philosophy there for a year was professor of dogmatic theology n St. Edmund's College between the years 1852-8. In the latter year he published "On Nature and Grace -- a Theological Treatise", containing the substance of his theological lectures.

As a contributor to, and later on as editor of, the "Dublin Review", of which he was offered the editorial chair by Cardinal Wiseman in 1863, he was a strenuous defender of papal authority, against Dollinger principally (1860-70), and a subtle critic of the tents of the "Experience School" as exemplified in the teaching of John Stuart Mill and Alexander Bain. After the death of Cardinal Wiseman, Dr. Ward, keenly alive to the circumstances and needs of the restored hierarchy, strongly advocated the appointment of Dr. Manning. He was a prominent member and, indeed, a co-founder

with Mr. James Knowles, of the Metaphysical Society (1869); of which, in the following year, he became the president. This society embraced representatives of almost every possible shade of thought and intellectual bias. The names of such members as Huxley, Tyndall, Martineau, Leslie Stephen, Frederic Harrison, Ruskin, John Morley, and Cardinal Manning are a sufficient indication of its heterogeneous nature. In 1878, his health compelled him to resign the important post which he held as editor of the historic "Dublin Review," using his great gifts in defense of the Church and the philosophical bases of the Faith. His contributions to the philosophy of Theism are valuable and solid. In his attitude he may be described as a thorough representative of the demonstrative school: but he lays the greatest stress upon the distinction between explicit and implicit reason. He follows Newman, and especially Kleutgen, in tracing the genesis of certitude: but he is clear in his teaching that all implicit reasoning is capable of being formally and explicitly expressed, that the whole of theistic teaching can be so presented as to claim the assent of all reasoning men.

WARD, William George Ward and the Oxford Movement (London, 1889); IDEM, William George Ward and the Catholic Revival (London, 1893); CHURCH, The Oxford Movement (London, 1891); HARRY, in Dublin Review (July, 1912).

FRANCIS AVELING

Mary Francis Xavier Warde

Mary Francis Xavier Warde

Born at Belbrook House, Mountrath, Queen's County, Ireland, 1810; died at Manchester, N.H., 17 September, 1884. Left motherless in infancy, she was confined to the care of a maternal grant-aunt who undertook the formation of her religious character according to the method of Fenelon. Naturally of a gay disposition, she was carried away by the frivolities of fashionable life until her scruples led her to confide in her director. She followed his advice in offering her services to the foundress of the Congregation of the Sisters of Mercy, whom she assisted in instructing the little inmates of the House for Homeless Children recently erected. Assuming the plain black habit of the institution in 1828, she conducted the affairs of the home while Mother McAuley and two foundress companions were making their novitiate in the Presentation Convent of George's Hill preparatory to the founding of the new congregation. After their return as professed Sisters of Mercy she and six companions assumed the garb of the congregation.

In 1837 Sister Mary Francis Xavier was appointed superior of the convent at Carlow, which had been built under her supervision and was the first house of the congregation outside of Dublin. In 1839 she founded the convent of Naas and in 1840

that of Weyford, to which soon after its establishment the public orphan asylum was affiliated. From Wexford foundations have been sent out as far as Australia. The convent of Sligo is perhaps the most noteworthy of her Irish foundations on account of its flourishing training-school for teachers. In 1843 Bishop O'Connor of Pittsburgh applied to Carlow for a foundation for his diocese, and Mother Warde with a band of six left for America. At Pittsburgh the sisters took charge of the cathedral Sunday school and the instruction of adults. Mother Warde's power of language and sympathy allied to ardent zeal won many to the Church. Parochial schools and academies, visitation of the sick poor in their houses and in the poor house, visitation of the penitentiary, and the opening of the first hospital in Pittsburgh followed each other in rapid succession. In 1846 a foundation was made in Chicago in compliance with Mother Warde's promise to Bishop Quarter. In 1848 she opened a second branch house in the Alleghenies on land given by the Reverend Demetrius Gallitzin within the limits of his Catholic settlement of Loretto. In 1850, though the "Knownothings" had recently burned the convent of the Ursulines near Boston, Mother Warde accepted the invitation of Bishop O'Reilly of Hartford to open a house in Providence. After the sisters' installation a mob surrounded the convent, threatening them with death if they would not immediately vacate the premises. Mother Warde exacted a promise from each of their Catholic defenders that no shot would be fired except in self defence, and the sisters held possession of the convent. One of the rioters had remarked to his companions:

We made our plans without reckoning the odds we shall have to contend with in the strong controlling force the presence of that nun commands. The only honourable course for us is to retreat from this ill-conceived fray. I, for one, shall not lift a hand to harm these ladies.

In 1852 Mother Warde opened houses in Hartford and New Haven to which free schools were attached; later on academies were opened and the works of mercy inaugurated. In 1854 Mrs. Goodloe Harper, daughter of Charles Carroll of Carrollton, donated to the congregation a house and some ground at Newport, R.I., for a convent and schools. Her daughter, Miss Emily Harper, was also a generous benefactor. In 1857 free and select schools were opened at Rochester, and later at Buffalo, by desire of Bishop Timon. On 16 July, 1858, Mother Warde and a band of missionaries left Providence for Manchester, by invitation of Bishop Bacon of Portland, and there established night schools for factory children. St. Mary's Academy was opened the same year. In 1861, at the request of Bishop Wood, Mother Warde opened a convent at Philadelphia, where free schools and the works of mercy were instituted. In 1864 a foundation was sent to Omaha; in 1865 a branch house and schools were opened at Bangor, Maine; in 1871 a colony of sisters was sent to Yreka, California, and North

Whitefield Mission, Maine, was undertaken by Mother Warde, who likewise sent foundations to Jersey City, Bordentown, and Princeton, N.J. In 1857 Bishop Bacon requested her to open an orphanage in Portland, but a disastrous fire delayed the work until 1872, when the Burlington foundation had been begun. The Kavanagh School was given to the sisters by Miss Winifred Kavanagh; an academy was also opened at Portland. On the feast of the Exaltation of the Holy Cross, 1878, Mother Warde sent the sisters to labour among the Indians of Maine at Old Town, Pleasant Point, and Dana's Point. The Government builds the schools houses and pays the sisters salaries for teaching the Indian children. Mother Warde's last works were the opening of an Old Ladies' Home and a Young Ladies' Academy at Deering, Maine. At the time of her golden jubilee in 1883 Mother Warde was the oldest Sister of Mercy living. Her salient characteristics were great purity of heart, earnestness of purpose, sincerity, and large-mindedness. She was exceedingly reserved, but sympathizing and compassionate towards others. Endowed with rare common-sense, she was an optimist in all things. In appearance she was of medium height, erect, and of commanding presence; her forehead was high, and her blue eyes deeply set.

Life of Mother M. Xavier Warde (Manchester); Annals of Sisters of Mercy, III-IV.

MARY STANISLAS AUSTIN

William Warham

William Warham

Archbishop of Canterbury, born at Church Oakley, Hampshire, about 1450; died at Hackington, near Canterbury, 22 August, 1532. He was educated at Winchester School and New College, Oxford, of which he became a fellow in 1475. Having taken his doctorate of laws he left Oxford in 1488, to become an advocate in the ecclesiastical courts in London, but two years later he returned to Oxford as principal of the school of civil law. His ability caused him to be employed o several foreign embassies, and his success obtained for him much ecclesiastical preferment. He became precentor of Wells (1493), rector of Barley (1495), archdeacon of Huntingdon (1497), and rector of Cottenham (1500). On 13 February, 1494, he had been appointed to the important legal office of Master of the Rolls. While absent on one of his frequent missions abroad he was elected Bishop of London (October, 1501), but was not consecrated till 25 September, 1502. In the interval he had resigned the office of Master of the Rolls, and had been appointed to the more important post of Keeper of the Great Seal. So great was his reputation for learning and ability that fresh honours followed rapidly. On 29 November, 1503, Pope Julius II nominated him as Archbishop of Canterbury, and on 21 January, 1504, the king made him Lord Chancellor of England. He received the

pallium at Lambeth on Candelmas Day and was enthroned at Canterbury on 9 March. He took a leading part in all important national business, and his powers as an orator were in much demand on great occasions of state. His university of Oxford chose him as Chancellor in 1506.

In 1509 he crowned Henry VIII and Katherine of Aragon, and under the new king he enjoyed the same confidence as under Henry VII till he was overshadowed by the growing influence of Wolsey. In 1512 he became involved in a controversy with his suffragans, who considered that he pushed the metropolitan prerogative too far, and the matter was finally settled by a compromise. When Wolsey was created cardinal in 1515 Warham conferred the hat upon him in Westminster Abbey, and thereafter he was forced into the second place. Before Christmas he resigned the office of Lord Chancellor, as he had long wished to do, being out of sympathy with the king's anti-French policy, and Wolsey received the Great Seal in his stead. Warham's power was still further diminished in 1517 when Wolsey was appointed papal legate, and from that time forward there were constant official differences between them, though their private relations continued friendly. Wolsey as legate continually interfered with the action of the archbishop as metropolitan of the southern province and not infrequently overruled his decisions. In state affairs, especially in the raising of subsidies, he supported Wolsey, though he incurred the contempt of the cardinal's enemies for doing so. When the divorce question was first raised in 1527 he was Wolsey's assessor in the secret inquiry into the validity of the king's marriage. About this time his health began to fail, and he was no longer equal to taking an effective part in the important affairs that ensued. Being selected as the chief of the counsel appointed to assist Queen Katherine he did nothing on her behalf, but when she appealed to him for advice, replied that he would not meddle in such matters. He steadfastly refused to oppose the king's wishes, and in the summer of 1530 signed the petition to the pope begging him to allow the divorce. This course he pursued under threats from the king that unless he was complaisant all ecclesiastical authority in England would be destroyed.

On Wolsey's fall the king wished the whole case to be submitted to Warham's decision, but the pope refused on the ground that his signature of the petition made him an unfit judge. When the whole clergy of England were subjected to a praemunire for having acknowledged Wolsey's legatine authority, the king seized the opportunity to force them to declare him head of the Church. Warham proposed an amendment recognizing him as "protector and supreme lord of the Church and so far as the law of Christ will allow supreme head". This was carried in default of opposition and the clergy were allowed to purchase their pardon for a large sum. At length Warham awoke to the gravity of the position, and on 24 February, 1532, he formally protested against all Acts of Parliament derogatory to the pope's authority or the prerogatives of Canter-

bury. The king incited the parliament to harass the archbishop with a petition for redress of grievances against his courts. With a flash of his old spirit and ability he returned an able answer, but this did not satisfy either king or parliament, and on 15 May the "submission of the clergy" was wrung from them. Three months later Warham died, leaving his books to be divided between Winchester, and All Souls and New Colleges at Oxford. He had nothing else to leave, owing to his extreme munificence in supporting public charities, in exercising hospitality and in assisting scholars, such as Erasmus. His own private life was simple and austere, so that he died "without money and without debts". His portrait by Holbein is at Lambeth, the original drawing for it being preserved in the king's collection at Windsor.

EDWIN BURTON

Archdiocese of Warsaw

Archdiocese of Warsaw

(VARSAVIENSIS).

Warsaw (Polish, *Warszawa*), on the western bank of the Vistula, is the capital of the Kingdom of Poland. The city, including the suburb of Praga on the east side of the Vistula, consists of the Old City (*Stare Miasto*), the New City (*Nowe Miasto*) and the westerly suburbs of Wola and Mokotów. It is the see of the Catholic archbishop and also of the Russian Orthodox Archbishop of Kholm and Warsaw. The Catholic archbishop is the primate of the Kingdom of Poland and is entitled to wear the red robes of a cardinal save the calotte and biretta, but he may not now call himself metropolitan, the Russian authorities allowing only "Archiepiscopus Ecclesiae Metropolitanae Varsoviensis". The city has fine handsome streets and is the chief industrial centre of western Russia and Poland. In the central part of the city is the royal palace, now the official residence of the Russian governor-general, and also the magnificent avenues of Krakowskie Przedmiescie, Nowy Świat, and Aleja Ujazdowska, which compare with those of any European cities, the new Orthodox Cathedral of St. Alexander Nevsky, and the fine park known as the Saxe Gardens, while to the north in the Old City is the

historic Catholic Cathedral of St. John and the frowning Alexander Citadel. The Jewish quarter lies to the north and west of the Saxe Gardens, commencing near the Zelazna Brama (Iron Gate), while to the south is the Lazienki Park with its chateau, formerly the royal summer palace. Two iron bridges span the Vistula to Praga, which is the actual railway terminus of Warsaw for trains from St. Petersburg, Moscow, or southern Russia. Many of the finest collections of books, manuscripts, and art treasures made by the kings of Poland and noble families in the university and palaces of Warsaw have been confiscated by the Russian Government and removed to St. Petersburg. The most ancient documents which mention the city of Warsaw date from the end of the twelfth century; but the city probably existed earlier, perhaps in the eleventh century. It developed greatly during the reign of Trojden, who in the fourteenth century surrounded it with walls. In 1431 it began to be embellished with houses and palaces, and became the residence of the Dukes of Masovia. In the sixteenth and seventeenth centuries it acquired great importance as the meeting-place of the Polish diets. In 1550 King Sigismund August chose it as a residence, and from the time of Sigismund III it was the capital. In 1815 it likewise became the capital of the Polish realm incorporated with Russia and began a rapid commercial development. Its population has increased from 75,000 at the beginning of the nineteenth century to 781,179 in 1910, of whom more than 265,000 are Hebrews and about 30,000 Russians and 25,000 Germans. The city nevertheless preserves its Catholic and Polish character, and is the most important centre of Polish literature. The Diocese, or Archdiocese, of Warsaw is of comparatively recent origin, though Christianity has flourished there from the foundation of the city, ancient documents attesting the existence of a church of St. George at Warsaw in 1195. Before the erection of its episcopal see, it formed part of the archdiaconate of Czersk which was a portion of the Diocese of Posen as early as the twelfth century. In 1406 Adalbert Sastrzenbiec, Bishop of Posen, authorized the institution of a collegiate church at Warsaw and transferred the archdeacon of Cerk there. In the sixteenth century the canons of Warsaw became a very important body, in which many nobles were included. In the seventeenth century the bishops of Posen began the title of the Diocese of Posen with that of Warsaw. The Archdiaconate of Warsaw lasted until 1798 as an appendage of the Diocese of Posen -- an extremely large one, including as it did the whole district of Czersk with part of those of Warsaw, Blonic, Rabsk, Sochaczew, etc., numbering 144 churches at the end of the eighteenth century, exclusive of those belonging to religious orders.

In 1793 Stanislaus Poniatowski, the last King of Poland, conceived the idea of setting up an episcopal see at Warsaw, but the political vicissitudes of the kingdom prevented the execution of this project. Frederick William II of Prussia, having obtained possession of Warsaw in 1797, nominated Joseph Boncza Miaskowski, the rector of

the cathedral of Posen, as its bishop. By a Bull dated at Florence, October, 1798, Pius VI sanctioned the canonical erection of the Diocese of Warsaw, separating it from the jurisdiction of Posen. The new diocese comprised within its limits the territory of the old archdiaconate -- the Deaneries of Garwolin, Liw, and Lasców. Its first bishop, Mgr. Miakowski, died in 1804, when its government was entrusted to Ignatus Raczynski, Archbishop of Gnesen, who, in 1808, appointed Gregory Zacharjaszewicz, titular Bishop of Corfu, his vicar-general. The city was divided into four parishes. At his death (1814) the diocese was administered by Francis Zambrzycki, titular Bishop of Dardania. As a result of the concordat between Pius VII and Alexander I, and the Bull "Militantis ecclesiae" of 11 March, 1817, the Diocese of Warsaw was made an archdiocese. On 2 October, 1818, Francis Skarbek Malczewski was preconized first archbishop, and by the Bull "Ex imposita nobis", 30 June, 1818, was appointed Apostolic Legate for the Kingdom of Poland. The diocese then comprised 19 deaneries, 278 parish churches, 432,929 souls, and a large number of convents. On the death of Malczewski, 18 April, 1819, Stephen de Holowczyce, a White Russian, was appointed archbishop, 17 December, 1819. On his death, 27 August, 1823, he was succeeded by Albert Leszczic Skarszewski (1824-27) and John Paul Pawenza Woronicz (1829-29). These first four archbishops bore the title of Primate of Poland. Stanislaus Kostka Lubicz Choromanski (1837-38) was the first to take the title of Metropolitan of Warsaw. Under the disturbed conditions of Poland between 1831 and 1837, the archdiocese was administered by two prelates, Edward Czarnecki and Adam Paszkowicz. On the death of Choromanski it had two other administrators, Thomas Chielewski, suffragan Bishop of Warsaw until 1844, and Anthony Melchior Fijalkowski, who was appointed archbishop 11 January, 1857, and died in exile 5 october, 1861. On 26 January he was succeeded by Sigismund Szczesny Felinski, who, in consequence of the Polish insurrection of 14 June, 1863, was summoned to St. Petersburg and exiled to Yaroslaw. There he remained for twenty years, exercising a fruitful apostolate and writing his memoirs which are of great interest for the religious history of Poland. He resigned on 13 March, 1883, and died on 17 September, 1895. On 15 March of the same year Vincent Theophilus Chosciak Popiel was appointed his successor.

The Archdiocese of Warsaw should have two suffragan bishops, one for Lowicz, the other for Warsaw; but these two suffragans are rarely elected. The Diocese of Warsaw at present comprises the metropolitan chapter of Warsaw, with eleven canons, and the collegiate chapter of Lowicz, with seven canons. The diocese is divided into fourteen deaneries: Warsaw, with 12 parishes and 25 churches or suburban parochial succursals; Brzeziny, 64,736 souls and 19 churches; Gostynin, 59,212 souls and 16 churches; Grodzisk, 91,958 souls and 18 churches; Grojec, 95472 souls and 30 churches; Kutno, 74,281 souls and 22 churches; Leczyca, 111438 souls and 32 churches; Lodz,

308,930 souls and 10 churches; Lowicz, 81,354 souls and 19 churches; Minsk, 88,472 souls and 20 churches; Radzymin, 69,279 souls and 13 churches; Rawa, 65,485 souls and 20 churches; Skierniewice, 43,687 souls and 13 churches; Sochaczew, 54,968 souls and 18 churches. There are 51 non-parochial churches. The secular clergy numbers 529 priests; the regular clergy is reduced to practically nothing, consisting only of a few religious who have survived since the closing of the convents in 1863, and some Capuchins of the convent of Nowe Miasto, thirteen in number, altogether 22 priests and 2 lay brothers. In 1906 five Redemptorists took up their residence at Warsaw, but were expelled in 1909. Two convents of religious women exist at Warsaw; that of the Visitation, with 14 Sisters; that of the Perpetual Adoration of the Blessed Sacrament, with 13 Sisters. At Szymanow there is a convent of Sisters of the Immaculate Conception, numbering 30 religious. On the other hand the Sisters of Charity, at Warsaw, Kutno, Lowicz, Leczyc, Rawa, Skierniewice, Grojec, etc., number 382; they have charge of the hospitals, orphanages, almshouses, lunatic asylums, and sanatoria. The metropolitan seminary has 10 professors and 122 students. In 1816 the University of Warsaw had a faculty of Catholic theology; in 1825 it was transformed into a seminary of higher studies; in 1835 the Tsar Nicholas I made it a Catholic ecclesiastical academy; but it was suppressed in 1867. The Diocese of Warsaw sends six or seven of its best students to the Catholic ecclesiastical seminary of St. Petersburg.

In the city of Warsaw the faithful number 414,620 souls; in the diocese, 1,412,652, making 1,827,272 souls for the whole archdiocese. The city contains more than forty churches and chapels, most of which formerly belonged to the religious orders. The cathedral, dedicated to St. John the Baptist, dates from the thirteenth century; it contains many chapels, works of art, and tombs of illustrious Polish magnates; the famous Jesuit, Father Peter Skarga, preached there. It is a church of much historical importance for the events which have taken place in it, and is a parish church, served by a college of vicars, with a parish of 20,000 souls. The Augustinian Church of St. Martin, founded in the fourteenth century, has been since 1625 the seat of a very flourishing Confraternity of the Girdle; the religious were expelled from it in 1864. Next in order of importance are, among others; the Church of the Visitation of the Most Holy Mary, founded early in the fifteenth century, restored in 1829-41, with a parish of 19,000 souls; the Church of S. Ann of the Bernardines, founded in the same century, where the mortal remains of Blessed Ladislaus of Gelniow are venerated; Holy Cross, built in the first half of the sixteenth century, and given in 1663 to the Missionaries of St. Vincent de Paul. The religious were expelled from it in 1864. It stands in the aristocratic quarter of the city, and has a parish of 17,000 souls. The Dominican Church of St. James was built in the seventeenth century by the famous church historian Abram Bzowski (Bzovius). The Church of the Holy Spirit, the origin of which is said to date from the fourteenth cen-

tury, was given to the Paulines in 1661, and in 1819 to the German Catholic Confraternity. St. Anthony, founded in the earlier half of the seventeenth century, was entrusted to the Reformed Franciscans; it has been the parish church of 18,000 souls since 1864. The Assumption, built in the first half of the seventeenth century by the Carmelites, together with their convent, became in 1865-67 the seat of the Catholic academy, and is now occupied by the archdiocesan seminary. St. Francis, consecrated in 1646, is now the church of the military chaplains. St. Mary, founded by the Jesuits and completed in 1626, was afterwards given to the Paulines and Piarists. The Transfiguration, formerly a Capuchin church, founded by John Sobieski to commemorate the deliverance of Vienna from the Turks, became in 1866 a parish church of 6000 souls. The Carmelite Church of the Nativity, built in the sixteenth century, is now the church of a parish with 42,000 souls. The Most Holy Trinity, Trinitarian, was begun in 1699; it now serves a parish of 38,000 souls. The church of St. Alexander, built by Tsar Alexander I in 1836, is magnificently adorned with sculpture and paintings, but is not in favour with patriotic Poles. All Saints, a modern church, consecrated in 1883, has a parish of 60,000 souls. Our Lady of Loreto, in the popular suburb of Praga, has 82,000 souls in its parish.

After Warsaw, the chief centre of population in the diocese is Lodz, which has two parish churches, the Assumption (92,000 souls) and the Exaltation of the Holy Cross (142,734 souls). Notwithstanding the unfavourable circumstances under which the Diocese of Warsaw exists, Catholicism there is in a flourishing condition, and piety is vigorous among its inhabitants. The secular clergy is insufficient in number to supply the spiritual needs of the flock, and unfortunately the assistance of regular clergy is wanting. Catholicism has to combat the corruption of morals fomented in a thousand ways by anti-Christian agencies; the anti-clerical propaganda of the Socialists and the Freethinkers, who have founded a periodical the "Mysl Niepodlegla" (Independent Thought), to defame religion and its ministers; the legal persecution of the Russian Government; lastly, the Mariavites, who are scattered throughout the Diocese of Warsaw. Lodz has now become the centre of Mariavitism; there, according to Mariavite statistics, the adherents of the sect numbered 40,000. Charitable works are highly developed at Warsaw, but it is regretted that the Catholic press is not as flourishing as it ought to be.

A. PALMIERI

Franz Wilhelm, Count von Wartenberg

Franz Wilhelm, Count von Wartenberg

Bishop of Osnabrück and cardinal, eldest son of Duke Ferdinand of Bavaria and his morganatic wife Maria Pettenbeckin, born at Munich, 1 March, 1593; died at Ratisbon, 1 December, 1661. He was educated by the Jesuits, at Ingolstadt (1601-8), and at the Germanicum in Rome (1608-14). In 1621 he became manager of the governmental affairs of the Elector Ferdinand of Cologne, who appointed him president of his council and brought him to the Diet of Ratisbon in 1622. On 26 Oct., 1625, he was elected Bishop of Osnabrück, receiving papal approbation 25 April, 1626. The Catholic Faith in Osnabrück was then in a deplorable condition. The three preceding bishops had been Protestants and had replaced most of the Catholic priests by Protestant preachers. Cardinal Eitel Friedrich, who succeeded them, endeavoured to restore the Catholic religion but soon died. With the help of Tilly Wartenberg took possession of his see (12 March, 1628), which had been occupied by Danish soldiers. He began the work of Counter-Reformation with great zeal; drove the Protestant preachers from the city and restored the churches to the Catholics. He eliminated the anti-Catholic element from the city council; took the system of education into his own hands; turned the former Augustinian convent over to the Jesuits whom he engaged as teachers at the Gymnasium Carolinum; restored various religious communities and established new ones; held synods and visitations, enforced the Tridentine decrees where possible and, in 1631, founded a university which, however, was destroyed by the Swedes in 1633.

Wartenberg was commissioned with the execution of the Edict of Restitution (1629) in Lower Saxony, and was elected later to the provostry of the collegiate church of Bonn. He was chosen Bishop of Verden (1630), Minden (1631), and appointed Vicar Apostolic of Bremen by Innocent X (1645). In 1633 Osnabrück capitulated to the Swedes and Wartenberg had to yield his see to Gustavus of Wasaburg, an illegitimate son of Gustavus Adolphus. During his forced exile, Wartenberg, who had not yet received any of the major orders, was ordained priest and consecrated bishop at Ratisbon

in 1636. In 1641 he went to Rome and upon his return was elected Coadjutor Bishop of Ratisbon *cum jure successionis*, succeeding on 9 April, 1650. In the negotiations of the Peace of Westphalia (1645-8) he represented the Catholic electors. Though preventing the intended secularization of his see by the Swedes, he had to yield to the stipulation that after his death the See of Osnabrück should be alternately administered by a Protestant and by a Catholic bishop. Wartenberg was to keep the See of Osnabrück, but the Sees of Verden, Minden, and Bremen fell into the hands of Protestants, Wartenberg, however, retaining spiritual jurisdiction over them. On 18 Dec., 1650, he took possession of the See of Osnabrück and laboured to restore the Catholic religion. On 5 April, 1661, he was created cardinal-priest by Alexander VII.

MICHAEL OTT

Washing of Feet and Hands

Washing of Feet and Hands

Owing to the general use of sandals in Eastern countries the washing of the feet was almost everywhere recognized from the earliest times as a duty of courtesy to be shown to guests (Gen., xviii, 4, xix, 2; Luke, vii, 44, etc.). The action of Christ after the Last Supper (John, xiii, 1-15) must also have invested it with a deep religious significance, and in fact down to the time of St. Bernard we find ecclesiastical writers, at least occasionally, applying to this ceremony the term *Sacramentum* in its wider sense, by which they no doubt meant that it possessed the virtue of what we now call a sacramental. Christ's command to wash one another's feet must have been understood from the beginning in a literal sense, for St. Paul (I Tim., v, 10) implies that a widow to be honoured and consecrated in the Church should be one "having testimony for her good works, if she have received to harbour, if she have washed the saints' feet". This tradition, we may believe, has never been interrupted, though the evidence in the early centuries is scattered and fitful. For example the Council of Elvira (A.D. 300) in canon xlvi directs that the feet of those about to be baptized are not to be washed by priests but presumably by clerics or at least lay persons. This practice of washing the feet at baptism was long maintained in Gaul, Milan, and Ireland, but it was not apparently known in Rome or in the East. In Africa the nexus between this ceremony and baptism became so close that there seemed danger of its being mistaken for an integral part of

the rite of baptism itself (Augustine, Ep. LV, "Ad Jan.", n. 33). Hence the washing of the feet was in many places assigned to another day than that on which the baptism took place. In the religious orders the ceremony found favour as a practice of charity and humility. The Rule of St. Benedict directs that it should be performed every Saturday for all the community by him who exercised the office of cook for the week; while it was also enjoined that the abbot and the brethren were to wash the feet of those who were received as guests. The act was a religious one and was to be accompanied by prayers and psalmody, "for in our guests Christ Himself is honoured and receive". The liturgical washing of feet (if we can trust the negative evidence of our early records) seems only to have established itself in East and West at a comparatively late date. In 694 the Seventeenth Synod of Toledo commanded all bishops and priests in a position of superiority under pain of excommunication to wash the feet of those subject to them. The matter is also discussed by Amalarius and other liturgists of the ninth century. Whether the custom of holding this "maundy" (from "Mandatum novum do vobis", the first words of the initial Antiphon) on Maundy Thursday, developed out of the baptismal practice originally attached to that day does not seem quite clear, but it soon became an universal custom in cathedral and collegiate churches. In the latter half of the twelfth century the pope washed the feet of twelve sub-deacons after his Mass and of thirteen poor men after his dinner. The "Caeremoniale episcoporum" directs that the bishop is to wash the feet either of thirteen poor men or of thirteen of his canons. The prelate and his assistants are vested and the Gospel "Ante diem festum paschae" is ceremonially sung with incense and lights at the beginning of the function. Most of the sovereigns of Europe used also formerly to perform the maundy. The custom is still retained at the Austrian and Spanish courts.

The liturgical washing of hands has already been treated in the article LAVABO. It may be noted that possibly in consequence of the words of St. Paul (I Tim., ii, 8): "I will therefore that men pray in every place, lifting up pure hands", the early Christians made it a rule to wash their hands even before private prayer, as many passages of the Fathers attest (e.g. Tertullian, "Apolog.", xxxix; "De Orat.", xiii). The multiplied washings in a pontifical Mass probably bear witness to the practice of an earlier age. Let us notice also that the "Caeremoniale episcoporum" enjoins the use of the *credenza* or tasting as a precaution against poison even for the water used in the washing of hands.

HERBERT THURSTON

Washington, D.C.

Washington, District of Columbia

Washington, the capital of the United States, is situated on the left bank of the Potomac River, 108 miles from its mouth in Chesapeake Bay: latitude (Capitol), N. 38° 53'; longitude, W. 77°. The original district (10 miles sq.) was reduced by the retrocession of Alexandria County to Virginia, in 1846, to the present approximate land area of 60 sq. miles. The population, according to census of 1910, was 331,069, and was classified as wholly urban: the county organization (Washington County, D.C.) was abolished in 1874, and the city of Washington is now coextensive with the District of Columbia. The larger part of the district is built up, and, because of its predominant urban character, whatever farm land exists possesses its chief value as a potential residence property.

The Continental Congress had held its sessions in different places, principally at Philadelphia, and there was no permanent seat of the general government until after the adoption of the Constitution of the United States. The following provision, enumerating the powers of Congress (Sec. 8, Art. I), was included in that instrument: "To exercise exclusive jurisdiction over such District (not exceeding ten miles square) as may, by cession of particular States and acceptance of Congress, become the seat of Government of the Untied States". Various places were proposed, and much warmth of feeling and sectional jealousy were elicited in the debates on the resolutions and bills introduced before Congress on the subject: the States of Maryland and Virginia, in 1788 and 1789, had offered the requisite area, and the "acceptance of Congress", under Acts of 16 July, 1790, and 31 March, 1791, constituted the District of Columbia the seat of the national government. The territory thus selected was determined as to its exact location and boundaries by George Washington: it included within its limits the flourishing boroughs of Georgetown, Montgomery County (Maryland), and Alexandria (Virginia); the rest of the territory was rural. The president was also authorized to appoint three commissioners to lay out and survey a portion of the District for a federal city, to acquire the land, and to provide buildings for the residence of the president, the accommodation of Congress and the use of the government departments. One of the commissioners thus appointed was Daniel Carroll "of Duddington", of the family of Bishop John Carroll, and one of the principal landed proprietors of the District; Mayor Charles Pierre L'Enfant, a French Catholic, was employed to furnish a plan of the city, and to him the credit of its magnificent design is mainly due; James Hoban, a Catholic, won by competition the prize offered for a plan of the president's house, and the "White House" is constructed in accordance with his design. The corner-

stone was laid (13 October, 1792) by President Washington, who also officiated at the laying of the corner-stone of the north wing of the Capitol (18 September, 1793): the site which the Capitol occupies was part of the land of Daniel Carroll, and was practically a gift from him to the United States.

The first local authorities of Washington were the president, three commissioners appointed by him, and the Levy Court; the city was incorporated in 1802, with a city council elected by the people, and a mayor appointed by the president. Robert Brent, a Catholic and nephew of Bishop Carroll, was the first mayor, and was annually re-appointed by Presidents Jefferson and Madison until 1812; in 1812 the duty of electing the mayor devolved on the council, and from 1820 to 1871 on the people. In 1817 the charters of the corporations of Washington and Georgetown were abolished by Act of Congress; for a brief time the District was assimilated to a territorial form of government, with a board of public works as the most important administrative factor. Since 1878 it has been governed by a board of three commissioners appointed by the president, with the approval of the senate. The District of Columbia is neither a state nor a territory, but a municipal corporation, holding the same relation to the government of the United States that the other municipal corporations do to their own state governments. It has no share in the election of president, nor any district representation in Congress: its inhabitants have no voice in national legislation, and, since 1874, not even any part in local self-government, except by favour of Congress.

Father Andrew White, S.J., "the Apostle of Maryland", was the first priest to visit this region: in 1639 he established a mission at Kittamaquund, a few miles below Washington, and, with solemn ceremony, baptized the *tayac*, or "Emperor of Piscataway". He also carried the Gospel still nearer to a Washington. The "Annual Letter" for 1641 mentions that the King of the Anacostans was a most promising candidate for baptism. The tribe from which the Anacostia River (eastern branch) is named, dwelt in the immediate neighbourhood, and on the site of the national capital: so that the history of Catholicism in the District is traced back to the earliest days of Lord Baltimore's Colony. As settlements advanced up the country from lower Maryland, a fair proportion of those who acquired land in what is now the District were Catholics. In 1669 "a parcell of land. . .called Rome. . .was layd out of Francis Pope. . .extending to the south of an inlet called Tiber"; this gentleman, "Pope of Rome on the Tiber", was sheriff of Charles County, and, in all probability, a Catholic. The well-known families of Carroll, Digges, Queen, and Young were the possessors of extensive landed estates before the American Revolution. There was no church in the region during the early decades of the eighteenth century, as the public exercise of Catholic worship was prohibited by the laws of Maryland: the faithful depended for spiritual aid on the Jesuit Fathers from White Marsh, Prince George's County, or St. Thomas' Manor, Charles

County. Stations were visited and Mass was celebrated in private houses, a room being set aside for the purpose, the neighbours being invited. An interesting collection of vestments, altar furnishings, chalices etc., relics of those stations and memorials of the old Jesuit missions, is preserved in the museum of Georgetown College. The independence of the United States ensured religious liberty, and new era for the Catholic Faith began in Maryland. Father John Carroll, having returned to America in 1774, resided at Rock Creek, from which he made missionary excursions to all the neighbouring region, including what is now the District. In 1784, he has appointed superior of the American Church, and his consecrations at Lulworth Castle, England, in 1790, to the Sea of Baltimore coincided with the selection of Washington as the seat of government. The District of Columbia has always been included in the Diocese of Baltimore. In 1789 Bishop Carroll had already taken steps for the establishment of Georgetown College, where, on 4 May, 1912, a bronze statue to his memory as founder was erected by the Alumni Association, with imposing ceremonies and addresses by the chief justice of the Supreme Court, the rector of the university, the attorney--general representing the president, Cardinal Gibbons, the Ambassador of Austria-Hungary, dean of the Diplomatic Corps, and the speaker of the House of Representatives.

The oldest Catholic Church in the District is Holy Trinity, Georgetown: the original edifice, erected by Father Francis Neale, S.J., is still standing, but is now used as a parochial school. The register of baptisms and marriages, beginning with 1795, has entries of people "living in the Federal City", even after the name of Washington had been officially adopted. The present Trinity Church dates from 1844. St. Patrick's is the parent church of Washington city proper, the land for it having been acquired in 1794 by Father Anthony Caffry; the first church was a one-and-a-half-story frame house. St. Mary's, or Barry's Chapel as it was generally called, was built by a merchant of that name, in 1806, for the accommodation of the workmen at Greanleaf's Point, near the Navy Yard; this chapel disappeared long ago, but its corner-stone was saved, and is now inserted in the outer wall of the Holy Name Chapel, the Church of St. Dominic. Queen's Chapel, in the north-east section, existed in 1816, and perhaps earlier, but was destroyed during the Civil War. In 1805 Father William Matthews became the second pastor of St. Patrick's, and continued in that position for nearly half a century; he was the first native-born American to be raised to the priesthood in the United States. Among his assistants was Father Charles Constantine Pise, chaplain of the United States Senate, 1832-1833, and among his parishioners were: Roger Brooke Taney, Chief Justice of the Supreme Court; Mayor L'Enfant, who drew the plan of the city; James Hoban, the architect of the White House; Robert Brent, the first mayor of Washington; Dr. Ironside, a distinguished convert; and Mayor Thomas Carbery, a brother of Mrs. Ann Mattingly, whose wonderful cure in 1824 was held to be miracu-

lous, Father Matthews being one of the witnesses in the case. The original Catholic inhabitants were mainly Maryland planters, of English descent, and their coloured servants; accessions came from other sources, Irish, German, French, when artisans were required for the construction of public buildings, but the absence of large commercial and industrial activities was a drawback to rapid increase in the general population, and foreign immigration, which has contributed so notably to swell the Catholic statistics of northern and western cities, has had but little effect on Washington.

St. Peter's and St. Matthew's were the first divisions of St. Patrick's, the original parish, which embraced the whole federal district, Georgetown excepted. There are now (1912) twenty-four churches, two of which (St. Augustine's and St. Cyprian's) are for the exclusive use of coloured people. All the congregations are English-speaking, except St. Mary's, which is German. St. Aloysius' and Holy Trinity are in charge of the Jesuit Fathers, and St. Dominic's in charge of the Fathers of St. Dominic. The Apostolic Delegation for the United States was established in 1893, and the successive delegates, Cardinals Satolli, Martinelli, and Falconio, and Archbishop Bonzano, have resided in Washington. The religious freedom guaranteed by the Constitution has been always fully enjoyed; the many representatives of Catholic countries in the Diplomatic Corps and the Catholics prominent in Congress and in the departments are factors for social influence and a restraint upon illiberal legislation. All churches, institutions of public charity, school houses, and cemeteries are exempt from taxation upon all their property not used for business purposes or to secure an income. Subventions, or appropriations to a limited amount, are granted to some of the Catholic charitable institutions. Catholic funeral services have been held in the Capitol occasionally for foreign ministers and members of either house, and Catholic chaplains have officiated in the halls of Congress: a Catholic priest, Father Gabriel Richard, of Detroit, was a delegate from Michigan territory to the House of Representatives. The local sentiment towards the Church has been, in general, one of good-will. When, during the Knownothing craze, a band of bigots secretly took away the memorial slab contributed by Pius IX to the Washington Monument, which was then being built, the better sentiment of the community condemned that act of vandalism: within the shadow of that same completed monument a solemn field Mass was celebrated in 1911, thousands attending it, and amongst them the chief magistrate of the republic. The grandest civic celebration which the capital has witnessed was that of the Columbus Memorial, 8 June, 1912, when, under the auspices of the Catholic Knights of Columbus, a superb monument was dedicated in honour of the Catholic discoverer of America.

George Washington cherished the hope that the capital would become the home of a great national seat of learning. Although that hope has not yet been realized, in the sense of a university endowed by the Government and under governmental control

and patronage, yet Washington is well supplied with institutions for higher education, offers extraordinary advantages for scientific and literary labour and research, and possesses an unparalleled educational equipment in the great scientific collections and libraries of the Government. By authority of Congress, all such facilities for research and information are made accessible to students of institutions of higher learning in the District. This provision applies to the Library of Congress, the National Museum, the Patent Office, the Bureau of Education, the Bureau of Ethnology, the Army Medical Museum, the Department of Agriculture, the Fish Commission, the Botanical Gardens, the Coast and Geodetic Survey, the Geological Survey, the Naval Observatory, several hospitals and other departments supplies with special libraries, laboratories, and equipment for research. The Library of Congress contains 1,100,000 volumes; Surgeon-General's Office, 140,639; National Museum, 16,000; Museum of Hygiene, 10,5000; Bureau of Ethnology, 5000; Bureau of Education, 30,000; Department of Agriculture, 25,000. The Law Library of the United States Capitol contains over 100,000 volumes, and is free to students seven hours daily. Washington presents advantages for the study of American jurisprudence which are unequaled elsewhere, and must always remain so. Congress, the Court of Claims, the Supreme Court of the United States, and the Court of Appeals of the District of Columbia are in session during several months of each scholastic year, and, with the executive departments, the Patent, Pension, and General Land Offices, furnish advantages for professional study nowhere else enjoyed. There are six law and three medical schools in the city.

Georgetown University (q.v.), founded in 1789, and the Catholic University of America (q.v.), canonically instituted by Pope Leo XIII in 1887, offer in their various departments numerous courses in the arts and sciences to men who desire a complete general and liberal education, or who aim at a professional career. The Catholic University has 52 professors, and schools of the sacred science of law, of philosophy, of letters, and sciences. It has affiliated colleges and communities of the Dominican and Franciscan Orders, of the Sulpician, Paulist, Marist, and Holy Cross Congregations, and a Polish house of studies. Georgetown University, besides the collegiate department, includes schools of law, medicine, and dentistry; attached to the medical school is a hospital, in charge of the Sisters of St. Francis, with a training school for nurses; the law school has (1911-1912) 959 students, the largest registration of any law school in the United States. the total number of students in the university is 1445. For female education, the Academy of the Visitation, Georgetown, and Trinity College, Brookland, are institutions of high standing. A summer school, under the auspices of the Catholic University, was successfully inaugurated in 1911., for the members of Catholic teaching orders of women. Besides these are: Gonzaga College, directed by the Jesuits; St. John's College, by the Christian Brothers; the Visitation Academy of Washington; the Im-

maculate Academy of the Sisters of Providence; academies and high schools, directed by the Sisters of the Holy Cross, Sisters of Charity, Sisters of Notre-Dame, Sisters of the Third Order of St. Dominic, and the Oblate Sisters of Providence (for coloured children). Over 4000 pupils attend the parochial schools.

The eleemosynary and benefit institution include St. Ann's Infant Asylum, and orphan asylum for little boys, another for girls, St. Rose's Technical School, and Providence Hospital (all in care of the Sisters of Charity). The Sisters of Mercy conduct a home for self-supporting girls. The houses of the Good Shepherd, the Little Sisters of the Poor, and the Bon Secours provide for their special objects of care and charity. Conferences of St. Vincent de Paul exist in nearly all parishes. The Christ Child Society, having for its object to provide for all the needs of child life among the destitute, has its headquarters in Washington, with branches in several other cities; the Bureau of Catholic Indian Missions has its office here; the Apostolic Mission House was established in 1902 near the Catholic University. It is difficult to determine the exact number of Catholics in Washington, but it has been estimated to be 30 per cent of the entire population.

Soc.; Catalogue Georgetown University (1912); FORBES-LINDSAY, Washington, the City and the Seat of Government (Philadelphia, 1908); DODD, Government of the District of Columbia (Washington, 1909); CLARK, Greenleaf and Law in the Federal City (Washington, 1901); WELLER, The National Capital, a Perpetual Memorial to the Generosity of American Catholics in The Morning Star (New Orleans, 29 April, 1911).

E.I. DEVITT

State of Washington

State of Washington

One of the Pacific cost states, popularly known as the "Evergreen State", the sixteenth in size among the state of the Union and the twenty-ninth in the order of admission. It was named in honour of the first president of the United States, whose likeness adorns the state seal. Its total area contains 69,127 square miles.

BOUNDARIES

The old territory of Washington was originally formed with the consent of the U.S. Congress, 2 March, 1853, from the Territory of Oregon. It contained then "all that part lying south of the 49th degree of north latitude and north of the middle of the main channel of the Columbia river from its mouth to where the 46th degree crosses said river near Fort Walla Walla, thence with said 46th degree to the summit

of the Rocky Mountains." Since the formation of the Territory (now State) of Idaho in 1863 Washington lies between 45 degrees 32' and 49 degrees northern latitude and 117 degrees and 124 degrees western longitude. Its limits according to article XXIV of the state constitution, adopted at Olympia, 22 August, 1889, are as follows:

Beginning at a point in the Pacific Ocean one marine league due west of and opposite the middle of the mouth of the north ship channel of the Columbia river, thence running easterly up the middle channel of said river, and where it is divided by island up the middle of the widest channel thereof to where the 46th parallel of north longitude crosses said river near the mouth of the Walla Walla river, thence east on said 46th parallel of latitude to the middle of the main channel of the Shoshone or Snake river; thence down the middle of the main channel of the Snake river to a point opposite the mouth of the Kookooskia or Clear Water river, thence due north to the 49th parallel of north latitude, thence west along said 49th parallel to the middle of the channel which separates Vancouver Island from the continent, thence following the boundary line between the United States and the British possessions through the channel which separates Vancouver Island from the continent to a point in the Pacific Ocean equidistant between Bonilla Point on Vancouver Island and Tatoosh Islands, thence running in a southerly course and parallel with the coast line, keeping one marine league off shore, to the place of beginning.

Thus, the State of Oregon lies to the south of Washington, Idaho to the east, British Columbia and Vancouver Island on the north, and the Pacific Ocean on the west.

PHYSICAL FEATURES, CLIMATE, ETC.

The Cascade and the Coast Ranges are the principal surface features. The former traverses the state from north to south, and divides it into two unequal parts commonly known as western and eastern Washington. These mountainous portions range from 5000 to 14,500 feet in height. The triangular peninsula which forms the extreme northwestern part of the state and contains the Olympic Mountains and the Coast Range is produced by Puget Sound, a part of the Pacific, occupying an area of more than 2000 square miles. The Olympic peninsula, though close to the most inhabited portion of the state, has on account of its native wildness been but little explored and is but sparsely inhabited. Between the Olympics and the Cascades lies the fertile Puget Sound Basin. The principal rivers of western Washington are the Skagit, Snohomish, Duwamish, Chehalis, and Willapa, which flow to the ocean, and the Cowlitz, a tributary

of the Columbia. The most important lake in western Washington is Lake Washington, about 16 miles long and 3 miles wide. Western Washington, at the foot of abrupt and heavily timbered slopes of the Cascades, is in area about one-half of eastern Washington, whose plains lie more than 1000 feet higher. The northern and southern part of this section of the state are known as the Okanogan Highlands and the Columbia Plains. During the last ten years much government and private money has been expended to redeem this vast waste for agricultural purposes by utilizing the watercourses of this section for irrigation, and the success has been marvelous. The best orchards of Washington and superior alfalfa farms mark the oases so obtained. The main water-course of eastern Washington is the Columbia, which receives on its long and circuitous path of nearly 1400 miles to the ocean a number of tributaries such as the Pend'Oreille or Clark, Okanogan, Spokane, Yakima, and Snake rivers. The northern part of eastern Washington with its extremely picturesque wilderness may be termed the Switzerland of Washington. Its most attractive spot is Lake Chelan, which is more than three miles wide and about seventy miles long and which penetrates deep into the Cascade Mountains, whose bases rise here and there abruptly from its waters.

Climatically there is scarcely a state in the Union more favoured than Washington, owing to the proximity of the Pacific Ocean and the protection afforded by the mountain ranges. The prevailing easterly and southwesterly winds bring with them the almost even ocean temperature, and make western Washington's winters milder and its summers less oppressive; eastern Washington, owing to its higher altitude, is less favoured. The state's mean temperature is about 51 degree west of the Cascades and 48 degrees east of that range. In like manner, these ocean winds charged with moisture precipitate more readily by coming into contact with cold land air in winter, and hence there is more rainfall in western than in eastern Washington, which latter they reach only after cooling off against the snowy Cascades.

FAUNA

This is represented by a great variety of animals. The fur bearers which attracted the first white speculators are not yet extinct, and furnish the market still with their valuable pelts. We note the bear, wildcat, cougar, coyote, elk, deer, mountain sheep, otter, beaver, marten, skunk, muskrat, squirrel, and rabbit. The "Evergreen State" is also the natural home of birds of every class and description. The small kind and singers are represented by the robin, black-bird, meadow lark, humming bird, and wild canary; while the game birds, geese, various kinds of ducks, prairie chickens, pheasants, and quails, attract the sportsman. Washington's rivers and large bodies of water, especially Puget Sound and its tributaries, are rich in all kinds of commercial fish, shellfish, and their by-products, such as glue and guano. The following statistics, taken form the report given by the state bureau, show the present extent of the annual

output: Salmon packed, value "(,113,656.40; fresh, salted, and smoked fish, \$3,592,215.00; oysters, \$581,000.00; clams, \$111,375.00; crabs, \$58,750.00; shrimps, \$35,263.70; oil, \$16,200.00; guano, \$22,050.00; glue, \$3,500.00. The total value of the output for 1909 was consequently \$13,534,010.10; the capital invested being \$4,825,620, and the number of persons employed 13,237.

NATURAL RESOURCES AND INDUSTRIES

Together with 6,173,688 acres of improved lands, 2,435,717 acres Indian reservations, 3,196,059 acres federal lands for homesteading, 12,007,340 acres of national forests, the State of Washington has still 391,000,000,000 (board) feet of standing timber; and the lumber, lath, and shingles manufactured in 1910 reached 4,000,000 feet. Though the coal mines and other mineral resources are yet in their infancy, the coal mines produced in 1910 no less than 3,979,569 tons of bituminous coal. Rich veins of silver, lead, iron, and copper, and occasionally gold, are found, especially in the hills of the Okanogan highlands; but they have been more or less neglected probably owing to the proximity of the richer goldfields of Alaska. More than three million dollars are annually realized by the lime, sandstone, cement, tile, pottery, and brick industries. Washington's chief charm and source of revenue lie in its forests with their wild vegetation of dogwood, madrona, maple, cottonwood, and alder and their gigantic trees. Cedar, spruce, fir, pine, and hemlock are the chief marketable varieties. Washington fir is extensively used for shipbuilding, and the cedar shingles are well known for their durability.

Commerce

The foreign trade of the State of Washington has naturally grown with the development of its agricultural and natural resources. While twenty years ago the total foreign commerce barely reached five million dollars, its present foreign trade is listed as follows: import, 1910, \$28,910,491; 1911, \$36,645,675; export, 1910, \$29,889,473; 1911, \$39,135,571.

Agriculture

The state of Washington, owing to its favourable climactic conditions, is rapidly advancing among the states of the Union as an agricultural state. Not only are the valleys, plains, and redeemed lands utilized for farming purposes, the logged-off forest lands are also growing in favour on account of the ever-increasing population. According to the U.S. government report, 8 Sept., 1911, western Washington had in 1908 a total area of 5,180,000 acres of standing timber, which was reduced by 1910 to 4,450,000 acres. The same government bulletin reports that in 1908 this territory had 432,000 acres of assessed pasture land which in 1910 had increased to 628,000 acres. The following list will show the principal agricultural products of the state: wheat, 34,895,000 bushels, \$32,452,350; oats, 9,190,,000 bushels, \$4,411,200; barley, 5,180,000 bushels,

\$3,315,200; corn, 417,000 bushels, \$359,000; potatoes, 6,970,000 bushels, \$3,276,000; hay, 798,000 tons, \$11,172,000; hops, 3,000,000 pounds, \$666,000. The total number of farm animals for the assessment of 1909 was given at 1,068,857 at a total value of \$38,034,450; while the dairy industry shows for the same year the following result: butter, 9,681,668 lbs., \$3,160,599.23; cheese, 204,983 lbs., \$32,750.21; condensed milk, 1,195,893 cases, \$4,185,230.00.

MEANS OF COMMUNICATION

With a frontage of salt water approximating 2500 miles Washington possesses on account of its numerous and safe harbours favoured foreign and domestic routes of communication. The most important harbours are Seattle, Tacoma, Gray's Harbour, Everett, Bellingham, Port Townsend, and Bremerton, at which latter port the U.S. navy yard and dry dock are situated. Besides its great facilities by sea the state has more navigable rivers and railroad advantages than any other western state. The total mileage of navigable rivers is approximately 1150; while the steam railroads are operated on a total trackage of 5726 miles, which does not include different interurban electric routes. If fact there is scarcely a county which is not touched by one or more means of communication. The principal companies operating within the State of Washington are the Northern Pacific, Great Northern, Chicago-Milwaukee-St. Paul, and the Canadian Pacific, which form the main transcontinental routes. There are also several interstate and state railway companies such as the Seattle- Portland-Spokane; Oregon-Washington R.R. & Nav. Co.; Inland Empire; and Columbia-Puget Sound. All railways are under the control of a state railroad commission.

POPULATION

According to the census returns Washington had, in 1860, 11,594; in 1870, 23,955; in 1880, 75,116; in 1890, 349,390; in 1900, 418,103; and in 1910, 1,141,990 inhabitants, about 5000 of whom are Indians. There are about 100,000 Catholics; 48,000 Methodists; 29,000 Presbyterians; 21,000 Baptists; 19,000 Lutherans; 11,000 Disciples of Christ; 9500 Congregationalists; 9000 Episcopalians; and a large variety of smaller sects. For purposes of administration the state is subdivided into 30 counties. Western Washington contains a population of 732,291; whereas eastern Washington, though almost twice as large, has only 409,796 inhabitants. The largest cities are Seattle, 237,194; Spokane, 104,402; Tacoma, 83,743; Everett, 24,814; and Bellingham, 24,298.

POLITICAL ORGANIZATION

The state constitution provides for the election of the state officers for a period of four years simultaneously with the general presidential election. Minor state officials and commissioners are appointed by the governor. Both men and women of the legal

age are qualified to vote, provided they are citizens, and have duly registered after a residence of one year in the state, three months in the county, and thirty days in their voting precinct. The legislature consists of a senate and a house of representatives. The senators are elected for four years, one half retiring every two years, while the representatives are chosen every two years. According to the state constitution the senate can never number more than half or less than one third of the house of representatives. The executive power in the several counties is vested in a board of three county commissioners whose office is likewise elective.

RELIGIOUS TOLERANCE AND PUBLIC MORALS

Article 1 of the state constitution provides in its section 2 for a strict separation of Church and State in the following words: "Absolute freedom of conscience in all matters of religious sentiment, belief and worship shall be granted to every individual, and no one shall be molested or disturbed in person or property on account of religion; but the liberty of conscience thereby secured shall not be so construed as to excuse acts of licentiousness or justify practices inconsistent with the peace and safety of the state. No public money or property shall be appropriated for any religious worship or the support of any religious establishment. No religious qualification shall be required for any public office or employment, nor shall any person be incompetent as a witness or juror in consequence of his religious opinion, nor be questioned in any court of justice touching his religious belief to affect the weight of his testimony." "The mode of administering an oath", according to sec. 6 of the same article, "shall be such as may be most consistent with and binding upon the conscience of the person to whom such oath may be administered." Though there is strict separation of Church and State, yet Sundays and Christmas are recognized as days to be legally observed. With the exception of hotels, drug-stores, livery stables, and undertakers' establishments, all business houses must be closed on those days. Likewise is the sale of all intoxicating liquors prohibited on Sundays, and all fines collected for violations are paid to the common school fund.

The state law provides for the severe punishment of indecent language and literature; which, however, does not annul the constitutional rights of every person to "freely speak, write, and publish on all subjects, being responsible for the abuse of that right". Drunkenness has received a wholesome check by the passage of a local option law in 909, which allows corporate towns and voting districts to determine whether places where liquor is sold shall exist in their midst or not.

Priests are not required to perform jury duty; nor can a priest be examined as a witness as to any confession made to him without the consent of the person making such confession. Likewise is the priest a legally recognized minister to solemnize marriage when a license has been obtained. The bishop as the representative of the

diocese possesses the rights of a corporation sole regarding all the church property in the State. This privilege was granted by the territorial Government, and has never been revoked by the State. Church property to the extent of 120 x 200 feet is exempt from taxation, provided the church edifice is built thereon.

DIVORCE

Unfortunately the reasons for which a divorce may be obtained are many, and much depends upon the personal good sense of the judge in applying them. The chief causes are: (1) Fraud or force in obtaining consent to the marriage, in which case the injured party can sue, provided there has been no subsequent voluntary cohabitation; (2) adultery; (3) impotency; (4) abandonment for one year; (5) cruel treatment and personal indignities rendering life burdensome; (6) habitual drunkenness, or neglect to provide for the family; (7) imprisonment in the penitentiary, providing the complaint be filed during such imprisonment; (8) any other cause which the court deems sufficient to prevent the parties from living together any longer. A necessary condition for obtaining a divorce is that the party demanding it must have resided in the state for one year.

EDUCATION

The State of Washington provides for the free education of all its citizens from the child in the common schools to the graduate of its high school. To accomplish this task, the state received on its admission to the Union from the U.S. Congress an endowment for school purposes of every section numbered 16 and 36 in all townships within its borders, or one-eighteenth of all its public lands, amounting to more than two million acres of land which will ultimately net the state treasury no less than fifty million dollars. The money obtained by the sale of this land constitutes an irreducible fund, of which only the interest, together with the rentals and incidental fines as provided by law, can be expended for current school purposes. Any deficiency of a school district is supplied by local taxation. The statistics show that there existed on 30 June, 1911, no less than 2685 districts with schools in which 2220,461 children were instructed by 7589 teachers, the average monthly salary paid to male teachers being \$85.69 and to female teachers \$66.25. There were then 379 high- schools in existence. The annual expenditure for each child maintained has been conservatively estimated at \$30. The state university is located at Seattle on a picturesque site of 350 acres overlooking Lakes Union and Washington. It owes its existence to an endowment of two townships of land made in 1854 by Congress to the Territory of Washington for this purpose. To minimize the tuition fee of students resident of the state, the state legislature in 1893 granted the university 100,000 acres additional. From its slender beginnings in 1862 the institution has steadily increased, and is at this time attended by

2427 students. It maintains schools and colleges of arts, sciences, law, pharmacy, philosophy, pedagogy, engineering, mines, and forestry. According to the latest state educational directory the present teaching staff is composed of 36 professors, 7 associate and 30 assistant professors, 54 instructors, 7 assistants, and 10 graduate assistants; together with a musical staff of 6 teachers, and a library staff of 6 members.

In addition to its university the state maintains an agricultural college at Pullman, which is devoted to practical instruction in agriculture, mechanic arts, experimental stations and incidental sciences, with an attendance of 1463 students. The three state normal schools at Bellingham, Cheney, and Ellensburg with a total of 1353 students supply teachers for the public schools. Besides these state institutions of higher learning there are no less than 30 schools under sectarian or private management. The Catholic Church also has not been lacking in its educational advancement. The total number of boys receiving their education in six Catholic high-schools and academies in the state is about 1100. These schools are chiefly in the care of the Christian Brothers, the Benedictine and Jesuit Fathers. The 18 academies for girls and young ladies in charge of the Visitation, Benedictine, Franciscan, Dominican, Providence, and Holy Names Sisters show an attendance of 1509 pupils. Great credit is especially due the Sisters of the Holy Names, whose two Catholic normal schools have been accredited by the state. In addition to these higher institutions of learning the Catholics by voluntary taxation and personal sacrifice maintain 32 parochial schools with 5126 pupils, thus saving the state an annual expense of about 150,000 dollars.

CHARITABLE AND REFORM INSTITUTIONS

The state maintains a penitentiary at Walla Walla and two reform industrial schools for youthful delinquents at Chehalis and Monroe. The total number of inmates of the state's penal, charitable, and reform institutions in 1906 were 3939, which increased to 4288 in 1911. The hopelessly insane are provided for by two asylums at Steilacoom and Medical Lake; while those suffering from milder forms of insanity are placed in the state sanitarium at Sedro-Woolley.

Almost with the dawn of Catholicism in the Northwest, charity had commenced its errand of well doing to the sick, the poor, and fallen. On 8 Dec., 1856, the Sisters of Charity of Providence (Montreal) arrived at Vancouver, and there began their errand of mercy in the Northwest. Their charitable institution at that place housed and supported in 1911 no less than 130 orphans and 253 aged and infirm persons. From humble beginnings their admirable work extends now proportionately to almost every larger city of the state: Colfax, Colville, Everett, North Yakima, Olympia, Port Townsend, Walla Walla, Spokane, and Seattle. Their new Providence Hospital at Seattle, built at a cost of approximately \$1,000,000 and dedicated on 24 Sept., 1911, has rooms for 300 patients, not including its spacious general wards. Other sisterhoods engaged

in hospital work in the state are the Sisters: of St. Dominic at Aberdeen and Chehalis; of St. Joseph of Peace (Jersey City, N.J.) at Bellingham; of St. Francis (Glen Riddle, Pa.) at Tacoma; the Sisters of the Good Shepherd have care of no less than 271 wayward and orphan girls. The liberality of Mrs. E. Briscoe Foss enabled Bishop O'Dea to open the Briscoe Memorial Home and Training School for orphan boys on 15 June, 1909, which now gives protection to about 80 young lads. In the large cities the St. Vincent de Paul Society and the Catholic Social Betterment League are likewise doing efficient charity work.

GENERAL HISTORY

The names of the first explorers of the coast of Washington are immortalized by the physical features of the Northwest. Inlets and bays bear the names of Juan de Fuca (1592), Cook (1778), Puget (1791), and Gray (1792); Vancouver and Whidby (1791) are recalled by two islands; while Lewis and Clark's expedition (1805) as well as Gray's ship, "Columbia," have been perpetuated by the largest rivers. Washington was originally a part of the long controverted Oregon Country, whose joint possession by both England and the United States was regulated by the treaty of 1818; but lying north of the Columbia River, which the British Government considered a favourable boundary, it remained until 1846 almost exclusively under the control of the English Hudson's Bay Company, who exploited it for its wealth in furred animals all the more energetically in the hope of establishing a claim of preponderant influence in favour of the home country. In this they were, however, destined to disappointment. When the time arrived the United States demanded the 49th parallel as the international boundary both by reason of prior discovery and of prior colonization of the whole Oregon Territory. In 1853 Washington was organized as a separate territory, and was admitted to the Union as a state with its present limits on 11 Nov., 1889.

CHURCH HISTORY

Before the advent of Christian civilization the Indians of the northwest coast lived in the grossest ignorance, and their morals were correspondingly low. They recognized a superior divinity, Ekannum, and an inferior god, Etalapasse. The former created everything visible, including the human being; while the latter gave man the use of his eyes and mouth and created the Columbia with its fishes for man's food. Idolatry was extensively practised; even the lowest animals and the shades of the dead received divine honours; nor were human sacrifices infrequent, especially after successful wars. Father De Smet, S.J., the pioneer Indian missionary, tells us of a child consecrated to the shade of one of its companions, who had died the previous day. "Almost in front of a house occupied by the Protestant missionary", he says, "the little victim was so cruelly garroted that the cords entered the flesh; it was exposed on a rock where it could not have failed

to soon expire had not Mr. Perkins succeeded in ransoming it." It was the general custom of the northwest tribes to bury their dead, though the funeral pile was also occasionally used. Among the Chinooks and Puget Sound Indians a strange funeral practice was favoured. The body, arrayed in the deceased one's best garb, was placed together with his weapons into one of his canoes, and permanently raised on long poles or a scaffold. Every tribe was governed in patriarchal fashion by a chief. Inter-marriage of persons of different tribes was forbidden, but polygamy tolerated. Prisoners of war, if not killed at subsequent festivities, were never adopted into a tribe, but performed slave work in the families of those who had fallen in battle. The Indian believed in immortality as a reward for personal bravery, which was one of his prominent virtues. He was fearless on land and sea, and in no way overawed by a white man's sailing vessel.

How Christianity became first known to the aborigines of the northwest coast, whether by stranded mariners or missionaries from California, can only be conjectured. Whether the few religious objects found among them by the first known explorers were obtained from venturesome fellow-tribesmen roaming southward to the California borders, from missionaries, or, as articles of exchange, from passing sailors and traders must likewise remain an unsolved problem. Certain it is that the desire to see the "Black Gowns" was to no small extent aroused by the French-Canadian trappers and hunters in the employ of the Hudson's Bay Company, and that the coast Indians were anxious to accept the Catholic Faith when the first known missionaries, Fathers F.N. Blanchet and Modeste Demers, arrived (cf. SEATTLE, DIOCESE OF). The first Catholic services known to have been celebrated within the present State of Washington were held in the Big Bend, Okanogan Co., 14 Oct.; at Walla Walla (Wallula) 18 Nov.; and at Vancouver 24 Nov., 1838. The first mission in the whole Northwest was established at Cowlitz, where Father Blanchet said Mass in the home of Simon Plamandon, one of the four Catholic settlers at that point, on 16 Dec., 1838. So strenuous, zealous, and successful was the work performed by these two apostles of the Northwest, that in 1844, when Father Blanchet was raised to the episcopal dignity, he could report to his superiors the conversion of more than 5000 Indians and the return to their religious practices of about 1500 whites. A new impetus to Catholic life came through the gradual arrival of more missionary labourers and especially through the wise division of the vast Oregon Territory into two dioceses in 1846, one of which by a change of title has now become the Diocese of Seattle. Bishop A.M.A. Blanchet was its first head as Bishop of Walla Walla, later of Nesqually.

In eastern Washington the Jesuits have always been zealous and influential missionaries and have met with wise foresight the ever-growing exigencies of this section. For nearly forty years they were almost exclusively in charge of the vast northern district

lying between the Cascades and the Rockies, and a debt of gratitude is owed to some of those intrepid apostles who by their prudent conduct and timely advice to both military leaders and turbulent tribes, prevented strife and bloodshed on many occasions during the Indian wars of Washington's territorial years. Among the religious labourers of the Society of Jesus in the Northwest, since their first apostle, Father P.J. De Smet, planted the cross on the summit of the Rockies in 1840, may be mentioned Fathers Joset, Tosi, Jaquet, and Cataldo, whose names are more intimately linked with the early history of Washington. By far the most important mission from a present-day point of view was the one established among the Spokane Indians by Father Cataldo, who celebrated Mass there for the first time on 8 Dec., 1866.

Since then the Indian has almost disappeared, and close by the former log church rises now the city of Spokane with its 104,402 inhabitants and its eight splendid Catholic churches. The little school originally intended for Indian boys was also forced to yield its place. In 1881, when the arrival of the Northern Pacific Railroad had transformed the spot into a village, white children gradually superceded the native element. In 1887 Gonzaga College was opened, and in 1912 was raised to the rank of a university; at the present time it has more than 500 students. The Jesuit Fathers maintain another college for boys at Seattle, with about 300 pupils, and are about to open an institution at Tacoma.

While eastern Washington was principally in the care of the Jesuits, western Washington was not less fortunate in possessing the efficient help of the Oblate (O.M.I.) Fathers, especially among the Indian tribes of Puget Sound. The name of Father Chirouse still lives among them. For almost thirty years they worked in the Diocese of Nesqually till their places could gradually be supplied by secular clergy, when they retired northward to British Columbia, of which they have had exclusive charge to the present day. The secular priests, as their number increased, were little by little restricted to narrower limits; instead of remaining missionaries in the stricter sense of the word their centres of action have been multiplied, whereby they are not only able to know better the momentary spiritual wants of their several districts, but also to meet more efficiently the individual claims of their cosmopolitan charges. Thus, when in 1895 Bishop Junger bequeathed the office to his successor, the present head of the diocese, the vast State of Washington contained a scattered Catholic population of about 25,000 in charge of 38 secular priests and 23 priests of religious orders. At present the last census shows in the same territory a Catholic population of nearly 100,000 taken care of by 161 priests, of whom 94 are secular clergy and 67 belong to religious orders.

W.J. METZ

Liturgical Use of Water

Liturgical Use of Water

Besides the holy water which is used by the Church in so many of her rites of blessing, and besides the water employed in the washing of feet and hands (*see WASHING OF FEET AND HANDS*) and in the baptismal font (q.v.), water has its recognized place in the ritual of every Mass and in a certain number of pontifical and extraordinary offices which include some form of washing. With regard to the water mingled with the wine in the Mass, the Fathers from the earliest times have tried to find reasons why the Church uses a mixed chalice though the Gospel narrative implies that Christ consecrated pure wine. St. Cyprian (Ep. lxiii, 13) discussing this question sees an analogy to the union of Christ with His faithful people, but, as the Council of Trent points out (Sess. XXII, De Missa, vii), there is besides this a reference to the flowing of blood and water from Christ's side, from which the Church, the dispensatrix of the sacraments, was formed, like a new Eve from the side of the new Adam. It was probably in allusion to the former symbolism (i.e. the union of the people with Christ) that the earlier "Ordines romani" directed the choir (*schola cantorum*) to present water at the Offertory of the Mass. We may note also that it has long been the practice of the Greek Orthodox Church to pour a little hot water into the chalice immediately before the Communion, and though there seems no reliable evidence for any such custom in the early centuries, the absence of this usage among the Latins is made by the Greeks a serious ground of reproach. In the purification of the chalice, water is again used in the second of the ablutions, but the present practice according to which the ablution of wine and water is drunk by the priest did not always obtain in the Middle Ages. On the other hand there was a very general custom of providing water, or wine and water, for the communicants to drink as a "purification" after Communion. In fact this is prescribed in the existing rubrics of the Missal (Rit. ser., X, 6), though the "Caeremoniale episcoporum" on Easter Day speaks of a purification of wine alone. Further, a strictly liturgical use of water is also made in such offices as the laying of the foundation stone of a church and the consecration of a cemetery, though here the blessing consists only of the five prayers commonly used for making ordinary holy water. In the blessing of a bell, however, and in the dedication of a church special features occur. In the case of the bell an entirely new prayer, "Benedic, Domine, hanc aquam", is inserted, and

with the water thus consecrated the bell is afterwards completely washed inside and out. For the consecration of a church a special lustral water is prepared after the bishop has entered the building, and the various ingredients, viz. salt, water, ashes, and wine, before being mixed together, are blessed with prayers which differ entirely from those employed in the case of holy water for common use. This lustral water is sprinkled while the bishop seven times makes the circuit of the altar and three times that of the interior of the church. The rite of washing the high altar on Maundy Thursday is performed in the Roman basilicas and some other churches with a certain solemnity, and was in old times an even more noteworthy function than at present. For this purpose wine and sometimes rose water were employed as well as the pure element. Again at the opening of the holy doors in the Roman basilicas when the year of jubilee begins, the penitentiaries, provided with sponges and towels, wash and wipe the threshold, after the previously obstructed door has been unwalled. Less strictly liturgical is the use of water which is blessed with various special formulae for devotional purposes. The official "Rituale romanum" contains a number of such blessings, for example "Modus benedicendi aquam" with other similar formulae in honour of St. Adelhaid, St. Willibrord, St. Vincent Ferrer etc., particularly. The purpose of this is generally medicinal and there is in particular a long blessing of the "water of St. Hubert" against the bite of a mad dog.

The reader may be referred to the books mentioned in the article HOLY WATER; cf. Also SCHROD in Kirchenlexikon, s.v. Weihwasser; THALHOFER, Liturgik (Freiburg, 1883-93); and for the Middle Ages especially FRANZ, Die kirchlichen Benediktionem (Freiburg, 1909). See further the commentaries of CATALANI, Pontificale Romanum (Paris, 1850); and Rituale Romanum (Rome, 1757); and THURSTON, The Laity and the Unconsecrated Chalice in The Month (October, 1911).

HERBERT THURSTON

Diocese of Waterford and Lismore

Diocese of Waterford and Lismore

(Waterfordiensis et Lismorensis), suffragan of Cashel. This diocese is almost co-terminalous with the ancient Celtic territory of Decies; it comprises the County of Waterford (except five townlands) with a considerable portion (two baronies and part of two others) of Tipperary County, as well as a small area (12,000 acres) of County Cork. The population is 131,636, of whom 124,367 are Catholics, ministered to by one bishop and 122 secular priests. The diocesan chapter, in abeyance since the seventeenth century, was revived with modifications in the last decade. In addition to the secular clergy, there are three houses of Franciscans, a Cistercian abbey, and one community

each of Dominicans, Augustinians, Fathers of Charity, and Congregation of the Divine Pastor. There are thirty houses of nuns and ten of brothers, including the (Irish) Christian Brothers, whose parent house is Waterford, and the Brothers of the Christian Schools (de La Salle). The following orders or congregations of nuns are represented: Presentation; Ursuline; Our Lady of Mercy; Sisters of the Poor; Good Shepherd; Sisters of Charity; Loreto; Carmelite; Sisters of St. John of God; Sisters of Le Bon Sauveur; and Sisters of St. Joseph of Cluny. All communities of brothers and the majority of the female religious are engaged in educational work.

It is probable that the region of Decies received its first Christian message--presumably from Britain--previous to the advent of St. Patrick. The Life of St. Declan (cf. Plummer and the Bollandists) places the preaching of Declan in the early fifth century, before St. Patrick had lit his Paschal fire at Slane. The chronology of Declan's life is very confused, and first-class authority is available for the opinion that Declan's mission was subsequent to Patrick's. But it is quite certain that at this period there was considerable intercourse between Wales and the southeast coast of Ireland. Controversy ceases when we come to St. Carthage [alias St. Mochuda], who established himself at Lismore and founded a great school there in 630. Long before that event, Lismore had been the seat of a religious establishment, for four early abbots, predecessors of St. Carthage, are mentioned (Colgan, "Acta Sanctorum", and "Annals of the Four Masters"). It may be, however, that the abbots in question belonged not to the Irish but to a Scottish Lismore. Lismore gradually became the acknowledged ecclesiastical capital of the Decies. There were other bishops and episcopal churches within the region in Celtic times, but there does not appear to have been anything approaching to episcopal succession in these instances, if we except the case of St. Declan's Church of Ardmore. It has been contended that the ancient deaneries represent these early episcopal churches. They probably represent the chief of them, but certainly they do not represent them all. In Waterford and Lismore the ancient deaneries were: Waterford, Kilbarry-meaden, Ardmore, Lismore, Ardfinan, and Kilsheelan. Up to the Synod of Rathbreasil (1110) we have the names of twelve abbots or abbot-bishops who sat in the chair of Carthage at Lismore. Presuming succession to have been continuous during the period, there must be many others whose names are lost. Some of the recorded successors in question are catalogued as saints in the Irish martyrologies, e. g. Cuanan, Cronan, Mocholomog etc. At the synod just named Irish episcopal jurisdiction was more clearly defined and diocesan boundaries formally aligned. The Bishop of Lismore at the time of the Synod of Rathbreasil was Nial MacAeducan, whose episcopal staff, inscribed with his name and covered with Celtic ornament, is still preserved at Lismore.

Keating has doubts that a Diocese of Waterford, as distinct from Lismore, was recognized at Rathbreasil. But Waterford was recognized as an independent see forty-

two years later, when its bishop assisted at the Synod of Kells. Unseemly disputes between Waterford and Lismore paved the way for a union of the sees on the death of the last Bishop of Waterford, Roger Cradock, in 1362. Waterford was the smallest diocese in Ireland, embracing an area of only twelve miles by nine; it included little more, in fact, than the city of Waterford and the adjoining cantred of the Danes. Its history is peculiar; the Christianized Ostmen of the city determined, towards the close of the eleventh century, to set up a bishop and cathedral of their own, and the racial friction between them and their Celtic neighbours is reflected in their method of procedure on the occasion. Having chosen one Malchus, a monk of Winchester in England, to be their first bishop, they sent him for consecration--not to Cashel or Lismore--but to the Archbishop of Canterbury. It was during the incumbency of Malchus (1096-1110) that the cathedral was erected by the Ostmen citizens, on the same plan and of the same dimensions as the Danish Christ Church of Dublin. This building, dedicated to the Holy Trinity, was not allowed to survive long in its original plan; a practically new cathedral was erected early in the thirteenth century, and survived till 1770. The original endowment of the cathedral may have been meagre or precarious; at any rate there was a re-endowment by King John--probably on the completion of the second cathedral. Then too its first dean was appointed, and a formal confirmation of its statutes and possessions made by Innocent III.

Among the more noted bishops of the see up to the time of its union with Lismore may be mentioned: David the Welshman, who was killed by O'Phelan (1207); Robert (1210-22), who commenced the century-long quarrel with Lismore which led to his excommunication and to his death from grief; Stephen of Fulburn (1373-86), who became Lord Justice or Chief Governor of Ireland, and established a mint for coinage of "a new kind of money" in his episcopal city; Roger Cradock (1350-62), between whom and the Archbishop of Cashel there arose litigation, because of Roger's action in executing two Irishmen for heresy at Bunratty Castle.

Though the sees were formally united in 1362, they continued to have separate cathedrals and chapters down to the suppression. During the period from the union of the sees to the Reformation, Lismore was regarded as the senior partner, and the title of the diocese in papal documents ran "Lismore and Waterford". Of its bishops we have little information beyond what we can glean from occasional references in state papers. The majority of them bear English names; in fact, there is only one--Nicholas O'Hennessey--with a distinctly Irish cognomen; three--Purcell, Power, and Cantwell--are Norman-Irish. Nicholas Comin, the bishop of the suppression period, had an unusually long reign if, as Brady states, he resigned only in 1551, for he was translated from Ferns to Waterford as early as 1519, and the latter year was the tenth from his consecration as bishop. The history of this Bishop Comin is not all clear. He

appears to have been an Englishman; he was consecrated in St. Paul's, London. His name does not appear in the Bull nominating his successor; instead we have the name of his predecessor, Thomas Purcell, who resigned in 1519. It was probably during Comin's episcopate that the famous vestments of Flemish work, still preserved in Waterford cathedral, were presented to that church by the king. These consist of four copes, two dalmatics, and one chasuble, with stoles and maniples richly wrought with silver gilt ribbons twisted around silk thread on a ground of Genoese velvet, and are valued at thousands of pounds. Patrick Walshe (1551-79), the next bishop, has been the subject of much controversy; he was certainly consecrated by royal mandate. On the other hand, from the fact that he was not deposed in Mary's reign and from the appearance of his name in the provision of his successor, it is evident that he was regarded as orthodox. We may take it that he received absolution from Cardinal Pole. However he may have temporized, his orthodoxy further appears from his consistent patronage of Dean Peter White, the greatest pedagogue of his day, and the most strenuous opponent of royal supremacy.

From the death of Walshe, for full half a century the diocese was administered by vicars only. Some years previously Archbishop Walsh of Cashel, a native of Waterford, had advised the Holy See that one archbishop and at most two bishops would be enough for Munster. James White, the daring ecclesiastic who reconciled the Waterford churches on the death of Elizabeth and confronted Mountjoy when the latter came to chastise the city, was named vicar Apostolic upon the bishop's death. James White was brother to Father Stephen White, S.J. (*Polyhistor*), and to Father Thomas White, S.J., founder of the Irish College of Salamanca. Twice again within the seventeenth century had the Holy See to revert to government of the diocese by vicars: from 1652 to 1671 and from 1693 to 1696. From 1677 to 1693 the affairs of the diocese were administered directly by the Archbishop of Cashel. For the first thirty-six years of the eighteenth century there was no resident bishop. The *de facto* bishop, who was an exile for thirty-five years, governed through vicars; he was Richard Pierce, once military or court chaplain in the service of King James, and, in the years of his exile, coadjutor to the Archbishop of Sens.

John Brenan was bishop from 1671 to 1693, and became metropolitan in 1677, retaining the administration of Waterford. Patrick (De Angelis) Comerford (1629-52) was an Augustinian; he sat in the Supreme Council and died in exile in Nantes. Sylvester Lloyd (1739-48), a Franciscan (translated from Killaloe), has left two cathedral works, one in Irish and English, and the other, in two volumes published in London, is a translation of the great Catechism of Montpellier. Bishop William Egan (1774-96), while yet a parish priest of Clonmel, was author of a pamphlet on the papal practice or right of nominating in certain cases to vacant parishes in Ireland, and Renehan in-

sinuates that Egan's criticism of the right in question led to its abandonment. Bishop Egan was consecrated by stealth and before daylight at Taghmon, whereas his successor, Thomas Hussey (1797-1803), was accorded a military guard of honour on the occasion of his consecration in old Adam and Eve's Chapel, Dublin. Hussey, who had been chaplain to the Spanish Embassy and later president of Maynooth College, was a *persona grata* with the government and a confidant of British statesmen. Burke's correspondence with him is still extant, but unpublished. John Power was bishop, 1804-17; Robert Walshe, 1817-21; Patrick Kelly (transferred from Virginia, U.S.A.), 1822-29; William Abraham, 1830-37; Nicholas Foran, 1837-55; Dominic O'Brien, 1855-73; John Power (the second), 1873-87; Pierse Power, 1887-89; John Egan, 1890-91; Richard Alphonsus Sheehan, cons. 31 Jan., 1892.

The history of the diocese embraces four distinct epochs: (a) the Celtic Church; (b) the Anglo-Irish Church; (c) the penal days; and (d) the modern revival. In the glory of the Irish Church during the first and third of these periods, Waterford and Lismore--especially Lismore--has had its full share. Some saints associated with the Decies during the Celtic period are: Ita; Finian the leper, and another Finian; Molua; Aileran; Molaise; two Aedhs; several Colmans; Kieran of Tubrid; Celsus of Armagh (buried in Lismore); Christian O'Connery, Bishop of Lismore and papal legate; etc. In the Danish wars the churches and monasteries along the Blackwater and up to Lismore suffered severely, and several of their religious were martyred. In the penal period Waterford produced a number of great ecclesiastics and scholars: Peter Lombard; Luke Wadding, O.M., and four other Waddings, his kinsmen, *scil.*: Ambrose, Luke, Peter, and Michael, of the Society of Jesus; Paul Sherlock, S.J.; Stephen White, S.J.; Thomas Walsh, Archbishop of Cashel; Dr. Geoffrey Keating.

Annals of the Four Masters; Acta SS.; BRADY, Episcopal Succession (Rome, 1876); BURKE, *Hist. of Clonmel* (Waterford, 1907); BURY, TODD, AND HEALY, *Life of St. Patrick* (London, 1905; Dublin, 1864, and 1905, respectively); COLGAN, *Acta*, etc. (Louvain, 1645); HAYMAN, *The Annals of Lismore in The Reliquary* (Jan., 1864); KEATING, *History of Ireland*, Irish Texts Society (London, 1902-08); KING, *Memoir Introductory to the Early History of the Primates of Armagh* (Armagh, 1854); *Liber Visitationis Regalis* (MS. T. C. D.) and other Visitations; MANT, *History of the Church of Ireland* (London, 1840); PLUMMER, *Vitæ Sanctorum Hiberniæ* (Oxford, 1910); REEVES, *Adamnan's Columba* (Dublin, 1857); RENEHAN, *Collection of MSS.* (Maynooth College); SMITH, *Ancient and Present state of Waterford* (Dublin, 1746); STOKES, *Martyrology of Gorman* (London, 1895); WARE, *Bishops; Waterford Archæological Society Journal*, etc. (Waterford, 1895-1912).

P. POWER

Ven. Edward Waterson

Ven. Edward Waterson

Born at London; martyred at Newcastle-on-Tyne, 7 January 1594 (1593 old style). A romantic episode marks this martyr's early career, for as a young man he travelled to Turkey with some English merchants, and attracted the attention of a wealthy Turk, who offered him his daughter in marriage if he would embrace Moslemism. Rejecting the offer with horror, Edward Waterson returned westward through Italy and, coming to Rome, was there reconciled to the Catholic Church by Richard Smith, afterwards Bishop of Chalcedon. The Pilgrim-book of the English College records his stay there, 29 November-11 December, 1588. He then went to Reims to study for the priesthood, arriving there 24 January, 1589. He received the tonsure and minor orders on 18 August, 1590, subdiaconate on 21 September, 1591, diaconate on 24 February, 1592, and the priesthood 11 March following. On 24 June he returned to England, with such zeal for the missions that he declared to his companions that if he might have the Kingdom of France to stay there till the next midsummer he would rather choose to go to England. Though he was not learned, his humility, spirit of penance, and other virtues caused him to be regarded as a patern. Captured at midsummer, 1593, he was cruelly treated in prison till his execution. Incidents occurred at the martyrdom of a miraculous nature. The horses were unable to drag the hurdle to the scaffold and the ladder was mysteriously agitated by invisible means, till the martyr signed it with the cross.

EDWIN BURTON

Charles Waterton

Charles Waterton

Naturalist and explorer, born in Walton Hall near Wakefield, Yorkshire, England, in 1782; died there in 1865. His family, originally from Lincolnshire, had migrated to Yorkshire several centuries before and its pre-Reformation members in many cases were eminent in the service of the State. Staunch Royalists as well as Catholics, they suffered from England's changes of faith and allegiance, and by the constant exactions

and fines of penal times they become much impoverished. Charles's mother was a Bedingfeld of Inburgh, Norfolk, granddaughter of Sir Henry, the third baronet, and his paternal grandmother was Mary More, the seventh in descent from Blessed Thomas, the martyred chancellor.

In his tenth year Charles was sent to a small Catholic school at Tudhoe, near Durham, the first English home of Mr. Jutine Ushaw. Thence he passed in 1796 for his higher studies to Stonyhurst. His four years' stay at Stonyhurst, while it succeeded in making him a good Latin scholar, developed still more his early passion for natural history, especially for the study of ornithology. "By a mutual understanding, he writes in his "Autobiography", I was considered rat-catcher to the establishment, and also fox-taker, fumart-killer, and cross-bow charger at the time when the young rooks were fledged. . . I followed up my calling with great success. The vermin disappeared by the dozen; the books were moderately well thumbed; and according to my notion of things, all went on perfectly right." On leaving school the Peace of Amiens in 1802 gave him his first chance of travelling and he went to Spain, where two of his maternal uncles had settled. He was with them in Malaga when the great plague occurred there, and, though he escaped infection, he returned somewhat impaired in health. In search of a warmer climate he undertook the administration of his uncles' estates in British Guiana and resided in Georgetown from 1804 to 1812, with occasional visits home. Meanwhile, in 1806 his father died, leaving him heir to Walton Hall. After handing over the West Indian estates to their owners, he determined to start exploring the hinterland of Guiana and at intervals of four years, beginning with 1812, he made the four adventurous expeditions which are described in the well-known "Wanderings in South America". For this work his long residence in the colony had rendered him exceptionally well equipped and he made very valuable additions to the sum of human knowledge concerning the fauna, especially the bird life, of that portion of the tropics. The main object of his first journey was to collect as large a quantity as possible of the deadly "wourali" poison, which induces immediate and profound quiescence, and would therefore, it was hoped, prove a specific against the tetanus of hydrophobia. That result has not been attained; however, Waterton's experiments with the poison proved that its deadly effects could be neutralized by keeping up artificial respiration during the period of its activity. His other services to science have been more valuable and permanent. By combining an unrivalled knowledge of the living habits of the wild creation with a new method of preserving skins, he raised (to use the words of Dr. Moore) "taxidermy from a sorry handicraft to an art". In 1829, five years after his last expedition, Waterton married the daughter of an old Demerara friend, who, however died with a year, leaving him with one child, a boy, well known later on as an antiquary. His subsequent travels, of which he has given a summary in the "Autobiography", were

confined to the Continent, but during his last sojourn in the New World he twice visited the States, considering, as he said, no Englishman's education complete till he had been there.

After surviving so many perils abroad, Waterton met his death in his own park through stumbling over a briar-root. This was in 1865 when he was in his eighty-third year: an internal injury resulted in his death in a few hours. He was so inured to hardship that it had become second nature. For the last thirty years of his life he always slept on bare boards, wrapped in a blanket and with a block of oak for a pillow. From this couch he rose at midnight to spend a few minutes in the chapel; he rose again at three o'clock, made his fire and lay down again till half-past, when he dressed and spent an hour at prayer. Breakfast followed a further three hours' work or reading, and the rest of the day was spent about his estate in the business of a country gentleman. He had walled in the park and forbade any destruction of wild life within its bounds, so that it became a perfect paradise of animated nature. His charity to the poor was constant and unostentatious, and his personal piety unaffected and deep. His faith was so staunch and undisguised that it was continually manifested, even in the most unexpected places, in his scientific papers. Of his strength of will and dauntless courage his own writings give much indirect evidence, for he made generally light of his exploits. The value of his work was recognized by Darwin, who visited him at Walton Hall, and his friend Thackeray, in a well-known passage in "The Newcomes", testifies to his moral worth: "I could not but feel a kindness and admiration for the good man. I know his works are made to square with his faith; that he dines on a crust, lives as chastely as a hermit, and gives his all to the poor."

Besides the author's works mentioned above and his Essays on Natural History, ed. MOORE, see: GERARD, Stonyhurst Centenary Record, viii; MOORE, in Dict. Nat. Biog., s.v.

JOSEPH KEATING

James Waterworth

James Waterworth

Born at St. Helen's, Lancashire, 1806; d. at Old Hall, Newark, 28 March, 1876. Educated at Stonyhurst, he went subsequently to Montrouge to enter the novitiate of the Society of Jesus, in which he did not long continue. Sent by Bishop Milner to study for the priesthood at the English College, Rome, he there devoted himself to theology, and especially patrology, that he often worked sixteen hours a day. At the end of his course he was recalled to Oscott, where he was ordained, and where he taught theology from 1830 to 1833. He then went to assist Rev. J. Yver at Newark, where he spent over

forty years as a missionary priest, still continuing his studies of the Fathers. Within a year or two he was placed in sole charge of the mission. In 1834 he published a pamphlet defending Berington and Kirk's work, "The Faith of Catholics", against the attack of an Anglican clergyman called Pope; and twelve years later he published a greatly enlarged edition in three volumes. He also published a translation of the canons and decrees of the Council of Trent (1848) and of Veron's "Rule of Faith" (1833). His "Digest of the Penal Laws affecting Roman Catholics" is another useful work. His latest book, "England ad Rome" (1854), was on the relations of the popes to England. He was made canon of Nottingham in 1852, doctor of divinity in 1860, and provost of that diocese in 1861.

Tablet (8 and 15 April, 1876); Oscotian (July, 1888); GILLOW, Bibl. Dict. Eng. Cath., s.vv. Berington and Kirk; Catholic Directory, (1830-76).

EDWIN BURTON

Jean Antoine Watteau

Jean Antoine Watteau

French painter, and founder and leader of the school usually known as that of the painters of Les Fêtes Galantes; born at Valenciennes, 1684, died near Paris, 1721. Young Watteau was a very clever boy, constantly sketching, and as quite a youth was taken to the studio of Gerin, who gave him his first education. He received, however, no sympathy at home, but, on the contrary, was urged to give up draughtsmanship. He therefore left Valenciennes, and tramped to Paris, where he arrived without a friend or a penny, and nearly starved. At first he commenced as a sign-board painter, but in 1703 was fortunate enough to be received into the studio of Gillot, with whom he remained for five years, and then became the assistant of Audran, one of the first artists of his day, and the keeper of the Luxembourg. Audran discovered his skill, but was inclined to keep him in his studio as his pupil and assistant, and to prevent him engaging in original work. Watteau, however, painted a small military picture, called "Le Départ," which was sold to a dealer in Paris. From the funds obtained by this sale, Watteau revisited his parents, but quickly returned to Paris. He then came under the notice of M. de Crozat, who introduced him to many artists, gave him the free run of his house and gallery, and encouraged him. During this time Watteau produced some of his best pictures, and was received by the Academy under the title of "Le Peintre des Fêtes Galantes" in 1717, where his position was at once secured. It was at this time that he produced his great picture, "The Embarkment for Cythera", which created a great sensation in Paris, and was the beginning of quite a new epoch in art. Watteau was always more or less in poor health, and two years after painting his great picture

came over to London to consult Dr. Meade, for whom he painted two important pictures. He then returned to Paris, and executed the great sign-board picture designed for his friend Gersaint, but, his health failing in Paris, he had to leave for a house which he had obtained at Nogent-sur-Marne. It was there soon after that he died. Watteau produced a great number of pictures, exquisite in colour, movement, composition, and in a peculiar sense of flutter which distinguishes his works. He was also a superb draughtsman and left behind him a number of drawings full of life and piquancy. He was an engraver, responsible for several etchings. His paintings stand quite alone in art, representing the gay and vivacious life of the period, with ideal forms and circumstances, and picturing the frivolity of his epoch extravagantly no doubt, but with great beauty and extraordinary charm. His finest works are those in Berlin, London, (the Wallace Collection), Paris (the Case Collection), Potsdam (the two collections at Sans Souci and the New Palace), and the Condé Museum at Chantilly. Besides these, there are great works by him at Brunswick, Cassel, Brussels, St. Petersburgh, Nantes, Orleans, Stockholm, Dresden, Edinburgh, and Glasgow. The chief artists of his school were Lancret and Pater, and their paintings approached more nearly than any others to the works of Watteau himself.

The chief work on Watteau is that of DE JULIENNE, a colossal volume published in Paris in 1734. Reference should also be made to a life of Watteau by DINAUX issued in his native town in 1834; to a treatise published at Leipzig in 1896 by ROSENBERG; an important work issued in Berlin by BODE in 1883; DILKE, French Painters of the Eighteenth Century (London, 1889); the treatise of Watteau by MUNTZ, issued in Paris, in 1885; various other works on the artist by PHILLIPS, PATER, STALEY, BLANC, and others.

G.C. WILLIAMSON

Cistercian Abbey of Waverley

Cistercian Abbey of Waverley

Situated in Surrey, near Farnham, founded by William Gifford, Bishop of Winchester, on 24 Nov., 1124, was the second daughter of L Aumone, in Normandy, and the first monastery of the Order of Citeaux in England. This claim to priority of establishment is sometimes disputed in favour of the Abbey of Furness, but though Furness was actually founded three or four years before Waverley, yet it was then a daughter of Savigny, and was not affiliated to the Cistercian Order until the year 1147. Bishop William endowed it with large possessions and, along with many other ecclesiastics and nobles, granted it numerous privileges which were confirmed and even increased by Henry de Blois, brother of King Stephen and successor of William in the

episcopal office. The first century of its existence was the golden age for Waverley, in which period it founded six monasteries and, despite the number of its members thus sent away, it had 70 choir religious and 120 lay brothers in 1190. In 1201 the abbey suffered from an inundation; so that in 1203 the foundations for a new church were laid, and for a new monastery also, but on higher ground. This church was not opened until 1231, when it was dedicated with great solemnity. In 1225 Henry III visited the abbey and, at his own request, was granted an honorary membership in the community. Waverley now became less and less important, until at the time of its suppression by Henry VIII (1536) it contained but thirteen religious. After the dissolution the property passed through various hands, becoming with each change more desolate; the cloister was still standing in 1673, at the present time nothing but the bare site of Waverley remains.

EDMUND OBRECHT

Ven. William Way

Ven. William Way

(*Alias MAY, alias FLOWER*).

English priest and martyr, born in Exeter Diocese (Challoner says in Cornwall, but earlier authorities say in Devonshire); hanged, bowelled, and quartered at Kingston-on-Thames, 23 September, 1588. He is frequently confused with the martyred layman Richard Flower, *alias* Lloyd, who suffered at Tyburn, 30 September, 1588 (as to whom see LEIGH, RICHARD), with the priest William Wiggs, *alias* Way, M.A., a notable prisoner at Wisbech, and with William Wyggs, M.A., of New College, Oxford. Our martyr William Way received the first tonsure in the Cathedral of Reims from the Cardinal of Guise on 31 March, 1584, and was ordained subdeacon, 22 March, deacon 5 April, and priest 18 September, 1586, at Laon, probably by Bishop Valentine Douglas, O.S.B. He set out for England 9 December, 1586, and in June 1587, had been committed to the Clink. He was indicted at Newgate in September, 1588, merely for being a priest. He declined to be tried by a secular judge, whereupon the Bishop of London was sent for; but the martyr, refusing to acknowledge him as a bishop or the queen as head of the Church, was immediately condemned. He was much given to abstinence and

austerity. When he was not among the first of those to be tried at the Sessions in August, he wept and, fearing he had offended God, went at once to confession, "but when he himself was sent for, he had so much joy that he seemed past himself".

JOHN B. WAINEWRIGHT

Way of the Cross

Way of the Cross

(Also called Stations of the Cross, Via Crucis, and Via Dolorosa). These names are used to signify either a series of pictures or tableaux representing certain scenes in the Passion of Christ, each corresponding to a particular incident, or the special form of devotion connected with such representations.

Taken in the former sense, the Stations may be of stone, wood, or metal, sculptured or carved, or they may be merely paintings or engravings. Some Stations are valuable works of art, as those, for instance, in Antwerp cathedral, which have been much copied elsewhere. They are usually ranged at intervals around the walls of a church, though sometimes they are to be found in the open air, especially on roads leading to a church or shrine. In monasteries they are often placed in the cloisters. The erection and use of the Stations did not become at all general before the end of the seventeenth century, but they are now to be found in almost every church. Formerly their number varied considerably in different places but fourteen are now prescribed by authority. They are as follows:

- 1 Christ condemned to death;
- 2 the cross is laid upon him;
- 3 His first fall;
- 4 He meets His Blessed Mother;
- 5 Simon of Cyrene is made to bear the cross;
- 6 Christ's face is wiped by Veronica;
- 7 His second fall;

- 8 He meets the women of Jerusalem;
- 9 His third fall;
- 10 He is stripped of His garments;
- 11 His crucifixion;
- 12 His death on the cross;
- 13 His body is taken down from the cross; and
- 14 laid in the tomb.

The object of the Stations is to help the faithful to make in spirit, as it were, a pilgrimage to the chief scenes of Christ's sufferings and death, and this has become one of the most popular of Catholic devotions. It is carried out by passing from Station to Station, with certain prayers at each and devout meditation on the various incidents in turn. It is very usual, when the devotion is performed publicly, to sing a stanza of the "Stabat Mater" while passing from one Station to the next.

Inasmuch as the Way of the Cross, made in this way, constitutes a miniature pilgrimage to the holy places at Jerusalem, the origin of the devotion may be traced to the Holy Land. The Via Dolorosa at Jerusalem (though not called by that name before the sixteenth century) was reverently marked out from the earliest times and has been the goal of pious pilgrims ever since the days of Constantine. Tradition asserts that the Blessed Virgin used to visit daily the scenes of Christ's Passion and St. Jerome speaks of the crowds of pilgrims from all countries who used to visit the holy places in his day. There is, however, no direct evidence as to the existence of any set form of the devotion at that early date, and it is noteworthy that St. Sylvia (c. 380) says nothing about it in her "Peregrinatio ad loca sancta", although she describes minutely every other religious exercise that she saw practised there. A desire to reproduce the holy places in other lands, in order to satisfy the devotion of those who were hindered from making the actual pilgrimage, seems to have manifested itself at quite an early date. At the monastery of San Stefano at Bologna a group of connected chapels were constructed as early as the fifth century, by St. Petronius, Bishop of Bologna, which were intended to represent the more important shrines of Jerusalem, and in consequence, this monastery became familiarly known as "Hierusalem". These may perhaps be regarded as the germ from which the Stations afterwards developed, though it is tolerably certain that nothing that we have before about the fifteenth century can strictly be called a Way of the Cross in the modern sense. Several travellers, it is true, who visited the Holy Land during the twelfth, thirteenth, and fourteenth centuries, mention a "Via

Sacra", i.e., a settled route along which pilgrims were conducted, but there is nothing in their accounts to identify this with the Via Crucis, as we understand it, including special stopping-places with indulgences attached, and such indulged Stations must, after all, be considered to be the true origin of the devotion as now practised. It cannot be said with any certainty when such indulgences began to be granted, but most probably they may be due to the Franciscans, to whom in 1342 the guardianship of the holy places was entrusted. Ferraris mentions the following as Stations to which indulgences were attached: the place where Christ met His Blessed Mother, where He spoke to the women of Jerusalem, where He met Simon of Cyrene, where the soldiers cast lots for His garment, where He was nailed to the cross, Pilate's house, and the Holy Sepulchre. Analogous to this it may be mentioned that in 1520 Leo X granted an indulgence of a hundred days to each of a set of sculptured Stations, representing the Seven Dolours of Our Lady, in the cemetery of the Franciscan Friary at Antwerp, the devotion connected with them being a very popular one. The earliest use of the word *Stations*, as applied to the accustomed halting-places in the Via Sacra at Jerusalem, occurs in the narrative of an English pilgrim, William Wey, who visited the Holy Land in 1458 and again in 1462, and who describes the manner in which it was then usual to follow the footsteps of Christ in His sorrowful journey. It seems that up to that time it had been the general practice to commence at Mount Calvary, and proceeding thence, in the opposite direction to Christ, to work back to Pilate's house. By the early part of the sixteenth century, however, the more reasonable way of traversing the route, by beginning at Pilate's house and ending at Mount Calvary, had come to be regarded as more correct, and it became a special exercise of devotion complete in itself. During the fifteenth and sixteenth centuries several reproductions of the holy places were set up in different parts of Europe. The Blessed Alvarez (d. 1420), on his return from the Holy Land, built a series of little chapels at the Dominican friary of Cordova, in which, after the pattern of separate Stations, were painted the principal scenes of the Passion. About the same time the Blessed Eustochia, a poor Clare, constructed a similar set of Stations in her convent at Messina. Others that may be enumerated were those at Görlitz, erected by G. Emmerich, about 1465, and at Nuremburg, by Ketzel, in 1468. Imitations of these were made at Louvain in 1505 by Peter Sterckx; at St. Getreu in Bamberg in 1507; at Fribourg and at Rhodes, about the same date, the two latter being in the commanderies of the Knights of Rhodes. Those at Nuremburg, which were carved by Adam Krafft, as well as some of the others, consisted of seven Stations, popularly known as "the Seven Falls", because in each of them Christ was represented either as actually prostrate or as sinking under the weight of His cross. A famous set of Stations was set up in 1515 by Romanet Bofin at Romans in Dauphine, in imitation of those at Fribourg, and a similar set was erected in 1491 at Varallo by the Franciscans

there, whose guardian, Blessed Bernardino Caimi, had been custodian of the holy places. In several of these early examples an attempt was made, not merely to duplicate the most hallowed spots of the original Via Dolorosa at Jerusalem, but also to reproduce the exact intervals between them, measured in paces, so that devout people might cover precisely the same distances as they would have done had they made the pilgrimage to the Holy Land itself. Boffin and some of the others visited Jerusalem for the express purpose of obtaining the exact measurements, but unfortunately, though each claimed to be correct, there is an extraordinary divergence between some of them.

With regard to the number of Stations it is not at all easy to determine how this came to be fixed at fourteen, for it seems to have varied considerably at different times and places. And, naturally, with varying numbers the incidents of the Passion commemorated also varied greatly. Wey's account, written in the middle of the fifteenth century, gives fourteen, but only five of these correspond with ours, and of the others, seven are only remotely connected with our Via Crucis:

- The house of Dives,
- the city gate through which Christ passed,
- the probatic pool,
- the Ecce Homo arch,
- the Blessed Virgin's school, and
- the houses of Herod and Simon the Pharisee

When Romanet Boffin visited Jerusalem in 1515 for the purpose of obtaining correct details for his set of Stations at Romans, two friars there told him that there ought to be thirty-one in all, but in the manuals of devotion subsequently issued for the use of those visiting these Stations they are given variously as nineteen, twenty-five, and thirty-seven, so it seems that even in the same place the number was not determined very definitely. A book entitled "Jerusalem sicut Christi tempore floruit", written by one Adrichomius and published in 1584, gives twelve Stations which correspond exactly with the first twelve of ours, and this fact is thought by some to point conclusively to the origin of the particular selection afterwards authorized by the Church, especially as this book had a wide circulation and was translated into several European languages. Whether this is so or not we cannot say for certain. At any rate, during the sixteenth century, a number of devotional manuals, giving prayers for use when making the Stations, were published in the Low Countries, and some of our

fourteen appear in them for the first time. But whilst this was being done in Europe for the benefit of those who could not visit the Holy Land and yet could reach Louvain, Nuremburg, Romans, or one of the other reproductions of the Via Dolorosa, it appears doubtful whether, even up to the end of the sixteenth century, there was any settled form of the devotion performed publicly in Jerusalem, for Zuallardo, who wrote a book on the subject, published in Rome in 1587, although he gives a full series of prayers, etc., for the shrines within the Holy Sepulchre, which were under the care of the Franciscans, provides none for the Stations themselves. He explains the reason thus: "it is not permitted to make any halt, nor to pay veneration to them with uncovered head, nor to make any other demonstration". From this it would seem that after Jerusalem had passed under the Turkish domination the pious exercises of the Way of the Cross could be performed far more devoutly at Nuremburg or Louvain than in Jerusalem itself. It may therefore be conjectured, with extreme probability, that our present series of Stations, together with the accustomed series of prayers for them, comes to us, not from Jerusalem, but from some of the imitation Ways of the Cross in different parts of Europe, and that we owe the propagation of the devotion, as well as the number and selection of our Stations, much more to the pious ingenuity of certain sixteenth-century devotional writers than to the actual practice of pilgrims to the holy places.

With regard to the particular subjects which have been retained in our series of Stations, it may be noted that very few of the medieval accounts make any mention of either the second (Christ receiving the cross) or the tenth (Christ being stripped of His garments), whilst others which have since dropped out appear in almost all the early lists. One of the most frequent of these is the Station formerly made at the remains of the Ecce Homo arch, i.e. the balcony from which these words were pronounced. Additions and omissions such as these seem to confirm the supposition that our Stations are derived from pious manuals of devotion rather than from Jerusalem itself. The three falls of Christ (third, seventh, and ninth Stations) are apparently all that remain of the Seven Falls, as depicted by Krafft at Nuremburg and his imitators, in all of which Christ was represented as either falling or actually fallen. In explanations of this it is supposed that the other four falls coincided with His meetings with His Mother, Simon of Cyrene, Veronica, and the women of Jerusalem, and that in these four the mention of the fall has dropped out whilst it survives in the other three which have nothing else to distinguish them. A few medieval writers take the meeting with Simon and the women of Jerusalem to have been simultaneous, but the majority represent them as separate events. The Veronica incident does not occur in many of the earlier accounts, whilst almost all of those that do mention it place it as having happened just before reaching Mount Calvary, instead of earlier in the journey as in our present arrangement.

An interesting variation is found in the special set of eleven stations ordered in 1799 for use in the diocese of Vienne. It is as follows:

- 1 the Agony in the Garden;
- 2 the betrayal by Judas;
- 3 the scourging;
- 4 the crowning with thorns;
- 5 Christ condemned to death;
- 6 He meets Simon of Cyrene;
- 7 the women of Jerusalem;
- 8 He tastes the gall;
- 9 He is nailed to the cross;
- 10 His death on the cross; and
- 11 His body is taken down from the cross.

It will be noticed that only five of these correspond exactly with our Stations. The others, though comprising the chief events of the Passion, are not strictly incidents of the Via Dolorosa itself.

Another variation that occurs in different churches relates to the side of the church on which the Stations begin. The Gospel side is perhaps the more usual. In reply to a question the Sacred Congregation of Indulgences, in 1837, said that, although nothing was ordered on this point, beginning on the Gospel side seemed to be the more appropriate. In deciding the matter, however, the arrangement and form of a church may make it more convenient to go the other way. The position of the figures in the tableaux, too, may sometimes determine the direction of the route, for it seems more in accordance with the spirit of the devotion that the procession, in passing from station to station, should follow Christ rather than meet Him.

The erection of the Stations in churches did not become at all common until towards the end of the seventeenth century, and the popularity of the practice seems to have been chiefly due to the indulgences attached. The custom originated with the Franciscans, but its special connection with that order has now disappeared. It has already been said that numerous indulgences were formerly attached to the holy places at Jerusalem. Realizing that few persons, comparatively, were able to gain these by

means of a personal pilgrimage to the Holy Land, Innocent XI, in 1686, granted to the Franciscans, in answer to their petition, the right to erect the Stations in all their churches, and declared that all the indulgences that had ever been given for devoutly visiting the actual scenes of Christ's Passion, could thenceforth be gained by Franciscans and all others affiliated to their order if they made the Way of the Cross in their own churches in the accustomed manner. Innocent XII confirmed the privilege in 1694 and Benedict XIII in 1726 extended it to all the faithful. In 1731 Clement XII still further extended it by permitting the indulged Stations to all churches, provided that they were erected by a Franciscan father with the sanction of the ordinary. At the same time he definitely fixed the number of Stations at fourteen. Benedict XIV in 1742 exhorted all priests to enrich their churches with so great a treasure, and there are few churches now without the Stations. In 1857 the bishops of England received faculties from the Holy See to erect Stations themselves, with the indulgences attached, wherever there were no Franciscans available, and in 1862 this last restriction was removed and the bishops were empowered to erect the Stations themselves, either personally or by delegate, anywhere within their jurisdiction. These faculties are quinquennial. There is some uncertainty as to what are the precise indulgences belonging to the stations. It is agreed that all that have ever been granted to the faithful for visiting the holy places in person can now be gained by making the Via Crucis in any church where the Stations have been erected in due form, but the Instructions of the Sacred Congregation, approved by Clement XII in 1731, prohibit priests and others from specifying what or how many indulgences may be gained. In 1773 Clement XIV attached the same indulgence, under certain conditions, to crucifixes duly blessed for the purpose, for the use of the sick, those at sea or in prison, and others lawfully hindered from making the Stations in a church. The conditions are that, whilst holding the crucifix in their hands, they must say the "Pater" and "Ave" fourteen times, then the "Pater", "Ave", and "Gloria" five times, and the same again once each for the pope's intentions. If one person hold the crucifix, a number present may gain the indulgences provided the other conditions are fulfilled by all. Such crucifixes cannot be sold, lent, or given away, without losing the indulgence.

The following are the principal regulations universally in force at the present time with regard to the Stations:

- If a pastor or a superior of a convent, hospital, etc., wishes to have the Stations erected in their places he must ask permission of the bishop. If there are Franciscan Fathers in the same town or city, their superior must be asked to bless the Stations or delegate some priest either of his own monastery or a secular priest. If there are no Franciscan Fathers in that place the bishops who have obtained from the Holy See the extraordinary of Form C can delegate any priest to erect the Stations. This

delegation of a certain priest for the blessing of the Stations must necessarily be done in writing. The pastor of such a church, or the superior of such a hospital, convent, etc., should take care to sign the document the bishop or the superior of the monastery sends, so that he may thereby express his consent to have the Stations erected in their place, for the bishop's and the respective pastor's or superior's consent must be had before the Stations are blessed, otherwise the blessing is null and void;

- Pictures or tableaux of the various Stations are not necessary. It is to the cross placed over them that the indulgence is attached. These crosses must be of wood; no other material will do. If only painted on the wall the erection is null (Cong. Ind., 1837, 1838, 1845);
- If, for restoring the church, for placing them in a more convenient position, or for any other reasonable cause, the crosses are moved, this may be done without the indulgence being lost (1845). If any of the crosses, for some reason, have to be replaced, no fresh blessing is required, unless more than half of them are so replaced (1839).
- There should if possible be a separate meditation on each of the fourteen incidents of the Via Crucis, not a general meditation on the Passion nor on other incidents not included in the Stations. No particular prayers are ordered;
- The distance required between the Stations is not defined. Even when only the clergy move from one Station to another the faithful can still gain the indulgence without moving;
- It is necessary to make all the Stations uninterruptedly (S.C.I., 22 January, 1858). Hearing Mass or going to Confession or Communion between Stations is not considered an interruption. According to many the Stations may be made more than once on the same day, the indulgence may be gained each time; but this is by no means certain (S.C.I., 10 Sept., 1883). Confession and Communion on the day of making the Stations are not necessary provided the person making them is in a state of grace;
- Ordinarily the Stations should be erected within a church or public oratory. If the Via Crucis goes outside, e.g., in a cemetery or cloister, it should if possible begin and end in the church.

In conclusion it may be safely asserted that there is no devotion more richly endowed with indulgences than the Way of the Cross, and none which enables us more literally to obey Christ's injunction to take up our cross and follow Him. A perusal of

the prayers usually given for this devotion in any manual will show what abundant spiritual graces, apart from the indulgences, may be obtained through a right use of them, and the fact that the Stations may be made either publicly or privately in any church renders the devotion specially suitable for all. One of the most popularly attended Ways of the Cross at the present day is that in the Colosseum at Rome, where every Friday the devotion of the Stations is conducted publicly by a Franciscan Father.

G. CYPRIAN ALSTON

Use of Wealth

Use of Wealth

The term "wealth" is not used here in the technical sense in which it occurs in treatises on economic subjects, but rather in its common acceptation, synonymous with riches. The purpose of this article is not to discuss the various uses to which wealth may be put with advantage to the public weal or that of the individual, but to determine whether and how far there is any employment of it which is obligatory, i.e. is the subject matter of a positive precept. It is unusual with writers on spiritual subjects to say that the possessors of wealth hold it in trust. This does not mean that they are not in any true sense owners, but only that their ownership is not unqualified to the extent of being unburdened by certain duties in its use. To say that one may act as he likes with his own brings forth the obvious rejoinder, what value is then to be attached to the word *own*? If it be regarded as that which one may dispose of according to his good pleasure, we have a crude instance of a vicious circle. If it be identified simply with the entire store of a rich man's belongings, then the only sufficient defence of individual ownership fails by proclaiming it to be unrestricted. The beneficiaries in part, at any rate, of that trust are the poor. The command to bestow alms applies with special emphasis to those who have an abundance of this world's goods.

In attempting in general to define the validity and quantity of this obligation theologians have recourse to many distinctions. They separate carefully the various degrees of distress to be relieved, and put stress upon the actual financial standing of those who are to afford the succour. Thus the differences are noted between extreme, grave, and ordinary necessity. Likewise, in the condition of those whose duty to give aid is to be ascertained discrimination is made between: those who have only what is barely required to maintain themselves and family; those who over and above the mere necessities of life are provided with what is needed to keep their present social status but nothing more: those who have a real surplus. The wealthy may be deemed to belong to this third class. It is a pagan and selfish view that all of a rich man's income or holdings is demanded for the upkeep or betterment of his social position and that thus

he cannot be said to ever have anything beyond his needs. The accepted Catholic teaching is that those who have a real superfluity of goods (as many other than multi-millionaires have) are bound to help those in want, whatever be their grade of misery. So much at least seems plain from the words of Christ (Matt., xxv, 41-46). It is not so easy to define precisely when this obligation is a grave one. Some hold that it is only so in cases of extreme necessity, i.e. when a person is so situated as to be unable to escape death or some equivalent evil without assistance from others. However, Christ threatens eternal damnation (Matt., la. cit.) for the neglect to succour needs such as those which constantly exist in human society. St. John (I Epist., iii, 17) asks the pertinent question: "He that hath the substance of this world, and shall see his brother in need, and shall shut up his bowels from him: how doth the charity of God abide in him?"

The more probable opinion seems to be that a wealthy man is bound under pain of grievous sin to help those in want, whether the need be grave, i.e. such as would compel descent from one's actual social condition, or merely of the ordinary type, such as is experienced by the general run of the poor. A rich man does not, however, incur the guilt of grievous sin through failure to render aid in each and every instance, but only by habitually refusing to answer the appeals of the unfortunate. The Fathers, such as Basil, Gregory of Nyssa, Ambrose, and Augustine, characterize such persons as false to their trust and robbers of what has been given to them to distribute. The judgment of theologians is, however, not unanimous in this matter. Hence, the confessor could not impose a strict obligation as binding under pain of grievous sin, nor could he consequently refuse absolution because of unwillingness to fulfil this duty.

JOSEPH F. DELANY

Wearmouth Abbey

Wearmouth Abbey

Located on the river Wear, in Durham, England; a Benedictine monastery founded in 674 by St. Benedict Biscop on land given by Egfrid, King of Northumbria. Benedict dedicated it to St. Peter, and ten years later founded the sister house at Jarrow, on the Tyne, in honour of St. Paul. These two monasteries were so closely connected in their early history that they are often spoken of as one; but they were really six or seven

miles apart. The founder brought workmen from France to build his church at Wearmouth in the Roman fashion and furnished it with glass windows (hitherto unknown in England), pictures, and service-books. The abbey was thus the cradle (as Bishop Hedley has said) not only of English art but of English literature, for the Venerable Bede received his early education there. Benedict himself was the first abbot, and the monastery flourished under him and his successors Easterwin, St. Ceolfrid, and others, for two hundred years. It suffered greatly from the Danes about 860, and again, after the Conquest, at the hands of Malcolm of Scotland. Jarrow was destroyed about the same time, but both monasteries were restored, though not to their former independence. They became cells subordinate to the great cathedral priory of Durham, and were thenceforward occupied by a very small number of monks. The names of only two of the superiors (known as *magistri*) have been preserved—those of Alexander Larnesley and John Norton.

In 1545 "all the house and seite of the late cell of Wearmouth", valued at about £26 yearly, were granted by Henry VIII to Thomas Whitehead, a relative of Prior Whitehead of Durham, who resigned that monastery in 1540 and became the first Protestant dean. Wearmouth passed afterwards to the Widdrington family, then to that of Fenwick. The remains of the monastic buildings were incorporated in a private mansion built in James I's reign; but this was burned down in 1790, and no trace is now visible of the monastery associated with the venerable names of Benedict Biscop, Ceolfrid, and Bede. The present parish church occupies the site of the ancient priory church. The tower dates from Norman times, and doubtless formed part of the building as restored after the Conquest.

Jahrhundert* in *Der Katholik* (Sept., 1901).

D.O. HUNTER-BLAIR

William Weathers

William Weathers

Titular Bishop of Amyela; born 12 November, 1814; died at Isleworth, Middlesex, 4 March, 1895. His parents were Welsh Protestants; the mother and children were converted after the father's death. He was educated at the Franciscan school, Baddesley (1823-28), and at Old Hall, where he remained for forty years, and held in turn every office. Before his ordination (1838) he was already a master (1835). He was prefect of

discipline 1840- 43, vice-president and procurator 1843-51, prefect of studies for some years, and president 1851-68. His presidency forms a memorable epoch in the history of the college and of Catholicism in southern England. The years succeeding the restoration of the Hierarchy saw a readjustment of standards. With a view to invigorate the future secular clergy, Manning thought it necessary that the control of the seminary should be in the hands of his newly-formed congregation, the Oblates of St. Charles; and, under his influence, Cardinal Wiseman appointed a staff at St. Edmund's who were neither desired nor welcomed by the president (1855-56). The result was an attempt to manage the college without the president's co-operation. The Westminster Chapter took up the matter, and, after an appeal to Rome, the Oblates were withdrawn in 1861. Dr. Weathers's own appreciation of higher ideals is indicated by the remodelling of the college rules during his presidency, and by the invitation and firm support given to Dr. Ward, a convert and a layman, as lecturer in theology (1852-58). When Archbishop Manning removed the divines to Hammersmith in 1869, he appointed Weathers rector of that seminary, which position Weathers held until the seminary was closed by Cardinal Vaughan in 1892. At his own choice, he then became chaplain to the Sisters of Nazareth at Isleworth. He had been created D.D. in 1845, became a canon of Westminster in 1851, was named a domestic prelate to Pius IX in 1869, and was consecrated bishop, as auxiliary to Archbishop Manning, in 1872. In 1868 he went to Rome as representative theologian of the English bishops in the deliberations preparatory to the Vatican Council. He published, under the name Amyclanus, *An Enquiry into the Nature and Results of Electricity and Magnetism* (1876).

J.L. WHITFIELD

Samuel Webbe

Samuel Webbe

English composer, born in England in 1742; died in London, 29 May, 1816. He studied under Barbaudt. In 1766 he was given a prize medal by the Catch Club for his "O that I had wings", and in all he obtained twenty-seven medals for as many canons, catches, and glees, including "Discord, dire sister", "Glory be to the Father", "Swiftly from the mountain's brow", and "To thee all angels". Other glees like "When winds breathe soft", "Thy voice, O Harmony", and "Would you know my Celia's charms" are even better known. In 1776 he succeeded George Paxton as organist of the chapel of

the Sardinian embassy, a position which he held until 1795: he was also organist of the Portuguese chapel. His "Collection of Motetts" (1792) and "A Collection of Masses for Small Choirs" were extensively used in Catholic churches throughout Great Britain from 1795 to the middle of the last century. If not of a very high order, they are at least devotional, and some are still sung. He also published nine books of glees, between the years 1764 and 1798, and some songs. His glees are his best claim on posterity.

W.H. GRATTAN-FLOOD

Beda Weber

Beda Weber

Benedictine professor, author, and member of the National German Parliament, born at Lienz in the Tyrol, 26 October, 1798; died at Frankfort-on-the-Main, 28 February, 1859. His father wished him to learn a trade as well as the ordinary work of a peasant, and thus Weber became a shoemaker. He was very talented, and completed the high-school course at Bozen in four years, and studied philosophy at Innsbruck during two years. He then entered the Benedictine Abbey of Marienberg in Obervintschgau, changing his Christian name, Johann Chrysanth, to Beda. In the autumn of 1821 he began to study theology at the University of Innsbruck, and on the abolition of the theological faculty there, he continued his course at Brixen. He was ordained in 1824, and went for a short time to the episcopal seminary at Trent to prepare himself for pastoral work; in 1825 he returned to his monastery. After a short time spent in the pastorate he began to teach at the high-school at Meran, where he remained for twenty years. He received calls to professorships from the University of Innsbruck, from the Benedictine lyceum at Augsburg, and from the Crown-Prince of Hohenzollern-Sigmaringen, but remained at Meran until he was called away by the political events of 1848. He was elected deputy to the national Parliament held at Frankfort. His parliamentary labours attracted attention. When the town priest of Frankfort died, Weber succeeded him. His activity and great zeal in the cure of souls was recognized by his bishop, who made him canon of Limburg, episcopal commissary, spiritual councillor, and member of the diocesan court at Frankfort and of the school commission, as well as inspector of the cathedral school. His labours proved too great for his frail constitution and he was soon carried off by apoplexy. Weber's memory has been perpetuated by a fresco in the imperial cathedral, the restoration of which he began.

His chief works are: several poems for a poetical annual, the "Alpenblumen", a translation of St. Chrysostom's "On the Priesthood" (1833); studies upon Oswald's treatise of Wolkenstein, which led to the discovery of a valuable manuscript containing "Titurel" and the "Nibelungenlied", "Das Land Tirol" (1837-8); "Meran und seine Umgebung" (1845); "Die Stadt Bozen und ihre Umgebung" (1849); "Das Tal Passeier und seine Bewohner" (1851), containing an account of Andreas Hofer and the events of 1809; "Erhuldihistorischen Bildern und Fragmenten" (1841); "Lieder aus Tirol" (1842), a selection of his poems; "Blüten heiliger Liebe und Andacht. Aus den Schriften der Giovanna Maria vom Kreuze"; "Giovanna della Croce und ihre Zeit"; "Die Gedichte Oswalds von Wolkenstein" (1847); "Oswald von Wolkenstein und Friedrich mit der leeren Tasche" (1850). Weber was an excellent preacher, and published "Predigten and Tiroler Volk", the proceeds of which he gave to charity. He founded a weekly paper, "Das Frankfurter katholische Kirchenblat" (1853), which two years later became the Sunday supplement of a large Catholic paper, the "Deutschland". He issued a selection of his contributions to this paper under the title of "Cartons aus dem deutschen Kirchenleben" (1858); five years earlier he had collected his contributions to the "Augsburger Postzeitung" and to the "Historisch-politische Blätter" in book form under the title "Charakterbilder".

His autobiography appeared in the *Deutschland* in 1858; see also WACKERNELL, Beda Weber 1798-1858 und die tirolische Literatur, 1800-1846 (1908); SCHEID in Hist. polit. Blatter, XCXXXII, 2.

N. SCHEID

Friedrich Wilhelm Weber

Friedrich Wilhelm Weber

Physician, member of the Prussian House of Deputies, and poet, born at Alhausen, near Driburg, in Westphalia, 25 December, 1813; died at Nieheim, 5 April, 1894. His father was forester for the Count of Asseburg. Weber first attended the village school, then when thirteen years old he went to the gymnasium at Paderborn, and afterwards studied medicine at the University of Greifswald. His talent for poetry had been evidenced at the gymnasium; at the university, as his biographer says, "his ballads grew like wild flowers after a spring shower." After spending two years at Greifswald he went to Breslau, where he became acquainted with Gustav Freitg. By the end of a year, however, he returned to Greifswald, where he obtained a doctorate; thence he went to Berlin, where he passed the state medical examination with great honour. After a brief journey for recreation to southern Germany he settled as a physician at Driburg, where he spent twenty-six years. His practice as a doctor did not keep him from writing

poetry. In 1887 he settled permanently at Nieheim. The numerous honours bestowed upon Weber show how beloved and distinguished he had become. In 1863 he was made "Sanitätsrat" (honorary title given to a distinguished doctor) in recognition of his distinguished medical services; he was made an honorary doctor of philosophy by the academy at Munich, and when he celebrated his semi-centennial as a physician he received the Order of the Red Eagle, fourth class, while three years before his death he received the further honour of the title of "Geheimen Sanitätsrat." Weber's popularity increased still more after he was elected a member of the Prussian House of Deputies. He remained a member of the Centre Party until 1893, when he declined a re-election on account of his health. Because of his wide knowledge and fine character he was greatly admired in political life, and gained many friends not merely among the members of his own party, but also among his political opponents. His political activity had also much influence on his poetry without, however, spoiling it.

As poet Weber was an honour to German Catholics; the name given him "Dreizehnlinde-Weber" (Weber of the thirteen linden trees) is immortal. In three forms of poetry, the epic, lyric, and didactic, he wrote works destined to live. His early poems were frequently imitations of foreign poets, and seldom show independence; it was only in his riper years that the originality of his powers was displayed. He deserves much credit as one of the translators who made Scandinavian and English poetry accessible to Germans. His reputation, however, was founded on his epic, "Dreizehnlinde" (1878). This made Weber celebrated not only in Germany but also throughout the civilized world. The epic enjoyed a wide circulation and has been frequently translated, cast in a melodramatic form, and arranged for the stage. His second work, far superior in poetic value to "Drizehnlinde", is his "Goliath" (1892), which has been reprinted some thirty times. His "Gedichte" (1881) and "Herbstblätter" (1895), published after his death, have also been very popular. His "Marienblumen" (1885) is a proof of his manly piety. Two other religious poems written for special occasions, "Vater unser" and "Das Leiden unseres Heilandes" (1892), are less important. Weber's latest biographer sums up his character as a man and poet thus: "In Weber fine talent and a many-sided education, nobility and purity of thought, the poet and the patriot, were all united into a personality which commanded the greatest respect".

There are three biographers of Weber; the two smaller ones are: KEITER, Friedr. W. Weber, der Dichter von Dreizehnlinde (1884); HOEBER, Friedr. W. Weber, sein Leben u. sein Dichtungen (1894); the larger one is: SCHWERING, Friedr. W. Weber, sein Leben u. sein Werke (1900), it gives all necessary bibliography in the notes. The best commentary of Dreizehnlinde is a literary study by TIBESAR (1895).

N. SCHEID

Heinrich Weber

Heinrich Weber

German Church historian, born at Euerdorf in the Diocese of Würzburg, 21 June, 1834; died at Bamberg, 18 January, 1898. His father, Heinrich Weber, left the Bavarian civil service and entered the employ of Prince von Leinigen-Hardenburg-Dachsburg. the family now lived at Amorbach in the Bavarian Odenwald where the father held the position of seigniorial judge until his death in 1846. Young Weber went to the primary school at Amorbach and then to the Latin school; after the death of his father he continued his studies at Würzburg. In 1849 he entered the seminary and later the gymnasium at Bamberg, where he graduated in 1853. He studied philosophy at the royal Lyceum at Bamberg, and theology at the University of Würzburg. On 9 August, 1857, he was ordained priest at Würzburg by his godfather, Bishop Dr. George Anthony von Stahl, and became chaplain at Sulzbach-on-the-Main on 11 October of the same year. On 18 February, 1859, he was transferred as chaplain to Sonderhofen, and on 21 September, 1869, to Schweinfurt as parish priest. On 5 September, 1865, he was appointed teacher of religion and history at the royal gymnasium at Würzburg; on 7 August, 1871, he was made professor of history at the royal lyceum at Bamberg, a position he held for over twenty-six years, up to the time of his death. Besides his professional duties Weber was a prolific writer. His most important work is the "Geschichte der gelehrt Schulen im Hochstift Bamberg von 1007 bis 1803", which was published in the "Berichte über Bestand und Wirken des historischen Vereins zu Bamberg" (1880-82). During the years 1894 and 1895 Weber also issued in these "Berichte": "Das Bistum und Erzbistum Bamberg, seine Einteilung in alter und neuer Zeit und seine Patronatsverhältnisse". He further published: "Geschichte des Christenlehrunterrichts und der Katechismen im Bistum Bamberg" (Bamberg, 1883); "Bamberger Beichtbücher aus der ersten Halfe des XV. Jahrhunderts" (Kempten, 1884); "Der Kirchengesand im Fürstbistum Bamberg" (Cologne, 1893), issued by the Gorres Society: "Forchheim in der Geschichte" (Forchheim, 1884); "Kronach in der Geschichte" (Dronach, 1885); "Vierzehnheiligen im Frankenthal" (Bamberg, 1884); "Die St. Martinspfarrkirche in Bamberg" (Bamberg, 1891), with a necrology of the Jesuit college at Bamberg for the years 1614-1772; "Geschichte des Freiherrlich von Aufsees'schen Studienseminaris in Bamberg" (Bamberg, 1880). Weber also wrote two biographies: "P. Marquard von Rotenhan S.J. 1691-1733" (Ratisbon, 1885), and "Johann Gotfried von Aschhausen, Fürstbischof zu Bamberg und Wurtzburg 1575-1622" (Wurtzburg, 1889). A treatise published in 1886 had for its topic the veneration of the holy "Fourteen Martyrs". In the series of pamphlets called "Frankfurter zeitgemasse Broschuren" Weber issued:

"Die "Sündenwage" zu Wilsnack" (1887); "Die Trappistenmission in Sudafrika" (1891); "Die Kaiseridee des Mittelalters" (1892); "Bunte Bilder aus dem alten Zunftleben" (1892); "Die Klostersuppe" (1895). Weber also collaborated on the "Historisch-politische Blätter", and other periodicals, on the "Kirchenlexikon" of Wetzer and Welte, for the second edition of which he wrote some fifty articles; he also wrote for the "Katholische Flugschriften zur Wehr und Lehr" (Berlin, published by the "Germania" newspaper). On 8 July, 1899, he received an honorary degree of Doctor of Theology from the University of Würzburg in consideration of his services as a historian of the Church. Weber was not only noted as an historical investigator but also as a model priest who gave all his energies to the promotion of religious life in the City and Diocese of Bamberg. In particular he encouraged the Catholic Press and Catholic associational life; he also did much for a house of the Sisters of the Most Divine Saviour at Bamberg, a branch of the mother-house at Niederbronn, and for twenty-five years was director and confessor to the Sisters at Bamberg.

HEIMBUCHER in Kalender fur katholische Christen, LIX (Sulzbach in the Oberpfalz, 1899), 126-36, with portrait.

MAX. HEIMBUCHER

Karl Maria Friedrich Ernst von Weber

Karl Maria Friedrich Ernst von Weber

Composer, born at Eutin, Lower Saxony, 18 December, 1786; died in London, 5 June, 1826. His father, Franz Anton von Weber, a nobleman of reduced finances and a former army officer, later became a strolling theatrical manager. This gave young Weber an opportunity for acquiring that stage routine and adaptability which stood him in good stead later; but it also interfered with his general and musical education. His father realized the talents of the youth, and saw that he received the best available instruction in violin, piano-playing, and harmony. Karl enjoyed at two intervals and for a considerable time the theoretical guidance of Michael Haydn at Salzburg, and later of Abbé Vogler in Vienna. Upon the latter's recommendation, Weber was appointed in 1804 conductor of the opera at Breslau. On account of his youth he was unable to enforce discipline, and had to relinquish the post at the end of one year. In 1806 he entered the service of Prince Eugene and Prince Louis of Wurtemburg, as private secretary and teacher of music. In 1810 an indiscretion on his father's part caused him to be exiled. The next three years were spent in composing and concertizing. In 1813 he accepted the conductorship of the national opera at Prague, where he continued until called to Dresden in 1816 by the King of Saxony to organize a German opera company in the Saxon capital.

With the assumption of his duties at Dresden, Weber's real significance as a factor in German national art takes shape. The somewhat frivolous spirit of former years now gave way to seriousness. The romantic literature of the day, with its echoes of the Catholic past and its tendency towards a return to the centre of unity, appealed all the more to him on account of his own family traditions. His familiarity with and love of folk-song, and the fiery liberation poetry of the day, all tended to increase in him the intense national spirit to which his own temperament enabled him in turn to give such remarkable expression. He became, through his musical interpretations of the war and emancipation songs, his operas, and works for the pianoforte, not only the founder of the romantic school of music, but also a powerful factor in the movement for throwing-off the foreign yoke in matters political and artistic. The fame of his works spread over Europe. Their dramatic truth, vividness, and the glowing colours of his instrumentation made Weber the lion of every capital. In Feb., 1826, he went to London for the purpose of producing his opera "Oberon", which he had been invited to compose for Covent Garden Theatre. Weber had suffered from phthisis for a number of years, and the strain involved in the London engagement caused him to succumb. He was buried in Moorfields Chapel. Seventeen years later, through the instrumentality of Wagner, his remains were removed to Dresden. Besides "Der Freischutz", the operas "Oberon", "Eurianthe", "Silvana", "Peter Schmoll", "Turandot", "Rubezahl", "Beherscher der Geister", "Abu Hassan" are the best known. Weber also created a large number of instrumental works, chiefly for the pianoforte. As royal director of music he had charge of the music in the Dresden court church. Two masses and a number of smaller works to liturgical texts, probably written in haste for special occasions, are below the standard of his secular works, and lack liturgical character.

BENEDICT, Carl Maria von Weber (London, 1896); BOURNE, Carl Maria von Weber in Great Composers (London, 1904); CROWEST, Carl Maria von Weber (London, 1891); REISSMANN, Carl Maria von Weber, Sein Leben und seine Werke (Berlin, 1886); WEBER, Carl Maria von Weber, tr. SIMPSON (London, 1865).

JOSEPH OTTEN

Henry Weedall

Henry Weedall

Born in London, 6 September, 1788; died at Oscott, 7 November, 1859. Both his parents died during his early childhood; his father was a doctor. He was educated at Sedgley Park (1794-1804), and at Oscott (1804-14), and was ordained priest at Wolverhampton, 6 April, 1814. He had been acting as a junior master at Oscott, and after his ordination he continued to teach classics, assisting also in the care of the Oscott mission.

In the beginning of 1816 he became prefect of studies; and when Thomas Walsh (afterwards bishop of the district) became president (August, 1818), Weedall undertook the vice-presidency, taught Divinity, and had the spiritual care of lay-students and the familia. From the summer of 1821 he had been in effect the president of Oscott, and when Bishop Walsh left Oscott, on succeeding to the vicariate (April, 1826), Weedall was made president in name also. Bishop Walsh named him his vicar-general (14 June, 1828), and obtained for him the degree of Doctor of Divinity (27 January, 1829). He had been elected a member of the Old Chapter, 8 May, 1827. Under his rule Oscott made noteworthy progress, and the present college edifice, two miles from the old, was erected (1826-38). On the division of the vicariates in 1840, Weedall was appointed Vicar Apostolic of the Northern District, with the titular See of Abydos; Wiseman being at the same time made coadjutor to Bishop Walsh and president of Oscott. Weedall went to Rome and obtained leave to decline the vicariate. He was then "in the desert" (head of the preparatory school at Old Oscott, 1841-3, rector at Leamington, 1843-8), until Bishop Ullathorne came to the Central District (August, 1848). Weedall was at once appointed vicar-general, dean of the cathedral church, and temporal administrator of the district and the two colleges; in 1852 he became the first provost of the newly erected Birmingham Chapter. (On 2 July, 1853, he returned to Oscott in its hour of difficulty, sent "to renew that peculiar spirit of ecclesiastical piety and discipline within its walls with which his character imbued it from the first", and, in spite of almost continuous ill health, he was entirely successful. He died at Oscott, and is buried beneath the college chapel. In 1854 he had been made a domestic prelate to Pius IX. Dr. Weedall had considerable reputation as a preacher, and was an occasional contributor to the reviews. The Weedall Chantry perpetuates his memory at Oscott.

HUSENBETH, Life of Mgr. Weedall (London, 1860); BRADY, Episcopal Succession (Rome, 1876-77); AMHERST, Hist. of Oscott College in the Ocotian (1882 sq.); NEWMAN, The Tree Beside the Waters (Funeral Discourse).

J.L. WHITFIELD

Liturgical Week

Liturgical Week

The week as a measure of time is a sufficiently obvious division of the lunar month, and the discussion carried on with much learning as to whether this seven days' period is ultimately of Babylonian origin has no great importance. In any case the week was regarded as a sacred institution among the Jews owing to the law of the Sabbath rest and its association with the first chapter of Genesis. The earliest Christian converts were no doubt tenacious of the usages (so far as they were compatible with the law of

the Gospel) in which they had been brought up. The Sunday, "the first day of the week" (Acts, xx, 7; I Cor., xvi, 2; cf. Apoc., i, 10), soon replaced the Sabbath as the great day of religious observance, but the week itself remained as before. Indeed, there is much to recommend the idea that in the first and second centuries the only commemorations of the great Christian mysteries formed a weekly, not an annual, cycle. Sunday, according to the Epistle of Barnabas (xv), was "the beginning of another world", and the writer further says: "Wherefore also we keep the eighth day for rejoicing, in the which also Jesus rose from the dead and having been manifested ascended into the heavens". Again the Didache (viii) ordains: "Let not your fasts be with the hypocrites; for they fast on the second and fifth days of the week, but do ye fast on the foruth and on the Friday", while in c. xiv we are told "And on the Lord's day of the Lord come together and break bread and give thanks". Altogether it becomes clear from the language of Tertullian, the Apostolic Constitution, and other early writers that the Sunday in each week was regarded as commemorating the Resurrection, and the Wednesday and Friday the betrayal and Passion of Christ. Although this simple primitive conception gave place in time, as feasts were introduced and multiplied, to an annual calendar, the week always retained its importance; this is particularly seen in the Divine Office in the hebdomadal division of the Psalter for recitation. Amalarius preserves for us the particulars of the arrangement accepted in the chapel royal at Aachen in 802 by which the whole Psalter was recited in the course of each week. In its broader features the division was identical with that theoretically imposed by the Roman Breviary until the recent publication of the Apostolic Constitution "Divine afflatus" on 1 Nov., 1911. Moreover, it appears from Amalarius that the Carlovingian arrangement was in substance the same as that already accepted by the Roman Church. Already in the sixth century, St. Benedict had clearly laid down the principle that the entire Psalter was to be recited at least once in the week; indeed a similar arrangement was attributed to Pope St. Damasus. The consecration of particular days of the week to particular subjects of devotion is also officially recognized by the special Office of the Blessed Virgin on the Saturday, by the Friday Masses of the Passion during Lent and by the arrangement of Votive Offices for special week days approved by Pope Leo XIII. For a long time in the early Middle Ages Thursday in the West was regarded as a sort of lesser feast or Sunday, probably because it was the day of the week on which the Ascension fell (cf. Bede, "Hist. Eccl.", IV, 25). Again the Breviary approved after the Council of Trent left certain devotion accretions to the Office, e.g. the Office for the Dead, Gradual Psalms, etc, to be said once a week, particularly on the Mondays of Advent and Lent.

BAUMER, *Histoire du Breviare*, Fr. tr. (Paris, 1905); BURTON and MYERS, *The New Psalter and its Use* (London, 1912); BAUDOT, *The Roman Breviary*, tr. (London, 1909).

HERBERT THURSTON
Francis Richard Wegg-Prosser

Francis Richard Wegg-Prosser

Only son of Rev. Prebendary Francis Haggit, rector of Newnham Courtney, born at Newnham Courtney, Oxfordshire, 19 June, 1824; died near Hereford, England, 16 August, 1911. He was educated at Eton and at Balliol College, Oxford, and graduated (first class in Mathematics) in 1845. In 1849, when he succeeded to the estates of his great-uncle, Rev. Dr. Prosser of Belmont, Herefordshire, he assumed the name of Wegg-Prosser. He was a member of Parliament from 1847 to 1852, when he was received into the Catholic Church by Bishop Grant of Southwark. This event entirely altered his career. After providing facilities for Catholic workshop in his neighbourhood, he built a beautiful church on his estate, which, by agreement with the Bishop of Newport and the superiors of the English Benedictine Congregation, became the pro-cathedral of the diocese. On the adjoining land given by him, a monastery was built, to serve as the novitiate and house of studies of the congregation. Wegg-Prosser was also identified with several Catholic interests. For many years he was a zealous member of the Superior Council of the Society of St. Vincent de Paul, a member of the Catholic union, and a representative of the Diocese of Newport on the Catholic Education Council. In his secular life he was devoted to mathematical science, and particularly to astronomy. He wrote a book, "Galileo and his Judges" (London, 1889), on the question of Galileo, and translated, under the title "Rome and her captors" (London, 1875), the letters collected by Count Henri d'Ideville upon the Roman question of 1867-70. He married Lady Harriet Catherine, daughter of the second Earl Somers; she died in 1893, leaving two sons and two daughters.

J.C. FOWLER
Weingarten

Weingarten

(MONASTERIUM VINEARUM, AD VINEAS, or WEINGARTENSE).

A suppressed Benedictine abbey, near Ravensburg. Wurtenburg, originally founded as a nunnery at Altdorf shortly after 900 by Henry Guelph. Later the nuns were replaced by canons, but again returned in 1036. Guelph III exchanged the nuns for the Benedictine monks of Altomunster in 1047. The monastery being destroyed by fire in 1053, Guelph III cedes his castle on the neighbouring hill to the monks, and thenceforth the

monastery became known as Weingarten. It was so liberally endowed that, though it was six times totally, and twice partially, destroyed by fire, it was always rebuilt, and remained the richest and most influential of the Swabian monasteries. Its discipline never seriously declined, except during the latter part of the fifteenth, and the early part of the sixteenth, century, owing chiefly to the encroachments of a few commendatory abbots and the oppression of the bailiffs. Immediately before its suppression in 1802 it comprised forty-eight monks, ten of whom resided at the dependent priory of Hofen. Its territory extended over six German square miles, with about 11,000 inhabitants. At present the monastery serves as barracks for a regiment of infantry, and the abbey church as the parish church of the town of Weingarten. The church, rebuilt in 1715-24 in the Italian-German baroque style according to the plans of Franz Beer, is the second largest in Wurtemberg.

The greatest treasure of Weingarten was its famous relic of the Precious Blood, still preserved in the church of Weingarten. Its legend runs thus: Longinus, the soldier who opened the Saviour's side with a lance, caught some of the Sacred Blood and preserved it in a leaden box, which later he buried at Mantua. Being miraculously discovered in 804, the relic was solemnly exalted by Leo III, but again buried during the Hungarian and Norman invasions. In 1048 it was re-discovered and solemnly exalted by Pope Leo IX in the presence of the emperor, Henry III, and many other dignitaries. It was divided into three parts, one of which the pope took to Rome, the other was given to the emperor, Henry III, and the third remained at Mantua. Henry III bequeathed his share of the relic to Count Baldwin V of Flanders, who gave it to his daughter Juditha. After her marriage to Guelph IV of Bavaria, Juditha presented the relic to Weingarten. The solemn presentation took place in 1090, on the Friday after the feast of the Ascension, and it was stipulated that annually on the same day, which came to be known as *Blutfreitag*, the relic should be carried in solemn procession. The procession was prohibited in 1812, but since 1849 it again takes place every year. It is popularly known as the *Blutritt*. The relic is carried by a rider, *der heilige Blutritter*, on horseback, followed by many other riders, and many thousand people on foot. the reliquary, formerly of solid gold, set with numerous jewels, and valued at about 70,000 florins, was confiscated by the Government at the suppression of the monastery and replaced by a gilded copper imitation.

Of the abbots the following are deserving of notice: Conrad II von Ibach (1315-36), author of an "Ordo Divini Officii" (ed. Hess, loc. cit. infra), important for the history of liturgy (his Life, written in the fourteenth century, was edited by Giesel in the supplement to "Wurttembergische Vierteljahresschrift", XIII, Stuttgart, 1890, 39-44); Gerwig Blaser (1520-67), leader of the Catholic party of Upper Swabia during the Reformation; Georg Wegelin (1587-1627), during whose abbacy Weingarten enjoyed

its greatest religious prosperity; Sebastian Hyller (1697-1730), who rebuilt the church and monastery; Placidus Benz (1738-45), Dominicus Schinzer (1745-84), and Anselm Rittler (1784-1804), all three men of learning, who promoted the literary activity of their monks. Monks famous for their literary productions are: Gabriel Bucelin (d. 1681); Anselm Schnell (d. 1751), author of theological and ascetical works; Gerard Hess (d. 1802), historian; Meingosus Gaelle (d. 1816), writer on mathematics and physics; Leonard Ruff (d. 1828), author of numerous sermons.

BUSL, Die ehemalige Abtei Weingarten (Ravensburg, 1890); SAUTER, Kloster Weingarten (Ravensburg, 1872); Ausfűrhliche Geschichte des Klosters Weingarten (Ravensburg, 1865); SCHURER, Das hl. Blut in Weingarten (Waldsee, 1880); HESS, Prodromus monumentorum Guelficorum seu catalogus abbatum imperialis monasterii Weingartensis (Augsburg, 1781); LINDNER, Professbuch des Benedictinerklosters Weingarten (Kempten, 1909).

MICHAEL OTT

Nicolaus von Weis

Nicolaus von Weis

Bishop of Speyer, born at Rimlingen, Lorraine, 8 March, 796; died at Speyer, 13 December, 1869. He studied at the seminary at Mainz, when Liebermann was its regent, and was ordained 22 August, 1818. Hereupon he taught the humanities at the seminary (1818-20), was pastor at Dudenhofen (1820-22), canon at the cathedral of Speyer (1822-37), and dean of the cathedral (1837-42). During this time he displayed remarkable literary activity. In conjunction with Andreas Rass, afterwards Bishop of Strasburg, he revised, enlarged, and translated several apologetic, dogmatic, homiletic, and hagiographic works, the best known of which are an enlarged German edition of Butler's "Lives of the Saints" (24 vols., Mainz, 1821-27), translations from the French of Carron, Brillet, Picot, and others, and an extensive compilation of sermons by various authors. He founded the monthly review "Der Katholik" at Mainz, conjointly with Rass, in January 21; he was its sole editor from 1827 to 1841. It is still one of the leading German Catholic monthly periodicals. On 27 February, 1842, he was nominated as successor to Bishop Geissel of Speyer. He was preconized, 23 May, consecrated at Munich by Archbishop Gebtsattel on 10 July, and solemnly enthroned in the cathedral of Speyer on 20 July. He laboured with great success for the advancement of Christian education among the faithful, promoted popular missions and pious ecclesiastical societies, introduced annual retreats for the priests of his diocese, and fostered religious orders, especially female teaching orders. His efforts to establish a theological seminary were frustrated by the Bavarian Government. During his pontificate the cathedral of Speyer

was artistically frescoed by Schraudolph (1846-53), and the renovation of its western front was completed (1858).

MICHAEL OTT

Johann Nikolaus Weislanger

Johann Nikolaus Weislanger

Polemical writer, born at Puttlingen in German Lorraine, 1691; died at Kappel-Rodeck in Baden, 29 August, 1755. After attending the Jesuit high-school at Strasburg, he became a private tutor in 1711. From 1713 he studied philosophy at the University of Heidelberg, then took up theology and prepared for ordination as priest under the direction of the Jesuits at Strasburg. Soon after ordination he was appointed parish priest at Waldulm (1726), and in 1730 at Kappel-Rodeck, but in 1750, on account of severe illness, he was obliged to resign his position. He was a prolific controversialist, widely read in the writings of his opponents. He had a keen mind and was quick at repartee in his polemical treatises. His language is often coarse and rough: he sought "in fine modes of speech from Luther's rhetoric", according to his own statement, to outdo the Protestant controversialists. The most celebrated of his writings is "Friss Vogel oder stirb!", which he composed when a student of theology; it appeared at Strasburg, 1723, and was often reprinted. Other polemical writings are: "Huttenus delarvatus" (Constance and Augsburg, 1730); "Hochst billig und grundliche Antwort auf die unbillig und grundlose Klagen" (Augsburg, 1733); "Auserlesene Merkwürdigkeiten von alten und neuen theologischen Marktschreieren" (Strasburg, 1738); "Schutz-Schrift des scharf angeklagten, doch aber ganz unschuldig befundenen Luthertums" (Strasburg, 1840-). He issued a new edition of Kaufmann's "Katholisch ist gut sterben" (Strasburg, 1744).

ALZOG in Freiburger Diozesan-Archiv, I (1865), 407-436; PAULUS in Strassburger Diozesanblatt, (1900), 103 sqq., 143 sqq.

PATRICIUS SCHLAGER

Johann Baptist Weiss

Johann Baptist Weiss

Born at Ettenheim, Baden, 17 July, 1820; died at Graz, 8 March, 1899. After completing his high-school studies he attended the universities of Freiburg, Tübingen, Heidelberg, and Munich, where he devoted himself to the study of modern languages and history. His first position was that of teacher of French and English at the high-school for the sciences at Freiburg; in 1848 he was appointed by the Government of Baden lecturer on history at the University of Freiburg. In 1848, the year of revolution, he was a strong adherent of the Catholic party. In 1850 he became editor of the "Freiburger Zeitung"; in 1852 he became involved in a quarrel with the Government of Baden and, on this account, accepted a call as professor of Austrian history from the University of Graz, where he laboured during the years 1853-91. For a time he was tutor in history to Archduke Charles Louis and the archduke's travelling companion in journeys to France and Constantinople. In 1899 Weiss was ennobled and made a knight on the Order of the Iron Crown. In 1892 he was appointed a life-member of the House of Lords and in 1893 he received the title of court councillor. Weiss wrote the "Geschichte Alfreds des Grossen" (Schaffhausen, 1852), a carefully prepared work but one that offers nothing new; he also issued "Maria Theresa und der österreichische Erbfolgekrieg" (Vienna, 1863). His chief work is his summary of the history of the world in thirty-two volumes (last edition, Graz, 1900-06). It extends to the close of the Congress of Vienna and gives special attention to the eighteenth century and the French Revolution, both of which it treats exhaustively on the basis of contemporary literature. The work is written from a distinctly Catholic point of view and is not always objective enough in its account of the conflict between the empire and the papacy in the medieval era, of the Reformation and Counter-Reformation, and of the Rationalism of the eighteenth century. Weiss also edited Gfrörer's "Geschichte des XVIII. Jahrhunderts" (Schaffhausen, 1862-74), and "Byzantinische Geschichten" (Graz, 1872-74).

PATRICIUS SCHLAGER

Monastery of Weissenau

Monastery of Weissenau

(Originally OWE_AUGIA, then MINDERLAU-AUGIA MINOR, and finally WEISSEN AU-AUGIA ALBA or CANDIDA).

A suppressed Premonstratensian house near Ravensburg in Wurtemberg, founded in 1145 by Gebizo of Ravensburg, a Guelphic ministerial, and his sister Luitgarde. Its first monks and their provost Herman (1145-75) came from the monastery of Rot (Monchsrot), near Memmingen. The monastery was completed in 1156, and in 1172 the church was dedicated to Our Lady and St. Peter by Bishop Otto of Constance, to whose diocese it then belonged. The number of canons at Weissenau increased so rapidly that in 1183 the newly founded monastery of Schussenried was recruited from there. In 1257 Weissenau was raised to the rank of an abbey, with Henry I (1257- 66) as its first abbot. From the time of its foundation in 1145 till its secularization in 1802, Weissenau continued uninterruptedly as a Premonstratensian monastery. During the first few years of its existence it had a nunnery attached, but this was transferred to the neighbouring Weissenthal by Provost Herman and existed there until the fifteenth century. In the thirteenth and fourteenth centuries Weissenau was repeatedly pillaged by feudatories and passing military troops; its most severe trial came during the Peasants' War, when the canons were temporarily driven from the monastery and the abbot, Jacob Murer (1523-33), replaced by the peasant, Johann Wetzel. Abbot Leopold Mauch (1704-22) began the rebuilding of the monastery in 1708 and of the church in 1717. The church, which is in the Barocco style, was completed in 1724 by his successor, Michael Helmling (1722-4), and the monastery by Anton Unold (1724-65). In all, Weissenau had eight provosts and forty-one abbots. Its last abbot, Bonaventure Brem (1794-1802), died on 4 August, 1818. At the time of its secularization (1802) it had twenty-seven canons, who administered the parishes of Weissenau, St. Jodock, Bodnegg, Grunkraut, Thaldorf, St. Christian, Gornhofen, Obereschach, and Obereisenbach. Its possessions comprised 198 estates and its jurisdiction extended over 137 villages. After its secularization it became the property of the Count of Sternberg-Manderscheid, upon whose death it was bought back by the Government of Wurtemberg in 1835, but resold and turned into a dressmaking and bleaching concern. Since 1892 the buildings are used as an asylum for the insane.

Weissenau acquired considerable fame on account of the reputed relic of the Precious Blood which it received from Rudolph of Habsburg in 1283. Up to 1783 the famous *Blutritt*, similar to that of the neighbouring monastery of Weingarten, took place every year. It consisted in a solemn procession during which the relic was borne by a priest on horseback, accompanied by many other riders and a large crowd of people. The relic is still preserved in the old abbey church, which now serves as the parish church of Weissenau. References to this relic is made in "Lohengrin" (ed. Gorres, p. 84).

MICHAEL OTT

Ignatius von Weitenauer

Ignatius von Weitenauer

Litterateur, exegete, and Orientalist, born at Ingolstadt, Bavaria, 1 November, 1709; died at Salem near Constance, Wurtemberg, 4 February, 1783. His family had been knighted by the Elector of Bavaria, Maximilian Joseph. After the ordinary studies of the Society of Jesus, which he entered 3 November, 1724, he taught for eleven years poetry and rhetoric in several colleges, mainly at Eichstadt. In 1753 he was called to the chair of philosophy and Oriental languages at Innsbruck. When his career as professor was abruptly brought to an end by the suppression of his order in 1773, he followed an invitation of the abbot of the Cistercians of Salmansweiler (near Salem) to continue his literary activity in the monastery, and remained there till his death. Prior to his call to Innsbruck, Weitenauer published several occasional works, festive odes and plays, of high merit. It was, however, during his professorship at Innsbruck that he composed his numerous learned works, the principal of which are: "Biblia sacra" (Augsburg, 1773), a commentary based on a comparison of the Vulgate with the original text; "Lexicon biblicum" (Augsburg, 1758, 1780), an explanation of difficult Hebrew and Greek phrases occurring in the Vulgate, republished frequently, even as late as 1866; "Hierolexicon linguarum orientalium", 1, together with a grammar "Trifolium hebraicum, chaldaicum et syriacum" (Augsburg, 1759); "Modus addiscendi. .linguas gallicam, italicam, hispanicam, graecam, hebraicam et chaldaicam" (Frankfurt on Main, 1756), which he supplemented in 1762 by the "Hexaglotton alterum docens linguas anglicam, germanicam, belgicam, latinam, lusitanicam et syriacam", both of them appearing under the title "Hexaglotton geminum". His extensive linguistic studies bore direct relation to the study of Scripture. Besides he published "Subsidia eloquentiae sacrae" (19 vols., Augsburg, 1764-69). After the suppression of his order appeared "Apparatus catecheticus" (Augsburg, 1775), a collection of 1500 examples, illustrative of the teachings of Christianity. His last great work was a German translation in 12 volumes of both the Old and the New Testament with numerous annotations.

CHARLES F. ARNOLD

Ven. Thomas Welbourne

Ven. Thomas Welbourne

Martyred at York, 1 August, 1605. Nothing is known about about this martyr except the scanty details collected by Bishop Challoner from the early catalogues of the sufferers for the Faith: "Thomas Welbourne was a school-master, a native of Kitenbushel in Yorkshire; and John Fulthering was a layman of the same county, who being zealous Catholics, and industrious in exhorting some of their neighbours to embrace the Catholic faith, were upon that account arraigned and condemned to suffer as in cases of high treason" (II, 12). Neither of their names occur in Peacock's "Yorkshire Catholics in 1604".

EDWIN BURTON

Weld Family

Weld

The name of an ancient English family (branches of which are found in several parts of England and America) which has been conspicuous for its zeal for the Church, and whose main stem has been for many generations settled at Lulworth in Dorsetshire, England.

- 1 Thomas Weld of Lulworth (b. 1750; d. 1810) distinguished himself in relieving the misfortunes of the refugees of the French Revolution. He gave Stonyhurst College, with thirty acres of land, to the exiled Jesuits; he entirely supported the English Poor Clares who had fled from Gravelines; and he founded and maintained a Trappist monastery at Lulworth (now Mount Mellary, Ireland). Indeed he is said to have given half his income in charity. Besides his conspicuous piety and great hospitality (he was one of the first English Catholics to entertain the king, 1789, 1791), he was also from the first a steady supporter of Bishop Milner. He died suddenly at Stonyhurst, where two of his sons also died, one of them, John, being its rector. He had nine sons, and six daughters.
- 2 Thomas, eldest son of the above, cardinal (b. in London, 22 Jan., 1773; d. 1837), continued all his father's liberalities. "There is scarce a religious establishment in the West of England", said Cardinal Wiseman, "which has not some debt of gratit-

ude recorded in his favour." He likewise befriended Milner, and stood almost alone on his side in the celebrated scene in 1813, when the whole of the Catholic committee turned upon the intrepid bishop. On the death of his wife and the marriage of his only daughter (1818) he became a priest (1821), and kept a poor orphanage in London. Asked for as Bishop of Upper Canada, he was consecrated in 1826, but his failing health forced him to resign his vicariate. In 1830, while visiting Rome, he was raised to the cardinalate.

- 3 Joseph, third son of Thomas (b. 27 Jan., 1777; d. at Lulworth Castle, 19 Oct., 1863). He succeeded his brother, Cardinal Weld, at Lulworth, and is remembered as one of the first to build and handle fast-sailing yachts. His best known boat was "The Arrow".
- 4 Humphrey, sixth son, settled at Chidcock Manor, Dorset; and his eldest son,
- 5 Charles, was an artist of some note, to whom we owe the copies of several of the pictures of the English martyrs, the originals of which are now missing. Charles's brother,
- 6 Frederick Aloysius (q.v.) was Governor of Western Australia.
- 7 James, the seventh son, was father of Mgr. Francis Weld, author of "Divine Love, and the Love of God's Most Blessed Mother" (London, 1873).
- 8 George, the eighth son (of Leagram), had as his fourth son,
- 9 Alfred Weld (b. 1823; d. 1890), a conspicuous member of the English Jesuits. Alfred filled all the higher posts of trust in the province (provincial, 1864-70) and undertook the editorship of "Letters and Notices", "The Month", and "The Messenger". As English assistant during the critical years 1873-83, he carried out with credit several confidential commissions both for the pope and for his order. Eventually he went out to the Zambesi mission, South Africa, of which he had been the foster father, and died amid the hardships of the recent settlement. He was the author of "The Suppression of the Society of Jesus in the Portuguese Dominions" (London, 1877).

The main stem of the family has now assumed the additional name of Blundell. The English "Catholic Who's Who" (1912) mentions three Weld-Blundells and six Welds.

J.H. POLLEN

Frederick Aloysius Weld

Frederick Aloysius Weld

Youngest son of Humphrey Weld, born at Chidcock Manor, Dorset, 1823; died there, 1891. He was educated at Stonyhurst and Fribourg, and was an early colonist of New Zealand, arriving there in 1843. He became interested in pastoral pursuits and explored much of the country in both islands, being the first to ascend the Awatere Valley and to discover the overland passes from Marlborough to Canterbury. He entered politics, and in 1853 became member of the House of Representatives of New Zealand, in 1854 special member of the Executive Council, in 1860 Minister of Native Affairs in the Stafford Ministry, and in 1864 premier and chief secretary. The chief item of his policy, which turned the tide of the Maori war, was embodied in the original proposition made by him to the governor and to which the new cabinet adhered:

Mr. Weld is of opinion that the system of double government by Governor and Ministers has resulted in evil to both races of Her Majesty's Subjects in New Zealand;-he recognizes the right of the Home Government to insist upon the maintenance of this system, so long as the Colony is receiving the aid of British troops for the suppression of internal disturbances; he is prepared to accept the alternative and will recommend the Assembly to request the Home Government to withdraw the whole of its land force from the Colony, and to issue such instructions to the Governor as may enable him to be guided entirely by the recommendations of his constitutional advisers, excepting only upon such matters as may directly concern Imperial interests and the Prerogatives of the Crown.

He carried on the confiscation of the Waikato, carried a native rights bill, opened native land courts, and raised the question of Maori representation. In a question of raising additional revenue by stamp duties Weld's ministry was only saved from actual defeat by the casting vote of the speaker and Weld immediately resigned. Though he only retained the office a year, he left a mark upon the administration of New Zealand. In January, 1866, he announced his retirement from public life, on the ground of ill

health, in a letter to the Electors of Canterbury, and shortly sailed for England. In 1856 he married Mena, daughter of Ambrose Lisle March Phillips de Lisle of Farenden Park, Leicestershire, and had six sons and seven daughters. In 1869 he was appointed Governor of West Australia (1869-75) and subsequently became Governor of Tasmania (1875-80) and Singapore and the Straits Settlements (1880- 87). He made his mark in each of these offices, but especially in the development of the Malay Peninsula. While Governor of Singapore he was created K.C.M.G. and later received the Grand Cross of the same order from Queen Victoria. He was also a Knight of the Roman order of Pius IX. Sir Frederick retired from public life after a brilliant and honourable career, settling down at Chidcock Manor, which estate he had inherited from his brother. He is the author of "Hints to intending sheep farmers in New Zealand" (London, 1851), and "Notes on New Zealand Affairs", which contains a sketch of his life policy.

EVERARD A. WELD

Prefecture Apostolic of Welle

Prefecture Apostolic of Welle

Located in the extreme north of Belgian Congo, Africa, separated by a Decree of the Propaganda on 12 May, 1898, from the Vicariate Apostolic of the Congo Free State, and committed to the care of the Canons Regular Premonstratensian of Tongerloo, Belgium. Its limits were on the North the Vicariate Apostolic of Central Africa or Sudan; on the East the Vicariate Apostolic of Northern Nyanza; on the West a line drawn from the junction of the Rivers Uelle and Ubanghi to the confluence of the Itimbri and the Congo; on the South the watershed of the southern tributaries of the Itimbri, eastwards to the 30° E. longitude. By a Decree, however, of 16 June, 1910, the northern boundary was extended so as to include a portion of the Vicariate Apostolic of the Sudan and now along the River Bomer and the watershed of the Nile and the Congo to where it crosses the 4° S. latitude.

Statistics

Inhabitants 1,500,000, mostly fetichists; Catholics 922; catechumens, 1951; 11 priests; 9 lay brothers; 2 houses of the Sisters of the Sacred Heart of Mary of Berlaer, with 8 nuns, 65 catechists; 3 principal stations: Imbembo, Amadi, and Gambari; 41 secondary posts; 3 schools with 445 pupils; 1 catechist school at Imbembo with 100

pupils, 2 orphanages with 380 orphans; 15 workshops with 109 pupils. More than 20 dialects or languages are spoken in the prefecture; the missionaries use the Bangala tongue. The first and present prefect Apostolic, Rt. Rev. Leo Derikx, was born at Neerfelt, Belgium, 20 July, 1860, entered the Premonstratensian novitiate on 8 October, 1878; was professed, 8 May, 1882; ordained, 20 December, 1884; and appointed prefect Apostolic in 1898. He resides at Imbembo in the south-western portion of the prefecture.

A. MACERLEAN
Archdiocese of Wellington

Archdiocese of Wellington

(WELLINGTONIENSIS).

Located in New Zealand, originally formed part of the Vicariate of Western Oceania erected by the Holy See in 1835. In 1836 New Zealand and the islands of the Western Pacific were entrusted by Gregory XVI to the then newly-founded Society of Mary, as a field for their missionary labours. Owing to the difficulty of communication at that time between the numerous islands forming the vicariate, it was thought that success could be better achieved by making New Zealand a separate vicariate. This was done in 1842, and Mgr. Pompallier was chosen to administer it as Titular Bishop of Amasia, and vicar Apostolic. Very soon the need was felt for a further division, as British colonists began to arrive in great numbers, once New Zealand was made a British colony. On 22 Jan., 1840, the first body of immigrants arrived and founded the town of Wellington. About the same time (29 Jan., 1840) the sovereignty of Queen Victoria over the Islands of New Zealand was proclaimed. A compact called the Treaty of Waitangi was entered into between the queen's representative and the prominent native chiefs, whereby all rights and powers of sovereignty were ceded to the queen, all territorial rights being secured to the chiefs and their tribes. New Zealand was then constituted a dependency of New South Wales, but on 3 May, 1841, was proclaimed a separate colony. The colony (as it then was) was divided into two vicariates in 1843, the Province of Auckland forming one vicariate, and Wellington, with the rest of the colony, the other. When the division of territory was made, Mgr. Philip Joseph Viard, who had for some time been acting as coadjutor to Mgr. Pompallier, became administrator of the Wellington vicariate, at the same time remaining coadjutor of Auckland. By Brief of 3 July, 1860, he ceased to be coadjutor of Auckland, and was appointed the first Bishop of Wellington. An Irish Capuchin, Rev. J.P. O'Reilly, was the first resident priest in Wellington, where he laboured from 1843 until his death in 1880.

The Archdiocese of Wellington occupies territory in both the main islands, comprising the following provinces: Taranaki, Wellington, and Hawkes Bay in the north island, and the greater portion of Nelson in the south island. Its area is about 34,000 sq. miles, being somewhat larger in size than Ireland. Wellington, the capital, owes its selection to the commanding position it occupies in Port Nicholson, the safest harbour in the dominion. Port Nicholson is an inlet of Cook Strait, the waterway dividing the north from the south island. The original capital was Auckland, but it had the disadvantage of not being centrally situated for the colony. The Governors of New South Wales, Victoria, and Tasmania were asked each to appoint one commissioner for the purpose of determining the best site in Cook Strait. These gentlemen, having made a personal inspection of all suitable places, arrived at the unanimous decision that "Wellington in Port Nicholson was the site upon the shores of Cook Strait which presented the greatest advantages for the administration of the Government of the Colony". The seat of government was therefore, in accordance with the recommendation of the commissioners, removed to Wellington in 1865. Wellington was made an archiepiscopal and metropolitan see on 13 May, 1887. The population of the city is now 72,000. As the European population of New Zealand continued to increase rapidly, the Provinces of Otago and Southland, with the adjacent islands, were separated from Wellington in 1869, and erected into a new see, with Dunedin as the seat. Dr. Patrick Moran was transferred from South Africa to the newly-erected see, and became its first bishop. In 1887 a further division of the territory of the Diocese of Wellington was considered advisable. The Provinces of Canterbury, Westland, and the southern portion of Nelson were detached to form the new See of Christchurch, and Dr. John J. Grimes, of the Society of Mary, became its first bishop.

Mgr. Philip Joseph Viard, the first Bishop of Wellington, was born at Lyons, France, in 1809. He made his religious profession in the Society of Mary in 1839, and left France the same year for New Zealand. He spent some time in the islands of the Pacific, notably Wallis, Futuna, and New Caledonia. In 1846 he was consecrated bishop and coadjutor to Mgr. Pompalier by Dr. Polding of Sydney. In 1850 he left Auckland to take up his residence in Wellington. In 1868 he paid a visit to Rome, and was present at the Vatican Council. He returned to Wellington in 1871, and died in 1872. Dr. Francis Redwood, the first Archbishop of Wellington, and Metropolitan of New Zealand, was born in the Diocese of Birmingham, England, in 1839. When he was only three years old the Redwood family came to New Zealand and settled in the Nelson district. At an early age he was sent to France to receive his education, and after a distinguished collegiate course he resolved to enter the ecclesiastical state. He accordingly made his religious profession in the Society of Mary, and was ordained priest in 1865. For some years after his ordination he lectured on philosophy and theology at Dundalk

and Dublin, Ireland. On the death of Mgr. Viard he was chosen Bishop of Wellington, and consecrated on 17 March, 1874, by Cardinal Manning. On 13 May, 1887, Dr. Redwood was created archbishop by papal Brief, and became Metropolitan of New Zealand. During his long life he has seen the Church in New Zealand develop from a few scattered families-the mustard seed of the Gospel-to the rich and vigorous growth of the present day.

STATISTICS

Out of a total population of 320,000 in the archdiocese, 47,000 are Catholics, according to the census of 1906. The vast majority of these came from Ireland, or are of Irish descent. In addition there are about 1500 Catholics amongst the native or aboriginal population. The number of districts in the archdiocese is 34; churches, 112; clergy, secular, 29, regular, 60, total, 89; religious brothers, 30; nuns, 367. The institutions number: one college for boys (St. Patrick's Wellington, under the charge of the Society of Mary); boarding and high schools, 14; primary schools, 34; orphanages, 4; industrial school for boys, 1; homes for incurables, 2; inmates, 91. Total number of children receiving Catholic education in Catholic schools, 4000.

MORAN, History of the Catholic Church in Australasia (Sydney, s.d.); WILSON, The Church in New Zealand (Dunedin, 1910); New Zealand Official Year Book (1908); Annals of the Society of Mary (Lyons).

JOHN BOWDEN

Ven. Smithin Wells

Ven. Smithin Wells

English martyr, born at Brambridge, Hampshire, about 1536; hanged at Gray's Inn Lane, London, opposite his own house, 10 December, 1591. He was the youngest of the five or six sons of Thomas Wells of Brambridge, by Mary, daughter of John Mompesson. It is not known when or whom he married. For many years he conformed, and received the Protestant communion, and for six years (probably 1576-82) kept a school for young gentlemen at Monkton Farleigh, Wiltshire. On 25 May, 1582, the Privy Council ordered a search to be made for him, and in that year or 1583 he was reconciled to the Church. In 1585 he came to London where he took a house in Gray's Inn Lane. On 4 July, 1586, he was discharged from Newgate on bail given by his nephew, Francis Parkins of "Weton", Berkshire. On 9 August, 1586, he was examined for supposed complicity in the Babington plot, and on 30 November, 1586, he was discharged from the Fleet prison. He was again examined 5 March, 1587, and on this occasion speaks of the well known recusant, George Cotton of Warblington, Hampshire,

as his cousin. On 1 Nov., 1591, Edmund Gennings was taken saying Mass at Wells's house in his absence, but in the presence of Mrs. Wells and the venerable martyrs Polydore Plasden, Brian Lacy, Sydney Hodson, and John Mason. According to one account Ven. Eustace White was also taken at this Mass. When Wells returned to his house he also was arrested. All the above-mentioned martyrs, included Mrs. Wells (but with the possible exception of Brian Lacy), were indicted at Westminster, 4 Dec., 1591, and were condemned, 5 Dec., under 27 Eliz. C. 2. According to another account they were arraigned, 6 December. Mrs. Wells was reprieved, and died in prison in 1602. All the rest suffered on the same day, Gennings and Wells at Gray's Inn Lane, and the other five at Tyburn. Of his brother-in-law Gerard Morin, to whom the letter printed by Bishop Challoner is addressed, no information is to hand. Swithin's eldest brother Gilbert, alive in 1598, suffered much in purse and person for the Faith. Another brother, Henry, of Purbeck, who entered Winchester College in 1541, aged twelve, and was a fellow of New College, Oxford, 1549-50, was also a Catholic. Our martyr was a follower of Blessed Thomas More and jested both at his apprehension and at his execution; but his last words were of pardon to his persecutor, Topcliffe: "God pardon you and make you of a Saul a Paul. . . I heartily forgive you."

JOHN B. WAINEWRIGHT

Wells in Scripture

Wells in Scripture

It is difficult for inhabitants of a more humid climate to realize the importance which a country like Palestine attaches to any source of fresh water. The Litâny and the Jordan are the only rivers of any size; perennial brooks are very scarce and the wadis, while numerous and impetuous in the rainy season, are dry during the rest of the year. Job (6:16-17) aptly compares faithless friends to these torrent-beds, swollen in the spring, but vanishing in the hot weather. Five months of parching summer heat pass without rain, and when the hot *sherkiveh*, the Arabian sirocco, blows from the desert, life itself seems a burden. Nothing will save the shepherd and his flock, the farmer and the caravan from perishing with thirst, but unfailing springs and reservoirs of uncontaminated water. Hence the Son of Sirach twice enumerates water as the first among the "principal things necessary for the life of man" (Song of Songs, 29:27; 39:31).

From time immemorial, to own a well and to possess the surrounding country were synonymous terms ([Proverbs 5:15-17](#)). On the other hand, so serious might be the disputes arising out of the use or claim of a well that the sword was appealed to as the sole arbiter ([Genesis 26:21](#); [Exodus 2:17](#); [Numbers 20:17](#)). If the approach of an enemy was feared, his progress might be seriously hampered, if not altogether frustrated, by stopping or destroying the wells along his route (II Par., 32:3). The enemy, in his turn, might reduce a city to starvation and submission by cutting off its water supply, as Holofernes did when besieging Bethulia (Jud., 7).

Springs and fountains were the centres of ancient Hebrew life. To the wells, the shepherd of the sun-baked hillside would lead his flock of sheep and goats out of the thirsty stretches of rock and prickly shrubs. Long caravans, legions of soldiers, and solitary wayfarers would hasten to wells towards sunset to refresh their weary limbs and forget the blazing heat of noon. Here the women of the neighbourhood would gather to gossip and to replenish their jars. Wells and springs and cisterns have inspired the Hebrew poets with some of their choicest images, and Christ Himself used them to illustrate His own truths. They have become landmarks in the topography of Palestine and links in its varied history extending from Abraham, who dug wells near Gerara some 4000 years ago, down to Christ, Who, sitting on the brim of Jacob's Well, taught the Samaritan woman the passing of the Old Covenant.

A spring, (*pede, fons*) is the "eye of the landscape", the natural burst of living water, flowing all year or drying up at certain seasons. In contrast to the "troubled waters" of wells and rivers ([Jer. 2:18](#)), there gushes forth from it "living water", to which Jesus aptly likened the grace of the Holy Ghost ([John 4:10](#); 7:38; cf. [Isaiah 12:3](#); 44:3). How highly these natural springs were valued is clear from the number of towns and hamlets that bear names compounded with the word *Ain (En)* -- for example, Endor (spring of Dor), Engannin (spring of gardens), Engaddi (spring of the kid), Rogel or En-rogel (spring of the foot), Ensemes (spring of the sun), etc. But springs were comparatively rare, and the dense population was compelled to have recourse to artificial sources. Holy Writ is always careful in distinguishing the natural springs from the wells (*psrear, puteus*), which are water pits bored under the rocky surface and having no outlet. Naturally, they belonged to the person who dug them, and he alone could give them a name. Among the Arabs of today they are the property of tribes or families; a stranger desiring to draw water from them is expected to give a bakshish. Many names of places, too, are compounded with *B'er*, such as Bersable, Beroth, Beer Elim, etc.

Cisterns (*lakkos, cisterna*) are subterranean reservoirs, sometimes covering as much as an acre of land, in which the rainwater is gathered during the spring. Their extreme necessity is attested by the countless number of old, unused cisterns with which the Holy Land is literally honeycombed. They may be found along the roads,

in the fields, in gardens, on threshing-floors, in the hamlets, and above all in the cities. Jerusalem was so well supplied with them that in all the sieges no one within its walls ever suffered from want of water. Cisterns were hewed into the native rock and then lined with impervious masonry and cement. As their construction involved great bodily labour, it is easily understood why Jehovah promised to the children of Israel, when coming out of Egypt, the possession of cisterns dug by others as a special mark of favour ([Deut. 6:11](#); [II Esd. 9:25](#)). If the cement of the cistern gave way, the reservoir became useless and was abandoned. It was then one of the "broken cisterns, that could hold no water" ([Jer. 2:13](#)). The mouth of wells and cisterns was generally surrounded by a curb or low wall and closed with a stone, both to prevent accidents and to keep away strangers. If the owner neglected to cover the cistern, and a beast fell into it, the Mosaic law obliged him to pay the price of the animal ([Exodus 21:33-34](#); cf. [Luke 14:5](#)). Sometimes the stone placed on the orifice was so heavy that one man was unable to remove it ([Genesis 29:3](#)). When dry, cisterns were used as dungeons, because, narrowed at the top, like "huge bottles", they left no avenue open for escape ([Genesis 37:24](#); [Jeremiah 38:6](#); I Mach. 7:19). They also offered convenient places for hiding a person from his pursuers (I Kings, 13:6; [II Kings 17:18](#)). The methods used for raising the water were the same as those in vogue all through the ancient East (cf. EGYPT).

A.C. COTTER

Bartholomeus Welser

Bartholomeus Welser

German merchant prince, born at Augsburg, 1488; died at Amberg, near Turkheim, Swabia, 1561. His father was Anton Welser, an important merchant of Augsburg. Bartholomeus entered his father's business at an early age. After Anton's death (1518) he bought the family homestead and with his brother Anton founded the firm of "Welser and Company", which lasted until 1553. Their business constantly increased, and the brothers granted large loans to Charles V, who in 1532 made Bartholomeus a nobleman of the empire, and gave him in 1541 a general safe-conduct and in 1546 the privilege of exemption from some local courts. By treaty dated 27 May, 1528 the Welsers, through their agents, Ehinger and Sailer, received from the Spanish Crown the rights of supremacy in Venezuela; they monopolized the import and export trade of the country, and established a colonizing scheme there. The first regent of the colony, Ambrosius Ehinger (Dalfinger), explored the interior of Venezuela. Disputes with the Spanish Government soon arose and banished any hopes for rich profit from the undertaking. In 1541 the Spanish Government desired to bring suit, against the governors of the colony, and in 1546 Bartholomeus's son was murdered. Although the province

was regarded as their property until 1551, it was taken from the Welsers by legal decision in 1556 and went to the Spanish Crown. The German colonizers have been accused of cruelty, but their uprightness and conscientiousness are now fully proved. Bartholomeus Welser frequently took part in the public affairs of Augsburg. Unwilling to oppose the emperor in the Smalkaldic War, he obtained from the council three years' leave of absence, and advanced large sums of money to Charles V. In 1547 he returned to Augsburg and in 1553 retired from business. From 1548-56 he was a member of the privy council. His interest in learning is evident from marginal notes he made on a copy of the Augsburg edition (1548) of Suetonius. Whereas his near relations accepted Lutheranism, Welser's family remained loyal Catholics.

KLEMENS LOFFLER

Welsh Church

Welsh Church

In giving separate consideration to the Church of Wales, we follow a practice common among English historical writers and more particularly adopted in the collection of "Councils and Ecclesiastical Documents" of Haddan and Stubbs. There seems, however, no sufficient reason for emphasizing the distinction made by these last authorities between "the British Church during the Roman period" (A.D. 200-450), "the British Church during the period of Saxon Conquest" (A.D. 450-681), and "the Church of Wales" (A.D. 681-1295). The term Welsh Church sufficiently covers these separate headings, though it will be convenient to treat the subject according to the same chronological divisions.

ROMAN PERIOD (200-450)

Both Tertullian (c. 208) and Origen (c. 240) use language that implies that the Gospel had been preached in Britain. The former speaks (*Adv. Jud.*, vii) of "the regions of Britain inaccessible to the Romans but subdued to Christ"; the latter of "the power of our Lord and Saviour which is with those who are separated from our world in Britain" (*Hom. vi in Luc.*, 1, 24). These passages may be somewhat rhetorical, but if we do not press the question of date there is confirmatory evidence for at least some acceptance of Christianity in Roman Britain. To begin with, both Constantius (A.D. 480), in the uninterpolated portions of his Life of St. Germanus of Auxerre, and the

British Christian writer Gildas (A.D. 547) speak of the martyrdom of St. Alban during the Roman period. Again in 314 three British bishops from York, London, and probably Lincoln seem to attended the Council of Arles, and British bishops were present, if not at Nicaea (325) and at Sardica (343), yet certainly at Ariminum (359), where the line they adopted drew attention to their nationality. Archaeology also tells us something, if not much, of the presence of Christians in these islands before the close of the Roman period. The Chi-Rho symbol has been found in mosaics and building stones as well as upon miscellaneous objects; the formulae "Vivas in Deo" and "Spes in Deo" with the "Alpha-Omega" occur stamped on rings or pigs of lead, and in particular the excavations at Silchester have brought to light a small building in which antiquaries are agreed in recognizing a Christian basilica. Further, there is the still existing Church of St. Martin's at Canterbury, which according to the testimony of Bede (*Hist. Eccl.*, I, xxvi), and in the opinion of some experts, is of Roman work. (For all which see Haverfield in "English Historical Review", XI, 417-430.) It should be added that certain authorities, e.g. Professor Hugh Williams, maintain that such Christianity as existed in Britain at this early date attached only to the Roman settlements, and that there is no evidence of anything which could be called a native or Cymric Christian Church. The evidence for either view is necessarily inconclusive, but the importance and numerical strength of the Welsh Church in the next period seem to point to the foundations having been laid before the Roman legions were withdrawn. Moreover, towards the close of the Roman period, indeed from early in the fourth century, the literary evidence for an active Christian organization in Britain becomes very strong. The allusion which we find in St. Hilary of Poitiers, St. Athanasius, Sulpicius Severus, etc. (see Haddan and Stubbs, I, 8-16), though slight in themselves, cannot be entirely set aside.

One piece of evidence, however, formerly appealed to by many Catholic controversialists, must now be abandoned. Bede tells us (*Hist. Eccl.*, I, 4) that in the years 156, in the time of Marcus Aurelius and Lucius Verus, "while Eleatherus, a holy man, presided over the Roman church, Lucius, King of Britain, sent a letter to him entreating that by his command he might be made a Christian. He soon obtained the fulfillment of his pious request and the Britons preserved the faith which they received, uncorrupted and entire, in peace and tranquility until the time of the emperor Diocletian". These dates, to which Bede himself did not consistently adhere (cf. *De sex aetat.*, s.m., 180), are impossible, for St. Eleutherus, at earliest, became pope in 171. But, apart from this difficulty, it is now generally admitted, e.g. by Duchesne and Kirsch, that the evidence is inadequate to support so startling a conclusion. Bede's statement is at best derived from the recension of the "Liber Pontificalis" known as the "Catalogus Felicianus", compiled about the year 530, in which we are told that Pope Eleutherus received a

letter "a Lucio Britannio rege" asking for Christian instruction. In the earlier recension of the "Liber Pontificalis" the Lucius episode is wanting. Harnack conjectures that this entry arose from a confusion with Lucius Abgar IX of Edessa, who seems about this period to have become a Christian and who in some early document was possibly described as reigning "in Britio Edessenorum", i.e. in the Britium or Birtha (the citadel) of Edessa. At any rate we are told that the Apostle St. Thaddeus, whose connection with Edessa is well known, was buried "in Britio Edessenorum", while it is quite conceivable that the word Britio, if it occurred, may have been mistakenly emended into Britannio and thus have given us a Lucius, King of Britain (see Harnack in the "Sitzungsberichte" of the Berlin Academy, XXVI and XXVII, 1904). This conjecture is by no means certain, but the difficulties against accepting the story of the letter of the supposed Lucius are considerable. Gildas and Aldhelm, who might be expected to refer to the tradition, are both silent, and, although they are equally silent about the mission of St. Germanus, the first introduction of Christianity is a matter of more fundamental interest. The Lucius story is found in Nennius, and Zimmer on that account believes it to have arisen in Britain, but Nennius is a writer of the ninth century and he calls the pope "Eucharistus". Again the name Lucius is not Celtic, a difficulty which Nennius seems to have felt, and he has accordingly celticized the name into "Llever maur, id est, Magni Splendoris", the great light. The impression thus given, that we must be assisting at the evolution of a myth, is much increased by the later developments. William of Malmesbury makes Eleutherus's missionaries, named Phaganus and Deruvianus, found a Church at Glastonbury. Rudborne makes Lucius endow the bishops and monks of Winchester with various lands, while the Triads connect the story directly with Llandaff, where "Lleirwg made the church which was the first in the isle of Britain". Further, somewhere in the eleventh century, as Liebermann has shown, a forger who had distinguished himself in other fields fabricated a letter which is supposed to have been sent by Pope Eleutherus to the British king.

On the other hand, in contrast to this legendary matter, we have the generally accepted fact of the visit twice paid to Britain by St. Germanus of Auxerre, in 429 and 447, with the purpose of confuting the Pelagians, an object which seems to take for granted a Christianity already widely spread. The Life of St. Germanus by Constantius has been interpolated (cf. Lewison in "Neues Archiv", XIX), but much of this account belongs to the primitive redaction and is confirmed by Prosper of Aquitaine. Even the story of the "Alleluia Victory" and of the observance of Lent may be true in substance, and the whole evidence sets before us a state of things in which Christianity was the prevailing and accepted religion. With this agrees all that we know of the heretic Pelagius and of his teaching. He was undoubtedly a monk and it is difficult to believe that he could have adopted the monastic profession anywhere but in the land of his

birth. Zimmer has maintained that Pelagius was an Irishman and that his heresy found acceptance in Ireland rather than in Britain. But Zimmer's views have been severely criticized (cf. Williams in "Celtische Zeitschrift", IV, 1903, 527 sq.), and are not commonly admitted. Professor Williams, indeed, as against Conybeare (*Cymrodorion Transactions*, 1897-98, 84-117), casts doubt upon the generally heretical character sometimes attributed to British Christianity, and certainly the tone of the writings of Fastidius, described as a "Bishop of the Britons" (c. 420), is such as seems reconcilable with orthodox interpretation.

THE PERIOD OF THE SAXON CONQUEST (A.D. 450-681)

The writings of Gildas, usually assigned to the year 547, throw a fitful and somewhat lurid light upon British Christianity during the earlier part of this period. No doubt something of the gloom of this jeremiad may be due to the idiosyncrasies of the writer. He seems to have belonged entirely by sympathy to the class, which after the departure of the legions, still preserved something of Roman culture. Also it is likely enough that the instability of all institutions, the stress and sufferings of a people continually harried and overmatched by invaders who were relatively barbarian, did produce an age of great moral degeneracy. Thus the vituperation with which Gildas lashes the vices of the Welsh princes and denounces the clergy has very probably serious foundation. But just as the tide of Saxon conquest was more than once checked, as for example by the British victory at the Mons Badonicus in 520, so there is reason to believe that there was a brighter side to the picture of evil and disaster which Gildas paints with a zest which was more a matter of temperament than conviction. The succession of bishops was evidently kept up, as we learn subsequently from the history of St. Augustine. Monastic life at the same epoch would seem to have flourished exceedingly. From the fact that Pelagius, as already noticed, was a monk and that St. Germanus is said to have founded a monastery, it seems probable that some kind of cenobitical life had begun in Britain before the end of the fifth century. Possibly this departure was due to a disciple of St. Martin of Tours who settled in Britain, but more probably the British pilgrims, who, as we learn from St. Jerome, made their way to the East to visit the Holy Land, brought back glowing accounts of what they had witnessed around Jerusalem or in the Egyptian deserts. The strongly Oriental characteristics of the Celtic Rite as a whole are in all probability due to a similar cause. In any case, both such direct testimony as we possess and the parallel case of Ireland point to the practice of asceticism on a vast scale, and it is possible that the very calamities and evils of the times led the more religiously minded of the Britons to take refuge in the monasteries. It is alleged that St. Germanus himself bestowed the priesthood on St. Illtyd, who became the spiritual father of many monks, and who founded the monastery of Llantwit, where saints like St. Samson of Dol and St. Pol de Leon (who both ultimately settled

in Brittany) as well as many other teachers of note were afterwards trained. But the whole province of Welsh hagiography is overgrown with legend and with wildly inconsistent conjectures and identifications to an incredible extent. Beyond the name of a few leaders and founders, like Dubritius, believed to have been the first Bishop of Llandaff, David, Bishop of Menevia and patron of Wales, Kentigern, whose chief work was accomplished on the banks of the Clyde, Asaph, who replaced him as bishop of the see which now bears his name, Winefride the martyr and her uncle Beuno, etc., we know nothing practically certain of the age of saints. We are not even sure of the date at which they lived. The object aimed at by the supposed Synods of Llandewi-Brefi (519-) and of Lucus Victoriae (569-), both said to have been convened to suppress Pelagianism, is equally a matter of conjecture. Regarding the spread of monasticism, such a statement as that of the Iolo manuscripts, that at Llantwit "Illytd founded seven churches, appointed seven companies for each church, and seven halls or colleges for each company and seven "saints" in each hall or college", does not inspire confidence. Yet we learn from the much safer authority of Bede (*Hist. Eccl.*, II, ii) that at Bangor-is-Coed in A.D. 613 the monastery was divided into seven parts with a superior over each, none of which divisions contained fewer than 300 men. Bede further tells us that when the Northumbrian King Ethelfrith advanced to attack the Britons near Chester these monks of Bangor came out to pray for the success of the arms of their countrymen. When the Welshmen were defeated, the monks, twelve hundred in number, were put to the sword. Bede looked upon the incident as a visitation of Providence to punish the Britons for rejecting the overtures of St. Augustine, but by the Irish chronicler Tighernach the incident was remembered as "the battle in which the saints were massacred". Undoubtedly the most certain facts in Welsh history at this period are those just referred to, connecting St. Augustine with the Welsh bishops. Pope Gregory the Great twice committed the British Church to the care and authority of St. Augustine and the latter accordingly invited them to a conference upon the matters in which they departed from the approved Roman custom. They asked for a postponement, but at a second conference the seven British bishops present altogether refused to accept Augustine as their archbishop or to conform in the matter of the disputed practices. The points mentioned by Bede prove that the divergences could not have been at all fundamental. No matter of dogma seems to have been involved, but the Britons were accused of using an erroneous cycle for determining Easter, of defective baptism (which may mean, it has been suggested, the omission of confirmation after baptism), and thirdly of refusing to join with Augustine in any common action for the conversion of the Angles. There were also other peculiarities, as, for example, the form of the tonsure and the sue of only one consecrator in consecrating bishops, as well as the employment of the Celtic Rite in the liturgy; but all these were matters of discipline only. None the

less the failure of all attempts of conciliation was complete and Bede attests that this attitude of hostility on the part of the British bishops lasted down to his own day. It may have been partly as a result of this uncompromising hatred of the Saxons and the Church identified with them, that we read during all this period of a more or less continual emigration of the Britons to Armorica, the modern Brittany. We hear about the year 470 of twelve thousand Britons who came by sea to settle in the country north of the Loire (Jonandes, "Getica", c. 45) and it is only in the sixth century apparently that the north-western regions of Gaul came to be called Britannia. The Gallo-Roman inhabitants of these districts welcomed the fugitives with much charity on account of their common Christianity (Remodus, "Carmina III"), but the Britons requited them but ill, and seem to have behaved with the same ruthless tyranny of might over right which marked the conquests of the Anglo-Saxons in the land from which they had been driven. No doubt, as time went on, the British saints like SS. Samson, Pol de Leon, Malo, Brioc, etc., who emigrated with them, exercised a restraining effect upon the settlers, and the Church in Britannia seems to have been in a flourishing state from the sixth century onwards.

DURING THE SAXON AND NORMAN PERIODS (681-1295)

The last British titular King of Britain is said to have been "Cadwalader the blessed" who, according to the "Brut-y-Tywysogion", "died at Rome in 681 on the twelfth day of May; as Myrrdin had previously prophesied to Vortigern of repulsive lips; and henceforth the Britons lost the crown of he kingdom and the Saxons gained it". This pilgrimage to Rome is, however, generally held to be apocryphal. Possibly there has been some confusion between Cadwalader of Wales and Caedwalla, King of Wessex, who undoubtedly did die in Rome in 689. At a later date, however, journeys of the Welsh princes to Rome became common, that of Cyngen, King of Powys, in 854 being one of the earliest examples. During this whole period the political antagonism between Anglo-Saxons and Welsh seems always to have caused the ecclesiastical relations between the two countries to be strained, though the Welsh accepted the Roman Easter before the end of the eighth century, and though in 871 we hear of a Saxon bishop of St. Davids. No doubt also attempts were made to establish friendly relations. Asser, the famous biographer of King Alfred, was a Welshman who came to the English court in 880, seeking protection from the tyranny of his native sovereigns, sons of Rhodri Mawr. This incident must be typical of many similar cases, and there were times, for example under Eadgar the Peaceable, when some sort of English suzerainty over the principality seems to have been acquiesced to. When Edgar was rowed on the Dee by eight under-kings in 973, five of the eight were Welsh, and this fact is even admitted by a Welsh annalist, the compiler of the "Brut-y-Tywysogion", who, however, transfers the scene of the episode to Caerleon-upon-Usk. To detail the incidents of

the six hundred years which preceded the final absorption of Wales politically and ecclesiastically into the English system, which took place in the reign of Edward I, would not be possible here. It must be sufficient to note that even before the close of the Saxon period, various Welsh prelates are alleged to have been consecrated or confirmed by English archbishops, while under the Norman kings a direct claim to jurisdiction over the Welsh Church was made by various archbishops of Canterbury beginning apparently with St. Anselm. The most important matter to notice is that the attempt to claim for the Welsh medieval Church any position independent of Rome is as futile as in the case of England or Ireland. Speaking primarily of the days of St. Augustine, the most recent and authoritative historian of Wales remarks: "No theological differences parted the Roman from the Celtic Church, for the notion that the latter was the home of a kind of primitive Protestantism, of apostolic purity and simplicity, is without any historical basis. Gildas shows clearly enough that the Church to which he belonged held the ideas current at Rome in his day as to the sacrifice of the Eucharist and the privileged position of the priest" (J.E. Lloyd, "Hist. of Wales", I, 173). And this remained true during the centuries which followed, as anyone who acquaints himself with such original sources as the chronicles, the Lives of the Welsh saints and especially the Welsh laws formulated in the Code of Howel the Good (A.D. 928), will readily perceive. In the preface of this same code we read that when the laws were drafted, Howel the Good and his bishops "went to Rome to obtain the authority of the Pope of Rome. And there were read the laws of Howel in the presence of the Pope and the Pope was satisfied with them and gave them his authority" (Haddan and Stubbs, I, 219). In this code religious observations such as the veneration of relics, the keeping of feasts and fasts, confession, Mass, and the sacraments are all taken for granted. The respect shown in the preface for the authority of the Holy See is of special importance. So far as this respect was at any time less prominent, this is due, as J.E. Lloyd points out, to Celtic isolation, and not to any anti-Roman feeling. The Irish missionary Columbanus, "sturdy champion though he was of Celtic independence in matters ecclesiastical", nevertheless says of the popes: "By reason of Christ's twin Apostles [Peter and Paul] you hold an all but celestial position and Rome is the head of the world's Churches, if exception be made of the singular privilege enjoyed by the place of Our Lord's Resurrection" (Hist. of Wales. I, 173). The rest of St. Columbanus's letter to Pope Boniface IV (613) gives proof of an even more absolute dependence upon the guidance of the Bishops of Rome whom he calls "our masters, the steersmen, the mystic pilots of the ship spiritual". It should perhaps be mentioned that the repudiation of papal supremacy attributed to Dinoth, Abbot of Bangor-is-Coed, is now universally admitted to be a post-Reformation forgery (Haddan and Stubbs, I, 122), and cf. Gougaud, "Les chretientes celtiques", 211). Again the imputation, founded on

a passage in the Gwentian text of the "Brut-y-Tywysogion" and suggesting that the obligation of celibacy was rejected on principle by the priests of the Welsh Church, runs counter to all the sounder evidence. Undoubtedly the gravest abuses prevailed in Wales regarding this matter, but in principle clerical celibacy was accepted. The Gwentian text referred to is of no value as evidence; on the other hand the laws of Howel clearly assume that a married priest was subject to penalty; his oath was invalidated (Laws and Institutes of Wales, 595) and his children born subsequent to his priesthood were held illegitimate. "When a clerk takes a wife by gift of kindred, and has a son by her, and afterwards the clerk takes priest's orders, and subsequently, when a priest, has a son by the same woman, the son previously begotten is not to share land with such a son, as he was begotten contrary to the decree" (ib., 217 and 371).

LLOYD, *History of Wales* (2 vols., London, 1911); SIR JOHN RHYS, *Celtic Britain* (London, 1884); NEWELL, *History of the Welsh Church* (London, 1895); WALTER, *Das alte Wales* (Munich, 1856); ZIMMER, *The Celtic Church of Great Britain and Ireland*, Eng. tr. (London, 1902); IDEM, *Pelagius in Ireland* (Berlin, 1901); H. WILLIAMS in *Celtische Zeitschrift*, IV (1902), lengthy review of ZIMMER; IDEM, Some aspects of the Christian Church in Wales in *Transactions of the Society of Cymrodorion* (1893-94); WADE EVANS, *Welsh Medieval Law* (Oxford, 1909); J. ROMILLY ALLEN, *Monumental History of the British Church* (London, 1889); BUND, *The Celtic Church of Wales* (London, 1907), a work written with a strong anti-Roman bias; FONSSAGRIVES, S. *Gildas de Ruis et la Societe bretonne au V siecle* (Paris, 1908). Though mainly concerned with a different branch of Celtic Christianity, the Catholic reader may also be urged to make acquaintance with the small but valuable work of J. SALMON, *The ancient Irish Church as a witness to Catholic Doctrine* (Dublin, 1898). Nearly all the most important texts bearing on the matter discussed in this article will be found collected in HADDAN and STUBBS, *Councils and Ecclesiastical Documents*, I (Oxford, 1869). See also the publication of the British Government, OWEN, *The ancient Laws and Institutes of Wales* (London, 1841).

HERBERT THURSTON

Welsh Monastic Foundations

Welsh Monastic Foundations

Few saints of the early British Church, as it existed before the Saxon invasion, are known to history; the names of St. Alban, SS. Julius and Aaron seem to be the only ones that have come down to us of the countless martyrs slain in Britain in the time of Diocletian. But if we follow the British Church when driven into Wales in the fifth

century, we meet at once with saints and scholars, whose names are little known to English-speaking Catholics. Wales became a home for the saints. Within its borders there are no less than four hundred and seventy-nine villages and towns that derive their names from local Saints. Thus Llandewi marks the spot where St. David, Bishop of Caerleon and then of Menevia (fifth century) is said to have finally refuted Pelagius; Llangybi near Caerleon recalls the name of St. Cybi; Llanbadern near Aberystwith that of St. Padern; Beddgelert is associated with St. Celert; Llangattock with St. Cadoc; Lladudno with St. Tudno, etc. The old Celtic idea of sanctity inclined for the most part to a great love of the eremitical life. Each locality seems to have its hermit who in his lonely chapel celebrated the Divine Mysteries (if a priest, recited the Psalter every day, and practised austerities.

The arrival of St. Germanus of Auxerre in Britain (fifth century), to oppose the heresy of Pelagius, seems to have given the first impetus to the formation of monastic schools. On his second visit, accompanied by St. Severus, Bishop of Trier, he established seminaries throughout the land. These schools soon became famous; those of Ross and Hentlan on the Wye in Herefordshire alone contained one thousand scholars. "By means of these schools", says Bede, "the Church continued ever afterwards pure in the faith and free from heresy". The saint ordained St. Dubricius Archbishop of Llandaff, and St. Iltutus (Iltyd) priest, recommending to them and others the multiplication and assiduous care of these monastic schools were sacred learning was to be cultivated. Almost immediately a great development of monastic life took place and all over Wales monasteries and monastic colleges arose which became renowned sanctuaries of holiness and homes of sacred learning.

Llancarvan monastery in Glamorganshire, three miles from Cowbridge, and not far from the British Channel, was founded in the latter part of the fifth century by St. Cadoc (Dranc, "Christian Schools and Scholars", I, 56). He was the son of Gundleus (Swynlliw), a prince of South Wales, who some years before his death renounced the world to lead an eremitical life near a country church which he had built. Cadoc, who was his oldest son, succeeded him in the government, but not long after followed his father's example and received the religious habit from St. Tathai, an Irish monk, superior of a small community at Swent near Chepstow, in Monmouthshire. Returning to his native county, Cadoc built a church and monastery, which was called Llancarvan, or the "Church of the Stags". Here he established a monastery and college, which became the seminary of many great and holy men. The spot at first seemed an impossible one, and almost inaccessible marsh, but he and his monks drained and cultivated it, transforming it into one of the most famous and attractive religious homes in South Wales. The plan of the building included a monastery, a college, and a hospital. The ancient Iolo manuscript (Welsh) gives an account of the numerical strength of this monastery:

"The College of Cattwg [Cadoc] in Llancarvan with three cells [halls or subject houses] and a thousand saints [monks], together with two cells in the Vale of Neath" (*Cambria Sacra*, 388 sq.).

St. Iltut (Iltyd) spent the first period of his religious life as a disciple of St. Cadoc at Llancarvan. St. Gildas the Wise was invited by St. Cadoc to deliver lectures in the monastery and spent a year there, during which he made a copy of a book of the Gospels, long treasured in the church of St. Cadoc. The Welsh felt such reverence for this book that they used it in their most solemn oaths and covenants. Seeing his monastery thoroughly established, St. Cadoc visited several of the famous religious houses and colleges in Ireland, and then undertook a pilgrimage to Rome and Jerusalem (A.D. 462). From the latter city he brought home with him three altar-stones which had touched the Holy Sepulchre. He died at Benevenna (Weedon) in Northamptonshire in the beginning of the sixth century, leaving Ellenius his successor as abbot, "an excellent disciple", says Leland, "of an excellent master".

Llaniltyd Vawr Monastery, also known as Llan-Iltut and Llan-twit, situated on the sea-coast in Glamorganshire, not far from Llancarvan, was founded and governed for many years by St. Iltut (Iltyd), a noble Briton, who was a native of Glamorganshire, and a kinsman of King Arthur. It was St. Cadoc who inspired him with a contempt of the world and a thirst for true wisdom. Iltut renounced his large possessions, received the tonsure at the hands of St. Dubricius, Archbishop of Llandaff, and then came as a humble disciple to place himself under the spiritual direction of St. Cadoc at Llancarvan. There he perfected himself in the science of the saints and acquired great skill in sacred learning. He was subsequently ordained priest by St. Germanus. It was probably by the advice of St. Cadoc that he left Llancarvan to found Llaniltyd, which became one of the most famous religious houses in Britain. Here the saint presided over a community of three thousand members, including many saints and scholars of note, as St. David, St. Samson, St. Magloire, St. Gildas, St. Pol de Leon, the bard Taliesin, and others. Here according to the Triads, an ancient authority on Wales, the praises of God never ceased, one hundred monks being employed in chanting the Divine Office throughout the day and night. Llaniltyd might rather be called a monastic university than a monastery of college. The Iolo manuscript (p. 556) gives us some idea of its extent: "Here are the name of the cells [halls or subordinate colleges] of the college [collegiate monastery] of Iltyd, the colleges of St. Matthew, St. Mark, St. Luke, St. John, of Arthur, St. David, Morgan, Eurgain and Amwn. Of these colleges Iltyd was principal, and the place was named Bangor Iltyd and there were three thousand Saints [monks]." St. Iltut while governing his immense community laboured with his own hands, and exercised himself in much watching, fasting, and prayer. Out of a love of holy retirement he passed three years in a lonely cave, in great austerity and assiduous prayer. Before

his death he took a journey to Brittany to visit his disciples and friends there, and died at Dole in the sixth century. He is to this day the titular saint of a church in Glamorganshire.

The monastery of Bangor of the Dee was known also as Bangor-is-Coed, i.e. "the eminent choir under the wood". The name Bangor was applied to several large monasteries, and is said to be derived from "Benedictus Chorus", shortened into Benchor, and subsequently written as Bangor. The monastery on the Dee was distance about ten or twelve miles from Chester, and its ruins witness to its former extent and importance. St. Bede the Venerable (lib. II, c. ii.) says that it was filled with learned men at the coming of St. Augustine into England. Of the founder of this religious house and its history little if anything seems to be known, as all its chronicles, documents, etc. have been lost or destroyed. We know, however, of its tragic extinction about the year 603. While the forces of Cadvan, King of North Wales, engaged those of the pagan and usurping Edilfrid of Northumbria, the monks were assembled on an eminence a short distance from the place of conflict. "The two armies", says Lingard, "met in the vicinity of Chester. On the summit of a neighbouring hill, Edilfrid espied an unarmed crowd, the monks of Bangor, who, like Moses in the wilderness, had hoped by their prayers to determine the fate of battle. "If they pray", exclaimed the pagan, "they fight against us"; and he ordered a detachment of his army to put them to the sword...Chester was taken, and Bangor (monastery) demolished. The scattered ruins demonstrated to subsequent generations the extent of that celebrated monastery" (Hist. Engl., II, 96). He adds in a note: "the number of monks slain on the hill is generally said to have been twelve hundred; but St. Bede observes that others besides the monks had assembled to pray. He supposes that the victory of Edilfrid fulfilled the predictions of Augustine."

The monastery of Bangor (Benchor) near the Menai Straits owed its origin to St. Daniel, the fellow disciple of St. Illtut. The place chosen was near the arm of the sea that divides Anglesey from Wales, where a city was soon afterwards built by King Mailgo, the same who undertook to defray the charges of St. David's funeral. Of the number of religious we have no information; but judging from the other monasteries of this period in Wales, vocations much have been plentiful. The Iolo manuscript (p. 556) tells us that there were 3000 saints [monks] at Iltyd; 2000 in St. Dubricius's monastery on the banks of the Wye; 1000 in Llancarvan; 500 in St. David's monastery, 1000 in Elvan monastery, Glastonbury; and 1000 in that of St. Erilo, Llandaff. St. Daniel, the founder who had been ordained by St. Dubricius, died about the year 545, and was buried in the Isle of Bardsey in the Atlantic near the extreme point of Carnarvonshire. The soil of this island is hallowed by the remains of 20,000 saints (monks) buried there. (see Alban Butler, XI, 246.) The monastery of Liancwlwy (St. Asaph) in the vale of Clwyd was founded by St. Kentigern, Bishop of Glasgow, who having been forced to

quit his see during the usurpation of Prince Rydderch's throne by one of the latter's rebellious nobles, took refuge in Wales, where, after visiting St. David at Menevia, he received from a Welsh prince a grant of land for the erection of a monastery. In the course of time his community numbered about 995. These he divided into three companies; two, who were unlearned, were employed in agriculture and domestic offices; the third, which was made up of the learned, devoted their time to study and apostolic labours, and numbered upwards of three hundred. These again were divided into two choirs, one of which always entered the church as the others left, so that the praises of "God to all hours resounded in their mouths" (*Britannia Sancta*, I, 273). On the restoration of Rydderch in 544, St. Kentigern was recalled to his see and left the government of his monastery and school to St. Asaph, his favourite scholar, whose name was afterwards conferred upon the church and diocese.

St. Dubricius's monastic schools were at Hentlan and Mochrhes on the River Wye. This saint had been consecrated first Archbishop of llanaff by St. Germanus about the year 444, and was afterwards appointed Archbishop of Caerlcon, which dignity he resigned to St. David in 522 (*Alban Butler*, XI, 245). He erected two great monastic schools, where St. Samson, St. Thelian (Teilo), and many other eminent saints and prelates were trained in virtue and sacred learning. It is said that he had 1000 scholars with him for years at a time.

St. David, his successor at Caerleon, founded twelve monasteries, one at Glastonbury, having, according to an ancient manuscript, a thousand monks. In all these foundations he contrived to combine the hard work of the scholar and the equally hard labours of the monk. Ploughing and grammar succeeded each other by turns.

The course of studies at Llaniltyd (and this also applies to the other monasteries) included Latin, Greek, rhetoric, philosophy, theology, and mathematics. these were taught at Llaniltyd with so much success that it was looked upon as the first college in Britain (*Cambria Sacra*, pp. 436, 437).

The Cambro-British monks led a hard an austere life. "Knowing", says Capgrave (1514), "that secure rest is the nourisher of all vices [the abbot] subjected the shoulders of his monks to hard wearisomeness...They detested riches and they had no cattle to till their ground, but each one was instead of an ox to himself and his brethren. When they had done their field work, returning to the cloisters of their monastery, they spent the rest of the day till evening in reading and writing. And in the evening at the sound of the bell, presently laying aside their work, and leaving even a letter unfinished, they went to the church and remained there till the stars appeared, and then all went together to table to eat, but not to fullness. Their food was bread with roots or herbs, seasoned with salt, and they quenched their thirst with milk mingled with water. Supper being ended they persevered about three hours in watching, prayer and genuflexions. After

this they went to rest and at cock crowing rose again, and abode in prayer till the dawn of day. Their only clothing was the skin of beasts."

At Llan-Tweence, the monastic habit was a goat's skin worn over a hair shirt; the fare, a little barley bread, with water and a decoction of boiled herbs. Sundays and feast days were distinguished by cheese and shell-fish, while a brief repose was taken on the bare earth, or the bark of trees for a bed with a stone for pillow. In this wise were trained saints and eminent scholars to carry as apostles the light of the Faith to Brittany, the Orkneys, and other distant lands.

P.J. CHANDLERY

Benedict Welte

Benedict Welte

Exegete, born at Ratzenried in Würtemberg, 25 November, 1825; died 27 May, 1885. After studying at Tübingen and Bonn, where he made special studies in the exegesis of the Old Testament and in Oriental languages, he was ordained priest when twenty-eight years old. Soon after this he became assistant lecturer at Tübingen, and in 1840 regular professor of Old Testament exegesis. During the next two decades Welte was remarkably active in literary work connected with his favourite subject. This, indeed, more than the classroom was the field of his life's achievements. An extensive familiarity with Oriental tongues, a talent for thorough research, and a clear, precise diction were his special qualifications. He published at Freiburg, in 1840, "Historisch-kritische Enleitung in die hl. Schriften des alten Testamentes". Much of the material for this work had been gathered by his predecessor, Herbst, who left a request that Welte should finish and edit his notes. It cost the latter great labour, for he was not in sympathy with the method of Herbst; and at times found it necessary to append his own views and arguments. The second part of the same work began to appear in 1842. Two years later, a third volume, completing the task, published as "Specielle Einleitung in die deutero-canonicalen Bucher des alten Testamentes" came from the pen of Welte alone. Before this, in 1841, the translation of Gorium's Armenian biography of St. Mesrob appeared in the university annual publication. In the same year he wrote "Nachmosaisches im Pentateuch", contending that there was no post-Mosaic matter in the Pentateuch. His explanation and translation of the Book of Job was published at Freiburg, 1849. Meanwhile, in company with the orientalist Wetzer,

he had begun his real life-work. Together they edited the 12 volumes of the "Kirchenlexikon", an encyclopedia of Catholic theology and its allied sciences. To this work Welte himself contributed 200 articles, and his literary activity closed with the completion of the encyclopedia. This was due partly to the duties of a canon's office which he assumed, 22 May, 1857, at the cathedral of Rottenburg, and partly to an incurable disease of the eyes. This affliction and the still greater suffering because of inactivity, did not diminish in the least the simple childlike piety of this scholarly priest.

JOHN M. FOX

St. Wenceslaus

St. Wenceslaus

(*Also Vaclav, Vacestlav.*)

Duke, martyr, and patron of Bohemia, born probably 903; died at Alt-Bunzlau, 28 September, 935.

His parents were Duke Wratislaw, a Christian, and Dragomir, a heathen. He received a good Christian education from his grandmother (St. Ludmilla) and at Budweis. After the death of Wratislaw, Dragomir, acting as regent, opposed Christianity, and Wenceslaus, being urged by the people, took the reins of government. He placed his duchy under the protection of Germany, introduced German priests, and favoured the Latin rite instead of the old Slavic, which had gone into disuse in many places for want of priests. Wenceslaus had taken the vow of virginity and was known for his virtues. The Emperor Otto I conferred on him the regal dignity and title. For religious and national motives, and at the instigation of Dragomir, Wenceslaus was murdered by his brother Boleslaw. The body, hacked to pieces, was buried at the place of murder, but three years later Boleslaw, having repented of his deed, ordered its translation to the Church of St. Vitus in Prague. The gathering of his relics is noted in the calendars on 27 June, their translation on 4 March; his feast is celebrated on 28 September.

FRANCIS MERSHMAN

St. Wendelin of Trier

St. Wendelin of Trier

Born about 554; died probably in 617. His earliest biographies, two in Latin and two in German, did not appear until after 1417. Their narrative is the following: Wendelin was the son of a Scottish king; after a piously spent youth he secretly left his home on a pilgrimage to Rome. On his way back he settled as a hermit in Westricht

in the Diocese of Trier. When a great landowner blamed him for his idle life he entered this lord's service as a herdsman. Later a miracle obliged this lord to allow him to return to his solitude. Wendelin then established a company of hermits from which sprang the Benedictine Abbey of Tholey. He was consecrated abbot about 597, according to the later legends. Tholey was apparently founded as a collegiate body about 630. It is difficult to say how far the later biographers are trustworthy. Wendelin was buried in his cell, and a chapel was built over the grave. The small town of St. Wendel grew up nearby. The saint's intercession was powerful in times of pestilence and contagious diseases among cattle. When in 1320 a pestilence was checked through the intercession of the saint, Archbishop Baldwin of Trier had the chapel rebuilt. Baldwin's successor, Boemund II, built the present beautiful Gothic church, dedicated in 1360 and to which the saint's relics were transferred; since 1506 they have rested in a stone sarcophagus. Wendelin is the patron saint of country people and herdsmen and is still venerated in Germany, Austria, and Switzerland. He is represented in art as a youth, or as a bearded man, with a shepherd's bag and a book in one hand and a shepherd's crook in the other; about him feed lambs, cattle, and swine, while a crown and a shield are placed at his feet. St. Wendelin is not mentioned in the Roman Martyrology, but his feast is observed in the Diocese of Trier on 22 October.

Acta SS., October, IX, 342-51; MOHR, *Die Heiligen der Diozese Trier* (Trier, 1892); LESKER, *St. Wendelinus* (Donauworth, 1898); ZURCHER, *St. Wendelinus-Buch* (Menzingen, 1903).

KLEMENS LOFFLER

Francis Xavier Weninger

Francis Xavier Weninger

Jesuit missionary and author, born at Wildhaus, Styria, Austria, 31 October, 1805; died at Cincinnati, Ohio, 29 June, 1888. When already a priest and doctor of theology, he joined the Society of Jesus in 1832 and in 1841 was sent to Innsbruck, where he taught theology, history, and Hebrew. As the Revolution of 1848 impeded his further usefulness at home, he left Europe and went to the United States. During his forty years he visited almost every state of the Union, preaching to vast multitudes in English, French, or German, as best suited the nationality of his hearers. In the year 1854 alone he delivered nearly a thousand sermons, and in 1864 he preached about forty-five missions. His zeal also prompted Father Weninger to win souls with the pen and he published forty works in German, Sixteen in English, eight in French, three in Latin. Among his principal works are: "Manual of the Catholic Religion" (Ratisbon, 1858); "Easter in Heaven" (Cincinnati, 1862); "Sermons" (Mainz, 1881-86).

Woodstock Letters, XVIII, 43-68; HURTER, Nomenclator, III, 1217 sqq.

A.C. COTTER

Wenrich of Trier

Wenrich of Trier

German ecclesiastico-polical writer of the eleventh century. He was a canon at Verdun, and afterwards *scholasticus* at Trier. Sigebert of Gembloux (P. L., CXL, 584 sq.) calls him also Bishop of Vercelli, but the early documents of the diocese leave no place for him in the list of bishops. Wenrich is the author of an able controversial treatise on behalf of Henry IV during his struggle with Gregory VII (*see CONFLICT OF INVESTITURES*). It was probably written in the summer of 1081, at the urgency of Bishop Dietrich of Verdun, to whom it has also been ascribed. The form is that of an open letter to the pope; the tone is friendly, as though what he had to say was painful to the author. Wenrich disputes the efficiency of the emperor's excommunication (1080), opposes the laws of celibacy promulgated by the pope, condemns the inciting of the people against the emperor, defends investitures by texts of Scripture and the history of the Church, upbraids Gregory for being an accomplice in the setting up of a rival king, and reminds the pope that he himself has been accused of unlawful striving after the papal dignity, and even of the use of force to attain this end. A reply was written by Mannegold of Lautenbach.

Hist.: Libelli de lite imperatorum et pontificum, I (Hanover, 1891), 280-99; MEYER VON KNONAU, Jahrbucher der deutschen Gesch. Unter Heinrich IV. u. V., III (Leipzig, 1900), 406-15; MIRBT, Die Publizistik im Zeitalter Gregors VII (Leipzig, 1894), passim.

KLEMENS LÖFFLER

St. Werburgh

St. Werburgh

(WEREBURGA, WEREBURG, VERBOURG).

Benedictine, patroness of Chester, Abbess of Weedon, Trentham, Hanbury, Minster in Sheppy, and Ely, born in Staffordshire early in the seventh century; died at Trentham, 3 February, 699 or 700. Her mother was St. Ermenilda, daughter of Ercombert, King of Kent, and St. Sexburga, and her father, Wulfhere, son of Penda the fiercest of the Mercian kings. St. Werburgh thus united in her veins the blood of two very different

races: one fiercely cruel and pagan; the other a type of gentle valour and Christian sanctity. In her, likewise, centred the royal blood of all the chief Saxon kings, while her father on the assassination of his elder brother Peada, who had been converted to Christianity, succeeded to the largest kingdom of the heptarchy. Whether Wulfhere was an obstinate pagan who delayed his promised conversion, or a relapsed Christian, is controverted, but the legend of the terrible and unnatural crime which has been imputed to him by some writers must here be dismissed on the authority of all earlier and contemporary chroniclers, as the Bollandists have pointed out. The martyrs, Sts. Wulfald and Ruffin, were not sons of Wulfhere and St. Ermenilda, nor victims of that king's tyranny. Ermenilda at once won the hearts of her subjects, and her zeal bore fruit in the conversion of many of them, while her influence on the passionate character of her husband changed him into a model Christian king. Werburgh inherited her mother's temperament and gifts. On account of her beauty and grace the princess was eagerly sought in marriage, chief among her suitors being Werebode, a headstrong warrior, to whom Wulfhere was much indebted; but the constancy of Werburgh overcame all obstacles so that at length she obtained her father's consent to enter the Abbey of Ely, which had been founded by her great-aunt, St. Etheldra, and the fame of which was widespread.

Wulfhere did not long survive his daughter's consecration. On his death, St. Ermenilda took the veil at Ely, where she eventually succeeded her mother, St. Sexburga, as abbess. Kenred, Werburgh's brother, being a mere child at his father's death, his uncle Ethelred succeeded to the throne. This king invited St. Werburgh to assume the direction of all the monasteries of nuns in his dominion, in order that she might bring them to that high level of discipline and perfection which had so often edified him at Ely. The saint with some difficulty consented to sacrifice the seclusion she prized, and undertook the work of reforming the existing Mercian monasteries, and of founding new ones which King Ethelred generously endowed, namely, Trentham and Hanbury, in Staffordshire, and Weedon, in Northamptonshire. It had been the privilege of St. Werburgh to be trained by saints; at home by St. Chad (afterwards Bishop of Lichfield), and by her mother, and in the cloister by her aunt and grandmother. Her position worked no change in the humility which had always characterized her, so that in devotedness to all committed to her care she seemed rather the servant than the mistress. Her sole thought was to excel her sisters in the practice of religious perfection. God rewarded her childlike trust by many miracles, which have made St. Werburgh one of the best known and loved of the Saxon saints. That of the stolen goose appealed most to the popular imagination. The story, immortalized in the iconography of St. Werburgh, relates that by a simple command she banished a flock of wild geese that was working havoc in the cornfields of Weedon, and that since then none of these birds

has been seen in those parts. She was also endowed with the gifts of prophecy and of reading the secrets of hearts. knowing how devoted her different communities were to her and how each would endeavour to secure the possession of her body after death, she determined to forestall such pious rivalry by choosing Hanbury as her place of burial. But the nuns of the monastery of Trentham determined to keep the remains. They not only refused to deliver them to those who came from Hanbury, but they even locked up the coffin in a crypt and set a guard to watch it. The people of Hanbury sent out anew a large party to make good their claims. Reaching Trentham at midnight all the bolts and bars yielded at their touch, while the guards were overpowered by sleep and knew not that the coffin was being carried to Hanbury.

So numerous and marvellous were the cures worked at the saint's tomb that in 708 her body was solemnly translated to a more conspicuous place in the church, in the presence of her brother, Kenred, who had now succeeded King Ethelred. In spite of having been nine years in the tomb, the body was intact. So great was the impression made on Kenred that he resolved to resign his crown and followed in his sister's footsteps. In 875, through fear of the Danes and in order to show greater honour to the saint, the body was removed to Chester. The Church of St. Peter and St. Paul, on the site of the present cathedral of Chester, was rededicated to St. Werburgh and St. Oswald, most probably in the reign of Athelstan. The great Leofric, Earl of Mercia (who was likewise styled Earl of Chester), and his wife, Lady Godiva, repaired and enlarged the church, and in 1093, Hugh Lupus, Earl of Chester, richly endowed the abbey and its church. By the instrumentality of this noble, Chester, which had been in the hands of secular canons, became a great Benedictine abbey, the name of St. Anselm, then a monk at Bee, being associated with this transformation. They abbey possessed such immense influence and position that at the time of the suppression under Henry VIII the Earl of Derby was the abbot's seneschal. In the vast wave of iconoclasm that swept over the country in that tyrant's reign the cathedral was sacked by apostates who scattered St. Werburgh's relics. Fragments of the shrine were used as the base of an episcopal throne. Many of the labels and figures had been mutilated, and while restoring them the workmen by mistake placed female heads on male shoulders and vice versa. Only thirty of the original figures remain, four having been lost. Late all these fragments were removed to the west end of the south choir aisle, where they have been placed nearly in the original position of the shrine, which is 10 feet high. St. Werburgh's feast is celebrated 3 February.

SISTER GERTRUDE CASANOVA

Werden

Werden

(*WERTHINA, WEERDA, WERDENA*).

A suppressed Benedictine monastery near Essen in Rhenish Prussia, founded in 799 by St. Ludger, its first abbot, on the site of the present city of Werden. The little church which St. Ludger built here in honor of St. Stephen was completed in 804 and dedicated by St. Ludger himself, who had meanwhile become Bishop of Münster. Upon the death of St. Ludger, 26 March, 809, the abbacy of Werden went by inheritance first to his younger brother Hildigrim I (809-827), then successively to four of his nephews: Gerfried (827-839), Thiadgrim (ruled less than a year), Altfried (839-848), Hildigrim II (849- 887). Under Hildigrim I, also Bishop of Châlons-sur-Marne, the new monastery of Helmstadt in the Diocese of Halberstadt was founded from Werden. It was ruled over by a provost, and remained a dependency of Werden till its secularization in 1803. Gerfried and Altfried were also bishops of Münster. The latter is the author of the oldest life of St. Ludger (*Acta SS.*, III, March, 641-650; P. L., XCIX, 769-90). The Abbots Thiadgrim and Hildigrim II were bishops of Halberstadt. Under the latter, the abbey church, begun by St. Ludger, was completed in 875, and solemnly dedicated to Our Saviour by Archbishop Willibert of Cologne, to whose archdiocese the monastery of Werden belonged. Under Hildigrim II the monastery, which up to that time had been the property of the family of St. Ludger, obtained on 22 May, 877, the right of free abbatial election and immunity. Henceforth the abbots of Werden were imperial princes and had a seat in the imperial diets. In 1130 the monastery of Liesborn was recruited with monks from Werden, replacing the nuns who had given up the regular life. The abbey church of Werden, destroyed by fire in 1256, was rebuilt in the late Romanesque style (1256-75). Thereafter the monastery began to decline to such an extent that under Abbot Conrad von Gleichen (1454-74), a married layman, the whole community consisted of but three, who had divided the possessions of the abbey among themselves. After a complete reform, instituted in 1477, by Abbot Adam von Eschweiler of the Bursfeld Union (See BURSFELD, ABBEY OF), Werden continued in a flourishing condition until its secularization by the Prussian Government in 1802. The church, which was restored in 1852, contains the sarcophagus of St. Ludger. The monastery

buildings are now used as a penitentiary. Two of the 74 abbots who ruled over Werden, namely, Ludger, its founder, and Bardo, who died in 1051 as Archbishop of Mainz, are honoured as saints. Werden was one of the richest abbeys in Germany. Its jurisdiction extended over about five square miles and it owned nearly all the land and the villages within that territory, besides some possessions beyond it.

Verein is issuing Beitrage zur Gesch. des Stiftes Werden (Bonn, 1909), fasc. 13 the same society is preparing a complete roll-book of the Stift Werden.

MICHAEL OTT

Friedrich Ludwig Zacharias Werner

Friedrich Ludwig Zacharias Werner

Convert, poet, and pulpit orator, born at Konigsberg, Prussia, 18 November, 1768; died at Vienna, 17 February, 1823. When sixteen years old he attended lectures on law and political economy at the University of Konigsberg, and at the same time was a zealous disciple of Kant. He received an appointment as clerk in the War Office, which post he retained for twelve years, residing at Konigsberg and other cities, lastly at Warsaw. During this era the poet, who from his youth had led a dissipated life, was married and divorced three times. During the years 1801-04 he lived at Konigsberg in order to take care of his mother, who had lost her mind; she died on 24 February, 1804, and on the same day his friend Mnioch also died at Warsaw. This day of double sorrow provided him with the title of his best known tragedy, "Der 243 Februar". The next year Werner was transferred to Berlin as a confidential clerk. While there he devoted himself entirely to poetry. In 1807 he began a period of wandering, finally going to Rome, where he "renounced his erroneous beliefs" and was received into the Church (19 April, 1810). After this event his life flowed somewhat more smoothly. He studied theology and was ordained priest in the seminary of Aschaffenburg on 14 June, 1814. In August of the same year he went to Vienna, where the historic congress was then assembled. The peculiarities both of his personality and of his sermons attracted great attention. From 1816 to 1817 he lived with a Polish count in Podolia, then returned to Vienna and lived in the house of the archbishop, Count von Hohenwarth. In 1821

he entered the novitiate of the Redemptorists, but soon left it, owing to failing health. He was able to preach, however, a fortnight before his death.

Werner undoubtedly possessed great dramatic talent, but he lacked self-control, and produced no work of lasting merit. The most important, besides the tragedy already mentioned, are: "Vermischte Gedichte" (1789), "Die Söhne des Tales" (1803), "Das Kreuz an der Ostsee" (1806). To counterbalance the effect of his "Martin Luther" (1807), he wrote, after his conversion, "Die Weihe der Unkraft" (1814). During this latter period of his life, also, he wrote "Die Mutter der Maddabäer", a tragedy in which a beautiful tribute is paid to his mother in the principal character. His sermons were not published until 1840.

SCHUTZ, Biographie u. Charakteristik nebst Originalmitteilung aus Werners Tagsbuchern, in the Collected Works of Werner, XIV, XV; ROSENTHAL, Konvertitenbilder; DUNTZER, Zwei Bekehrte-Zacharias Werner und Sophie von Schardt, 1878; MINOR, Schicksalstrayodie in ihren Hauptvertretern (1883); INNERKOFLER, Ein oesterreichischer Reformator, der hl. Clemens Hofbauer (1910), gives an account of Werner's labours at Vienna.

N. SCHEID

John Wessel Goesport (Gansfort)

John Wessel Goesport

(GANSFORT).

A fifteenth-century Dutch theologian, born at Gröningen in 1420; died there on 4 Oct., 1489. He was educated at Zwolle and lived in the seminary of the Brothers of the Common Life. From 1449 he studied at the University of Cologne, and graduated master of arts there. In 1456-7 he was temporary professor of arts at the University of Heidelberg. About the beginning of 1458 he went to Paris, intending to induce two celebrated teachers from the Netherlands, then lecturing at Paris, to change from Formalism to Realism, which he advocated zealously. He himself, however, was converted to Formalism, and then adopted Nominalism, to which he afterwards adhered. His stay at Paris lasted probably until 1473; He left very likely because of the edict issued in that year by Louis XI against Nominalism. He then spent some time in 1474 at Venice, and apparently at Basle, after which he returned home and devoted himself in quiet to learning. He spent the greater part of his last years alternately in several monasteries. Though he remained a layman, he was interested mainly in theological questions. A selection from his writings, "Farrago rerum theologicarum", was issued at Zwolle, probably in 1521 (reprint at Wittenberg, 1522, and Basle, 1522, this latter containing a commendatory preface by Luther). The Basle edition included several

letters to and from Wessel. Shortly after 1521 Wessel published at Zwolle: "De sacramento Eucharistiae et audienda missa"; "De oratione et modo orandi"; "De causis incarnationis". A complete edition of his works appeared at Gr ningen in 1614, with a biographical sketch by the Protestant preacher Albert Hardenberg.

Protestants usually regard Wessel as a precursor of Luther. The first publication of the "Farrago rerum theologicarum" was the work of Protestants, who presented in it a collection of extracts which seemed to favour Protestantism. This judgment, maintained in modern times by Ullmann, is one-sided and exaggerates Wessel's deviations from the teaching of the Church. True his theology contains dogmatic errors, some of which were later taught by Luther. He denies the infallible office of teaching of the Church, and the infallibility of the pope and the ecumenical councils. He disputes the right of ecclesiastical superiors to give commands that bind under sin. He emphasizes too strongly the subjective activity of the faithful in sharing the fruits of Communion and of the Sacrifice of the Mass (*opus operantis*), so that the objective working of the sacrament (*opus operatum*) seems to be impaired. In the Sacrament of Penance he acknowledges the priestly absolution, but denies its judicial character. He rejects satisfaction as a part of the sacrament, holding that with the remission of sins the temporal punishment is also remitted. He regards an indulgence as a merely external release from canonical punishments and censures; in his opinion, purgatory serves not to punish temporally sins remitted in this world, but only to purify souls from inordinate desires, and from venial sins. Yet in those points which touch the fundamental doctrines of the Reformers, Wessel stands entirely on Catholic ground. He teaches the freedom of the will, justification not by faith alone but by faith active in love, the meritorious character of good works; the rule of faith as formed by the Scriptures and Tradition; he acknowledges the primacy of the pope, the efficacy of the Sacraments *ex opere operato*, Transubstantiation by the priestly consecration, the sacrificial character of the Holy Eucharist, and holds firmly to the veneration of the Blessed Virgin. Such being the character of his theology, he cannot be regarded as a precursor of the Reformation. He never thought of separating from the Church and he died a Catholic. During his lifetime he was never taken to task by the Inquisition. In the sixteenth century his writings, however, were placed on the Index of forbidden books on account of their errors.

Ullmann, *Reformatoren vor der Reformation*, II (Gotha, 1866), 235- 557, partisanly Protestant; Friedrich, *Johann Wessel* (Ratisbon, 1862); Paulus, *Ueber Wessel Gansfort's Leben und Lehre in Der Katholik*, II (1900), 11-29, 138-154, 226-24.

FRIEDRICH LAUCHERT

Ignaz Heinrich von Wessenberg

Ignaz Heinrich von Wessenberg

Vicar-General and Administrator of the Diocese of Constance, born at Dresden, 4 November, 1774; died at Constance, 9 August, 1860. He studied at Augsburg, Dillingen, Wurzburg, and Vienna. At the age of eighteen he was already canon at Constance, Augsburg, and Basle, and in 1802, when still a subdeacon, he became Vicar-General of Prince-Primate Dalberg for the Diocese of Constance. Not until 1812, when he was thirty eight years old, did he accept priest's orders. Wessenberg was entirely unfit for the position. Though a man of extensive knowledge, he was not a profound scholar and his theological training was very deficient. Imbued from his early youth with Josephinistic and Febronian principles, he advocated a German National Church, somewhat loosely connected with Rome, supported by the State and protected by it against papal interference.

Before he became vicar-general he had ventilated his liberalistic views of religion and the Church in a work entitled "Der Geist des Zeitalters" (Zurich, 1801). In 1802 he founded the monthly review "Geistliche Monatsschrift", which he edited and used as a medium to spread his ideas of false religious enlightenment. The protests against this review were such that Dalberg ordered its suspension on 25 May, 1804. It was replaced by the "Konstanzer Pastoralarchiv", which was less offensive and continued to be published annually in two volumes till 1827. For the realization of his pet plans of a National German Church Wessenberg made futile efforts at the council which Napoleon convened in Paris in 1811 and at the Congress of Vienna in 1815.

In the Swiss portion of the Diocese of Constance Wessenberg's innovations aroused great dissatisfaction. His abolition of various holy days of obligation in the cantons of Aargau and St. Gall in 1806; his cooperation with the Government of Lucerne in the suppression of monasteries; his orders in case of mixed marriages (1808) to permit the male offspring to be brought up in the religion of the father, the female in the religion of the mother; and especially his many matrimonial and other dispensations that exceeded his competence induced Testiferrata, the papal nuncio at Lucerne, to call him to account, but Wessenberg insisted that nothing had been done which exceeded the jurisdiction of the Bishop of Constance, giving Testiferrata at the same time to understand that he did not recognize the papal nunciature of Lucerne. After various requests from the Catholics of Switzerland, Pius VII put an end to Wessenberg's reformatory plans in that part of the diocese by severing the Swiss cantons from the Diocese of Constance, in a Brief of 21 October, 1814. On 2 November of the same year the pope ordered Dalberg to depose Wessenberg without delay from the office of vicar-

general. Dalberg kept the pope's order secret, though in the beginning of 1815 he temporarily replaced Wessenberg as vicar-general by Canon von Roll for private reasons. In the summer of 1815 he requested the Government of Baden to appoint Wessenberg his coadjutor with the right of succession. The government acceded to Dalberg's wish, but Rome refused to recognize the coadjutorship. In the same year Wessenberg published anonymously a notorious anti-papal treatise entitled "Die deutsche Kirche, Ein Vorschlag zu ihrer neuen Begründung und Einrichtung". It is a plea for his scheme of a German National Church, and suggests detailed plans as to its organization. On 17 Feb., 1817, seven days after the death of Dalberg, the Chapter of Constance elected Wessenberg as vicar of the chapter and administrator of the diocese, but his election was invalidated by Pius VII in a Brief of 15 March, 1817. In July Wessenberg went to Rome, hoping to gain the pope to his side and return as primate of his projected German Church or, at least, as Bishop of Constance. He was kindly received by Consalvi, the secretary of state, but was told that, before the pope would enter into any negotiations with him, he would have to resign as administrator and, like Fenelon, make a declaration to the effect that he disapproved all that the pope disapproves. Refusing to submit to these conditions, he left Rome and with the approval of the Government of Baden continued to act as administrator of Constance until 1827, in open disobedience to the pope. Pius VII suppressed the Diocese of Constance in his Bull, "Provida sollersque", of 16 Aug., 1821, incorporating it in the newly erected Archdiocese of Freiburg, whose first archbishop, Bernard Boll, was appointed in 1827. It must be said to the credit of Wessenberg that during his administration he rendered some services to the Church. Among these are especially noteworthy his deep solicitude for a better training and stricter discipline of the clergy and his insistence on regular Sunday sermons in parish churches and semi-weekly religious instructions in the state schools. After his retirement in 1827 he gave vent to his anti-papal sentiments and spread his rationalistic views on religion and the Church by various treatises and by frequent contributions to the anti-religious review, "Die freimüthigen Blätter" (Constance, 1830-44). His chief literary productions are: "Die grossen Kirchenversammlungen des 15. und 16. Jahrhunderts in Beziehung auf Kirchenverbesserung" (4 vols., Constance, 1840, 2nd ed., 1845), extremely anti-papal (cf. Hefele, in "Tübinger Quartalschrift", 1841, 616 sq.); "Die Stellung des römischen Stuhles gegenüber dem Geiste des 19. Jahrhunderts" (Zürich, 1833); "Die Bistumssynode und die Erfordernisse und Bedingungen einer heilsamen Herstellung derselben" (Freiburg, 1849). The last-named two works were placed on the Index. He is also the author of a collection of poems (7 vols., Stuttgart, 1843-54).

BECK, Freiherr Ign. Heinrich v. Wessenberg. Sein Leben u. Wirken (Freiburg, 1862; 2nd ed., 1874), panegyrical, was placed on the Index; WEECH, Badische Bio-

graphien, II (Heidelberg, 1878), 452 sq.; LAUER, Gesch. der katholischen Kirche in Baden (Freiburg, 1908), passim, especially 51-71; BRUCK, Gesch. der katholischen Kirche in Deutschland im 19. Jahrhundert, I (Mains, 1902), 150-60; VON SCHULTE in Allg. Deutsche Biographie, XLII; (Leipzig, 1897), 147-57; ROSCH, Das religiose Leben im Hohenzollern unter dem Einflusse des Wessenbergianismus 1800-1850 (Cologne, 1908).

Wessobrunn

Wessobrunn

(WESSOGONTANTUM, AD FONTES WESSONIS).

A suppressed Benedictine abbey near Weilheim in Upper Bavaria. It was founded about 753 by Duke Tassilo and named after the duke's hunting companion Wesso who discovered a well at the present site of the monastery. It was colonized by monks from Niederaltaich with Abbot Ilsung at their head. Under him was completed a church dedicated to Sts. Peter and Paul and he took part in the synod of Dingolfing in 770. His successor Adelmar (199-831) was present at the Council of Aachen in 817 and during his abbacy, Wessobrunn, which had originally belonged to the Diocese of Brixen, was joined to the Diocese of Augsburg. In 955 the abbey was destroyed by the Hungarians, on which occasion Abbot Thiente and six of his monks suffered martyrdom, while the remaining three fled to Andechs with the sacred relics. The Monastery was then occupied by canons until 1065 in which year the provost Adalbero restored the Rule of St. Benedict and governed as abbot until his death in 1110. In the first year of his abbacy the monastic church was rebuilt and was dedicated by Bishop Embrico of Augsburg. Adalbero was succeeded by Sigihard (1110-28), during whose reign a separate church was built for the neighbouring people, dedicated to St. John the Baptist in 1128. Under Bl. Walther (1129-57) Wessobrunn enjoyed its first era of great spiritual and temporal prosperity. By rearing various tasteful edifices he gave the first impulse to unusual architectural activity and the cultivation of art for which Wessobrunn became famous in subsequent times. During his incumbency we find the earliest mention made of a nunnery in connection with the abbey. It was here that Blessed Wulfhildis and the learned and pious Diemoth lived and died under his guidance. (Concerning him see "Monatsschrift des hist. Vereins von Oberbayern", I, Munich, 1892, 55 sq.) The three following centuries were periods of successive rise and decline. In 1401 the abbots of Wessobrunn were granted the right of pontifical insignia. A new era of great prosperity began with the accession of Ulrich Stocklin (1438-43), who had previously been a monk at Tegernsee and acquired considerable fame as a writer of sacred hymns.

His rhymed prayers are highly finished and breathe a deep piety, though at times owing to their excessive length they become tedious. G.M. Dreves, who edited them in his "Analecta Hymnica", III, Vi, and XXXVIII, styles him "one of the most prolific rhythmic poets of the later Middle Ages". Abbot Heinrich Zach (1498-2508) installed a printing press at the monastery, and Abbot Georg Uebelhor (1598- 1607) founded the famous Wessobrunn school of stucco-work from which issued the great masters Schmauzer (Matthias, Johann, Franz, and Joseph) and Zimmermann (Johann and Dominik). Towards the end of the seventeenth century Abbot Leonard Weiss (1671-96) began the rebuilding of the church and monastery in larger dimensions. This abbot was also instrumental in the formation of the Bavarian Benedictine Congregation in 1684 and joined his abbey to it. From the sixteenth century to the secularization of Wessobrunn in 1803, its monks displayed a continuous rare literary activity and some of them acquired fame as authors and teachers in various schools of Germany. Among the best known are: the historians Stephan Leopolder (d. 1532) and Coclentin Leutner (d. 1759); the theologians Thomas Ringmayr (d. 1652), Thomas Erhard (d. 1743), Veremund Eisvogl (d. 1761), Alphonse Campi (d. 1769), Ulrich Mittermayr (d. 1770), Virgil Sedlmayr (d. 1772), Sympert Schwarzhuber (d. 1795); the canonists Gregor Zallwein (d. 1766) and Johann Kleinmayern (the last Abbot of Wessobrunn, d. 1810); the Librarian and scientist Anselm Ellinger (d. 1816). Among these Leutner, Campi, Eisvogl, and Mittermayr collaborated in the edition of a large concordance of the Bible which was published in 1751. After its secularization in 1803 the abbey came into the possession of a certain De Montot. In 1810 the church was pulled down and used as building material at the neighbouring town of Weilheim. The remaining buildings were bought by Professor Sepp of Munich in 1861 and since 1900 they have been the property of Baron von Cramer-Klett.

Of special importance for the history of German literature is the "Wessobrunn Prayer" (Das Wessobrunner Gebet), so called because it was discovered in a manuscript at Wessobrunn. It is a Saxon poem, copied in Bavaria c. 800, and is one of the earliest literary remains of the German language. It appears to have as its basis [Psalm 89:2](#), consists of nine alliterative lines, and is probably a quotation from a lost Biblical poem anterior to the "Heiland". To the poem is loosely attached a short prayer in the Bavarian dialect. It was edited by Mullenhoß-Schere, "Denkmaler deutscher Poesie und Prosa No. I", and by Kogel, "Geschichte der deutschen Literatur", I, I, 269-276.

(Kempten, 1909); SCHLEGLMANN, Geschichte der Sakularisation im rechtsrheinischen Bayern, III, I (Ratisbon, 1906), 917-929.

MICHAEL OTT

Sebastian Westcott

Sebastian Westcott

English organist, born about 1524, was a chorister, under Redford, at St. Paul's Cathedral, London, and in 1550 became organist, almoner, and master of the boys of that cathedral. He retained his post at St. Paul's, under Edward VI, Queen Mary, and Queen Elizabeth, from 1550 to 1583, and this notwithstanding the fact that he was an avowed protagonist of the ancient Faith, for which he suffered deprivation and even imprisonment. His chief title to fame rests on the many plays and pageants, with music, which he produced for the delectation of the English Court during a period of thirty-three years, these plays being performed by the boys of the cathedral school. So celebrated was he in this respect that he is seldom mentioned by his surname (Westcott), but almost invariably as "Master Sebastian". Under Queen Mary this Catholic organist had the honour of arranging the music for the formal restoration of the ancient Faith at St. Paul's, in Nov., 1553, and he composed a "Te Deum" which was sung on 9 Feb., 1554, on the suppression of Wyatt's rebellion. He also conducted the service for the reception of Cardinal Pole on the first Sunday of Advent, 1554, when the beautiful motet: "Te spectant Reginalde Pole", by Orlando di Lassus, was sung. Di Lassus was in England at this time, as was also Philippe de Monti, and both were probably present.

Under Elizabeth, in 1559, Westcott refused to subscribe to the new "articles", and was deprived of his post, but owing to the favour of the queen was permitted to retain it. Official documents from 1559 to 1561 amply prove that "Master Sebastian" was well paid for his musical and dramatic performances. Rev. Dr. Nicholas Sander, in a report to Cardinal Morone, in May 1561, highly praises Westcott. At length, in December, 1577, he was deprived by the Protestant Bishop Allmer and imprisoned in the Marshalsea as a Catholic recusant. Evidently Queen Elizabeth missed her customary Christmas plays by the choristers of St. Pal's, and so she ordered the release of Master Sebastian on 19 March, 1578. Even during the fierce persecution of the year 1583 this sturdy confessor-musician was allowed to continue in office, but in 1583 his name disappears from official records and he either resigned or died in that year. His successor was appointed in 1584.

W.H. GRATTAN-FLOOD

Ancient See of Westeraas

Ancient See of Westeraas

(AROSI, AROSIENSIS).

Located in Sweden. The Catholic diocese included the lands of Vestmanland and Stora, Kopparberg (Dalecarlia, Dalarne), and the district of Fellingsbro in the land of Orebro. The see was founded at Munktorp, then removed about 1100 (not 1050) to Westeraas by the English Cluniac missionary St. David, Abbot of Munktorph, Bishop of Westeraas, and one of the patron saints of Westeraas cathedral. Before 1118 the Diocese of Sigtuna was divided into those of Upsala and Westeraas, and Henry, Bishop of Sigtuna (1134), was transferred to Westeraas. Heathenism was not extinct in 1182. Charles (1257-1277) was a great benefactor, and Israel Erlandsson, O.S.B. (1260-1332; bishop, 1309- 1332), mined copper in Dalecarlia and wrote "De Vita et Miraculis S. Erici" (Ser. rev. Svec., II, I, 272-276). Otto (1501-1522) completed the cathedral. Peter Sunnanvader (1522-1523), formerly chancellor to Sten Sture, was executed for alleged treason in 1527. The last Catholic bishop, Petrus Magni (1524-1534), was consecrated on 1 May, 1524, at Rome. In 1527 a Diet was held at Westeraas which Protestantized the Swedish Church and separated it from Rome. Petrus Magni consecrated various bishops in 1528 and 1531 under protest. Though subjected latterly to humiliating tutelage by Gustavus Vasa, he retained the see until his death. The Dalecarlians rose repeatedly in defence of their religion, but were overcome by the cunning and violence of Gustavus I. Even now they retain many Catholic beliefs and usages. The cathedral of Westeraas and the parish church of Mora are the only important churches in the diocese.

At Westeraas there were a Franciscan convent (founded 1234) and a Hospital of the Holy Spirit (founded 1345). Munktorp Abbey was extinct before 1318. The Cistercian Abbey of Husby (Gudsberga, Mons Domini) in Dalecarlia, founded in 1477, and colonized from Aalvastra in 1486, lasted until 1544. Its ruins are extensive. There are now scarcely any Catholics in the diocese.

W. TAYLOR

Archdiocese of Westminster

Archdiocese of Westminster

(WESTMONASTERIENSIS).

Erected and made metropolitan in 1850, comprises the Counties of Middlesex, Hertfordshire, Essex, and London north of the Thames. Its suffragan sees are Northampton, Nottingham, Portsmouth, and Southwark. In 1911 the Province of Westminster, which included the whole of England and Wales, was divided into three; but certain privileges of pre-eminence over the new provinces were granted "for the safeguarding of unity, to the already historic Church of Westminster". The subject will be treated in the following order:

- I. The Making of the Diocese;
- II. The Rule of the Archbishops;
- III. Diocesan Institutions.

I. THE MAKING OF THE DIOCESE

The Archbishop of Westminster today represents two offices of the Pre-Reformation Church. As ordinary of the Diocese of Westminster his jurisdiction extends over much the same area as that of the Bishop of London. As chief metropolitan, he occupies a position similar to that of the Archbishop of Canterbury, Primate of All England. Edmund Bonner, the last Catholic Bishop of London, died in prison in 1569. Cardinal Pole, the last Catholic Archbishop of Canterbury, was dead before Elizabeth's Parliament had finally broken the continuity of episcopal succession in the English Church. Nearly three hundred years passed away before the hierarchy was restored. Nevertheless, as early as 1622, a vicar Apostolic was appointed for all England; and the country was divided into four vicariates in 1688. The state of Catholicism in the Archdiocese of Westminster today is a development on the foundations laid by the succession of eleven vicars Apostolic in the London District (see LONDON).

The beginning of the progress that has made the modern diocese must be dated from the passing of the Catholic Relief Acts of 1778 and 1791, which brought freedom of teaching and worship. Throughout the ninety years previous the Catholic population

of London remained steady at about 20,000; while in the country parts of the London District, the numbers dropped from 50000 in 1746 to 4000 in 1773, the low-water mark of English Catholicism. Even towns in the London District, like Canterbury and Colchester, did not possess a chapel. The venerable Bishop Challoner laboured on the London mission for the last fifty years of this depressing period, and died in the midst of the ruin wrought in his district by the Gordon Riots of 1780, occasioned by the first Relief Acts. He will ever be memorable as the devoted pastor who guided the Church in England through the long, dark hour before the dawn. Though his end came in troublous times, a better day was already breaking. For in the very year of the second Relief Act, Bishop Douglass was able to say in a report to Rome: "The Church is now beginning to flourish in our metropolis"; and in the twenty years that followed, the Catholic population of the London District was considerably more than doubled.

The development of the missions and the provision of more decent places of worship were the most obvious external results of the Relief Acts. The old chapels were rebuilt on a larger scale, and the next thirty years saw the rise of many new ones in places hitherto impossible. The arrival of the French emigres in Bishop Douglass's time, while helping to spread the spirit of toleration, gave a further stimulus to the starting of missions and the building of chapels. London had always enjoyed a unique advantage over the rest of the country in respect of Catholic worship. This was due to the existence of the embassy chapels and, in the reigns of Charles I and Charles II, to the chapels maintained by the Catholic queens, Henrietta Maria and Catherine of Braganza. Even from Elizabeth's reign Catholics seem to have been able to worship with immunity in the embassy chapels. The Spanish Embassy possessed, in the time of Elizabeth and James I, the old monastic church attached to the town-house of the Bishops of Ely (this pre-Reformation church, probably built about 1339, was once again restored to Catholic worship in 1879). In 1670, several Masses were said daily in the chapels of the Spanish, Portuguese, and Venetian embassies; and Airoldi reported: "I was edified by the crowds of worshipers. Masses were said from eight o'clock to twelve, and during those hours the chapels were never empty". Several of these chapels were open to the public in the latter part of the seventeenth and throughout the eighteenth centuries. Bishop Petre pointed out to Propaganda their importance, and begged Rome to persuade the Catholic Powers to provide larger chapels in convenient places. They suffered with the rest during the Gordon Riots, but were repaired or rebuilt, and some of them have remained to our own day the parish churches of important London missions. The Sardinian Chapel, Lincoln's Inn Fields, which has registers dating from 1729, and which is said to have been founded in 1648, was doubled in size. At one time in the eighteenth century seven priests were attached to it, serving a Catholic population of nearly 14,000; in 1814 there was a Catholic population of 7000

served by four or five priests. In 1799 Bishop Douglass took over the lease of the chapel and converted the ambassador's house into a presbytery, the mission being henceforward supported by the congregation. The old church, built by Inigo Jones and enlarged by Sir Christopher Wren, was standing until 1909, when it had to be abandoned to make room for the London County Council improvements in connection with the new highway Kingsway, and the present church was built a short distance off. The Spanish Embassy always provided a public chapel. The present mission of Spanish Place was set on a permanent footing in 1792, when Father Hussey, F.R.S. (afterwards Bishop of Waterford and first President of Maynooth), built the chapel which was used until the new Gothic church, one of the most beautiful in London, was opened in 1890. The Warwick Street Chapel was first built in 1730 for the Portuguese Embassy. Its registers date from 1747, about which year it was attached to the Bavarian Embassy. It was rebuilt some eight years after the Gordon Riots, and still stands today as the parish church of London's most aristocratic quarter. The French, Portuguese, Venetian, and Neapolitan Governments also maintained chapels where public worship was carried out more or less attractively during the eighteenth century.

Other missions that had been conducted in fear and trembling through the eighteenth century now found their opportunity. Soho is one such. It was "Little Ireland", the Catholic centre of the London Irish, and also contained the town houses of the Catholic gentry, who "formed each spring one united colony of the faithful", hence known as "The Holy Land". A large hall in Carlisle House was fitted up by Father O'Leary in 1792, and continued in use for a hundred years until Canon Vere opened the present St. Patrick's Soho. One or more "Mass-houses" existed at Moorfields, close to the City of London, from the beginning of the eighteenth century. The old chapel, along with the schools, was utterly destroyed in the Gordon Riots, and a new one, St. Paul's Moorfields, was fitted up in a dwelling house. The Catholic population increased so rapidly, from 4200 in 1791 to 12,700 in 1816, that a large church had to be built. It was opened in 1820, and became the principal church of the vicars Apostolic, three of them being buried there. In 1852 it was enlarged, and served as Wiseman's pro-cathedral. Manning was consecrated there in 1865. Ten missions have been formed from the original one. In 1899, the district around St. Mary Moorfields having long ceased to be a residential quarter, the church was sold and replaced by a smaller one. The old riverside chapel at Virginia Street in the East end was replaced by a new one in 1780. Its Catholic population increased from 7000 in 1805 to 16,000 in 1850, and many new missions have since been established in its neighbourhood. The principal church of the district is now the beautiful Gothic church of St. Mary and St. Michael, in Commercial Road, opened in 1850.

Great numbers of the French clergy and nobility came over to Bishop Douglass's district after the outbreak of the French Revolution. At one time there were as many as 5 archbishops, 27 bishops, and 5000 priests in London. Eight chapels were opened for their use, toward the building of which Protestants and Catholics alike subscribed. All but one were closed by 1814, on the return of the exiles to France. This one, the chapel of St. Louis in Little George Street, opened in 1799, was later given the title of "Chapel Royal of France", and continued to be served by French priests until it was closed in 1911, shortly after the death of Mgr. Tournel. The exiled French clergy also opened churches for English Catholics, and thus laid the foundations of permanent London missions. Such are the missions of Tottenham, opened by the Abbé (afterwards Cardinal) de Cheverœuf in 1794; Somers Town, opened by the famous Abbé Carron in 1808; Cadogan Terrace, Chelsea, opened by the Abbé Voyaux de Franous in 1812; and Hampstead, opened by the Abbé Morel in 1815.

Catholic Emancipation, which placed Catholics civilly and politically on a level with their fellow-citizens, marks the next epoch. "It is especially since 1829", as Cardinal Wiseman pointed out in 1863, "that the exterior expansion of Catholicism has been most visibly manifested." The next twenty years witnessed remarkable progress all round, which made the establishment of a hierarchy a necessity. The number of churches in London was doubled; the number of priests trebled; while the number of convents increased from one to nine. Ten years after Emancipation, the Catholics of London numbered close on 150,000, about one-tenth of the total population of London; and the churches were quite inadequate in size and number to the needs of the congregations. There were 400 conversions in London in 1836, and ten years later the harvest of the Oxford movement was already being gathered. Because of the recent growth, the Bull "Munificientia Apostolica Ratio" was published in 1840 to increase the vicariates from four to eight, as a first step towards a regular hierarchy.

II. THE RULE OF THE ARCHBISHOPS

A. Cardinal Wiseman

On 29 September, 1850, the Bull "Universalis Ecclesiae" was issued, restoring a hierarchy with territorial titles. England and Wales were formed into one ecclesiastical province. Westminster was raised to the dignity of metropolitan, the twelve other sees being made suffragan to it. The old London Vicariate gave place to the dioceses of Westminster and Southward, the former retaining Middlesex, Hertfordshire, and Essex. Nicholas Wiseman, the last Vicar Apostolic of the London District, was appointed first archbishop and raised at the same time to the sacred purple. The new cardinal's letter "From out of the Flaminian Gate of Rome", announcing the reorganization of the English Church, aroused a storm of opposition in the country against what was termed "Papal aggression". On his return from Rome he made it his first business to

allay the storm. How well he succeeded is attested by Cardinal Newman. "Highly as I put his gifts, I was not prepared for such a display of vigour, power, judgment, sustained energy..." The Ecclesiastical Titles Act, indeed, passed into law, but it was a dead letter from the beginning.

On Wiseman fell the task of beginning the reconstruction of the Church in England. The constitution given to the vicars Apostolic was out of date, and a new code of legislation had to be laid down in the three provincial Synods held at Oscott in 1852, 1855, and 1859. The principal decrees of those Synods defined the status of cathedral chapters and the position of the rectors of missions, and regulated the government of the colleges and seminaries. In London much had to be done in the way of remodeling and reorganizing the missions. Wiseman gave a great impetus to the spread of popular devotions, introduced the Forty Hours' Adoration, and obtained more decorum and regularity in church services. Before his time daily Mass was regularly celebrated only in twelve churches in London. Benediction and Vespers were very rare, and seem to have been intermingled with English prayers and hymns at the will of the celebrant. In 1849 only one church in London possessed a statute of Our Lady. Wiseman also took the initiative in obtaining the appointment of Catholic army chaplains on an equality in all respects with the Protestant, and in making some provision for the spiritual needs of Catholics in the navy. Both the military and naval chaplains' departments are now administered from Archbishop's House, Westminster (S.C. de Prop. Fide, 15 May, 1906).

The question of the education of the poor was in very sad condition. Wiseman applied his energies to every new move. The Government started reformatory schools for juvenile offenders in 1854, and Wiseman at once secured that one should be reserved near London as the first Catholic reformatory. In 1857 he opened an industrial school for homeless children; and at the time of his death he was busy with negotiations for providing the Poor Law children with Catholic instruction. Several new schools were also opened for the poor children in the missions. One of the great means to which Cardinal Wiseman looked for the carrying out of his schemes was the formation of religious communities, especially of religious communities, to help in the work of evangelizing the poor. When he first came to London "there was not a single community of men". The Jesuits indeed had a "splendid church" at Farm Street, opened in 1849; but could not provide a community of the nature that Wiseman required. In a few years, however, the Redemptorists, the Passionists, the Marists, and the Oratorians had come. By the end of his life he had seen the establishment of fifteen communities of men, and the number of communities of women increase from nine to thirty-two. These figures, taken in conjunction with the increase in number of churches from 46

to 120, and of priests from 113 to 215, testify amply to the wonderful development of the diocese under the first archbishop.

But by 1852 Wiseman had already arrived at the conclusion that the regular communities could not give to the diocese the manifold activities he expected from them. He therefore determined to form a community of secular priests "ready to undertake any spiritual work which the Bishop cut out for them". The work was entrusted to Henry Edward (afterwards Cardinal) Manning, and resulted in the formation of the Oblates of St. Charles in 1857. Unfortunately, this brought the cardinal some of the saddest days of his life. The new foundation aroused a strong opposition, at the head of which Archbishop Errington, coadjutor with right of succession to the see, was found. The controversy resulted in Archbishop Errington's resignation of his rights of succession in 1862. He had been associated with Wiseman in all his undertakings, supplying the business capacity that Wiseman lacked; and in his retirement, it is recorded of him that "he nursed no resentment in his heart...His tongue left no sting or stain behind". Cardinal Wiseman died in 1865, after several years of failing health. Always regarded on the Continent as one of the greatest personalities of the age, his popularity grew steadily in England among all classes of the population. How thoroughly he had conquered was made known by an almost unique demonstration of public sympathy at the time of his death.

B. Cardinal Manning

Mgr. Manning had been appointed provost of the Westminster Chapter under Cardinal Wiseman in 1857, and now succeeded him as metropolitan. The contrast between the roles of the first and second archbishop has been drawn by the latter's biographer. "If Wiseman's was the pilot's venturesome arm to steer the bark of Peter through heavy seas to a safe anchorage, it was Manning's part to make smooth the way by tact and skill and intimate knowledge of the land, for the advance of the Church into the fullness of English life." Manning's qualification in this respect were his Oxford training and his intimacy with English life and society. The first thing to which the archbishop turned his attention was the education of the poor. "Our weak side is the education of our children", was Wiseman's lament in 1863, and he estimated that there were 17,000 poor Catholic children unprovided for. Manning, in the first year of his episcopate, put the figures at 20,000, and saw that the difficulty could only be overcome by continual and organized effort. With this end in view, he established the Westminster Diocesan Educational Fund in 1866. The success of the new undertaking was all that he desired. Some fourteen years later he was able to say: "The work for the poor children may be said to be done...There is school room for all". A critical moment for Catholic education in England was caused by the passing of the Education Act of 1870, which established the School Boards. It was met by the crisis fund, started by the Committee

under Lord Howard of Glossop, which eventually provided accommodation for 70,000 children at a cost of £350,000.

For the higher education of the laity, Manning, even as early as 1864, considered that something in the nature of a Catholic University was necessary and feasible. For a moment he had entertained the idea of an academy for young laymen in Rome. But at the Provincial Council of 1873, he returned to the plan of a college of higher studies in London, under the control of the bishops of the province. In 1874 a Catholic University College was opened at Kensington, and, much against Manning's wishes, a Senate was established to represent the dioceses, colleges, and laity of England. Men of distinction, including Prof. Barff, Dr. Mivart, Father Clarke, Mr. Gordon Thompson, Mr. Paley, and Mr. Seagar, were appointed to act as professors under the rectorship of Mgr. Capel. The college proved a failure. After costing the cardinal £10,000 it was eventually united to St. Charles's College (started by the Oblates in 1863 and transferred to a new site in 1874) as a higher department. Manning then reconciled himself to "the postponement of any college for higher studies to the indefinite future". Cardinal Manning had all through his life the education of the clergy much at heart. In 1866 he undertook the reorganization of the English College, Rome, and arranged for the nomination of one of the Oblates of St. Charles as rector. In 1869 he transferred the students in theology from Ware to Hammersmith, where he began what he considered "a true Tridentine Seminary". New buildings were erected by 1884 at a total cost of £37,000. Dr. Weathers was rector until it was closed in 1892. He became bishop auxiliary to Cardinal Manning in 1872, and died in 1895 in his eighty-first year.

Meanwhile the development of the diocese, begun under Wiseman, was maintained. New missions were founded; and ten churches built, two of them being among the principal churches of the diocese, viz., the pro-cathedral at Kensington, the foundation stone of which was laid in 1867, and the Brompton Oratory, which was consecrated in 1884. The development of the missions was facilitated by the growth in the numbers of the clergy during Cardinal Manning's episcopate from 215 to 358. In managing the business of the diocese, the cardinal relied greatly on his vicar-general, Mgr. Gilbert, founder of the Providence Row Night Refuge. Mgr. Gilbert was provost of the Chapter at the time of the cardinal's death, and his name was put on the *terna* then submitted to Rome.

In matters of social reform Cardinal Manning was one of the leading men of all time. The foundation of the League of the Cross did more than any prohibitive legislation could for the promotion of temperance amongst the masses. He played an active part in the Royal Commission appointed in 1884 to enquire into the question of housing the working classes. (It was on this occasion that the Prince of Wales, afterwards Edward VII, decided that "the name of the Cardinal should appear immediately

after his own" in the list of commissioners.) Mansion House committees might always count on his active support in any charitable undertaking. He warmly espoused the cause of labour. The energy, insight, and skill which he displayed in imposing "the Cardinal's peace" on masters and men alike at the end of the Dock Strike of 1889 will not be easily forgotten. The Fourth Provincial Council of Westminster was held at St. Edmund's College in 1873. Archbishop Manning was made a cardinal in 1875, with the title of Sts. Andrew and Gregory on the Caelian Hill. Within the next four years, two other eminent English ecclesiastics were admitted to the Sacred College: Edward Howard and John Henry Newman.

C. Cardinal Vaughan

Cardinal Manning died 14 January, 1892, and was succeeded by Herbert Vaughan, Bishop of Salford, who became cardinal-priest with the title of Sts. Andrew and Gregory on the Caelian Hill, in Jan., 1893. The foundation of St. Joseph's Society for Foreign Missions and his work in the Diocese of Salford pointed him out as the man most eminently suited for the See of Westminster. He had the same educational problems to face as Cardinal Manning, though under different conditions. The problem of the education of the clergy in England he thought could only be solved by "the concentration of labour and resources into one or two central seminaries". He therefore closed the seminary at Hammersmith, and, with the co-operation of seven bishops of southern and midland dioceses, converted Oscott into a central seminary. To give facilities for the higher education of the laity, he removed the prohibition against attendance at the national universities and formed the Universities Board. St. Edmund House was also opened at Cambridge for ecclesiastical students. All through Cardinal Vaughan's time the struggle for the better education of the poor continued, until the passing of the Education Bill of 1902, which placed existing denominational schools on an equality in maintenance with the Board schools.

As a result of an inquiry instituted in 1896, the cardinal found that there were 1720 destitute Catholic children in non-Catholic homes. These agencies made no attempt to disguise their purpose: charity was given on the one condition that the faith of the children was sacrificed. The cardinal saw that he must take steps to provide a home for every Catholic child who was really destitute. He therefore founded the Crusade of Rescue. In 1901 the care of the rescue work was transferred to Father Bans, who had for some years been in charge of the homes for destitute children started by Rev. Lord Archibald Douglas in 1859. The work has prospered, until today (1912) the society provides for 1000 children at a cost of £16,000 a year.

The chief and closing event of the episcopate of Cardinal Vaughan was the erection of Westminster Cathedral, of which the first stone was laid, 29 June, 1895. Owing to its special function and scope, this foundation may truly be said to have marked a new

epoch in the life of the Catholic Church in England. In it the cardinal realized a project which he had deeply at heart, namely that the cathedral of the chief metropolitan see should be not only a large and stately building, but one in which should be revived the cathedral life and work, as in Catholic times, according to the Church's ideal, and in which, as the "House of Prayer", the voice of the Church in the daily round of her Divine Office and sacred liturgy should ascend continually to God in thanksgiving and intercession on behalf of the people. All this he was wont to express by saying that it must be "a live cathedral". For this purpose, he obtained permission from the Holy See that the number of the canons of the metropolitan chapter should be increased from twelve to eighteen, and as these are for the most part non-resident, he made provision for a body of eighteen cathedral vicars or chaplains, whose main duty is the celebration of the daily High Mass and the choral recitation or chanting of the Divine Office. In this they are assisted by a choir composed of choristers, and also of boys who are maintained and trained in the song-school attached to the cathedral. The cathedral has thus been able to fulfill, under the fostering care of Cardinal Bourne, what its founder regarded as its missionary object -- that it should not only a fitting centre and summit to the structure of the Catholic Church in England, but that it should stand in the midst of the capital of the British Empire as a worthy presentation of the dignity and beauty of Catholic worship in liturgy, music, and ceremonial. Its success and the multitudes which assemble within its walls have attested the public appreciation of the lofty ideal which entered into its erection, and have more than justified the wisdom of Cardinal Xaughn and his predecessors. The cardinal also organized the researches which led to the decision given at Rome in 1896 on the subject of Anglican Orders.

During his time the number of priests was increased by 90, and the number of churches by 14 in London and 20 in the Home Counties. Mgr. Michael Barry succeeded Mgr. Gilbert as vicar-general and provost of the chapter in 1895. Bishop Robert Brindle, D.S.O., was auxiliary bishop from 1899 till his appointment to the See of Nottingham in 1901. He was succeeded as provost by Bishop Patterson, who had been Wiseman's intimate friend.

To the college at Mill Hill, which he had founded as a young priest, and from which the Faith had since been spread to so many wild places of the earth, the cardinal would retire from time to time to pray for blessing on the work of his later years in the archdiocese; and there he breathed his last on 19 June, 1903.

D. Cardinal Bourne

Leo XIII died a month after Cardinal Vaughan, and one of the first acts of Pius X was the translation of Bishop Bourne, then in his forty-third year, to the See of Westminster. The new metropolitan, a Londoner by birth, had been Bishop of Southwark since, 1897, having been consecrated Bishop of Epiphania, as coadjutor with the right

of succession, in the previous year. He was early marked as a leader of men by the ability and energy with which he conducted St. John's Seminary, Wonersh, from its very foundation, endowing it with his high ecclesiastical ideals, and placing it amongst the leading colleges of England with a distinctive spirit of its own. It is almost the only seminary in England which is strictly Tridentine, i.e. which educates the priests of the diocese from boyhood in a purely ecclesiastical college in the diocese. His training had fitted him to take the lead in ecclesiastical education; for his student days were passed in the long-established English colleges at Ushaw and Old Hall, in the seminaries of St. Thomas in London and St-Sulpice in Paris, and finally, in the theological side of Louvain University. His six years' government of the Diocese of Southwark is especially memorable for the development of rescue and social works and for the opening of a very large number of new missions. It was already manifest that he possessed the great administrative ability, power of organization, and apostolic zeal which he has since displayed in a larger sphere of activity as Archbishop of Westminster and head of the Church in England. He was created cardinal on 27 Nov., 1911, and received the same titular church, of St. Pudentiana, as Cardinal Wiseman.

The rule of the fourth archbishop has been noted for the gathering together and organization of forces. Westminster Cathedral, opened in 1903 and consecrated in 1910, has become the focus of diocesan activities and the great centre of English Catholicism. It witnessed the celebration of the Golden Jubilee of the Hierarchy in 1910; and secured the wonderful success of the Eucharistic Congress of 1908, at which seven cardinals, seventeen archbishops, and over seventy bishops assisted. The diocesan seminary has been restored to its ancient home at Ware, and housed in a commodious modern building. The annual general meetings of the Catholic Truth Society have developed into national congresses, in which all the Catholic works of the country unite. The Catholic Women's League, founded in 1907, has banded Catholic women together for the furtherance of religious and intellectual interests, and of social work. The altar-servers of the country have been united in the Archconfraternity of St. Stephen, founded by Cardinal Bourne in 1905. The Catholic Federation has been established, with the object of enabling Catholics to take combined action in securing the due representation of Catholic interests in public bodies; and thus concrete form has been given to the principles laid down by the first archbishop. At length, also, Catholic prison chaplains have, through the influence of Cardinal Bourne, been placed on an equality with the Protestant.

Cardinal Bourne has spoken with the voice of a great churchman who commands attention, on subjects of the first importance, e.g. the crisis of the French Church (1906), the Congo question (1909), temporal power (1911), present social unrest (1912), and the language question in Canada (1910 and 1912). "His is the straight word --

wise, conciliatory, never shrinking from a full statement, but only from an unfair one." Two events in particular have revealed him as a statesman capable of rising superior to any emergency. One was the tactful, but firm and decisive, handling of the Government's eleventh-hour prohibition of the Eucharistic Congress procession. The other was the conduct of the campaign against the Education Bill of 1906. The climax of this campaign was reached in the monster demonstration at the Albert Hall, where the archbishop, supported by the Duke of Norfolk and Mr. John Redmond, rallied Catholics of every political creed to the defence of the schools.

The publication of the Apostolic Constitution "Si qua est" on 28 October, 1911 marks a new epoch in the history of the Church in England. Hitherto the whole of England and Wales had formed one ecclesiastical province, composed of one metropolitan and fifteen suffragan sees. In 1911 three provinces were formed: Westminster in the east, Birmingham in the west, and Liverpool in the north. Westminster retains the Churches of Northampton, Nottingham, Portsmouth, and Southwark, as suffragan. "Moreover, for the preservation of unity in government and policy, to the Archbishop of Westminster are granted certain new distinctions of pre-eminence. He will be permanent chairman at the meetings of the bishops of all England and Wales...he will take rank above the other two archbishops, and will, throughout all England and Wales, enjoy the privilege of wearing the pallium, of occupying the throne, and of having the cross carried before him. Lastly, in all dealings with the supreme civil authority, he will in his person represent the entire episcopate of England and Wales." The progress that the Church has made in England since the establishment of the hierarchy may be realized from the fact, pointed out by Cardinal Bourne, that two of the new provinces "each possess more churches and larger bodies of clergy than were contained in the whole country in 1850; while the third and smallest province falls very little short of the same degree of expansion". In the Diocese of Westminster alone the number of priests has been multiplied by five, the number of churches by four, and the Catholic population has been increased by one hundred and fifty thousand, during the same period of sixty years.

Mgr. William A. Johnson, Bishop of Arindela, died in 1909. In the words of Cardinal Bourne, he had been "the main pivot in the government of the archdiocese for forty-four years". Born in London in 1832, he became assistant secretary to Cardinal Manning in 1865, and chief diocesan secretary two years later, in succession to Canon John Morris, the well-known writer, who then entered the Society of Jesus. He was made provost under Cardinal Bourne in 1903, and vicar-general in 1904. On the petition of the Bishops of England, he was consecrated Bishop of Arindela in 1906. After his death he was succeeded as provost of the chapter by Mgr. Patrick Fenton, who had

been president of St. Edmund's College from 1882 to 1887, vicar general from 1900, and auxiliary bishop from 1904.

III. DIOCESAN INSTITUTIONS, ETC.

The Cathedral, built in the Byzantine style, was begun in 1895, opened in 1903, consecrated in 1910 (see WESTMINSTER CATHEDRAL). The Westminster mission was started in 1792, with a Catholic population of about 500. The Horseferry Road Chapel, opened in 1813, served this very poor district until 1903.

Colleges and Boys' Schools. -- Besides the diocesan college and seminary at Ware, and the foreign missionary college at Mill Hill, there are: a training college for men teachers in elementary schools, and nine other institutions engaged in secondary education, all but two of which are conducted by clergy or religious. For Girls, there are 37 convent schools, three schools under secular teachers, and one training college for teachers.

Public Elementary Schools number 116, of which 104 (including 199 departments) receive Government grants. In 1910-11 there were 36,902 children on the books of these schools. In 1900 the numbers were 27,779; 21,315 in 1890; 11,145 in 1865. In 1849 the year before the establishment of the hierarchy, there were only 8445 in all the Catholic schools in England.

Residential Institutions for Poor Children. -- (1) Schools certified by Government: one reformatory, two industrial schools, ten schools for Poor-Law children, and five schools for ophthalmic, feeble-minded, crippled, or epileptic children. (2) Homes and Orphanages under the Rescue Society: four homes for boys and one for girls, with one home in Canada for emigrated children, under the Catholic Emigration Association. (3) Other Homes: three for boys and ten for girls.

Charities. -- There are 35 homes and orphanages for poor children, nine refuges for penitents, one night refuge, four asylums and three almshouses for aged poor, and six hospitals. Much work is done amongst the poor by the Society of St. Vincent de Paul, the Ladies of Charity, and other organizations of the laity. Other societies watch over the interests of certain classes. Such are: the Converts' Aid Society (for convert clergymen), the Catholic Soldiers' and Seamen's Association, the Prisoners' Aid Society, the International Catholic Society for befriending girls.

Periodicals. -- "The Tablet", a weekly newspaper and review, is the chief Catholic paper in England. Founded in 1840 by Mr. Frederick Lucas as the organ of the English Catholics, it emigrated to Dublin for a time in 1849. Mr. John Wallis brought it back to London and edited it until 1868, where it was bought by Father Herbert (afterwards Cardinal) Vaughan. The "Dublin Review" was started in 1835, as "the Catholic rival of the Whig "Edinburgh" and the Tory "Quarterly". Cardinal Wiseman was to all intents and purposes the literary editor until 1863, when it passed into the hands of W.G.

Ward. Bishop (afterwards Cardinal) Vaughan became owner in 1879, and Bishop Hedlwy edited it until 1884, when Bishop Vaughan took over the editorship himself. Mgr. Canon Moyes was editor from 1892 until the appointment of Mr. Wilfrid Ward by Cardinal Bourne in 1906. The "Catholic Directory", published annually in Westminster, supplies a guide to the varied activities of the Church in Great Britain. It is a development of the "Ordo recitandi", and the "Laity's Directory" (started in 1793), and appeared for the first time in its present form in 1838.

Religious Communities. -- Men: Augustinians, Augustinians of the Assumption, Benedictines, Canons Regular of the Lateran, Discalced Carmelites, Catholic Missionary Society, Congregation of the Mission, Dominicans, Fathers of Charity, Friars Minor, Hijos Missionarios del Corazon Immac. de Maria, Institute of St. Andrew, Jesuits, Marist Fathers, Missionaries of the Sacred Heart, Oblates of Mary Immaculate, Oblates o St. Charles, Oratorians, Passionists, Pious Society of missions, Redemptorists, Fathers of St. Edmund (Pontigny), St. Joseph's Society for Foreign Missions, Salesians, Salvatorians, Servites, Alexian Brothers, Brothers of Mercy, Marist Brothers.

Women: Adoration of the Sacred Heart, Adoration Reparatrice, Assumption, Bon Secours, Bon Secours (of Troyes), Canonesses of St. Augustine, Canonesses of the Holy Sepulchre, Carmelites, Dames Bernardines, Dames de Nazareth, Daughters of the Cross, Dominicans, English Institute of the B.V.M., Faithful Companions, Filles de Jesus, Franciscans, Good Shepherd, Handmaids of the Sacred Heart, Helpers of the Holy Souls, Holy Child, Immaculate Conception, Our Lady of the Retreat, Institut Normal de Paris, Jesus and Mary, Little Company of Mary, Little Sisters of the Assumption, Little Sisters of the Poor, Marie Auxiliatrice, Marie Reparatrice, Marist Sisters, Most Holy Cross and Passion, Most Holy Sacrament, Notre Dame, Notre Dame de Sion, Poor Clares, Poor Handmaids of Jesus, Poor Servants of the Mother of God, Poor Sisters of Nazareth, Filles de La Sagesse, Sainte Union, Servants of the Sacred Heart, Servites Siervas de Maria, Sisters of Charity (4 congregations with 17 convents), Sisters of Hope, of Mary and Joseph, of Mercy, of Providence, of St. Chretienne, of St. Joseph, of St. Martha, of St. Martin, of St. Mary, of the Christian Retreat, of the Holy Family, of the Poor Child Jesus, of the Sacred Heart, of the Sacred Hearts of Jesus and Mary, Society of the Sacred Heart, Soeurs de Misericorde, Ursulines, Ursulines of Jesus, Visitation.

Statistics

Priests, 540 (180 regulars), 184 churches, 30 communities of men, 161 communities of women. Catholic population, 250,000 out of a total population of 5,467,768.

ARTHUR J. HETHERINGTON

Matthew of Westminster

Matthew of Westminster

The name given to the supposed author of a well-known English chronicle, the "Flores Historiarum". The misunderstanding regarding this imaginary personage originated in the title of a rather late manuscript of this history (Cotton, Claudio, E, 8) which describes the work as "liber qui Flores Historiarum intiulatur secundum Matthaeum monachum Westmonasteriensem". This seems to be due to the blunder of some copyist, who, perceiving that the latter part of the chronicle was written at Westminster while the greater portion followed the history of Matthew Paris, concluded that the said Matthew was himself a monk of Westminster. The "Flores Historiarum" in its fullest form extends from the Creation to 1326, but many manuscripts stop short at 1306. From 1259, where Matthew Paris ends, it possesses considerable historical value. The compilation from 1259-65 was made at St. Albans; from 1265-1325 it bears evident signs that the various writers who contributed to it lived at Westminster. The chronicle was printed for the first time by Archbishop Parker in 1567 and was attributed by him, following Bale and Joscelin, to "Matthew of Westminster". It was re-edited by Luard for the Rolls Series in 1890 with an introduction containing the fullest investigation of the genesis of the work.

MADDEN, Historia Anglorum of Matthew Paris in R.S., III (London, 1866-9); HARDY, Catalogue of Materials for British History in R.S., III (London, 1862-71); HUNT in Dict. Nat. Biog., s.v. Westminster, Matthew, based upon Luard, whose explanations are now generally recognized.

HERBERT THURSTON

Westminster Abbey

Westminster Abbey

This most famous of all English abbeys is situated within the precincts of the Royal Palace of Westminster, like Holyrood in Scotland and the Escurial in Spain. Its site, on the northern side of the River Thames, a mile or two above the ancient City of London, was formerly known as Thorney or the Isle of Thorns. The date of the foundation of the abbey is quite uncertain. The Venerable Bede (d. 736) does not mention it, but an early and long-received tradition ascribes it to Sebert, King of the East Saxons, who likewise founded St. Paul's, London. The given is 616 and the church is said to have been miraculously consecrated by St. Peter himself. But though this is mere legend, invented probably in the thirteenth century, it is tolerably certain that the monastery existed as early as the eighth century, for it is in a charter of King Ofa, dated 785, that it is first called Westminster, to distinguish it apparently from the minster of St. Paul's to the east. There is also extant a tenth century charter of King Edgar in which the boundaries of the abbey property are defined, and according to William of Malmesbury, St. Dunstan brought twelve Benedictine monks from Glastonbury to Westminster about 960, though the authenticity of this statement has been doubted.

At any rate, whatever the beginnings may have been, it is quite certain that there was an important church standing, and a community of Benedictines in existence at Westminster, when Edward the Confessor began to build in 1055. Of this first Saxon church and monastery no traces remain, and even its plan and site are for the most part conjectural. During his exile in Normandy Edward had vowed to make a pilgrimage to Rome if he should regain his throne. The pope absolved him from this vow on condition that he built or restored an abbey in honour of St. Peter, and this condition Edward fulfilled at Westminster, his friend Edwin being abbot at the time. The earlier buildings were demolished to make way for the new choir and transepts, which were finished and consecrated in 1065, a few days before the king's death. The monastery was planned for seventy monks, but the actual number seems never to have been more than about fifty. The nave of the church was begun in 1110 and completed about 1163 when the Confessor's relics were translated, on his canonization, to a stately shrine in the middle of the choir. Early in the thirteenth century a large eastern lady-chapel was substituted for the small semi-circular one behind Edward's high altar, and this was consecrated in 1220. The growing needs of the community and the constant stream of pilgrims to the tomb of the miracle-working Confessor soon necessitated further changes, and, aided by the munificence of Henry III, a period of great building activity

set in. The demolition of the Norman church began in 1245, and during the next thirty years the whole of the eastern part of the church, together with about half the nave, were rebuilt, and the shrine of St. Edward was moved to its present position in the apse behind the high altar. The abbots during this period were Richard Crokesley and Richard Ware. The death, however, of Henry in 1272, a disastrous fire in 1298 which consumed the whole of the monastic buildings, and the "Black Death" in 1349, which carried off Abbot Byrcheston and twenty-six of his monks, so drained the resources of the abbey that all building operations ceased for nearly a century. Under Abbot Litlyngton (1362-86) the conventional parts were rebuilt, after which the western bays of the nave were taken in hand. Progress was slow, however, and the nave was not finally completed until 1517, whilst the western towers were not added until the eighteenth century. In 1502 Henry VII commenced the beautiful eastern lady-chapel which bears his name and was intended by him to enshrine the remains of his uncle Henry VI. Robert Vertue was the architect and his work is far in advance of any other contemporary building. Its wonderful fanvault has never been surpassed either in beauty of design or in the daring skill displayed in its actual construction. In this chapel stands the tomb of its pious founder who died in 1509.

As regards the internal history of Westminster, it must have been much like any other large and important monastery of the same period and apparently full of life and vigour. The "Customary", drawn up by Abbot Ware (1258-84), supplies us with the details of the daily life of the monks, but, apart from this, the close proximity of the abbey to the royal palace, the fact of its being under direct royal patronage, as well as its possessing a noted shrine much visited by pilgrims, combined to bring it prominently into the religious and civil life of the nation. The abbots were important personages with seats in the House of Lords. Their position enabled them to foster learning and the arts. The first printing-press in England was set up within the monastic precincts by Caxton in 1477 under the patronage of Abbot Esteney. Simon Langham (1349-62) deserves mention because of his being the only Abbot of Westminster to become a cardinal. He was successively Bishop of Ely, Archbishop of Canterbury, Lord High Treasurer, and Lord Chancellor, and finally Cardinal-Bishop of Palestrina. For many years he devoted large annual sums of money towards the building expenses of his old abbey, and, at his death in 1376, he bequeathed the greater part of his fortune for the same purpose. He was buried at Westminster, in St. Benedict's Chapel, where his tomb may still be seen.

In 1539 the monastery was suppressed and the monks, then less than thirty in number, were dispersed, being replaced by a dean and twelve prebendaries, who acknowledged the royal supremacy. William, Boston, or Benson, the last abbot, became the first dean. In 1540 the abbey was made the cathedral church of a new see, Thomas

Thirlby being the first and only Protestant Bishop of Westminster. Ten years later this bishopric was suppressed. In 1556 Queen Mary restored Westminster to the Benedictines and Dr. John Feckenham, who had been professed at Evesham before the dissolution, was made abbot. He was the last mitred abbot to sit in the House of Lords. On the accession of Queen Elizabeth in 1559, the monks were again ejected from Westminster and superseded by a Protestant dean and chapter, which arrangement has continued down to the present day. Westminster Abbey is designated a "Royal peculiar", its officials are appointed by the Crown, and the abbey itself is extra-diocesan, that is, exempt from the jurisdiction of the Bishop of London in whose diocese it was situated. This exemption from episcopal jurisdiction was first obtained by Abbot Crokesley (1246-58) and has been perpetuated under the Protestant regime. The right of sanctuary was enjoyed by Westminster from Norman times, and even after the Reformation it lingered on in a modified form until finally abolished by King James I. The greater part of the old monastic buildings are now used as a public school. As was usual in all the larger monasteries, there had always been a school in the monastic cloister, the minute regulations for which may be found carefully detailed in Abbot Ware's "Customary". To replace this, at the Reformation, Henry VIII founded a new school, which was afterwards given collegiate rank by Elizabeth and it now ranks as one of the leading English public schools. The scholars of Westminster still have certain rights and privileges within the abbey itself, such as greeting the sovereign with acclamation, on behalf of the English people, at the moment of his coronation. From its earliest days Westminster has witnessed the coronations of almost all the English sovereigns and their consorts, commencing with Harold, the successor of Edward the Confessor, and William the Conqueror, in 1066. There are two coronation chairs. The first, which stands in St. Edward's Chapel against the back of the high altar screen, contains the stone on which the Scottish kings had formerly been crowned. This stone, according to legend, is supposed to have been the identical one on which Jacob rested his head at Bethel, and to have been taken thence to Egypt and then through Spain to Ireland, about 700 B.C., where it stood upon the sacred Hill of Tara, and it is said to have been removed thence to Scone in Scotland, in 330 B.C., by Fergus, the founder of the Scottish monarchy. But whatever its origin may have been, Edward I in 1297 brought it to Westminster and on it every sovereign of England since Edward II has been crowned, excepting only Edward V. The other chair, the queen's, which now stands in Henry VII's Chapel, was made for Mary, the wife of William III, who was crowned with him in 1689. Besides being the scene of their coronations, Westminster is also the burial-place of many English sovereigns and their consorts, e.g. Henry III, Edward I, Edward II, Richard II, Henry V, and six queens, whose tombs are in St. Edward's Chapel, and Henry VII, Mary Queen of Scots, Elizabeth, and Mary Tudor, and Margaret, the widow of Henry

V, who lie buried in Henry VII's Chapel. Numerous other celebrities, poets, statesmen, warriors, etc., illustrious in English history, have likewise been buried within the abbey, so that it has become a national honour to be given a resting place there, though unfortunately it cannot be said that their tombs do anything but mar the beauty of the building. The pre-Reformation tombs accord with the medieval architecture of the abbey, but those of later date, though many of them good work in themselves, are completely out of harmony with their surroundings.

The extreme length of the abbey, including Henry VII's Chapel, is 511 ft.; the width of the nave and aisles 79 ft.; and the height to the vaulting 102 ft., which is unusually lofty for an English church. Exteriorly, the want of a central tower detracts somewhat from the general effect, and the eighteenth century western towers are poor compared with the rest of the building, but the grace and beauty of the interior, in spite of the incongruous tombs and monuments, are surpassed by few other Gothic churches in the world. Much judicious restoration of the fabric has been successfully carried out in recent years. Apart from the immediate monastic precincts, the abbey domains were very extensive, comprising numerous manors and other endowments, but most of these have now passed into other hands. The revenues of the abbey at the time of the dissolution amounted to £3471 (equivalent to about £35,000 or \$154,000 at the present day), but though shorn of so many of its ancient possessions, the Chapter of Westminister is still a very wealthy collegiate body.

G. CYPRIAN ALSTON

Westminster Cathedral

Westminster Cathedral

As a national expression of religious faith given by Roman Catholics to England since the Reformation, Westminster Cathedral, London, stands pre-eminent. This distinction is due to vastness of proportion, and original qualities of design. The project of erecting a cathedral for the metropolitan see originated in 1865, with the first archbishop of the restored hierarchy, but it was not until thirty years later that the building was commenced by Cardinal Vaughan from the design of the late John

Francis Bentley. On the death of the architect, in 1902, the structure was practically complete, but the internal decoration had scarcely been attempted. The whole building covers an area of about 54,000 square feet; the dominating factor of the scheme, apart from the campanile, being a spacious and uninterrupted nave, 60 feet wide, covered with domical vaulting.

In planning the nave, a system of supports was adopted not unlike that to be seen in most Gothic cathedrals, where huge, yet narrow, buttresses are projected at intervals, and stiffened by transverse walls, arcading and vaulting. But while, in a Gothic cathedral these counterforts are generally most conspicuous features outside the building, at Westminster Cathedral they are limited to the interior, the space between being entirely utilized, as at St. Mark's, Venice. It should be noted, however, that in the latter instance the cruciform plan is emphasized by making the transepts as important as the nave, while at Westminster Cathedral they are virtually shut off by the nave arcades, that maintain an unbroken continuity from west to east. This rhythm, or repetition of parts, produces an effect of length and height quite lacking in the Venetian prototype. The main piers and transverse arches that support the domes divide the nave into three compartments, each 60 feet square. The domes rest on the arches at a height of 90 feet from the floor; the total internal height being 111 feet, or about 10 feet higher than the choir of Westminster Abbey.

In selecting the pendentive type of dome, of shallow concavity, for the main roofing, weight and pressure were reduced to a minimum. The pendentures that occupy the angles of the square compartments, and develop a circle 60 feet in diameter at a height of 90 feet from the floor, may be regarded as corbels, by which the weight of the domes is directed to the main piers. The domes and pendentures are formed of concrete, and as extraneous roofs of timber were dispensed with, it was necessary to provide a thin independent outer shell of impervious stone. The concrete flat roofing around the domes is covered with asphalt. The sanctuary, 54 feet square, is essentially Byzantine in its system of construction. The extensions that open out on all sides make the luminous corona of the dome, raised aloft on pendentives, seem independent of support. The extensions on the north and south of the sanctuary are occupied by the organ galleries. On the exterior, the group formed by the sanctuary and the eastern turrets presents a subtle gradation of parts more oriental than the rest of the building and perhaps more expressive of the internal arrangements.

The eastern termination of the cathedral forming the retro- choir, whether viewed from the outside or the inside, suggests the Romanesque, or Lombardic style of Northern Italy. The crypt with openings into the sanctuary, thus closely following the Church of St. Ambrose, Milan, the open colonnade under the eaves, the timber roof following the curve of the apex, are all familiar features. The huge buttresses, however,

give distinction, and resist the pressure of a vault 48 feet in span. Although the cruciform plan is hardly noticeable inside the building, it is emphasized outside by the boldly projecting transepts. These with their twin gables, slated roofs, and square turrets with pyramidal stone cappings suggest a Norman prototype, and all in striking contrast to the rest of the design. The aspiring note, however, is provided by the campanile, 30 feet square, that rises from the ground to a height of 284 feet. Like some of the well-known towers of Italy its lines are unbroken for marking the height.

The main structural parts of the building are of brick and concrete, the latter material being used for the vaulting and domes of graduated thickness and complicated curve. Following byzantine tradition, the interior was designed with a view to the future application of marble and mosaic; and throughout the exterior, the lavish introduction of stone bands in connection with the red brickwork produces an impression quite foreign to the English eye. The main entrance facade owes its composition, in a measure, to accident rather than design. Its apparent lack of height caused by the unavoidable recession of the upper parts is however compensated for by the lofty campanile, not many feet away. The most prominent feature of the facade is the deeply recessed arch over the central entrance, flanked by tribunes, and stairway turrets. The tympanum of this arch is left vacant for a subject in mosaic. The elevation on the north, with a length of nearly 300 feet contrasted with the vertical lines of the campanile and the transepts, is most impressive. It rests on a continuous and plain basement of granite, and only above the flat roofing of the chapels does the structure assume a varied outline. The porch next the tower is an ornate and pleasing feature of this elevation. The lighting of the nave and sanctuary mainly depends on large lunettes, just under the main vaulting.

On entering the cathedral the visitor who knows St. Mark's, Venice, or the churches of Constantinople, will note the absence of a spacious and well lighted outer narthex, comprising all the main entrances; but this is soon forgotten in view of the fine proportions of the nave, and the marble columns, with capitals of Byzantine type, that support the galleries and other subsidiary parts of the building. The marbles selected for the columns were, in some instances, obtained from formations quarried by the ancient Romans, chiefly in Greece. Thus, in the nave and transepts there are monoliths of the green breccia of Atrax, in Thessaly, and the grayish green marble of Carystus, in the Island of Euboea. Besides these we see the pale green *cipollino* of Switzerland, the red marble of Langerdoc, and varigated breccias from Italy. In the sanctuary eight columns of yellow marble, from Verona, support the baldacchino over the high altar, and others, white and pink, from Norway, support the organ galleries. Two columns of the black and white breccia from the Pyrenees adorn the shafts of Italian *pavonazzo* are in the baptistery, the chapel of the holy souls, and the sanctuary. In the crypt, under

the retro-choir, sturdy monoliths of red granite support the vaulting, and others, the gallery at the west end of the nave.

Respecting the general scheme of internal decoration the architect's intention was based on an appreciation of the principles underlying the application of marble and mosaic, as exemplified by St. Mark's, Venice, and the churches of Ravenna and Constantinople. Accordingly we find in his design, the two materials separated by a boldly defined cornice at a uniform level throughout; the lower part being reserved for the marble plating, and the upper for mosaic. The decoration already done is confined to the sanctuary and the chapels. Two of the latter, the chapel of the holy souls, and the chapel of Sts. Gregory and Augustine, are finished throughout. The little shrine of the Sacred Heart is also finished; and the marble plating is completed in the chapel of the Blessed Sacrament, the Lady Chapel, the chapel of St. Thomas, and St. Peter's crypt. The altars were all in position before the consecration of the cathedral on 28 June, 1910.

The chapels entered from the aisles of the nave are 22 feet wide, and roofed with simple barrel vaulting. The chapel of Sts. Gregory and Augustine, next the baptistery, from which it is separated by an open screen of marble, was the first to have its decoration completed. The marble lining of the piers rises to the springing level of the vaulting and this level has determined the height of the altar reredos, and of the screen opposite. On the side wall, under the windows, the marble dado rises to but little more than half this height. From the cornices, at their levels, begins the mosaic decoration on the walls and vault. This general arrangement will apply to all the chapels entered from the sides of the nave, yet each chapel will have its own distinct artistic character. Thus in the chapel of the holy souls on the opposite side of the nave, there are but slight deviations from the arrangement just described, though the tone of the decoration is more subdued, and the details differ. Italian marbles of sombre tint are applied to the lower part of the walls, and silver takes the place of gold on the vault. The other chapels of this series dedicated to St. Joseph, St. Paul, St. George, and the English Martyrs, St. Patrick, and St. Andrew, are at present without their decoration. The chapel of the Blessed Sacrament, on the north side of the sanctuary, and the Lady Chapel, on the south, are entered from the transepts, twenty-two feet wide, lofty, with open arcades, barrel vaulting, and apsidal ends; in plan they are alike. Over the altar of the Blessed Sacrament chapel a baldacchino is suspended from the vault, and the chapel is enclosed with bronze grilles and gates. In the Lady Chapel the altar reredos will have a picture in mosaic of the Virgin and Child.

The central feature of the decoration in the cathedral is of course the baldacchino over the high altar in the sanctuary. This is one of the largest structures of its kind, the total width being 31 feet, and the height 38 feet. The upper part of white marble is

richly inlaid with coloured marbles, lapis lazuli, pearl, and gold. Behind the baldacchino the crypt emerges above the floor of the sanctuary, and the podium thus formed is broken in the middle by the steps that lead up to the retro-choir. The curved wall of the crypt is lined with narrow slabs of green carystran marble. Opening out of this crypt is a smaller chamber, directly under the high altar. Here are laid the venerated remains of the first two archbishop of Westminster, Cardinal Wiseman and Cardinal Manning. The altar and relics of St. Edmund of Canterbury occupy a recess on the south side of the chamber. The little chapel of St. Thomas of Canterbury, entered from the north transept, is used as a chantry for the late Cardinal Vaughan. A large crucifix suspended from the sanctuary arch dominates the whole interior of the cathedral.

JOHN A. MARSHALL

William Weston

William Weston

Jesuit missionary priest, born at Maidstone, 1550 (?); died at Valladolid, Spain, 9 June, 1615. Educated at Oxford, 1564-1569 (?), and afterwards at Paris and Douai (1572-1575), he went thence on foot to Rome and entered the Society of Jesus, 5 November, 1575, leaving all he possessed to Douai College. His novitiate was made in Spain, and there he worked and taught until called to the English Mission, where there was not then a single Jesuit at liberty. He reached England, 20 September, 1584, and had the happiness of receiving into the Church Philip Howard (q.v.), Earl of Arundel. He has left us an autobiography full of the missionary adventures (see bibli. below). One salient feature was the practice of exorcisms, at which a number of other priests assisted; and this movement made for a time a good impression. So far, however, as we can now discover, the subjects were not suffering from diabolic possession, but only from hysteria (then called "mother"). Yet there is no reason to doubt the sincerity of the exorcists, for Catholics and Protestants alike were then credulous on this subject, and the latter, so far as England and Scotland went, were very cruel. The first to object to these witchcraft proceedings were the older priests. A recrudescence of persecution put an end to the exorcisms after a year, before any serious harm had ensued; and this we should consider as a merciful disposition of Providence ("The Month", May, 1911). Many of the exorcists were martyred for their priesthood; the rest, almost to a man, were seized and imprisoned, Weston amongst the latter (August, 1586). In 1588 the Government moved Weston and a number of other priests to the old ruinous castle of Wisbech, where for four years their confinement was very strict. But in 1592 the prisoners were, for economy's sake, allowed to live on the alms supplied by Catholics, and for this much freedom of intercourse was permitted. A great change ensued, the

faithful came, quietly indeed, but in considerable numbers, to visit the confessors, who on their part arranged to live a sort of college life. This was not accomplished without much friction.

The majority with Weston (20 out of 33) desired regular routine with a recognized authority to judge delinquencies, e.g. quarrels and possible scandals. The minority dissented, and when the majority persisted, and even dined apart (February, 1595), a cry of schism was raised, and Weston was denounced as its originator, the pugnacious Christopher Bagshaw (q.v.) taking the lead against him. In May, arbitrators (Bavant and Dolman) were called in, but without result, as one espoused one side, one the other. In October two more arbitrators, John Mush (q.v.) and Dudley, were summoned, and they arranged a compromise amid general rejoicings. The whole body agreed to live together by a definite rule (November, 1595). This result seems to show that Weston and those from whom he acted as "agent" were not wrong in insisting on some measure of order. On the other hand he was clearly at fault in not appreciating better the motives and feelings of the considerable minority against him; but some of them were no doubt most difficult to treat with. In the spring of 1597 the troubles of the English College, Rome, spread to England, and led to a renewal of the "Wisbech stirs", which were soon overshadowed by the "Appellant controversy". Weston took no part in this, as he was committed, early in 1599, to the Tower, where he suffered so much that he almost lost his sight. In 1603 he was sent into exile and spent the rest of his days in the English seminaries at Seville and Valladolid. He was rector of the latter college at the time of his death. His autobiography and letters show us a man learned, scholarly, and intensely spiritual, if somewhat narrow. A zealous missionary, he strongly attracted many souls, while some found him unconciliatory. Portraits of him are preserved at Rome and Valladolid.

Morris, *Troubles of our Catholic Forefathers*, II (1875), contains a translation of Weston, *Autobiography*. The conclusion, which is there missing, is in *Catholic Record Society*, I; Peralta, *Puntos cerca la santa vida del P. Guillermo Weston* (1615); MS. at Rome; Law, *Jesuits and Seculars in the Reign of Elizabeth* (1889); Bartoli, *Inghilterra* (1668); More, *Historia provinciae anglicanae* (1660); Pollen in *The Month* (July, 1912). For the literature of the Appellant question see Garnet, Henry; Persons, Robert.

J.H. POLLEN

Westphalia

Westphalia

A province of Prussia situated between the Rhine and the Weser. It is bounded on the northwest and north by the Netherlands and Hanover, on the east by Schaum-

burg-Lippe, Hanover, Lippe-Detmold, Brunswick, Hesse-Nassau, and Waldeck, on the south and southwest by Hesse-Nassau, on the west by the province of the Rhine and the Netherlands. It is the tenth in size and the third in population of the Prussian provinces, having an area of 7804 square miles, and 4,125,096 inhabitants. Of its population 2,121,534 are Catholics, and 1,947,672 Evangelicals. The province has 107 cities and 1468 village communities. In the south and northeast it is mountainous, in the other sections it is level. The chief industries are agriculture, breeding of cattle, mining, and manufactures. The industrial section on the Ruhr River contains the most productive coal beds of Germany and also the most valuable iron mines. Consequently this district is the seat of the most extensive mining industry, large iron forges, and innumerable factories for the manufacture of machinery and the working of iron. The relatively small district of 386 square miles contains some twenty towns of more than 20,000 inhabitants with altogether a population of 750,000. The other manufactures are chiefly linen and other textile products. 53.4 per cent of the inhabitants make their living in mining and manufacturing industries, 26.2 per cent in agriculture, 10 per cent in commerce and traffic. Still 42.4 per cent of the area is given up to farming and gardening.

HISTORY

In the earliest era the province was inhabited by the German tribes of the Sicambri, Bructeri, Marsi, and Cherusci. For a short time it was held by the Romans, having been conquered by Drusus and Tiberius, the sons of Augustus, in a series of campaigns during the years 12 B.C. to A.D. 5. The Romans were defeated in the great battle in the Teutoburg Forest (A.D. 9), and Germanicus was not able to reconquer the country. In the third century the Saxons pushed their way into the province from the Cimbrian peninsula; other tribes joined them, either voluntarily or under compulsion, and thus there arose a large confederation of tribes which bore the name of Saxons. The western part of the province between the Weser and the Lower Rhine appears from about the year 800 in the historical sources under the name of Westphalia, while the district on both banks of the Weser was called Engern, and the district between the Weser and the Elbe bore the name of Eastphalia. In the later Middle Ages the name Engern disappeared and the region of the Weser was then considered a part of Westphalia. No one has yet been able to give a satisfactory explanation of the names Westphalia and Eastphalia. Among the various meanings suggested have been: *fâl*, horse; *fale*, inhabitant of a lowland; *vallum*, boundary wall, etc.

The Westphalians were brought into contact with Christianity in the seventh century. The first apostles (about A.D. 695) were the two Ewalds, known from the colour of their hair as the White and the Black Ewald. However, the account of Bede (*Hist. eccl. gent. Angl.*, lib. V, c.x) is uncertain and contradictory. At a later date the

conversion of the Saxons especially engaged the attention of St. Boniface. He was not, however, able to carry out his desire, although Westphalian folk-lore has stories of the preaching of Boniface and even of his founding of churches. Probably, even though the proof is lacking, the attempts to found missions among the Saxons proceeded from Cologne. No permanent success was gained by the campaigns of the Frankish King Pepin (751-68) against the Saxons. The country was finally subdued after several bloody wars (772-804) by Pepin's son Charlemagne, who, as an apostle of the sword, brought the Saxons to Christianity. The questions asked the Saxon candidates for baptism are still in existence, as well as the answers that were to be made in which they were obliged to renounce the gods Donar, Wodan, and Saxnot. The baptism of the Saxon Duke Widukind (785) was of much importance; for after baptism he was unswervingly loyal to Christianity and its zealous promoter. The same is true of the Westphalians in general. After they had once accepted the Christian faith, which "had been preached to them with an iron tongue by their bitterest enemies", hardly any other people were as loyally and devotedly attached to Christianity. Charlemagne's chief assistants in the missionary work were Sturm (who converted the country around Paderborn), Lebwin (who brought the western districts of Westphalia to Christianity), and Liudger (who converted the district surrounding Münster). At the end of the eighth and the beginning of the ninth centuries the missionary districts of Osnabrück, Münster, Minden, and Paderborn were raised to dioceses. The southern part of the province, in the neighbourhood of Ruhr and Lippe, fell to the Archdiocese of Cologne. Louis the Pious continued the work of his father. During his reign the first monasteries were founded; the most celebrated of these are the Benedictine Abbey of Corvey (815), and the Abbey of Herford (819) for Benedictine nuns.

Westphalia, as has already been said, was only a part of Saxony, and in about the year 900 Saxony was made a duchy, after Ludolf, the ancestor of the ducal house, had been made a margrave in 850 during the reign of Louis the German. The duchy continued to exist until 1180. The last and greatest of the dukes was Henry the Lion, who lost the duchy through disloyalty to the emperor. This led to the division of Westphalia into numerous principalities. The southern part, the "Sauerland", fell as the Duchy of Westphalia to the Archdiocese of Cologne which retained it until 1803. This duchy had its own constitution and its own diet. The head of the ecclesiastical government was the court of the officiality. Up to 1434 the court was held at Arnsberg, and after that at Werl. The attempts of the Archbishops of Cologne to extend the ducal power even over the northern part of the province were unsuccessful. Instead of the jurisdiction of Cologne, the Bishops of Münster, Osnabrück, Paderborn, and Minden, who had long had secular sovereignty, became independent ruling princes. At the same time numerous smaller principalities were created, such as the countships of Mark,

Ravensberg, Tecklenburg, Rietberg, and Steinfurt, the free imperial city of Dortmund, the principality of the Abbot of Corvey. In 1394 the Countship of Mark was united with Cleves. In 1346 the Countship of Ravensberg was united with Julich and in 1511 also with Cleves. In this article the Diocese of Osnabruck, as is generally the case, is not taken into consideration, although it belongs to the original territory of Westphalia and in earlier ages included large districts of the present dioceses of Münster and Paderborn, because from 1648 it was entirely independent, and in 1815 it became a part of the Kingdom of Hanover with which, in 1866, it was incorporated into Prussia.

In the meantime the Church had developed in all directions. The number of monasteries and religious foundations that were established during the Middle Ages exceeded 250. Among these should be mentioned: the Benedictine abbeys at Grafschaft (1072), Marienmünster (1128), St. Moritz at Minden (1042), Abdinghof at Paderborn (1015); the Cistercian abbeys at Bredclar (1196), Hardchausen (1140), and Marienfeld (1185); the Premonstratensian abbeys at Kappenberg (1122), Klarholz (1133), and Varlar (1128); the Augustinian monasteries at Osnabrück (1288), Herford (before 1288), and Lippstadt (1281); the Dominican monasteries at Dortmund (1310), Minden (1236), Münster (1346), Soest (1231), and Warburg (1280); the Minorite monasteries at Soest (1232), Paderborn (1232), Münster (about 1247), and Herford (1223?). In the Conflict of Investitures the Westphalian bishops, with few exceptions, held to the Emperors Henry IV and Henry V, and only at times, and then under strong compulsion, did they support the Church. In the same way they were partisans of Emperor Frederick I (1152-90) in his quarrel with the pope. During the reign of Frederick II (1215- 1250), on the contrary, they were actively connected with the pope. The strong religious feeling of the medieval Westphalians is shown by the large number of ecclesiastical institutions dependent upon the charity of the people. Thus Lippstadt, with a population of 2700, had four parish churches, and there were hospitals in very small places. Numerous pilgrimages were undertaken as far as Spain and France. Many also took part in the Crusades. In 1217 one of the leaders was Count Gottfried II of Arnsberg. In the fourteenth century the object of the Crusades was the heathen land of the Prussians. Thus in 1337 the Counts of Lippe, Arnsberg, and Wittgenstein joined the expeditions against the Prussians.

The Carthusian Werner Rolevinck (b. in 1425 in the District of Münster; d. in 1502) said of his countrymen: "I am bold to assert that the people are genuinely pious, especially in fasting, in hearing the Divine Word, in attendance at church, in the acceptance of their pastors, in frequent pilgrimages, in the giving of alms, hospitality to strangers, and other works of Christian charity". It is probable, however, that Rolevinck describes the beautiful and earlier period of the fathers. At the beginning of the fourteenth century Westphalia was in a terrible state of disorganization caused by the

political schemes of its ecclesiastical princes, as, for instance, by the three counts of Mors who occupied the sees of Cologne, Paderborn, Osnabrück, and Münster, or more especially by the Soest feud (1441-49), and the Münster feud (150-56). After 1456 better conditions prevailed for a time; order was restored in the monasteries; the bishops encouraged religious life; the diocesan synods were more regularly held, and favourably influenced both clergy and people. But conditions again grew bad when suddenly, in the year 1508, all the Westphalian sees were vacant and the former competent bishops were succeeded by persons unequal to the duties of their office. Until towards the end of the Middle Ages Westphalia in intellectual matters was under the influence of Cologne and its university. Yet in the era of Humanism a vigorous independent life was developed in the province. Many Westphalians attended the school at Deventer which flourished under the guidance of Alexander Hegius, a native of Westphalia. At Münster, Rudolf of Langen and Johannes Murrmellius exerted an active and far-reaching influence for the spread of humanistic training. The Westphalian Hermann von dem Busche was one of the greatest wanderers among the itinerant humanistic teachers. Although a eulogist like Hermann Hamelmann goes too far when he asserts, as Hamelmann continually does, that the Westphalians were the first to revive Classical learning in Germany, nevertheless a large share must be ascribed to them in this revival.

During the first years of the era of the Reformation Westphalia was little affected. It is true that here, as elsewhere in Germany, a strong anti-clerical opposition had been in existence for a long time, but this antagonism did not at once join the new dogmatic opposition of Luther. The revolts which in 1525 arose in Minden and Münster, were social in the main, and were aimed both against abuses in the lives of the upper and lower clergy which were inconsistent with the dignity of the clerical calling and which had become intolerable, and against historically sanctioned privileges of ecclesiastics in civil and political affairs. The earliest adherents of Luther in Westphalia were Augustinian monks and Humanists. The Augustinians studied at the University of Wittenberg and brought the new doctrine home with them. Thus in 1524 the Lutheran opinions were preached at Lippstadt by the prior Westermann, and the lector Koiten, and at Herford by the prior Kropf. Among the Humanists who maintained the Lutheran cause were Hermann Marburg von dem Busche, who watched and supported from Marburg the advance of the new dogma in his native region, Jacob Montanus at Herford, and a large number of school teachers of the younger generation of Humanists, as Gerhard Cotius, John Glandorp, and Adolf Clarenbach at Münster. It was not until after 1525 that Lutheranism gained ground among the common people in Westphalia. As the common people had little comprehension of the dogmatic controversies, the success of the Reformation is rather explicable by the fact that the old popular oppos-

ition to the life and constitution of the Church learned to look upon Luther as its leader. The adherents of the movement continually grew in number by means of the accounts given by itinerant merchants, by the agitation carried on by preachers and students of Wittenberg University, and by popular literature. Among the cities, Lippstadt, Soest, and Herford were the first to introduce the Evangelical Confession; Tecklenburg was the first of the countships. The secular principalities gradually became Protestant. In the ecclesiastical principalities the position of the ruler was of great importance. Münster was won for the new doctrine by the preacher Bernhard Rothmann; it was recognized as a Lutheran city by the bishop in the Treaty of 14 February, 1533. The Protestant faith was also established in a number of country towns in the Diocese of Münster. However, in the years 1534-35, the Anabaptists carried on their wild regime at Münster, and their overthrow put an end for a time to the progress of the Reformation. The Archbishop of Cologne and Bishop of Paderborn, Hermann von der Wied, sought to introduce the Reformation in the Duchy of Westphalia and in the Diocese of Paderborn, but he was deposed in 1547 and his successor re-established Catholicism in both districts. In Minden the bishops themselves were friends of the new doctrine, consequently Protestantism was able to maintain itself. The check given by the Augsburg Interim (1548) to Protestantism was only a partial and temporary one, especially as a number of the princes rejected it altogether. After the Religious Peace of Augsburg (1555) the Church lost Dortmund, a large part of the Diocese of Münster, as is shown by the visitation of 1571, and Paderborn, which was under the Protestant Bishop of Lauenburg (1577-85).

Lutheranism was also partially superseded by Calvinism, as in the countships of Mark and Tecklenburg, in the Diocese of Münster, and in Southern Westphalia (Wittgenstein and Nassau-Siegen), while the flourishing cities of Soest, Lippstadt, Herford, Bielefeld, and Dortmund held to the Lutheran faith, the stronghold and pattern of Lutheranism being Soest. However, after the Church had been re-invigorated by the Council of Trent, it took more decisive steps against Protestantism in Westphalia as well as other regions. Here also the Jesuits deserve the most credit for the Counter-Reformation. Their first *collegium* was established at Paderborn in 1580, the next at Münster at 1589. During the following century other collegiate foundations and missions were added to these. By means of their gymnasial schools they gained over the rising generation and brought large numbers back to the Church, in districts far beyond the places of their settlement, by means of missions, retreats, brotherhoods, and sodalities. The new Capuchin and Franciscan monasteries, a fairly large number of which were founded between 1600 and 1650, exerted influence in the same manner. It must, however, be said, that the "secular arm" had a large share in the Counter-Reformation, often a larger one than spiritual weapons. The exercise of the Evangelical

religion was forbidden and the non-Catholic clergy, teachers, and officials were deposed and expelled. The Counter-Reformation was begun in the Diocese of Münster by Bishop John von Hoya (1566-74), and brought to a victorious close by Ernst of Bavaria (1585-1612), and Ferdinand of Bavaria (1612-50).

In Paderborn Henry of Lauenburg was followed by Theodore of Furstenberg (1585-1618), who defeated the Protestant opposition by the taking of Paderborn in 1604; he restored Catholicism with the aid of the Jesuits, and gave the Counter-Reformation a centre by founding the University of Paderborn in 1614. In 1623 Paderborn was once more entirely Catholic. The Archbishop of Cologne, Gebhard Truchess of Waldburg (1577-84), made a second fruitless attempt to introduce Protestantism in the Duchy of Westphalia. The three successors of Truchess made the duchy once more completely Catholic. The Counter-Reformation was introduced in the domains of the Abbey of Corvey by the Prince Abbot Dietrich of Beringhauses (1585-1616), but it made little progress under the inactive and incapable Abbot Henry of Aschebrock (1616-1624), and Hoxter remained Protestant. In the same way the attempts of the dukes of Cleves, who had returned to the Church, to drive Protestantism out of the countships of Mark and Ravensberg failed, especially as in 1614 both countships became a part of Brandenburg. Rietberg was completely regained for Catholicism by the conversion to Catholicism of the heiress of the Countship of Rietberg, Sabina Katharina, and by her marriage with the convert John III of East Freisland, a grandson of King Gustavus Vasa. In 1610 the exercise of Protestantism was forbidden in Rietberg. The ruler of Buren, Elizabeth, was converted in 1613; her son Moritz became a Jesuit, and presented his seigniorial domain to the order. The attempts to re-establish Catholicism which were undertaken during the Thirty Years War, on account of the Edict of Restitution of 1629, had only a temporary success. Among these efforts were the one at Minden, where the Jesuits laboured for a short time and where in 1632 a diocesan synod was held, and that at Herford.

The Treaty of Westphalia (1648) established as the basis of ecclesiastical affairs the conditions of the year 1624. Accordingly, since then the territories of Minden, Ravensberg, Mark, Tecklenburg, Rheda, Hohenlimburg, Siegen-Hilchenbach, Wittgenstein, and the imperial city of Dortmund have been entirely or mainly Protestant, while Münster, Paderborn, the Duchy of Westphalia, and Rietberg have been Catholic. The Countship of Steinfurt and the Seigniory of Gemen gradually became for the most part Catholic. Until modern times territorial boundaries were also denominational boundaries, especially in Westphalia. With the present era the denominational compactness was broken by the growth of the cities and the immigration of large numbers of factory hands from all parts of Germany. In 1648 Brandenburg-Prussia received by the Treaty of Westphalia the Diocese of Minden, in 1702 the Countship of Lingen by

inheritance from the line of Orange, and in 1707 the Countship of Tecklenburg by purchase. From the end of the seventeenth century to the beginning of the nineteenth century Church life was torpid and little progress was made. The cathedral chapters at Münster and Paderborn withdrew more and more from their spiritual duties. From the fifteenth century they were open only to members of the old families of the nobility, of whom but a few were ordained. The others did not live differently from the secular nobility. The old Benedictine and Cistercian abbeys had also become very worldly, but little was done for the training of their inmates in learning, although, in general, good discipline and order were maintained. Only the mendicant orders, especially the Franciscans, laboured actively for the cure of souls. The system of schools was very defective. In the Diocese of Münster the seminary for priests founded by the Prince-Bishop Ferdinand in 1613 was allowed to fall into decay, so that the training of priests was very unsatisfactory.

Much was done at the end of the eighteenth century for the improvement of education by the distinguished minister and Vicar-General of Münster, Freiherr Franz von Furstenberg. His work affected at first only the Diocese of Münster, but the example had an influence on the whole of Westphalia, and indeed was felt throughout Germany. He reorganized the entire school system of Münster from the lowest elementary instruction up to the university on a well constructed plan, founded the University of Münster in 1771, re-established the seminary for priests, and founded the normal school over which he placed Overberg. The era of the French Revolution and of the Napoleonic empire brought violent changes. On account of the Peace of Luneville (1801) and of the Enactment of the Imperial Delegation (1803), the secular sovereignty of the bishops was suppressed and their territories used to compensate the princes who were obliged to yield their possessions on the left bank of the Rhine to France. Thus Prussia received the Diocese of Paderborn and a part of the Diocese of Münster, that is the half of the upper section of the diocese with the capital. The other half was used to form petty principalities for the Princes of Salm, Croy, and Looz-Corswaren; the lower diocese and the district called Emsland were given to the Dukes of Oldenburg and of Arenberg. The Duchy of Westphalia went to the Landgrave of Hesse-Darmstadt. The new rulers at once secularized the monasteries for men, a right given them by the enactment of the imperial delegation. Thus in the spring of 1803 Prussia suppressed the monasteries of Kapenberg, Marienfeld, Liesborn, Abdinghof, Hardehausen, Dalheim, and Boddeken. By an Edict of 17 October, 1803, Landgrave Louis of Hesse suppressed the monasteries in his territories.

In 1807 Prussia had to concede its Westphalian possessions to France. The western part of Westphalia was obliged to change its nationality several times, it belonged in part to the French Empire, in part to the Grand Duchy of Berg under Joachim Murat.

The eastern section of Westphalia was made, in conjunction with territories taken from Prussia, Hesse, Hanover, and Brunswick, into the Kingdom of Westphalia, the name of which was a misnomer, as the larger part of the new kingdom was composed of lands that were not Westphalian. The Kingdom of Westphalia was given to Napoleon's brother Jerome. The French continued the secularization of the monasteries, nor did they spare the convents. On 13 May, 1809, Jerome decreed the suppression of six convents and on 1 November, 1809, ordered the suppression of all religious foundations, chapters, abbeys, and priories with exception of those devoted to education. Similar decrees were issued by Napoleon himself on 14 November, 1811, for the territories of Münster. As far as possible the lands were sold. In 1815, after the French had been driven out of the country, Prussia received, besides its earlier possessions, the former Duchy of Westphalia, the Abbey of Corvey, the former free imperial city of Dortmund and a number of mediatised principalities and seigniories. In 1816 the Province of Westphalia was formed from these acquisitions. At a later date (1851) the whole of Lippstadt, which up to then had been divided between Prussia and Lippe, was added to the province. Under Prussian administration the province has reached a high degree of prosperity.

The life of the Church has also greatly developed in connection with the revival of German Catholicism in general. There are in Westphalia a large number of religious, political, social, and charitable associations of Catholics, and brotherhoods which are very active and have many thousand members. the Catholic Press of Westphalia also is in a prosperous condition. There are 82 Catholic newspapers, of which the "Westfälischer Merkur" of Münster, the "Westfälisches Volksblatt" of Paderborn, and the "Tremonia" of Dortmund should be mentioned, besides numerous Catholic periodicals. A diocesan synod was held at Paderborn in 1868 and at Münster in 1897. Next to the province of the Rhine, Westphalia is the most important Catholic part of Prussia. The ecclesiastical divisions have been so arranged by the Bull "De salute animarum" of 1821, that the Diocese of Münster includes the government district of Münster, one parish in the government district of Minden, as well as three enclaves in the government district of Arnsberg; the County of Königssteele in the government district of Arnsberg belongs to the Archdiocese of Cologne, and all else to the Diocese of Paderborn. The government district of Münster contains 800,302 Catholics, and 182,044 Evangelicals; the government district of Arnsberg, 1,081,343 Catholics and 1,276,187 Evangelicals; the government district of Minden, 239,889 Catholics and 489,441 Evangelicals. For ecclesiastical statistics see articles MUNSTER and PADERBORN.

KLEMENS LOFFLER

West Virginia

West Virginia

A state of the American Union, bounded on the northeast by Pennsylvania and Maryland, on the northwest by Ohio, on the southeast and south by Virginia, and on the southwest by Kentucky; it is situated between latitude 37°36' and 40°38' North, and between the meridians 77°45' and 82°03' West. Its area is 24,780 square miles, of which 24,645 square miles is land and 135 square miles is water, containing 15,859,200 acres. The population, according to the U.S. Census of 1910, is 1,221,119. The principal cities are: Wheeling, 41,641; Huntington, 31,161; Parkersburg, 17,742; Charleston, 22,926; Clarksburg, 9201.

PHYSICAL CHARACTERISTICS

West Virginia geographically belongs to the Mississippi Valley, and the principal rivers, which are the Sandy, Guyandotte, Big and Little Kanawha, and the Monongahela, with its tributaries the Youghiogheny and Cheat, are tributary to the Ohio River, which flows for 300 miles along this state.

This great watercourse puts West Virginia in direct communication with the trade of the Mississippi Valley, the Gulf of Mexico, and in fact with the markets of the far West. The Allegheny Ridge forms in this state the watershed between the Atlantic Ocean and the Mississippi Valley. West of the Allegheny Range and that of the Shenandoah on the east, and the Greenbrier and Laurel Mountains on the west, are numerous short parallel ridges of which the most important are Potts or Middle Warm Spring and Jackson River Mountains. The most western of these continuous chains is the

Laurel Ridge with its prolongations, the Greenbrier and Flat Top Mountains. Near the line of Randolph County the Greenbrier Mountains throw off a spur east to the Allegheny Range, and from this extend numerous parallel ridges following the usual course of the mountain chains of the state and known as Rich, Middle Shaves, Cheat, and Valley Mountains. The Great Flat Top Mountain, as the south-western portion of this ridge is called, also throws out spurs north and north-west called the White Oak Mountain and Barker's Ridge. These mountain chains inclose many fertile valleys.

The prevailing ingredients of the soil are silica, aluminium, pure clay, marl, lime, magnesia, and iron, which the very unevenness of the surface tends to amalgamate to the greatest practical advantage. Thus the alluvial or bottom lands composed of the diluvium from adjacent and distant hills combine mechanically and chemically every kind of mineral and vegetable decomposition in the country. This soil, which varies in depth from three to forty feet, produces the largest timber and heaviest crops, and, resting upon a substantial basis of dark loam and fertile clay, exceeds in reliability and endurance the black, rich, but thirsty and chaffy, soils of the Western prairies. The second bottom is generally representative of the rocks prevailing upon this level, with a strong admixture of the strata above brought down by the gradual landslips and the rains, and accumulated probably to a great extent before the present vegetation took possession of the surface. On ascending, the soil is found gradually less mixed in substance and colour, the timber is less varied, and on steeper places less thrifty. When the ridge is sharp and narrow, the bare rock is found but a few inches below and not seldom protruding above the surface; but when flat or gently inclined, as in a majority of cases, there is found a deep, arable soil heavily coated with humus, and producing, with few exceptions, the identical kinds of timber and crops found in the alluvial valley below. In those regions of the state where the table-lands are exceptionally met with, the surface presents undulating plains, which, but for their timber, would recall to mind an Illinois prairie, reaching along the mountain summits for miles in length and breadth, with scarcely an elevation sufficiently great to divide the water. West Virginia is richly invested with timber, comprising many varieties of the oak and fir, the hemlock, cedar, laurel, tulip-tree, the black and white walnuts, hickory, beech, sycamore, elm, maple, birch, white and mountain ash, besides the wild-fruit varieties peculiar to the surrounding states. It has been estimated that 11,300,000 acres, or nearly three-fourths of the superficial area of the state, are as yet unimproved, and of these a considerable proportion are still in the vigour and juvenescence of original growth.

There is a great diversity of climate in West Virginia. In the mountain regions the summers are never very warm, while the winters are extremely cold, the thermometer sometimes registering 25 below zero. Except in these mountain regions the climate is generally free from the extremes of heat and cold, rain and drought, and upon the

whole one of the most agreeable and salubrious in the Union. The mean annual temperature is about 50°; summer 72°; autumn 54° Fahrenheit. The average rainfall is from 43 to 45 inches.

RESOURCES

Agricultural

The production and value of leading crops in 1910 were as follows: hay, 810,000 tons, value \$12,150,000; corn, 23,290,000 bushels, value, \$16,226,000; wheat, 5,125,000 bushels, value, \$5,228,000; oats, 2,520,000 bushels, value, \$1,260,000; rye, 155,000 bushels, value \$140,000; buckwheat, 575,000 bushels, value \$443,000; potatoes, 3,772,000 bushels, value, \$2,527,000; tobacco, 12,800,000 lbs., value, \$1,318,000. The fruit crop aggregated over \$1,000,000 in value. Stock raising is also an important industry.

Mineral

West Virginia is richly endowed with a high grade of oil or crude petroleum. During the year 1909 the production was 10,745,092 barrels, valued at \$17,642,283. This state is also very rich in high-grade coal, containing every variety except anthracite; during 1909 there were 51,466,010 tons mined, thus ranking second, after Pennsylvania, in the production of coal; coke was produced to the amount of 2,637,132 short tons. In 1908 the production of natural gas was valued at \$14,837,130; and in this year the clay products amounted in value to \$3,261,756.

Manufactures

There are a number of manufacturing industries within the state, most of which are located along the Ohio River. In 1907 there were 2150 manufacturing establishments, with a combined capital of \$41,175,913, turning out a product valued at \$94,584,091, and employing 45,871 persons whose annual wages were \$24,268,502. The leading industries in this year were iron and steel, thirteen plants, product valued at \$20,095,000; lumber and planing mills, product valued at \$10,359,615; coke, product valued at \$5,074,403; glass, \$6,322,223; leather and harness, \$6,623,567; machinery and castings, \$6,521,374; brewing and distilling, \$2,650,895; flour and feed, \$2,664,012; pottery, \$1,826,745; wood pulp and paper, \$1,735,967; brick and tile, \$1,064,710.

EDUCATION

General

Although the state is of comparatively recent development, an efficient free school system has been established of which a state superintendent has general supervision, and a county superintendent and board of three commissioners for each school district have local jurisdiction. In 1908 there were 351,966 children of school age; of these 336,279 were white and 15,657 were coloured. Separate schools are provided for white and coloured persons. There were 7021 public schools with 8282 teachers, with property

of an estimated valuation of \$7,705,768, while \$3,979,125 was expended in maintenance. Other state institutions are: six normal schools, two preparatory branches of the State university, two coloured institutes, a school for the deaf and blind, the State Reform School, the Industrial School for Girls, the Weston Hospital for the Insane, and the West Virginia University. This university, situated at Morgantown, originated by virtue of the National Land Act of Congress of 2 July, 1862, the subsequent action of the Legislature in accepting its provision, and from the foundations of an educational institution which had already been laid at Morgantown for half a century. Its sources of revenue are: first, an annual productive endowment of \$115,750; second, the Morrill fund, which amounts to \$25,000 a year; third, the Hatch fund, amounting to \$15,000 annually; fourth the biennial appropriations of the Legislature; and, fifth, fees and tuitions paid only by students of other states.

Catholic

The Sisters of the Visitation have academies for young ladies at Mount de Chantal, near Wheeling, and at Parkersburg. The Sisters of St. Joseph have academies for young ladies at Clarksburg and Wheeling; the Xaverian Brothers conduct a high school for boys at Wheeling. St. Edward's Preparatory School for Young Men, at Huntington, was opened in September, 1909. There are 14 parochial schools with 1975 pupils, and in all 3300 young persons are under Catholic care.

The oldest Catholic charitable institution in the state is the Wheeling Hospital, incorporated in 1850, and in charge of the Sisters of St. Joseph, who have been labouring in the diocese since its foundation. The same order conduct hospitals at Parkersburg and Clarksburg, also St. Vincent's Home for Girls, and St. John's Home for Boys at Elm Grove, a suburb of Wheeling. A manual training school for boys at Elm Grove is conducted by the Xaverian Brothers, a home for wayward and homeless girls, at Edgington Lane, Wheeling, is in charge of the Sisters of the Good Shepherd.

LAWS AFFECTING RELIGION

The Constitution provides that there shall be no special laws concerning property held for religious or charitable purposes. No church or religious denomination can be incorporated. A religious congregation can legally acquire and hold a limited quantity of real property by deed of conveyance for three purposes only: first, for a place of worship; second, for a place of burial; third, for a place of residence for a minister. The title to such property is vested in trustees, named in the deed of conveyances or appointed by the proper court, which trustees hold the property for the use and benefit of the congregation. No devise or bequest by will of either personal or real property to any church, or trustees thereof, or to any congregation is valid. Any persons desiring to make a bequest or devise for the benefit of any church may make such bequest or devise in favour of some individual, absolutely and without any limitation or qualifica-

ations, trusting to the loyalty of such person for faithful application of the property to the real purposes for which the bequest or devise is desired to be made. But any devise or bequest if questioned in legal proceedings, and the real facts shown, would doubtless be held to be void. A gift of personal property to the trustees or other proper authorities of any church for the benefit thereof with delivery of possession by the donor, of course, is valid. On some of the questions relating to charitable trusts the decisions of the courts are not free from confusion. Property used for educational, literary, scientific, religious, or charitable purposes is exempt from taxation.

No appropriation of school funds to support any sectarian or denominational school is allowed. A clergyman is incompetent to testify concerning any confession made to him in the course of discipline enjoined by the Church to which he belongs. Ministers of the Gospel regularly in charge of a congregation are exempt from military duty, labour on public roads, and jury service. No religious or political test or oath can be required as a prerequisite or qualification to vote, serve as a juror, sue, plead, appeal, or pursue any profession or employment. No person can be compelled to attend or support any particular religious worship; the Legislature may not prescribe any religious test whatsoever, or confer any peculiar privileges or advantages on any sect or denomination; it may not pass any law or levy any tax for the erection or repair of any house for public worship, or for the support of any Church or ministry; but every person is free to select his religious instructor and provide for his support. Marriage between whites and negroes is prohibited. Divorces which are *vinculo matrimonii* or *a mensa et toro* can only be granted by the courts, on statutory grounds which are very similar to those of most of the Eastern states. In the court all testimony is required to be given under oath. Search warrants cannot be issued without affidavits. Profanity and drunkenness are prohibited by law, and a penalty is imposed for its violation. While the observance of Sunday is not directly enjoined, labouring at any trade or calling or the employing of minor apprentices or servants in labour on Sunday, except in household or other work of necessity or charity, are forbidden. Also hunting and fishing on Sunday are forbidden by law. A penalty is imposed for the disturbance of religious worship.

HISTORY

The territory now embraced in West Virginia was an unexplored wilderness when it first became known to white men. That it was first inhabited not many generations before the coming of the white explorer is evidenced by many relics found, such as pieces of flint, rude stone implements, human bones, large mounds, and other unmistakable witnesses to that fact. Different Indian tribes at various times had their homes within the present limits of the state: the Delawares in the Monongahela Valley; the Mohicans in the Kanawha Valley; the Conoys in the New River Valley, and the

Shawnees on the south branch of the Potomac. The first permanent settlement in the state was made at New Mecklenburg in 1727; this is now Shepherdstown, the oldest town in West Virginia. In 1681 Charles II granted to a company of gentlemen a tract of land which comprised as a part of what is now called the "Eastern Pan Handle" of the state.

This tract of land was inherited by Thomas, Lord Fairfax, and became known as the "Fairfax Land Grant". Surveyors were employed to determine the boundaries, and during this work, on 17 October, 1746, was erected the famous "Fairfax Stone", the first monument marking boundary of real estate in West Virginia. George Washington, at a later period, was employed on this survey. West Virginia was organized and became a state during the early years of the Civil War, and was composed of the western and northern counties of the State of Virginia. John Letcher, Governor of Virginia, convened the General Assembly in extra session on 7 January, 1861, at which session an act providing for a convention of the people of Virginia was passed. At this gathering, held in the Old State House at Richmond, the Ordinance of Secession was passed on 13 April, 1861. The people of the eastern counties of the state favoured its ratification, while those of the western and northern counties, separated by a range of mountains from the fertile plains of the Old Dominion and holding but few slaves, had little in common with the wealthy planters and slave owners of the eastern and southern sections, and were opposed to secession. Moreover, many of the latter were of northern descent, especially those residing along the Ohio River, and, when war broke out, they took sides with the Union. Representatives from the counties opposed to secession assembled in Wheeling, and on 19 June, 1861, the convention unanimously adopted An Ordinance for the Reorganization of the State Government. This convention reassembled on 6 August, and an ordinance providing for the creation of a new state out of a portion of the territory of Virginia was adopted. By its provisions this ordinance was to be submitted to the people of the thirty-nine counties, and as many other counties as wished to vote on it, at an election to be held on 24 October, 1861. The vote resulted 18,489 for and 781 against the new state. The proposed constitution was adopted by the people on 11 April, 1863. Its motto is "Montani semper liberi" (Mountaineers are always free). The Constitution of 1863 was superseded by the present one, adopted in 1872. The first capital of the state was situated at Wheeling, but was afterwards removed to Charleston in 1885.

Commissioner; Reports of the Bureau of Labor; The Code of West Virginia, 1906, Acts of the Legislature, 1907; CALLAHAN, Evolution of the Constitution of West Virginia (Morgantown, 1909).

FRANK A. MCMAHON

Abbacy Nullius of Wettingen-Mehrerau

Abbacy Nullius of Wettingen-Mehrerau

A Cistercian abbey near Bregenz, Vorarlberg, Austria. The Cistercian monastery of Wettingen was founded by Henry of Rapperswil in the present Canton of Aargau, Switzerland, in 1227. It was first recruited with Cistercian monks from Salem (Salmannsweiler) in Baden, and continued without interruption till its suppression by the Government of the Canton of Aargau, 13 January, 1841. Hereupon its abbot, Leopold Höchle, made several futile attempts to found a new home for himself and his scattered monks. After thirteen years of searching for a suitable place he finally obtained the permission of Emperor Franz Joseph to buy the partly dilapidated Benedictine monastery of Mehrerau, which had been suppressed in 1806. On 18 October, 1854, this new home of the Cistercians of Wettingen was solemnly opened under the name of Wettingen-Mehrerau. The abbot bears the title of Abbot of Wettingen and prior of Mehrerau, and has all the privileges of the former abbots of Wettingen. He exercises episcopal jurisdiction over the German convents of Cistercian nuns in Switzerland. Wettingen-Mehrerau is the only consistorial abbey of the Cistercians, that is, its abbot is the only Cistercian abbot who is preconized in a public consistory (see MEHRERAU).

WILLI, Wettingen-Mehrerau in BRUNNER, Ein Cistercienserbuch (Wurzburg, 1881), 453, 497; IDEM, Zur Gesch. des Klosters Wettingen-Mehrerau, serially in Cister, Chron., XVI (1904); LEHMANN, Das ehemalige Cistercienserkloster Maris Stella bei Wettingen u. seine Glasgemälde (Aarau, 1909).

MICHAEL OTT

Heinrich Joseph Wetzer

Heinrich Joseph Wetzer

Learned Orientalist, born at Anzefahr in Hesse-Cassel, 19 March, 1801; died at Freiburg in Baden, 5 November, 1853. He studied theology and Oriental languages at the universities of Marburg (1820-3), Tübingen (1823), and Freiburg (1824), and was graduated as doctor of theology and philosophy at Freiburg in 1824. He continued the study of Arabic, Persian and Syriac for eighteen months at the University of Paris,

under the celebrated Orientalists De Sacy and Quatremere. At the royal library of Paris he discovered an Arabian manuscript containing the history of the Coptic Christians in Egypt from their origin to the fourteenth century, which he afterwards edited in Arabic and Latin: "Taki-eddini Makrizii historia Coptorum Christianorum in Ægypto" (Sulzbach, 1828). In 1828 he became professor-extraordinary, and in 1830 professor-ordinary, of Oriental philology at the University of Freiburg. His interest in preserving the Catholic character of Freiburg, which had been founded and endowed as a Catholic university, incurred for him the odium of the Protestant professors, who, being in the majority since 1846, excluded him from all academic positions. He was nevertheless appointed chief librarian of the university library in 1850. With a view to maintaining the Catholic character of the university, he composed anonymously the little work "Die Universitat Freiburg nach ihrem Ursprunge..." (Freiburg, 1844). He had also begun a history of the controversy between Arianism and the Catholic Church in the fourth century, but only a small part of it was completed and published as "Restitutio verae chronologiae rerum ex controversiis Arianis, inde ab anno 325 usque ad annum 350 exortarum..." (Frankfort, 1827). His greatest achievement is the part he took in the production of the first edition of the "Kirchenlexikon" for which he drew up the "Nomenclator" and which he edited conjointly with Benedict Welte.

GYORY in Allgemeine deutsche Biographie, XLII (Leipzig, 1897), 261-3.

MICHAEL OTT

Ven. Christopher Wharton

Ven. Christopher Wharton

Born at Middleton, Yorkshire, before 1546; martyred at York, 28 March, 1600. He was the second son of Henry Wharton of Wharton and Agnes Warcop, and younger brother of Thomas, first Lord Wharton. He was educated at Trinity College, Oxford, where he graduated M.A., 3 February, 1564, and afterwards became a fellow. In 1583 he entered the English College at Reims to study for the priesthood (28 July). He was ordained priest in the following year 31 March, but continued his studies after ordination till 1586, when on 21 May he left Reims in company with Ven. Edward Burden. No details of his missionary labours have been preserved; but at his trial Baron Savile, the judge, incidentally remarked that he had known him at Oxford some years after 1596. He was finally arrested in 1599 at the house of Eleanor Hunt, a widow, who was arrested with him and confined in York castle. There, with other Catholic prisoners, he was forcibly taken to hear Protestant sermons. He was brought to trial together with Mrs. Hunt at the Lent Assizes 1600, and both were condemned, the former for high treason, the latter for felony. Both refused life and liberty at the price of conformity,

and the martyr suffered with great constancy, while Eleanor Hunt was allowed to linger in prison till she died. Dr. Worthington, writing of Ven. Christopher Wharton, specially commends his "humility, fervent charity, and other great virtues".

EDWIN BURTON

Diocese of Wheeling

Diocese of Wheeling

(WHELINGENSIS).

Comprises the State of West Virginia except the following counties, which are in the Diocese of Richmond: Pendleton, Grant, Mineral, Hardy, Hampshire, Morgan, Berkeley, and Jefferson; also the Counties of Lee, Scott, Wise, Dickinson, Buchanan, Washington, Russel, Grayson, Smyth, Tazewell, Carroll, Wythe, Bland, Floyd, Pulaski, Montgomery, Giles, and a portion of Craig Co., in Virginia; square miles in West Virginia, 21,355; in Virginia, 7,817; total 29,172. The Diocese of Wheeling was formed from the Diocese of Richmond by Apostolic letters dated 23 July, 1850. The Rt. Rev. Richard Whelan, D.D., at that time Bishop of Richmond, was transferred to Wheeling as the first bishop of the newly-created see. He had been consecrated the second Bishop of Richmond, 21 March, 1841. The earliest record preserved in the Wheeling chancery sets forth that Rev. Francis Rolf was appointed pastor of Wheeling in 1829. He records a baptism performed by him on 3 November, 1828. There is evidence of priests having visited Wheeling at an earlier date. Wheeling was established as a town in 1795, and one vague tradition has it that it took its name from a certain Father Whelan, a Catholic priest, who came occasionally to minister to the spiritual wants of the members of his flock. The western part of Virginia, which in 1863 became the State of West Virginia, had never many Catholic settlers, nor does it appear to have had many professing any religion. In 1912 the Catholic population was estimated at about 50,000, and the total population at 1,000,000. A letter preserved in the archives of the Diocese of Wheeling dated Baltimore, 13 April, 1832, and signed James Whitfield, Archbishop of Baltimore, states the inability of securing a priest to be stationed at Wheeling, but the letter goes on: "I desired the priest who attends a congregation, on the way to Wheeling, about 40 miles on this side (Brownsville if I remember), to go and give Church once or twice a month. He seems to say that he would comply, as far as he could, with my wish."

From February, 1833, to 1 January, 1844, Rev. James Hoerner was in charge of the Catholics in the Wheeling district. He was succeeded by Rev. Eugene Comerford, who was in Wheeling till the arrival of Rt. Rev. Richard Whelan, Bishop of Richmond, in November, 1846. The bishop took charge of the missionary work in the Wheeling portion of the Richmond See till he was transferred as the first Bishop of the new Diocese of Wheeling. The zeal of Bishop Whelan in labouring under the most difficult and trying circumstances for period of twenty-four years is still remembered by many of the faithful, and often referred to as a striking example of genuine saintly piety. He did much manual labour in addition to the other duties of his episcopal office. The present Wheeling cathedral was planned by him, and built under his supervision. He was architect and supervisor, and did much of the actual work in building the edifice. He also established a seminary of which he took personal charge, and some of the priests who were educated by him are still labouring in the diocese. St. Vincent's College for laymen was also instituted under his auspices. Bishop Whelan had among his self-sacrificing clergy one especially conspicuous for his saintly life, the late Rev. H.F. Parke, V.G. This servant of God met a tragic death by being crushed under the ruins of a falling building, 9 April, 1895. Bishop Whelan (d. 7 July 1874) was succeeded by the Rt. Rev. John Joseph Kain, D.D., who was consecrated the second Bishop of Wheeling, 23 May, 1875. In 1893 Bishop Kain was appointed coadjutor to the Archbishop of St. Louis, Missouri, and became archbishop of that see, 21 May, 1895. He died on 13 October, 1903. During the eighteen years of Bishop Kain's administration, the work, so well begun by his able predecessor, was continued and made rapid progress. He was consecrated at the age of thirty-four and devoted his talents and energy to the increase of clergy, the establishing of new missions, and the building of churches and parochial schools, so that, at the time of his transfer, the diocese was well established, although it was still greatly in need of priests, about thirty-five of whom covered an area of 29,172 sq. miles. The Catholics were much scattered and there were but few points at which the necessary support of a pastor could be obtained.

Rt. Rev. P.J. Donahue, D.D., was consecrated the third Bishop of Wheeling, 8 April, 1894. At the time of his appointment he was rector of the cathedral at Baltimore. During the eighteen years of Bishop Donahue's administration the number of clergy has been doubled, many new missions established, and the following institutions founded in the diocese: Home of the Good Shepherd, situated near Wheeling, where 200 wayward and homeless girls are provided for -- the sisters in charge conduct a large laundry and sewing school; the Manual Training School, near Elm Grove, W. Va. (West Virginia), six miles east of Wheeling, conducted by the Xaverian Brothers, and St. Edward's Preparatory College, Huntington, W. Va., in charge of the secular clergy of the diocese, of which the Rev. John W. Werninger is the first president. Besides

these institutions two large additions have been built to the Wheeling Hospital, and a new orphanage for boys at Elm Grove, W. Va., a large addition to St. Vincent's Home, Elm Grove, W. Va., St. Joseph's Hospital at Parkersburg, W. Va., and St. Mary's Hospital at Clarksburg, W. Va., have been erected. Prior to 1895 there was one religious order of priests, the Capuchin Fathers, and three religious orders of women, the Sisters of St. Joseph, Visitation Sisters, and the Sisters of Divine Providence. Since then, the Marist and the Benedictine Fathers have been introduced, as also the Good Shepherd Sisters, Sisters of St. Francis, and the Felician Sisters. There are academies for girls at Mt. De Chantal (near Wheeling), Parkersburg, Wytheville, Wheeling, and Clarksburg. There are a Catholic high school at Wheeling, and 16 parochial schools in the diocese.

EDWARD E. WEBER

Amiel Weeks Whipple

Amiel Weeks Whipple

Military engineer and soldier, born at Greenwich, Massachusetts, 1818; died at Washington, D.C., 7 May, 1863. He was the son of David and Abigail Pepper Whipple. After studying at Amherst College, he made the course at West Point, graduating 1 July, 1841. His early years of service were spent in surveying the Patapsco River, sounding and mapping the approaches of New Orleans, and in surveying Portsmouth Harbour. Later he helped to determine portions of the Canadian and the Mexican boundaries of the United States. In 1853 he had charge of the explorations for a railroad route near the 35th parallel of latitude to the Pacific Ocean. He became a Catholic around 1857, when he was in Detroit in charge of the lighthouse districts from Lake Superior to the St. Lawrence. In the war, after engineering under Gen. McDowell, he became chief topographical engineer under McClellan. His maps were used on many Virginian battlefields. In 1862, as brigadier-general of volunteers, he had charge of the defense of Washington on the Virginia side. After great gallantry at Antietam and Fredericksburg, with his division in General Sickles's corps, he was much exposed at Chancellorsville. In a skirmish at the close of the battle he was severely wounded in the neck by a sharpshooter, and received the last rites of the Church on the battlefield. Taken to Washington he was breveted brigadier-general on 4 May, major general of volunteers on 6 May, and major-general by brevet on 7 May, only a few hours before his death.

REGINA RANDOLPH JENKINS

Ven. Thomas Whitaker

Ven. Thomas Whitaker

Born at Burnley, Lancashire, 1614; martyred at Lancaster, 7 August, 1646. Son of Thomas Whitaker, schoolmaster, and Helen, his wife, he was educated first at his father's school. By the influence of the Towneley family he was then sent to Valladolid, where he studied for the priesthood. After ordination (1638) he returned to England, and for five years laboured in Lancashire. On one occasion he was arrested, but escaped while being conducted to Lancaster Castle. He was again seized at Place Hall in Goosenargh, and committed to Lancaster Castle, 7 August, 1643, being treated with unusual severity and undergoing solitary confinement for six weeks. For three years he remained in prison, remarkable for his spirit of continual prayer and charity to his fellow-captives. Before his trial he made a month's retreat in preparation for death. Though naturally timorous, and suffering much from the anticipation of his execution, he steadfastly declined all attempts made to induce him to conform to Anglicanism by the offer of his life. He suffered with Ven. Edward Bamber and Ven. John Woodcock, O.S.F., saying to the sheriff: "Use your pleasure with me, a reprieve or even a pardon upon your conditions I utterly refuse".

CHALLONER, *Memoirs of Missionary Priests* (London, 741-2), following KNARESBOROUGH who had before him a contemporary account of the three martyrs.

EDWIN BURTON

Ven. Thomas Whitbread

Ven. Thomas Whitbread

(*Alias* HARCOURT).

Born in Essex, 1618; martyred at Tyburn, 30 June, 1679. He was educated at St. Omer's, and entered the novitiate of the Society of Jesus on 7 September, 1635. Coming upon the English mission in 1647, he laboured for more than thirty years, mostly in the eastern counties. On 8 December, 1652, he was professed of the four vows. Twice he was superior of the Suffolk District, once of the Lincolnshire District, and finally in 1678 he was declared provincial. In this capacity he refused to admit Titus Oates as member of the Society, and shortly afterwards the celebrated plot was fabricated. Father Whitbread was arrested in London on Michaelmas Day, 1678, but was so ill that he could not be moved to Newgate till three months later. He was first indicted at the Old Bailey, 17 December, 1678, but, the evidence against him and his companions

breaking down, he was remanded and kept in prison till 13 June, 1679; later, he was again indicted, and with four other fathers was found guilty on the perjured evidence of Oates, Bedloe, and Dugdale (see BARROW, WILLIAM, VENERABLE; the others were Fathers Fenwick, Gavin, and Turner). After the execution the remains of the martyrs were buried in St. Giles's in the Fields. Father Whitbread wrote "Devout Elevation of the Soul to God" and two short poems, "To Death" and "To his Soul", which are printed in "The Remonstrance of Piety and Innocence".

The Remonstrance of Piety and Innocence (London, 1683); TANNER, Brevis relatio felicis agonis (Prague, 1683); Florus Anglo-Bavaricus (Liege, 1685); Tryals and condemnation of Thomas White alias Whitbread (London, 1879); SMITH in CORBETT, State Trials, VII; FOLEY, Coll. Eng. Prov. S. J. V, VII (London, 1879-1883), ii, and all works dealing with the Oates Plot; COOPER in Nat. Biog., s. v. Harcourt, Thomas.

EDWIN BURTON

Abbey of Whitby

Abbey of Whitby

(Formerly called Streoneshalh). A Benedictine monastery in the North Riding of Yorkshire, England, was founded about 657, as a double monastery, by Oswy, King of Northumberland. The first abbess was St. Hilda, under whom the community seems to have reached a considerable size, the conventional buildings being large enough to accommodate the council, held in 664, to determine the controversy respecting the observance of Easter. On St. Hilda's death, about 680, Aelfleda, daughter of King Oswy, succeeded as abbess, and the Monastery continued to flourish until about 687, when it was entirely destroyed by the Danes. The community was dispersed, the abbot, Titus, fleeing to Glastonbury and taking with him the relics of St. Hilda. No attempt was made to restore the monastery until after the Norman conquest, when this district of Yorkshire was granted to Hugh Lupus, first Earl of Chester, who assigned Whitby to William de Percy, ancestor of the earls of Northumberland, by whom the monastery was refounded toward the end of the conqueror's reign. Reinfrid, a monk of Evesham, was appointed prior of the restored foundation, which was richly endowed by the founder. William the Conqueror himself also granted to the monastery a charter of privileges. These were confirmed and extended by Henry I, in whose reign the priory was raised to the rank of an abbey, but the abbot, though regarded as one of the spiritual barons of England, did not sit in Parliament. The story of the house during the Middle Ages does not call for any special comment, the only exceptional circumstances in its history being occasional damage by pirates, to which its position on the coast

laid it open. When the lesser religious houses had all been suppressed by Henry VIII and it became clear that the same fate awaited the larger ones, the Abbot of Whitby obtained permission to resign his office so that he might not be called upon to hand over the house to the king. The surrender was therefore made by the prior under date 14 December, 1540, the net income at the time being returned as 437 pounds; the site and ruins being granted some years later to John, Earl of Warwick. Among the monks of Whitby the most famous is the Saxon poet, Caedmon.

The Monastery of St. Hilda was so completely destroyed by the Danes that nothing even of its foundations is known to remain. Of de Percy's building the greater part was pulled down and the monastery rebuilt on a larger scale in the thirteenth and fourteenth centuries. At the dissolution the roofs were removed, but most of the walls remained standing until 1763, when the entire western side of the monastery was blown down. Since that date the destruction has been rapid owing to the very exposed position of the ruins. In 1830, the remains of the central tower collapsed, and nine years later a large part of the choir also fell, so that only a small part of the church still stands on the cliff some two hundred feet above the sea. The arms of the abbey, three snakes rolled up, are said to have their origin in the number of fossil ammonites found in the vicinity. Of these Camden writes in his "Britannia": "Here are found stones resembling snakes rolled up . . . you would think they had once been snakes, covered with a crust of stone."

G. ROGER HUDLESTON

Synod of Whitby

Synod of Whitby

The Christianizing of Britain begun by St. Augustine in A.D. 597 was carried on with varying success throughout the seventh century. One great hindrance to progress lay in the fact that in Northumbria the missionary impulse was largely Scottish (i.e. Irish) in origin, having come through St. Aidan from Iona. In certain matters of external discipline, notably the observance of Easter, the English and Celtic traditions did not agree. Thus when the Northumbrian King Oswy and his household were keeping Easter, his queen, who had been brought up in the south under the Roman system, was still fasting. The consequent inconvenience and discord must have been extreme. In 664 a fortunate opportunity occurred of debating the matter, and a conference took place at the monastery of St. Hilda at Whitby or Streanoeshalch. King Oswy with Bishops Colman and Chad represented the Celtic tradition; Alchfrid, son of Oswy, and Bishops Wilfrid and Agilbert that of Rome. A full account of the conference is given by Bede and a shorter one by Eddius. Both agree as to the facts that Colman

appealed to the practice of St. John, Wilfrid to St. Peter and to the council of Nicaea, and that the matter was finally settled by Oswy's determination not to offend St. Peter. "I dare not longer", he said, "contradict the decrees of him who keeps the doors of the Kingdom of Heaven, lest he should refuse me admission". This decision involved more than a mere matter of discipline. The real question decided at Whitby was not so much whether the church in England should use a particular paschal cycle, (see EASTER CONTROVERSY) as "whether she should link her fortunes with those of the declining and loosely compacted Irish Church, or with the rising power and growing organization of Rome". The solution arrived at was one of great moment, and, though the Celtic Churches did not at once follow the example thus set, the paschal controversy in the West may be said to have ended with the Synod of Whitby.

HERBERT THURSTON

Andrew White

Andrew White

Missionary, b. at London, 1579; d. at or near London, 27 Dec., 1656 (O.S.). He entered St. Alban's College, Valladolid, in 195; later he studied at the English College, Seville, Spain, matriculated at Douai, and was ordained there about 1605; sent on the English Mission, he was seized, imprisoned, and banished in 1606. He entered the Society of Jesus in 1607 at Louvain; in 1609 he was back in England, labouring in the southern counties. He taught Sacred Scripture, dogmatic theology, and Hebrew, and was prefect of studies at Louvain and Liege, varying scholastic occupations by occasional missionary trips to England. He is principally known to American history for his writings and labours in connection with Lord Baltimore's colony, which have earned for him the title of "Apostle of Maryland". Sir George Calvert, first Lord of Baltimore, corresponded with him from Avalon; Father Vitelleschi, General of the Jesuits, makes mention to him, for the first time, of the mission to English America, in a letter date Rome, 3 March, 1629. In preparation for the founding of the Maryland Colony he composed the "Declaratio Coloniae Domini Baronis de Baltimore", to attract settlers and co-operators in the enterprise. The expedition set sail on 22 Nov., 1633, from Cowes, Isle of Wight. Father White is the author of the "Relatio itineris", which constitutes the classical authority in regard to early Maryland. On the Feast of the Annunciation, 25 March, 1634, the "Pilgrims" of Maryland landed on St. Clement's Island, where Mass was celebrated for the first time: art has depicted the scene, and "Maryland Day" has been consecrated to patriotic remembrance of the event.

For ten years Father White devoted himself with apostolic humility, patience, and zeal to missionary labours amongst the settlers and the aborigines. A Protest writer

(Davis in "Day-Star", p. 160) says: "The history of Maryland presents no better, no purer, no more sublime lesson than the story of the toils, sacrifices, and successes of her early missionaries." In contrast with other English colonies, the relations between whites and Indians were harmonious, largely due to Father White. The "Annual Letters" narrate his successful labours amongst the tribes of the Patuxent and Potomac; he carried the Gospel to the Anacostans in the neighbourhood of the nation's capital; he converted and baptized with solemn ceremonies, 5 July, 1640, Governor Calvert and other civil dignitaries being present, Chitomachon, the *Tayac* or "Emperor of Piscataway". A graphic representation of this sacred function from Tanner is reproduced in Shea, "Catholic Church in Colonial Days", p. 53. He composed a grammar, dictionary, and catechism in the native idiom, being the first Englishman to reduce an Indian language to grammatical form. The claim has been advanced that the honour of the first printing-press in British America belongs to Maryland; but these works were manuscript compositions.

The rise of the Puritan party in England was felt with disastrous effects to Catholic interests in Maryland; a band of marauders from Virginia plundered the Jesuit establishments, and Father White, with two companions, was seized and sent in irons to London, where he was tried on the charge of treason, as being a priest in England contrary to the statute 27 Elizabeth. He was acquitted on the manifest pleas that he had entered the country under force and much against his will. Banished again, he longed to return to his "dear Marilandians", but his earnest petitions could not be granted, as he was advanced in years and broken by exhausting labours; the remainder of his life was spent quietly in England.

The writings of Father White are: (1) "Relatio itineris"; (2) *Declaratio Coloniae*"; (3) "A Briefe Relation".

(1) "Declaratio iteneris in Marilandiam". Rev. Wm. McSherry, S.J., discovered this Latin narrative of the voyage in the archives of the Domus Professa at Rome in 1832. He made a transcript of the document, and brought it to George town College; an abridged translation appeared in the "Catholic Almanac" (Baltimore, 1840), pp. 15-34, and a full translation by N.C. Brooks was printed in Force's "Historical Tracts", pp. 47 (Washington, 1846), IV, 12. The Latin text was printed for the first time with a revised translation in the first volume of "Woodstock Letters" (1872); in 1874 the Maryland Historical Society published it in Latin and English, Fund Publication, 7 (edited with notes by Dr. E.A. Dalrymple); this version is reprinted verbatim in Foley, "Records of the English province" (London, 1878), III, 339 sqq., and in Scharf, "History of Maryland" (Baltimore, 1879), I sqq., Hughes, "History of the Society of Jesus in North America" (London, 1908), presents the most authentic text, with a facsimile photographic reproduction of the first page of the original (Documents, I, pt. I, 94-107); in the same history

(Text, I, 274-9) he gives an epitome of the "Relation", discusses its authorship and authenticity, and furnishes exhaustive biographical information concerning Father White, who wrote this account to the general of the Society, from St. Mary's in 1634, within a month of the landing.

(2) "Declaratio Coloniae Domini Baronis de Baltimore": composed by Father White, revised and published, with "Conditions of Plantation", by Cecilius Calvert. "Woodstock Letters" (Latin and English)m, I, 12-21; Maryland Historical Society (Fund Publication, 7), Baltimore, 1874 (Latin and English); Force and Foley (pp. 329-334), ut supra; Hughes, Documents, I, 145-148 (Latin), Text, I, 249-253; Hall, "Narratives of Early Maryland" (New York, 1910), 5-10.

(3) "A Briefe Relation of the Voyage unto Maryland". The substance of this was printed in London, 1634, and reprinted in 1865, Shea, "Early Southern Tracts", no. 1. It was composed by Father White, and authenticated by Governor Leonard Calvert in a letter from Point Comfort, May, 1634, as the work of a "most honest and discreet gentlemen". Maryland Historical Society, Fund Publication, 35, Calvert Papers, no. 3 (Baltimore, 1899), 26-46- discussion of authorship, pp. 6-12; Notes by Father Hughes: Hall, "Narratives of Early Maryland" (New York, 1910), 29-45.

Imitatrix (Prague, 1694), 893; DODD, Church History, III, 313; OLIVER, Collections (London, 1845), 221; DE BACKER, Ecrivains (Liege, 1859), 776; SOMMERVOGEL, Bibliotheque de la C. de J.; SOUTHWELL, Bibliotheca; Menology, English-speaking Assistancy; CHANDLERY, Fasti Brevoires (Rochampton, 1910); CAMPBELL, Catholic Almanac (Baltimore, 1841), 43-68; Woodstock Letters, I, 1-11; CLARKE in Metropolitan Magazine (Baltimore, 1856), 73-80.

EDWARD I. DEVITT

Charles Ignatius White

Charles Ignatius White

Editor, historian, born at Baltimore, Maryland, U.S.A., 1 February, 1807; died at Washington, D.C., 1 April, 1878. He was one of the leading publicists in the United States during the second half of the nineteenth century. His Classical studies were made at Mt. St. Mary's Emmitsburg, and at St. Mary's College, Baltimore, and his theological course at St. Sulpice, Paris, where he was ordained priest on 5 June, 1830. Returning to Baltimore soon after his ordination, he was engaged in parish work there and at Pikesville, until 1857, when he was made rector of St. Matthew's, Washington, remaining in this charge until his death. In addition to his parochial labours he edited the "annual Catholic Almanac and Directory" (1834-1857); founded the "Religious

Cabinet", a monthly magazine in Baltimore (1842) which was called the following year the "U. S. Catholic Magazine" (1843-1847), and revived as the "Metropolitan Magazine" in 1853. He was also editor of the weekly paper, the "Catholic Mirror" (1850-1855). These publications in the formative period before the civil war were, under his direction, very influential factors in the great progress made in the United States by the Church spiritually and materially. He also translated and published: Balme's "Protestantism and Catholicity Compared in their Effects on the Civilization of Europe" (Baltimore, 1856); and compiled the "Life of Mrs. Eliza A. Seton" (New York, 1853), founder of the American branch of the Sisters of Charity.

Cathedral Records (Baltimore, 1906), 60; Freeman's Journal (New York), contemporary files; ALLIBONE, Dict. of Authors, s.v.

THOMAS F. MEEHAN

Ven. Eustace White

Ven. Eustace White

Martyr, born at Louth, Lincolnshire, in 1560; suffered at the London Tyburn, 10 December, 1591. His parents were heretics, and his conversion resulted in a curse from his father. He was educated at Reims (1584) and at Rome (1586), where he was ordained. He came on the mission in November, 1588, and laboured in the west of England. On 1 Sept., 1591, he was betrayed at Blandford, Dorset, by a lawyer with whom he had conversed upon religion. For two days he held public discussion with a minister, and greatly impressed the Protestants present. He was then sent to London, and lodged in Bridewell, 18 September, where for forty-six days he was kept lying on straw with his hands closely manacled. On 25 October the Privy Council gave orders for his examination under torture, and on seven occasions he was kept hanging by his manacled hands for hours together; he also suffered deprivation of food and clothing. On 6 December together with Edmund Gennings and Polydore Plasden, priests, and Sydney Hodgson (q.v.), Swithin Wells, and John Mason, laymen, he was tried before the King's Bench, and condemned for coming into England contrary to law. He forgave Topcliffe his cruelties, and prayed for him, and at his execution, telling the people that his only treason was his priesthood, he thanked God for the happy crown to his labours. Being cut down alive, he rose to his feet, but was tripped up and dragged to the fire where two men stood upon his arms while the executioner butchered him. With him suffered Polydore Plasden and three laymen.

Ven. Polydore Plasden

Venerable Polydore Plasden, *alias* Oliver Palmer, born in 1563, was the son of a London horner. He was educated at Reims and at Rome, where he was ordained priest

on 7 December, 1586. He remained at Rome for more than a year, and then was at Reims from 8 April till 2 September, 1588, when he was sent on the mission. While at Rome he had signed a petition for the retention of the Jesuits as superiors of the English College, but in England he was considered to have suffered injury through their agency. He was captured on 8 Nov., 1591, in London, at Swithin Wells's house in Gray's Inn Fields, where Ven. Edmund Gennings was celebrating Mass. At his execution he acknowledged Elizabeth as his lawful queen, whom he would defend to the best of his power against all her enemies, and he prayed for her and the whole realm, but said that he would rather forfeit a thousand lives than deny or fight against his religion. By the orders of Sir Walter Raleigh, he was allowed to hang till he was dead, and the sentence was carried out upon his body.

Ven. John Mason

Venerable John Mason was a servant to Mr. Owen of Oxfordshire. When Topcliffe endeavoured to obtain entry into the room where Father Gennings was saying Mass, Mason seized him, and in the struggle both fell down the stairs together. Mason was therefore cited as an aider and abettor of priests and condemned accordingly.

Ven. Brian Lacey

At the same time suffered another layman, Venerable Brian Lacey, cousin and companion of Venerable Montford Scott, with whom he was apprehended in 1591. Lacey was committed to Bridewell where he was cruelly tortured by Topcliffe in the vain endeavour to elicit at whose houses he had been with Scott. He was arraigned before the lord mayor at the Old Bailey and condemned to be hanged for aiding and abetting priests. Five years previously Lacey had suffered imprisonment in Newgate for religion, and he was then three times examined by Justice Young. Information against him as a distributor and dispenser of letters to Catholics and against Montford Scott had been given by his own brother, Richard Lacey, gentleman, of Brockdish, Norfolk.

Record Soc., II; V; MORRIS, Troubles of our Catholic Forefathers, III (London, 1906-08); IDEM, Life of Gerard (London, 1881); CHALLONER, Memoirs of Missionary Priests; FOLLEY, Records of the English Province of the Soc. of Jesus, VI.

J.L. WHITFIELD

Ven. Richard White

Ven. Richard White

(*Vere GWYN*).

Martyr, born at Llanilloes, Montgomeryshire, about 1537; executed at Wrexham, Denbighshire, 15 October, 1584. After a brief stay at Oxford he studied at St. John's College, Cambridge, till about 1562, when he became a schoolmaster, first at Overton in Flintshire, then at Wrexham and other places, acquiring considerable reputation as a Welsh scholar. He had six children by his wife Catherine, three of whom survived him. For a time he conformed in religion, but was reconciled to the Catholic Church at the first coming of the seminary priests to Wales. Owing to his recusancy he was arrested more than once, and in 1579 he was a prisoner in Ruthin gaol, where he was offered liberty if he would conform. In 1580 he was transferred to Wrexham, where he suffered much persecution, being forcibly carried to the Protestant service, and being frequently brought to the bar at different assizes to undergo opprobrious treatment, but never obtaining his liberty. In May, 1583, he was removed to the Council of the Marches, and later in the year suffered torture at Bewdley and Bridgenorth before being sent back to Wrexham. There he lay a prisoner till the Autumn Assizes, when he was brought to trial on 9 October, and found guilty of treason and sentenced on the following day. Again his life was offered him on condition that he acknowledge the queen as supreme head of the Church. His wife consoled and encouraged him to the last. Five carols and a funeral ode composed by the martyr in Welsh have recently been discovered and published.

An English contemporary biography printed in the Rambler, N.S., III (London, 1860); BRIDGWATER, Concertatio Ecclesiae (Treves, 1588), giving a contemporary Latin account; CHALLONER, Memoirs of Missionary Priests (London, 1741-42); THOMAS in Dict. EDWIN BURTON

Robert White

Robert White

English composer, b. about 1530; d. Nov., 1574; was educated by his father, and graduated Mus. D., at Cambridge University, 13 Dec., 1560. In March, 1561, he succeeded Dr. Tye as organist and master of the choristers at Ely cathedral, continuing in that office till 1566. He accepted a similar post at Chester cathedral in 1566, and took part in the Whitsuntide pageants during the years 1567-69. Such was his repute as a choir trainer that in 1570 he was appointed organist and master of the choristers of Westminster Abbey. Though an avowed Catholic he retained his post at Westminster Abbey from 1570 until his death. It is worth recording that during the same period,

under Elizabeth, the musical services of the Chapel Royal, Westminster Abbey and St. Paul's Cathedral were directed by three Catholics, namely Farrant, White, and Westcott. White made his will on 5 Nov., 1574, and in it he describes his father Robert White as still living. He left each of the choristers four pence. The high estimation in which he was held by his contemporaries may be judged by the distich which a pupil (in 1581) inscribed in the manuscript score of White's "Lamentations":

"Non ita moesta sonat plangentis verba prophetae
Quam sonat authoris musica moesta mei."

Fortunately quite a large number of White compositions have survived, and of these his Latin motets are sufficient to place him in the front rank of English composers of the Elizabethan epoch. His contrapuntal writing is very fine, though stilted. However, his "Lamentations", set for five voices, have a flavour far in advance of his period, as also his motet "Peccatum peccavit Jerusalem" and "Regina Coeli". It is to be observed that he wrote his English anthems *ex officio*, but his Latin services reveal the full genius of White, and give him a place with Tallis, Byrd, Shepherd, and Taverner. Strange to say, though he stood so high among mid-sixteenth century musicians, his compositions were almost utterly neglected till unearthed by Dr. Burney. In recent years he has come into his own, thanks to the zeal of Mr. Arkwright, Dr. Terry, and others. Dr. Ernest Walker regards White "fairly to be reckoned -- even remembering that Palestrina and Lassus were contemporaries -- as among the very greatest European composers of this time".

BURNEY, Gen. Hist. of Music (4 vols., London, 1776-89); WALKER, A Hist. of Music in England (London, 1907); GROVE, Dict. of Music and Musicians, V (London, 1910).

W.H. GRATTAN-FLOOD

Stephen White

Stephen White

Antiquarian and polyhistor; b. at Clonmel, Ireland, in 1574; d. in Galway, 1646. He belonged to a family devoted to religion and education. In 1592 Trinity College, Dublin, was founded, and S. White (in all probability Stephen White) was one of the few students named in the charter. Unwilling to take the oath of supremacy, he left his native land and entered the Irish College at Salamanca, Spain, where in 1596 he joined the Society of Jesus, and taught from 1602 to 1606. The domestic record says of him "plurimum profecit in litteris". This skill he employed as one of the two principal

collaborators of William Bathe's systematic language method called "Janua linguarum", a work on which Comenius twenty years later based his celebrated "Janua linguarum reserata". In 1606 he went to Germany and lectured on theology at Ingolstadt, at Dillingen, and other places. He applied himself assiduously to the study of history and was generally reputed to be one of the most learned men of his time in Europe. Ussher calls him "a man profoundly versed in the ancient records, not of Ireland alone, but of other countries". His chief interest was in Irish history. To him is due the honour of fixing the historic label "Scotia" where it belongs -- to Ireland. He called attention to the rich treasures of Irish literature preserved in the monasteries and libraries of Germany, and generously supplied many noted scholars, as Ussher and Colgan, with accurate copies of Irish manuscripts accompanied by critical emendations and valuable commentaries. His biographical notices of early Irish saints were utilized in the "Acta SS." What gave him the bent towards early Irish history seems to have been the publication at Frankfurt by Camden of two works by Gerald of Wales, libelling Ireland and its people. In refutation he wrote his best-known work "Apologia pro Hibernia adversus Cambri calumnias". After an absence of nearly thirty-eight years he returned to Ireland to join the staff at the Jesuit college recently established at Dublin. The college, however, was in a short time suppressed by the Government, and the property was confiscated and handed over to Trinity College. For some years he laboured in his native Diocese of Waterford and Lismore, mainly engaged in teaching catechism to children. In 1644 he went to Galway where he died.

HOGAN, Life of Father Stephen White, S.J. in The Waterford Archaeological Journal, III (1897); REEVE, Memoir of White 1861); CORCORAN, Studies in the History of Classical Teaching, 1500-1700 (Dublin, 1911); KELLY, notes to WHITE, Apologia; SOMMERVOGEL, Bibl. de la comp. de Jesus.

M.J. FLAHERTY

Stephen Mallory White

Stephen Mallory White

American statesman; born at San Francisco, California, 19 January, 1853; died at Los Angeles, California, 21 February, 1901. His parents were William F. White and Fannie J. (Russell), natives of Limerick, Ireland, and distinguished California pioneers of 1849. He was a grand-nephew of Gerald Griffin, the poet and novelist, and a cousin of Stephen Russell Mallory, Secretary of the Navy of the Southern Confederacy. He was educated at the Jesuit Colleges of St. Ignatius in San Francisco and Santa Clara at Santa Clara, California. In 1874 he was admitted to the bar. He was a noted orator, a profound student, and was gifted with great natural ability which he employed with

tireless energy as a lawyer and in the service of his country. In 1886 he was elected, as a Democrat, state senator, lieutenant governor (1888), and United States senator (1893). In the latter capacity he served for six years and during that time was one of the leaders who forced the Pacific railroads to pay their enormous debt to the Government and who urged the construction of the Panama Canal. His most valuable service to the nation while in the United States Senate was his learned exposition of the complex questions of international and constitutional law involved in the war with Spain and in the annexation of Hawaii and of the Philippines to the United States. These studies have been included in two volumes, published since his death, "Stephen M. White, His Life and Work" (Los Angeles, 1902), and have taken rank as classics among treatises on civil government. He was one of the lawyers who represented the Church in the claim against Mexico growing out of the "Pious Fund of the Californias". In 1896 the Democratic party in California endorsed him for President of the United States, but he declined to enter the contest. He was a devout though unobtrusive Catholic all his life, and died while suffering from overwork. The people of the United States have, by popular subscription, erected a life-size statue of Senator White in bronze at Los Angeles, where his remains repose.

Society, IX (New York, 1911), 177; SHUCK, Hist. of the Bench and Bar in California (Chicago, 1902); JAMES, Heroes of California (Boston, 1910).

ROBERT P. TROY

Edward White

Edward White

Grandfather of Stephen Mallory White, born in County Limerick, Ireland, in the latter part of the eighteenth century; died December, 1863. Early in the nineteenth century he emigrated to America, and settled at Binghamton, New York. Here he founded and directed an academic institution for women. This school existed from 1830 until the death of Mrs. White in 1851. White had nine children. His five daughters entered religious orders; the most well-known among them was Madame Catherine White of the Religious of the Sacred Heart, author of text-books on mythology, classical literature, and church history. Of his sons the most distinguished was the eldest, James, a prominent lawyer in New York City.

JOHN V. SIMMONS

Thomas White

Thomas White

(*Alias BLACKLOW, BLACLOE, ALBIUS, ANGLUS*).

Born in Essex, 1593; died in London, 6 July, 1676. Through his mother, Mary Plowden who married Richard White of Hutton, Essex, he was grandson of the lawyer, Edmund Plowden. Educated at St. Omer, Valladolid, and Douai, he was ordained priest on 25 March, 1617; he studied at the Sorbonne, became bachelor of divinity, and returned to Douai to teach theology, which he did, with intervals, till 1630, when he became president of the English College, Lisbon. In 1633 he resigned and returned to England, where he devoted himself to the writing of about forty works, which caused a bitter theological controversy. Not only was he accused of employing new expressions and manners of speech not usual in Scholastic theology, but his views on purgatory, hell, and the infallibility of the pope, were unsound. Exception was also taken to his politico-religious views, especially his teaching in favour of passive obedience to any established government. Several of White's opinions were censured by the Inquisition in decrees dated 14 May, 1655, and 7 Sept., 1657, and many of his friends and former students publicly disclaimed his principles. Finally, he withdrew the censured opinions and submitted himself and his writings to the Holy See. He was chiefly opposed by George Leyburn, the president of Douai, and Robert Pugh, the latter of whom wrote a life of him, not known now to exist, also a work called "Blacklo's Cabal", in which he accuses him of opposition to the regulars and to episcopal authority, and disloyalty to the pope. White, however, counted amongst his friends some of the leading secular clergy, who defended the solidity of his fundamental doctrine and maintained his loyalty to the Church, while disclaiming the doctrines to which exception was taken and which he had retracted.

HOLDEN, Letter to a Friend upon Mr. Blacklow's submitting his writings to the See of Rome (Paris, 1657), INDEM, Epistola Brevis in qua de 22 propositionibus ex libris Thomae Angli ex Albiis excerptis . . . sententiam suam dicit (Paris, 1661); IDEM, A letter to Mr. Graunt concerning Mr. White's treatise "de medio animarum statu" (Paris, 1661); PUGH, Blacklo's Cabal (s. l., 1680); LEYBURN, Letter written by G. L. to Mr. And. Knigh[tley] and Mr. Tho. Med [calfe] (Douai, 1656); IDEM, An Epistle Delaratorie (Douai, 1657); IDEM, The summe of Dr. Leyburn's Answere to a Letter printed against him by Mr. Blackloe (Douai, 1657); LEYBURN (or WARNER), Vindiciae Censurae Duacenae (Douai, 1661); Blackloanoë Haeresis Historia et Confutatio (Ghent, 1675); DODD, Church History, III (Brussels vere Wolverhampton 1737-42); PANZANI, Memoirs (Birmingham, 1793); PLOWDEN, Remarks on Panzani (Birm-

ingham, 1793); KIRK, History of Lisbon College, ed. CROFT (London, 1902); GILLOW, Bibl. Dict. Eng. Cath., svv. White, Holden, Pugh; COOPER, in Dict. Nat. Biog., s. v.; Third Douay Diary, C. R. S., x (London, 1911), especially vol. II, 532 sqq. For Leyburne's catalogue of priests, in which he distinguishes by pungent comments all White's supporters.

EDWIN BURTON

White Fathers

White Fathers

(MISSIONARIES OF OUR LADY OF AFRICA OF ALGERIA).

This society, known under the name of "Pères Blancs" or "White Fathers", was founded in 1868 by the first Archbishop of Algiers, later Cardinal Lavigerie. The famine of 1867 left a large number of Arab orphans, and the education and Christian instruction of these children was the occasion of the founding of the society; but from its inception the founder had in mind the conversion of the Arabs and negroes of Central Africa. Missionary posts were established in Kabylic and in the Sahara. In 1876 and in 1881 two caravans from South Algeria and R'dames, intending to open missions in Soudan, were massacred by their guides. In 1878 ten missionaries left Algiers to establish posts at Lakes Victoria Nyanza and Tanganyika. These now form the present Vicariates Apostolic of Northern Nyanza, Southern Nyanza, Unyanyembe, Tanganyika, Nyassa, and Upper Congo. In 1894 the mission of French Soudan was founded. The missions of the Sahara are grouped in a prefecture Apostolic. In 1880, at the request of the Holy See, the White Fathers established at Jerusalem a Greek Melchite seminary for the formation of clergy of this rite. The society is composed of missionary priests and co-adjutor brothers. The members are bound by an oath engaging them to labour for the conversion of Africa according to the constitutions of their society. The missionaries are not, strictly speaking, a religious order, and may retain their own property; but they may expend it in the society only at the direction of the superiors. One of the chief points in the rule is in regard to community life in the missions, each house being obliged to contain not less than three members. At the head of the society is a superior-general, elected every six years by the chapter. He resides at Maison-Carree, near Algiers. Those desiring to become priests are admitted to the novitiate after their philosophical studies, and one year of general theology. The three last years are spent at the scholasticate of Carthage in Tunis. The society admits persons of all nationalities. Recruiting houses are found in Quebec (Canada), Belgium, Holland, Germany, and France, in which are received those not yet ready for the novitiate. The costume of the missionaries resembles the white robes of the Algerian Arabs and consists of a cassock

or *gandoura*, and a mantle or *burnous*. A rosary and cross are worn around the neck in imitation of the *mesbaha* of the marabouts. The society depends directly on the Congregation of Propaganda. The White Fathers succeeded in establishing small missions among the Berbers of Jurjura (Algeria), there being at present nine hundred and sixty-two Christians; but the regions bordering on the great lakes and Soudan show the best results. The number of neophytes in all the vicariates (June, 1909) was 135,000; the number preparing for baptism 151,480. A test of four years is imposed on those desiring to be baptized. To religious instruction the missionaries add lessons in reading and writing, and teach also, in special classes, the tongue of the European nation governing the country. The brothers form the young blacks for trades and agriculture. The number of boys in the schools (June, 1909) was 22,281. In July, 1910, the society numbered; 600 priests, 250 brothers; 70 novices, with 80 pupils in the theological classes. In the houses of postulants for the novitiate were 72 pupils.

JOHN FORBES

Whithorn Priory

Whithorn Priory

Located in Wigtownshire, Scotland, founded about the middle of the twelfth century, in the reign of David I, by Fergus, Lord of Galloway, for Premonstratensian, or White, Canons. The canons of Whithorn formed the chapter of the Diocese of Galloway, which was re-established about the same time, also by Fergus, the old succession of bishops having died out about 796. The prior stood next in rank to the bishop, as we see from the order of signatories to an episcopal charter early in the thirteenth century; and he and his community enjoyed the right of electing the bishop, although this right was occasionally overruled in favour of the secular clergy by the Archbishop of York, of which see Galloway was a suffragan for several centuries. The full list of priors has not been preserved; among them were: Maurice, who swore fealty to King Edward I of England in 1296; Gavin Dunbar (1514), who rose to be Archbishop of Glasgow; and James Beaton, successively Archbishop of Glasgow and of St. Andrews, and chancellor of the kingdom. Whithorn was long a noted place of pilgrimage, owing to its connection with the venerated memory of St. Ninian. Many Scottish sovereigns, among them Margaret (queen of James III), James IV, and James V, made repeated pilgrimages to the saint's shrine, and left rich offerings behind them. The monastery, thus endowed,

became opulent, and its income at the dissolution was estimated at over £1000. The last prior (Fleming) was committed to prison in 1563 for the crime of saying Mass. The whole property of the priory was vested in the Crown by the annexation act of 1587, and was granted in 1606 by James VI to the occupant of the See of Galloway when he established Episcopalianism in Scotland in 1606. It continued to belong to the bishopric until the revolution of 1688, at which date that see was the richest in the kingdom next to St. Andrews and Glasgow. The priory church, which served also as the cathedral of the diocese, had a long nave without aisles, a choir of about the same length, and a lady chapel beyond. In 1684 the nave and western tower were still intact; but the existing remains consist only of the roofless nave and the extensive vaulted crypts constructed under the eastern end of the church. Such restoration as was possible has been carefully carried out by the third Marquis of Bute.

The Five Great Churches of Galloway (Edinburgh, Ayrsh, and Gall. Archaeol. Assn., 1899), 169-96, with a complete series of drawings of the ruins; MAXWELL, Hist. of Dumfries and Galloway (Edinburgh, 1896), 22, 48 sq.; GORDON, Monasticon, III (London, 1875), 318-21; WALCOTT, The Ancient Church of Scotland (London, 1974), 223-28; CHALMERS, Caledonia, V (Paisley, 1890), 410-20; BELLESHEIM, Hist. of Cath. D.O. HUNTER-BLAIR

Pentecost

Pentecost (Whitsunday)

A feast of the universal Church which commemorates the Descent of the Holy Ghost upon the Apostles, fifty days after the Resurrection of Christ, on the ancient Jewish festival called the "feast of weeks" or Pentecost ([Exodus 34:22; Deuteronomy 16:10](#)). *Whitsunday* is so called from the white garments which were worn by those who were baptised during the vigil; *Pentecost* ("Pfingsten" in German), is the Greek for "the fiftieth" (day after Easter).

Whitsunday, as a Christian feast, dates back to the first century, although there is no evidence that it was observed, as there is in the case of Easter; the passage in I Corinthians (16:8) probably refers to the Jewish feast. This is not surprising, for the feast, originally of only one day's duration, fell on a Sunday; besides it was so closely bound up with Easter that it appears to be not much more than the termination of Paschal tide. That Whitsunday belongs to the Apostolic times is stated in the seventh of the (interpolated) fragments attributed to St. Irenæus. In Tertullian (De bapt., xix) the festival appears as already well established. The Gallic pilgrim gives a detailed ac-

count of the solemn manner in which it was observed at Jerusalem ("Peregrin. Silviæ", ed. Geyer, iv). The Apostolic Constitutions (V, xx, 17) say that Pentecost lasts one week, but in the West it was not kept with an octave until at quite a late date. It appears from Berno of Reichenau (d. 1048) that it was a debatable point in his time whether Whitsunday ought to have an octave. At present it is of equal rank with Easter Sunday. During the vigil formerly the catechumens who remained from Easter were baptized, consequently the ceremonies on Saturday are similar to those on Holy Saturday.

The office of Pentecost has only one Nocturn during the entire week. At Terce the "Veni Creator" is sung instead of the usual hymn, because at the third hour the Holy Ghost descended. The Mass has a Sequence, "Veni Sancte Spiritus" the authorship of which by some is ascribed to King Robert of France. The colour of the vestments is red, symbolic of the love of the Holy Ghost or of the tongues of fire. Formerly the law courts did not sit during the entire week, and servile work was forbidden. A Council of Constance (1094) limited this prohibition to the first three days of the week. The Sabbath rest of Tuesday was abolished in 1771, and in many missionary territories also that of Monday; the latter was abrogated for the entire Church by Pius X in 1911. Still, as at Easter, the liturgical rank of Monday and Tuesday of Pentecost week is a Double of the First Class.

In Italy it was customary to scatter rose leaves from the ceiling of the churches to recall the miracle of the fiery tongues; hence in Sicily and elsewhere in Italy Whitsunday is called *Pascha rosatum*. The Italian name *Pascha rossa* comes from the red colours of the vestments used on Whitsunday. In France it was customary to blow trumpets during Divine service, to recall the sound of the mighty wind which accompanied the Descent of the Holy Ghost. In England the gentry amused themselves with horse races. The Whitsun Ales or merrymakings are almost wholly obsolete in England. At these ales the Whitsun plays were performed. At Vespers of Pentecost in the Oriental Churches the extraordinary service of genuflexion, accompanied by long poetical prayers and psalms, takes place. (Cf. Maltzew, "Fasten-und Blumen Triodion", p. 898 where the entire Greco-Russian service is given; cf. also Baumstark, "Jacobit. Fest brevier", p. 255.) On Pentecost the Russians carry flowers and green branches in their hands.

F.G. HOLWECK

Rose Whitty

Rose Whitty

Born at Dublin, Ireland, 24 November, 1831; died 4 May, 1911. Of her two sisters one became a religious of the Sacred Heart; the other, like herself, joined the Order of St. Dominic and in 1870 led a band of sisters to New Zealand, where she laboured till her death in 1911. Sister Rose entered St. Catherine's Convent, Sion Hill, Blackrock, Co. Dublin, in her nineteenth year, 25 March, 1849. Seventeen years later, at the request of Bishop Moran, who then had charge of the Eastern Vicariate of South Africa, she with five others began their work at Post Elizabeth, 23 November, 1867. She was prioress for twenty-five years of Rosemary Convent, which she founded. The diamond jubilee of her religious profession was celebrated in 1910, and a Mother Rose scholarship was founded as an appropriate memorial of her long devotion to the work of education. Her good health continued till within a month or two of her death in her eightieth year. With every mark of public veneration her remains were laid to rest in the convent cemetery of Emerald Hill Priory, one of the convents which she had founded, on 6 May, 1911.

The Catholic Magazine for South Africa (June, 1911).

MATTHEW RUSSELL

Ellen Whitty

Ellen Whitty

In religion Mary Vincent, born at Pouldarrig near Oylgate, a village seven miles from the town of Wexford, 1 March, 1819; died at Brisbane, Queensland, March, 1892. She was one of the principal assistants of Mother Catherine McAuley in establishing the Institute of the Sisters of Mercy. St. David's Well, which has lately become again the object of extraordinary devotion, lies besides her father's land; it is dedicated to St. David of Wales, said to have been the confessor of St. Aidan of Wexford. Of her sisters one became also a Sister of Mercy; the other married the brother of the famous convert and publicist, Frederick Lucas. Father Robert Whitty, S.J., was her brother. In 1839 she joined the infant community in Baggot Street, Dublin, and was trained by the foundress. She was made mistress of novices in 1844, and in 1849 superior general, third in succession to Mother McAuley. While she was superior, the Crimean War was carried on, and she offered the services of her nuns to nurse the sick and wounded soldiers. Her sister Mary Agnes was one of those who went to the seat of war. In 1861

she yielded to the appeal of Dr. James Quinn of Dublin, a member of a priestly family, who had been appointed the first Bishop of Brisbane in Queensland, the northern part of New South Wales. The new diocese, as large as France, Spain, and Italy together, had then only two priests and four churches. It now forms three well-equipped dioceses. Mother Whitty herself led her band of missionary sisters to their new sphere of labour, which they reached on 10 May, 1861. There she toiled with untiring devotedness for the rest of her life, founding more than twenty convents before her death.

MORAN, History of the Catholic Church in Australia; CARROLL, Leaves = from the Annals of the Sisters of Mercy.

MATTHEW RUSSELL

Robert Whitty

Robert Whitty

Born at Pouldarrig near Oylgate, 7 January, 1817; died 1 September, 1895. In 1830 he entered Maynooth College in his fourteenth year. Having added two years on the Dumboyne Establishment to his college course, he was still too young for ordination. He offered his services to Dr. Griffiths, Vicar Apostolic of the London District, who ordained him priest at St. Edmund's, Ware, 19 September, 1840. From the first he showed a warm sympathy with the Oxford converts and formed a friendship with Newman and Oakeley before they had become Catholics. Dr. Wiseman showed his appreciation of his priestly zeal by making him provost of the newly appointed metropolitan chapter and his vicar-general in 1850. In this capacity he was responsible for the publication of the famous pastoral "From the Flaminian Gate", in which English bigotry pretended to discover papal aggression. "The Cardinal never blamed me", he wrote long afterwards, "but others did." In 1857 Father Whitty obtained leave to resign his position, and entered the noviceship of the Society of Jesus at Verona. On his return to England he was appointed professor of canon law in St. Beunos College, North Wales. After labouring for some time in Scotland, he was appointed provincial. Subsequently he was assistant to the Father-General Anderledy. He filled other important offices, and worked until the end, giving ecclesiastical retreats even in the last summer of his life. He died at the age of 78 years, of which he had spent 38 as a Jesuit.

WARD, Life of Cardinal Newman (London, 1912).

MATTHEW RUSSELL

Wibald

Wibald

Abbot of Stavelot (*Stablo*), Malmedy, and Corvey, b. near Stavelot in Belgium in 1098; d. at Bitolia in Paphlagonia, 19 July, 1158, while returning from an imperial embassy to Constantinople. He studied at the monastic schools at Stavelot and Liege, and entered the Benedictine monastery at Waulsort near Namur in 1117. After presiding for some time over the monastic school at Waulsort he went to the monastery at Stavelot and in 1130 was elected Abbot of Stavelot and malmedy. On 22 October 1146, he was also elected Abbot of Corvey and four months later the convents at Fischbeck and Kemnade were annexed to Corvey by the emperor. During the abbacy of Wibald the monastery of Stavelot reached the period of its greatest fame, and at Corvey the monastic discipline which had been on the decline was again restored. Wibald was one of the most influential councillors of the emperors Lothaire and Conrad III. Combining true patriotism with a submissive devotion to the Holy See, he used his great influence to preserve harmony between the emperors and the popes. In 1137 he accompanied Lothaire on a military expedition to Italy and through the emperor's influence was elected Abbot of Monte Cassino. When, however, King Roger of Sicily threatened to destroy the monastery unless Wibald resigned the abbacy, he returned to Stavelot, having been Abbot of Monte Cassino only forty days. During the reign of Conrad III (1138-52) Wibald became still more influential. All the emperor's negotiations with the Apostolic See were carried on by Wibald, and he visited Rome on eight different occasions on imperial embassies. The emperor would enter upon no political undertaking without consulting the abbot. In 1147 he took part in the unsuccessful expedition against the Wends. During the absence of Conrad III in Palestine (1147-49) he was tutor of the emperor's young son Henry, but seems to have had little to do with the political affairs of Germany during that period. Conrad's successor, Frederick Barbarossa, also esteemed him highly and was sent by him on a mission to Constantinople in 1154 and again in 1157. His sudden death on his second journey back from Constantinople gave rise to the suspicion that he was poisoned by the Greeks. More than 400 of Wibald's epistles are still extant. They begin with the year 1146 and have become the chief source for the history of Conrad III and the early reign of Barbarossa. The best edition was prepared by Jaffé, "Monumenta Corbeiensia" in "Bibliotheca rerum Germ.", I (Berlin, 1864), 76-602. They are also printed in P.L., CLXXXIX, 1121-1458.

MICHAEL OTT

Diocese of Wichita

Diocese of Wichita

(WICHITENSIS).

Erected in 1887, from the Diocese of Leavenworth. The territory of the new see was bounded on the east by the sixth principal meridian, south by the Indian Territory, west by Colorado, and north by the northern lines of Greeley, Wichita, Scott, Lanes, Ness, Rush, Barton, Rice, and MacPherson Counties in the State of Kansas. At that time there were 16 priests in charge of churches, and 23 churches attended as missions; 9 parochial schools, 2 of which were taught by the Sisters of St. Joseph, and 1 by the Sisters of Charity of the Blessed Virgin Mary (Dubuque). The Catholic population numbered about 8000, but there were no religious communities in the diocese. In 1897 the Holy See attached fourteen additional counties located east of the sixth principal meridian, the eastern boundary being the West line of the State of Missouri, and continuing the north line of the Indian Territory on the South. The first bishop appointed for this Diocese, Rt. Rev. James O'Reilly, of Topeka, Kansas, died on 26 July, 1887, before his consecration. One year later, the present bishop, Rt. Rev. John Joseph Hennessy, was selected, and was consecrated on 30 Nov., 1888, in St. John's Church, St. Louis, Missouri, of which he was rector. The ceremony was performed by Archbishop Kenrick of St. Louis, assisted by Bishops Hennessy of Dubuque, and Fink of Leavenworth. When the bishop took over, his territory was in a very discouraging condition owing to a succession of years of drought and crop failures. Many settlers abandoned their farms and availed themselves of the opening of the new Territory of Oklahoma. Since then, the Kansas portion of what had been formerly known as the Great American Desert has improved under better methods of farming, and is now justly described as the garden spot of the West. The City of Wichita, called after an Indian tribe, had a population of about 20,000 when established as an episcopal see; it now numbers over 60,000 and is the largest and most thrifty city in Kansas, with the exception of Kansas City. It has four Catholic churches with about 3700 Catholics, 3 parochial schools attended by nearly 400 children, one academy for young ladies with 175 boarders, one industrial school for small children with 120 boarders, one hospital with 125 patients daily, one orphanage with 30 inmates, one convent and mother-house of the diocesan Sisters of St. Joseph.

Diocesan Statistics

There are 76 secular and 12 regular priests, 69 churches with resident pastors, 58 missions with churches, 7 hospitals, 35 parish schools, with 2400 pupils, and a Catholic Population of 32,000. There are 4 religious institutes of men: the Passionist Fathers at St. Paul, Kansas, the Franciscans at Wichita, the Capuchins at Marienthal, and the Silvestrine Benedictines at Chicopee for work especially among the Italians. There are six religious institutes of women: Sisters of St. Joseph (diocesan), Sisters of Charity of the Blessed Virgin Mary (Dubuque); Sisters of Mercy (diocesan), Sisters of St. Dominic (Diocesan); Sisters of the Precious Blood (Belleville), and Sisters of the Sorrowful Mother (Rome, Italy). A magnificent Romanesque cathedral of Bedford stone and granite was consecrated in 1912 by His Eminence Cardinal Gibbons, Archbishop of Baltimore.

JOHN J. HENNESSY

Wichita Indians

Wichita Indians

A confederacy of Caddoan stock, formerly dwelling between the Arkansas River, Kansas, and the Brazos River, Texas, and now located in Oklahoma, within the boundaries of the former Wichita reservation. They call themselves *Kitikitsch* and sometimes *Tawehash*, the meanings of which are unknown, and claim to have come from the same stock as the Pawnee. The names of nine of the tribes formerly comprising the confederacy have been preserved, but the only divisions now existing are the Tawakoni, the Waco, and the Wichita proper. Previous to the annexation of Texas (140-5), the Wichita proper dwelt north of the Red River and around the Wichita Mountains. The meaning of the name Wichita is unknown. These Indians were first met about 1541 in Quivara, during the expedition of Francisco Vasquez de Coronado. Fray Juan de Padilla, who accompanied Coronado, and some companions remained behind to evangelize them, and three years later gained the palm of martyrdom. In 1719 the Wichita were visited by La Harpe, a French soldier, who found them given to cannibalism; somewhat later they were forced to the southwest by the Osago and Chickasaw. In 1758 they destroyed the Spanish missions of San Sabá, near the Rio Colorado. In 1801 the tribe suffered severely from an epidemic of small-pox. Their first treaty of peace was made in 1835, and fifteen years later the Wichita proper settled at Rush Springs, Oklahoma. They took refuge in Kansas during the Civil War, on the conclusion of which they were placed on a reservation to the north of the Washita River. In 1902 the reservation was opened by the Government for settlement, and the

Wichita received allotments in severalty. They now number 310, in addition to 30 Kichai.

The Wichita were an agricultural tribe, but also engaged in hunting the buffalo. They cultivated corn, pumpkins, and tobacco, which they bartered with their neighbours. Their permanent dwellings were cone-shaped, with a diameter of from forty to fifty feet, and were thatched with grass; when travelling they lived in skin tipis. Before coming under the influence of civilization their dress was very scanty; they tattooed their faces, arms, and chests, and so were called the "tattooed people" by some of the other tribes, thus: *Dogúat* or *Tuchquet* (Kiowa), *Dókana* (Comanche), *Hochsúwitan* (Cheyenne). They were a steadfast, peaceful race, given to ceremonial dances, particularly the Horn dance and the Gift dance, and also held foot-races in which all the tribe competed.

A.A. MACERLEAN

Francis Wichmans

Francis Wichmans

In religion AUGUSTINE, born at Antwerp, 1596; died 1661. Having finished his classical studies, he received the white habit in the Norbertine Abbey of Tongerloo, Belgium, 21 Sept., 1612. Ordained priest 4 March, 1620, he was sent to the University of Louvain, where he graduated as bachelor of theology. Recalled to the abbey, he filled the offices of master of novices and *circator*. In 1630 he was made parish priest of Mierlo, and rural dean of Helmond. After the taking of Herzogenbusch by the Dutch Protestants in 1629, Bishop Ophovius was obliged to leave his city, and resided at Geldorp, three miles from Mierlo. The bishop's "Diarium" shows that Ophovius conferred almost daily with Wichmans on the affairs of his diocese.

In 1632 Wichmans was transferred to the parish of Tilburg, in the same diocese, and was made rural dean of Hilvarenbeck. In 1634 the Retorsion laws were made, whereby Catholic priests were expelled, their churches confiscated and handed over to Protestant preachers. Wichmans then resided at Alphen, a village just outside the boundaries and six miles from Tilburg. From this place he administered his parish, always at the risk of his liberty and even his life. It was owing to Wichmans's fearless zeal that not one Catholic of Tilburg apostatized. In 1642 Wichmans was elected coadjutor to Abbot Verbraken, whose successor he became in 1644. He was also named a member of the Permanent Committee of the States of Brabant. Wichmans promoted

education in his abbey; in 1647 six of his religious graduated at Louvain, and a seventh in Rome. He erected or decorated several chapels in honour of the Blessed Virgin, and wrote several books; "Sabbatismus Marianus", "Brabantia Mariana", "Syntagma Sacerdotale", are the most important.

F.M. GEUDENS

Joseph Widmer

Joseph Widmer

Catholic theologian, born at Hohenraim, Lucerne, Switzerland, 15 Aug., 1779; died at Beromünster, 10 Dec., 1844. He studied philosophy at Lucerne, and theology at Landshut (1802-4) under Sailer and Zimmer, the former exercising a great and abiding influence over him. After ordination Widmer was appointed professor of philosophy in 1804, and of moral and pastoral theology in 1819 at the lyceum of Lucerne. In 1833 he was removed from his position by the Government and received a canonry in the collegiate chapter at Beromünster; in 1841 he became the provost of this chapter. In connection with Gugler Widmer did good service in opposing the teachings of Wessenberg, and in reviving ecclesiastic life in Switzerland. Among his writings are: "Der katholische Seelsorger" (Munich, 1819-23); "Systematische Uebersicht der in Sailer's Handbuch der christlichen Moral ausführlich entwickelten und dargestellten Grundsätze" (Sarmenstorf, 1839); "Vortrage über Pastoraltheologie" (Sarmenstorf, 1840). He edited the works of Sailer (Sulzbach, 1830-46), of Franz Geiger (Fluelen, 1823-39), and Gugler (Lucerne, 1828-40).

GOLDLIN, Erinnerungen an J. Widmer (Baden im Aargau, 1849).

FRIEDRICH LAUCHERT

Widow

Widow

I. Canonical prescriptions concerning widows in the Old Testament refer mainly to the question of remarriage. If a man died without children, his widow was obliged to marry her deceased husband's brother, and if the latter refused to take her to wife he was put to shame before the people (Deut., xxv, 5-10). The high-priest was forbidden to marry a widow (Lev., xxi, 14), but other members of the priesthood were at liberty to take to wife the widow of another priest, but not the widow of a layman (Ezech.,

xliv, 22). Outside of these prescriptions, there is no law in the Old Testament restricting a widow's remarriage. The support of widows was commended to the charity of the Israelites, and they were to have the gleanings of the cornfields, olive trees, and vineyards (Deut., xxiv, 19-22). In the third year of tithes (or the great tithe) widows were to have their share of the offering (Deut., xxvi, 12), and at the three principal solemnities of the year they were to be invited to feast with the nearest house-holder (Deut., xvi, 11). In the times of the Machabees money was deposited and provisions were kept in the Temple at Jerusalem for the subsistence of widows (II Mach., iii, 10), and the spoils of battle were also shared with them (II Mach., viii, 28). For their protection, there was a prohibition against taking their garments in pawn (Deut., xxiv, 17). In the Book of Job the taking away of a widow's ox for a pledge is considered a wicked action (xxiv, 3), from which commentators generally gather that the law of Deuteronomy was later extended to all a widow's possessions. Besides legal prescriptions for the protection of widows, the Old Testament contains many general precepts commanding them to the reverence and benevolence of the chosen people and bitter denunciations of their oppressors and defrauders. The lot of the widow in Old Testament times was generally a hard one, and Christ refers to the widow's mite as an offering from the poorest of the poor (Mark, xii, 44). He also strongly denounces the Pharisees: "because you devour the houses of widows" (Matt., xxiii, 14). Under the Old Dispensation some widows devoted themselves to a life of special religious observance, as is recorded of Anna the Prophetess, "who departed not from the temple by fastings and prayers serving night and day" (Luke ii, 37).

II. In primitive Christian times the support of widows was made a special duty by the Apostles, who collected alms for them and gave care of them to the deacons (Acts, vi, 1). This support of needy widows has always been considered a particular charge of the ministers of the Christian Church and many decrees of popes and councils make mention of it as specially incumbent on bishops, parish priests, and holders of benefices. In Apostolic times widows were employed in certain capacities in the ministry of the Church, directing that one to be chosen must be "of no less than threescore years of age, who hath been the wife of one husband. Having testimony for her good works", and some see in this reference to the order of deaconess, while others do not. Shortly after, however, the office of deaconess was referred to as "widowhood" (St. Ignat., "Ep. ad Smyrn.", viii, 1). As to the remarriage of widows in the Christian Church, though St. Paul declares that widowhood is preferable to the married state (I Cor., vii, 8), yet he does not forbid remarriage (*loc. cit.*, 39). Second nuptials are valid by ecclesiastical law if the first marriage bond has been really dissolved and if there is no canonical impediment, as is the case for clerics in major orders in the Oriental rites. In the mind of the Church, however, second nuptials are less honourable than a first marriage

(Conc. Aneur., c. 19; Conc. Laodic., c. 1), and the state of widowhood is more commendable (Conc. Trid., sess. xxiv, de matr., can. 10) as a more perfect good. (See WOMAN.)

THOMASSIN, *Vet. et noval disciplina* (Paris, 1688); WERNZ, *Jus decret.*, IV (Rome, 1904).

WILLIAM H.W. FANNING

Widukind

Widukind

Saxon leader, and one of the heads of the Westphalian nobility. He was the moving spirit in the struggles of the Saxons for their independence and heathen faith.

The Frankish accounts of the Saxon wars, coloured by national feeling, give only an outline of Widukind's character. After Charlemagne's victory in 777 Widukind fled to Denmark. He saw that at the moment opposition was useless. When Charlemagne was in Spain in 778, Widukind came back and, trusting to the Saxon love of independence, organized a war of revenge. Saxon hordes plundered and devastated the region of the middle Rhine, and even threatened Fulda, so that the monks fled, carrying the remains of St. Boniface. A Frankish army defeated the Saxons at Laisa and rescued the town. In 782 order seemed to be restored among the Saxons, and Widukind again fled to Denmark, but returned once more when Charlemagne began his march toward home. The Wends also were incited to join the uprising. The hatred of the insurgents was directed against the churches and priests, and Willihad, first bishop of Bremen, was obliged for the time to abandon his missionary work. Widukind no longer had time the entire Saxon nation on his side. A strong Frankish party had now sprung up, but the terrible punishment inflicted by Charlemagne on 4000 Saxons at Verden on the Aller greatly strengthened the national party among the Saxons. Widukind again fled to Denmark; after this he persuaded the inhabitants of the northern Elbe district and the Frisians to join the revolt. Particulars as to Widukind's actions during the last struggles of the Saxons are lacking. Charlemagne saw that he was the leading spirit of the resistance and sought to induce him to submit peacefully. In 785 Widukind was baptized, with many of his companions, at Attigny. Charlemagne believed that the Saxon opposition was now broken, and the pope ordered a general feast of thanksgiving. Widukind took no part in the later Saxon wars. There is no further credible information respecting him. It is fairly probable that Mathilde, second wife of King Henry I of Germany, was a member of the same family. Widukind soon became one of the heroes of legend, and later he appeared as a great builder of churches and a saint. Medieval times regarded Enger, near Herford, as his place of burial. A gravestone purporting

to be Widukind's and giving his entire figure, is a work of the twelfth century; what is called Widukind's reliquary is a work of the ninth or tenth century.

FRANZ KAMPERS

Widukind of Corvey

Widukind of Corvey

Historian who lived in the tenth century in the Benedictine Abbey of Corvey, Germany. He was a Saxon, he began in 967 his *Res gestae saxonicae sive annalium libri tres*, devoted particularly to Henry I and Otto I, as stated in the dedication to Mathilde, Abbess of Quedlinburg. Unlike the earlier chroniclers, he did not connect the beginning of his account with the time of the Roman Empire, but commenced with the primitive history of his nation. He relates with much enthusiasm the tribal sagas, tells of his heathen ancestors in their battles with the Franks, and describes the introduction of Christianity. After this, he shows how, after they became Christian, the Saxons conquered all other nations, including the Franks, in the reign of Henry I, maintained the supremacy victoriously, in spite of the revolt of various tribes, during the reign of Otto, and finally ruled all Christendom. His work has become a very popular one; but in his efforts to be brief and to imitate the classic writers, especially Sallust, he is frequently impossible to understand. The work is of great value, because it is often the sole authority for the events mentioned, and because it describes persons truthfully and reliably, although only so far as they come within his range of vision; whatever was outside of Saxony was incomprehensible to him. His opinion of the Emperor Otto is incorrect, neither has he any conception of Otto's labours for the benefit of the Church. Widukind is silent respecting the founding of the Archdiocese of Magdeburg, and he does not speak of the pope at all. When he mentions France and Italy his statements are meagre and incorrect. The work was edited by G. Waitz in Mon. Germ. Hist. Scriptores", III, 416-67, and was also published in the "Scriptores rerum germanicarum" (Hanover, 1882).

PATRICIUS SCHLAGER

Diocese of Wiener-Neustadt

Diocese of Wiener-Neustadt

(NEOSTADTIENSIS).

A suppressed see in Lower Austria. Upon the request of Frederick III it was erected by Paul II on 14 January, 1469, and was immediately subject to the Holy See. At first

it was coterminous with the town of Wiener-Neustadt, but in 1769 the new parish of Theresienfeld was added and in 1784 its territory was extended from Wiener-Neustadt to the boundary of Styria. On 21 April, 1785, the see was incorporated in the Archdiocese of Vienna by Joseph II. Its last bishop, Heinrich Johann Kerens, S.J. (1775-85), and his cathedral chapter was transferred to the newly erected diocese of Sankt Pölten. Of the twenty-three bishop of Wiener-Neustadt the most noteworthy were: Melchior Klesl, also Bishop of Vienna and cardinal (1614-30); Leopold, Count von Kollonitsch (1670-85), later Bishop of Raab, and Christopher Royas von Spinola (1686-95).

WIEDERMANN, Beitrage zur Gesch. des Bis. Wiener-Neustadt, in Oesterreich, Vierteljahrsschrift fur kath. Theol. (Vienna, 1864-9).

MICHAEL OTT

Stephan Wiest

Stephan Wiest

Member of the Order of Cistercians, b. at Teisbach in Lower Bavaria, 7 March, 1748; d. at Aldersbad, 10 April, 1797. He attended the gymnasium at Landshut, and in 1767 entered the Cistercian monastery of Aldersbach in lower Bavaria, where he studied philosophy and theology, took the vows, 28 October, 1768, and was ordained priest, 1772. He continued his studies at the University of Ingolstadt. From 1774-80 he taught philosophy and mathematics, and from 1780-81 theology, at Aldersbach. In 1781 he was made professor of dogmatic theology at Ingolstadt, where he also taught patrology and the history of theological literature. He was rector of the university, 1787-88, resigned his professorship in 1794, and returned to his monastery. Wiest has an honourable place in the history of Catholic theology of the eighteen century as a positive dogmatist, well versed in theological literature. His chief work, "Institutiones theologicae" (6 vols., Eichstätt, 1782-86; Ingolstadt, 1788-89; 2nd ed., Ingolstadt, 1788-1801), is valuable for its abundance of positive and historical materials, though the treatment of the speculative side is scanty. "Institutiones theologiae dogmaticae in usum academicum" (2 vols., Ingolstadt, 1791) is a compendium, of which two posthumous editions appeared at Landshut (1817; 1825). The most important of his other works are: "Introductio in historiam litterariorum theologiae revelatae potissimum catholicae" (Ingolstadt, 1794); "Institutiones Patrologiae in usum academicum" (Ingolstadt, 1795); and four dissertations in the university year- book: "De Wolfgango Mario Abbe Alderspacensi Ord. Cist." (I-IV, Ingolstadt, 1788-92).

WERNER, Gesch. der katholischen Theologie (Munich, 1866), 243-48; LAUCHERT, Briefe von Stephan Wiest, O. Cist., an Gerhoh Steigenberger in Studien u. Mit-

theilungen aus dem Benedictiner-und-Cistercienser-Orden, XXI (1900), 127-5, 285-306, 535-53.

FRIEDRICH LAUCHERT

Sts. Wigand

Sts. Wigand

(*Also rendered VENANTIUS*).

Three saints of this name are mentioned in the Roman Martyrology:

(1) SAINT WIGAND, bishop and martyr, 1 April. His body with many others was brought from Dalmatia in 640 by Pope John IV. He was the successor of St. Domnio in the See of Salona, if not immediately, at least before 312. Zeiller (Bessarione, Serm. II, IV, 1903, 335) makes him the founder of the episcopal see and places his death in 270 (Anal. boll., XXIII, 1904, 6). His name is not found in the early martyrologies, but for the first time in a Hungarian calendar of the twelfth century. His relics are in the baptistery of the Lateran Basilica, which contains his picture in mosaic. He is venerated at Toledo also.

(2) SAINT WIGAND, martyr, 18 May, a youth of fifteen, well trained in religious life by Porphyrius, who, with ten unnamed companions, suffered martyrdom A. D. 254 under Decius at Camerino, Umbria. He is honoured as principal patron of Camerino and of Fabriano, where they also celebrate the translation of his relics on 28 March. He is represented as a Roman knight with banner and sword. The Roman Breviary gives proper hymns for his feast. The apocryphal Passio (Acta SS., May, IV, 436) is a simple imitation of the Acts of St. Agapitus of Praeneste (Günter, "Legendenstudien", Cologne, 1906, 24). It relates many wonderful occurrences: the king, Antiochus, makes use of all possible means to induce Venantius to deny his faith, but in vain; angels protect the martyr from death by fire, smoke, etc.; his constancy converts the trumpeter Anastasius; and when he is beheaded, earthquakes and lightning accompany his death.

(3) SAINT WIGAND, abbot, 13 Oct., lived in the latter half of the fifth century. He was a native of Berri. He joined the monks of St. Martin of Tours, and was soon elected abbot. His life (Acta SS., Oct., VI, 211) was written by St. Gregory of Tours. Trithemius and Wion make him a Benedictine.

FRANCIS MERSHMAN

St. Wigbert

St. Wigbert

Companion of St. Boniface, born in England about 675; died at Hersfeld about 746. Positive biographical accounts of him are scanty; he had several contemporaries of the same name, and it is difficult to decide in all instances to which Wigbert the different details belong. In 836 Servatus Lupus wrote a life of Wigbert, but this contains very few clear historical data while it relates in detail the purity of Wigbert's morals, his zeal for souls, charity, familiarity with the Bible, knowledge of theology, skill in teaching, enthusiasm for monastic life, and the faithfulness with which he fulfilled his duties. Boniface called him from England. Wigbert was certainly older than Boniface. A letter from a priest named Wigbert to the fathers and brethren in Glestingaburg (Glastonbury) in Somersetshire is preserved. It has been supposed that the writer was St. Wigbert and therefore a monk of Glastonbury, but this is not probable. He went to Germany about 734, and Boniface made him abbot of the monastery of Hersfeld in Hesse; among his pupils there was St. Sturm, the first Abbot of Fulda. About 737 Boniface transferred him to Thuringia as Abbot of Ohrdruf, where he worked with the same success as in Hersfeld. Later Wigbert obtained Boniface's permission to return to Hersfeld to spend his remaining days in quiet and to prepare for death; notwithstanding old age and illness he continued his austere mode of life until his end. He was first buried at Fritzlar in an inconspicuous grave, but during an incursion of the Saxons (774) his remains were taken for safety to Buraburg, and from there, in 780 by Archbishop Lullus transferred to Hersfeld, where in 850 a beautiful church was built to him; this was burned in 1037. A great fire in 1761 destroyed the new church (dedicated, 1144) and consumed the saint's bones, or else they crumbled in the ruins. The veneration of Wigbert flourished especially in Hesse and Thuringia. At the present day he is venerated only in the dioceses of Mainz, Fulda, and Paderborn. He is recorded in the "Martyrologium Romanum" under 13 August.

KLEMENS LÖFFLER

Wigbod

Wigbod

(WICBODUS, WIGBOLD, WIGBALD).

Theological writer of the eighth century. Of his works there is extant a Latin commentary on the Octateuch called "Quaestiones in Octateuchum" that is, on the

Five Books of Moses, Josue, Judges, and Ruth. He wrote the work, as the title states, at the command of Charlemagne. As Charlemagne is only called king of the Franks and Lombards, not Emperor, the work must have been written before the year 800. The form of the book is that of a dialogue between pupil and teacher. The pupil propounds the difficulties and the teacher gives the solution. Wigbod, however, did not compose these answers himself, but gives verbatim, statements by the following eight Fathers: Augustine, Gregory, Jerome, Ambrose, Hilary, Isidore, Eucherius, and Junilius. For the greater part of Genesis only Jerome and Isidore are drawn on, and later Isidore almost entirely. The two members of the Congregation of Saint-Maur, Martène and Durand, who found the manuscript in the monastery of St. Maximin of Trier, have, therefore, only given the portion to the first three chapters of Genesis in their "Collectio amplissima", IX, (Paris, 1733), 295-366. This portion has been reprinted in P. L., XCVI. 1101-68. The work is chiefly valuable for its preservation of the texts of the Fathers quoted. The commentary is preceded by three Latin poems in hexameter. In the first Wigbod felicitates his book, because it is to be taken into the palace of the king; in the second he praises the king, particularly because Charlemagne has brought together books from many places, and because he knows the Bible well; in the third he treats the seven days of creation. The first two are largely taken from the introductory poems written by Eugene of Toledo to the work of Dracontius, the third is the closing poem to Dracontius (Mon. Germ. Hist.: Poet. Lat., I, 95-97). The manuscript used by Martène and Durand is now unknown. Two manuscripts without the poems are at Admond and Vienna. Nothing positive is known as to the author. Martène and Durand mention Wigbald, who was vice-chancellor under the chancellors Itherius and Rado, and Widbod, who was Count of Périgueux about 778. The last mentioned hardly seems possible.

KLEMENS LÖFFLER

George J. Wigley

George J. Wigley

Died in Rome, 20 January, 1866. By profession he was an architect, but subsequently devoted himself to journalism in Paris. He was one of the band of laymen who surrounded Frederick Ozanam and who founded with him the Society of St. Vincent de Paul. At Ozanam's suggestion he wrote some letters to "The Tablet" describing the aims and the work of the new Society. Lucas, editor of "The Tablet", then wrote some articles on the same subject and in January, 1844, the English branch was formed, Wigley, who was then living in London, becoming one of the original thirteen members. In or about 1860 Wigley took a leading part in forming both in England and in France the

Peterspence Association for assisting the Holy Father. Shortly after Pius IX bestowed on him the Cross of St. Gregory the Great. He met his death in attending one of the St. Vincent de Paul cases in Rome, a Protestant English sailor. Wigley nursed him with great devotion, and had him received into the Church on his death-bed, and then falling ill of the same disease went to the hospital of the Brothers of St. John of God where he died.

DUNN, *The Society S.V.P.; recollections of its early days in London* (1907); AM-HERST, *The Formation of the Society of S.V.P.* (London, 1899).

EDWIN BURTON

Henry William Wilberforce

Henry William Wilberforce

Born at Clapham, 22 September, 1807; died at Stroud, Gloucestershire, 23 April, 1873. He was third son of the famous William Wilberforce, and younger brother of Robert Wilberforce. He entered Oriel College, Oxford, in 1826, becoming a pupil of Newman; and after taking a brilliant degree became a law-student at Lincoln Inn. Newman persuaded him to leave the law for the Church, and in 1834 he took Anglican orders, becoming successively curate of Bransgrove, Hampshire (1834), vicar of Walmer (1841), and vicar of East Farleigh, Kent (1843). On 15 Sept., 1850, he and his wife were received into the Catholic Church. He then devoted himself to journalism, being proprietor and editor of the "Catholic Standard", afterwards known as the "Weekly Register", from 1854 to 1863. His works were: "The Parochial System", London, 1838; "Reasons for Submitting to the Catholic Church", London, 1851, a pamphlet which ran through several editions and led to much controversy; "Proselytism in Ireland" (London, 1852); "Essay on Some Events preparatory to the English Reformation" (London, 1867); and "The Church and the Empires" (London, 1874). His wife was Mary, daughter of the Rev. John Sargent; they had five sons and four daughters.

EDWIN BURTON

Robert Isaac Wilberforce

Robert Isaac Wilberforce

Born at Clapham, 19 December, 1802; died at Albano, near Rome, 3 Feb. 1857. He was the second son of William Wilberforce, and a younger brother of Samuel Wilberforce, Anglican Bishop of Oxford. Educated privately, he entered Oriel College, Oxford, in 1820, and after graduating with a double first, he was elected a fellow of Oriel in 1826, thus becoming a colleague of Newman, Pusey, Keble, and Hurrell Froude. In the same year he took Anglican orders, and on leaving Oxford in 1831 he became rector successively of East Farleigh, Kent, and Burton Agnes, Yorkshire. In 1832 he married Agnes Everilda Wrangham, who died in 1834, leaving him two children, and three years later he married Jane Legard, by whom he had no issue. In 1841 he was installed as canon of York Cathedral and Archdeacon of the East Riding. His wide theological reading made him an influential member of the Tractarian party, and it was a great loss to the High Churchmen when in October, 1854, he became a Catholic, being received at Paris on All Saints' Day. Being now a widower for the second time, he determined to study for the priesthood on the advice of Manning, whose intimate friend and confidential adviser he had been in their Anglican days. With this view he entered the Accademia in Rome, but within a year he died, having only received minor orders. Besides the "Life of William Wilberforce", which he wrote with his brother Samuel (5 vols., London, 1838), he published several historical and theological works.

MOZLEY, Letters of J. B. Mozley (London, 1885); IDEM, Letters and Correspondence of J. H. Pusey (London, 1893-4); PURCELL, Life of Cardinal Manning (London, 1895); FOSTER, Alumni Oxonienses (Oxford, 1891); LEDGE in Dict. Nat. Biog., s.v.; GILLOW in Bibl. Eng. Cath., s.v.

EDWIN BURTON

Diocese of Wilcannia

Diocese of Wilcannia

(WILCANIENSIS).

Located in New South Wales, one of the six suffragan sees of Sydney; consists for the most part of the western portions of the older diocese of Bathurst, Armidale, and Goulburn. It is composed of nearly one-half of the State of New South Wales, its area

being 150,000 sq. miles. Its sparsely scattered population is engaged principally in pastoral pursuits, though of late years a couple of important and flourishing mining centres have sprung up. When formed, in 1887, its Catholic population was estimated at about 7000, with 8 priests, and an average attendance of 800 children in Catholic schools. The official return for 1912 shows a population of 19,000 Catholics, including 19 secular priests, and 2960 children in Catholic schools under the care of 146 religious teachers. Owing to various causes, namely, the dry climate, the form of land tenure (which favours vast areas of pastoral holdings or "Squattages"), and the uncertainty of the mining industry, the material progress of the diocese has not been such as was anticipated on its establishment. But, with increased railway facilities, scientific wheat growing, and irrigation farming along the great rivers of the western plains, the possibilities of development are very great. Within this vast area are contained mineral deposits of great value which only await the advance of settlement and population for their successful development. The chief mining districts at present are Broken Hill, in Western Corner, and Cobar, in the centre of the diocese. The silver and lead mines of Broken Hill are famous and support the largest purely mining population in Australia. Broken Hill has a population of 40,000 and is a well laid out and thoroughly equipped city. At Cabar, Cambelego, and Wymagee there are gold and copper mines of importance and well-established permanency.

The Very Rev. John Dunne, parish priest of Albury and Vicar-General of the Diocese of Goulburn, was chosen in 1887 to administer this newly formed and vast diocese. He was born in King's Co., Ireland, in 1846; educated at Carlow College; and ordained priest in 1870. After his arrival in Australia he laboured in the Diocese of Goulburn for sixteen years, and was consecrated Bishop of Wilcannia by Cardinal Moran, on 14 Aug., 1887. As there was no residence for a bishop in the town of Wilcannia, from which the diocese was named, nor means to support one, Bishop Dunne resided for a short time at Hay. Seeing, however, the prospects of the new mining city of Broken Hill, he took up his residence there in 1889, and since has administered the diocese from this centre. The city has a handsome cathedral, two convents, an orphanage, and three suburban schools and churches.

A. KILLIAN

Ven. Robert Wilcox

Ven. Robert Wilcox

English martyr, born at Chester, 1558; suffered at Canterbury, 1 October, 1588. He arrived at Reims, 12 August, 1583, and received the tonsure and minor orders, 23 September following. He was ordained sub-deacon, 16 March, deacon, 5 or 6 April,

and priest, 20 April, 1585, receiving all these orders at Reims. Sent on the mission, 7 January, 1586, he was imprisoned in the Marshalsea that same year. With him suffered two other priests, Christopher Buxton and Edward Campion, and a layman, Robert Widmerpool.

Edward Campion (*vere* Edwards) was born in 1552 at Ludlow, Shropshire, of a good family, and was educated for two years at Jesus College, Oxford, and was afterwards in the service of Gregory, tenth Lord Dacre of the South. He arrived at Reims, 22 February, 1586, where he assumed the name of Campion. He was ordained sub-deacon at Laon, 18 September, deacon at Reims, 19 December the same year, and priest at the beginning of the following Lent, being described as of the Diocese of Canterbury. Sent on the mission, 18 March, 1587, he was arrested at Sittingbourne, and imposed in Newgate and at the Marshalsea.

Robert Widmerpool was born at Widmerpool near Nottingham and was for a time tutor to the sons of Henry, ninth Earl of Northumberland. When he had the rope round his neck, he thanked God for the glory of dying in Canterbury for the cause for which St. Thomas died. All were condemned under 27 Elizabeth cap. 2.

JOHN B. WAINEWRIGHT

Johann Wild

Johann Wild

Scriptural commentator and preacher, better known by his Latin name FERUS, b. in Swabia, 1497; d. at Mainz, 8 Sept., 1554. At an early age he joined the Franciscan Order. He was educated at Cologne. His application and proficiency to study were very distinguished, and laid the foundation of that extensive acquaintance with Holy Scripture and the Fathers at which he afterwards excelled. At a chapter held in the Convent at Tubingen in 1528, he was appointed professor of rhetoric and belles-lettres, scriptor, and preacher. His sermons in the churches of Mainz soon gained a high reputation for learning and eloquence. Subsequently at a chapter celebrated in the Convent at Mainz in 1540, he was elected definitor of the province and appointed to the arduous post of *Domprediger* (preacher in the cathedral), which he continued to occupy till his death. By his unflagging zeal and energy he preserved his order and the clergy from the wiles of the Lutherans; and it was principally due to his preaching that

Mainz remained steadfast in the Catholic Faith. Not even his enemies disputed his title of being the most learned preacher in Germany in the sixteenth century. The Protestant historian, Henry Pantaleon, said of him: "His days and nights were spent in the fulfillment of his sacred functions and in study, so that he became a most learned theologian. To profound learning and rich eloquence he united great sanctity of life".

When the troops of Albert of Brandenburg, burning and pillaging as they went, entered Mainz in 1552, priests, religious, and most of the inhabitants fled from the city. Father Wild remained. His courage was greatly admired by Albert, who solicited him to give up the religious habit. "For many years", he answered, "I have worn it, it has never done me any harm, why should I now abandon it?" He was ordered to preach in the presence of Albert and his followers on the text, "Render to Caesar the things that are Caesar's", etc. At the end of his discourse he addressed his audience on the text, "Render an account of thy stewardship". The prince was so struck by his apostolic zeal and courage that he promised to grant him any request he would make. He asked that the cathedral and Franciscan buildings should be spared from all desecration and injury. His request was granted, and in recognition of this great service a statute representing Wild holding the cathedral in his hand was placed in the treasury.

His works are numerous, consisting of commentaries on nearly all the parts of the Old Testament; the Gospels of St. Matthew, St. John, the Acts of the Apostles, Epistle to the Romans, the First Epistle of St. John, sermons, orations, and ascetical. His method in explaining the Holy Scripture was to oppose to the captious quotations to the Lutherans a learned commentary drawn up from the works of the Fathers of the Church. Nearly all his works were published after his death, and had not been composed with a view to publication. With the exception of the Commentaries on Matt., John, and I John, his other works were placed on the Index with the clause *donec corrigantur*. Dominicus a Soto, O.P., extracted from the Commentary of St. John seventy-seven passages which he considered susceptible to false interpretation. He was answered by Michael Medina, O.S.F., who had been theologian with Dominicus at the Council of Trent. Sixtus Senensis, Serarius, Wadding, and many others state that the works of Wild were deliberately altered by the Lutherans to deceive the Catholics. In the Roman edition of the Commentary on St. John, the passages criticized were left out. J. Wild is mentioned as present at the chapter held at the Convent of Pforzheim on 15 April, 1554. He died the same year, and was buried in the front of the high altar in the Franciscan Church at Mainz. His principal works are commentaries on the Pentateuch, Josue, Judges, Job, Ecclesiastes, [Psalms 31](#) and 60, Esther, Esdras, Nehemias, Lamentations of Jeremias, Jonas, St. Matthew, St. John, Acts of the Apostles, Romans, I John; six vols. of sermons; examination of candidates for Sacred Orders.

SERARIO, Moguntiacorum Rerum libri quinque (Mainz, 1604); SIXTUS SENEN-SIS, Bibliotheca Sancta (Paris, 1610); WADDING-SBARALEA, Script. Ord. Min. (Rome, 1806); IDEM, Annal. Ord. Min., XIX (Rome, 1745); JOHN A S. ANTONIO, Bibliotheca Univ. Franciscana (Madrid, 1732); PANTALEON, L'hommes illustres d'Allemagne; NICERON, Memoires pour servir a l'Historie des hommes illustres (Paris, 1729); MARCELLINO DA CIVEZZA, Storia della Missioni Francescane, VII (Prato, 1883), I; GLASSBERGER, Chronica (Quaracchi, 1887); PAULUS, Joh. Wild, ein Mainzer Domprediger des 16. Jahrhunderts (Cologne, 1893).

GREGORY CLEARY

St. Wilfrid

St. Wilfrid

Bishop of York, son of a Northumbrian thegn, born in 634; died at Oundle in Northamptonshire, 709. He was unhappy at home, through the unkindness of a step-mother, and in his fourteenth year he was sent away to the Court of King Oswy, King of Northumbria. Here he attracted the attention of Queen Eanfleda and by her, at his own request, he was sent to the Monastery of Lindisfarne. After three years spent here he was sent for, again through the kindness of the queen, to Rome, in the company of St. Benedict Biscop. At Rome he was the pupil of Boniface, the pope's archdeacon. On his way home he stayed for three years at Lyons, where he received the tonsure from Annemundas, the bishop of that place. Annemundas wanted him to remain at Lyons altogether, and marry his niece and become his heir, but Wilfrid was determined that he would be a priest. Soon after persecution arose at Lyons, and Annemundas perished in it. The same fate nearly came to Wilfrid, but when it was shown that he was a Saxon he was allowed to depart, and came back to England. In England he received the newly founded monastery at Ripon as the gift of Alchfrid, Oswy's son and heir, and here he established the full Benedictine Rule. The Columbite monks, who had been settled previously at Ripon, withdrew to the North. It was not until he had been for five years Abbot of Ripon, that Wilfrid became a priest. His main work at Ripon was the introduction of Roman rules and the putting forward of a Roman practice with regard to the point at issue between the Holy See and the Scottish monks in Northumbria; to settle these questions the synod of Whitby was held in 664. Chiefly owing to Wilfrid's advocacy of the claims of the Holy See the votes of the majority were given to that side, and Colman and his monks, bitterly disappointed, withdrew from Northumbria. Wilfrid, in consequence of the favours he had then obtained, was elected bishop in Colman's place, and, refusing to receive consecration from the northern bishops, whom he regarded as schismatics, went over to France to be consecrated at Compiègne.

He delayed some time in France, whether by his own fault or not is not quite clear, and on his return in 666 was driven from his course by a storm and shipwrecked on the coast of Sussex, where the heathen inhabitants repelled him and almost killed him. He succeeded in landing, however, in Kent not far from Sandwich. Thence he made his way to Northumbria, only to find that, owing to his long absence, his see had been filled up, and that a St. Chad was bishop in his place. He retired to his old monastery at Ripon, and from thence went southwards and worked in Mercia, especially at Lichfield, and also in Kent.

In 669 Archbishop Theodore of Canterbury visited Northumbria, where he found Chad working as bishop. He pointed out to him the defects of his position and, at his instigation, St. Chad withdrew and Wilfrid once more became Bishop of York. During his tenure of the see, he acted with great vigour and energy, completing the work of enforcing the Roman obedience against the Scottish monks. He founded a great many monasteries of the Benedictine Order, especially at Henlam and at Ripon, and completely rebuilt the minster at York. In all that he did he acted with great magnificence, although his own life was always simple and restrained.

So long as Oswy lived all went well, but with Ecgfrid, Oswy's son and successor, Wilfrid was very unpopular, because of his action in connection with Ecgfrid's bride Etheldrida, who by Wilfrid's advice would not live with her husband but retired into a monastery. It was just at this juncture that Theodore, possibly exceeding his powers as Archbishop of Canterbury, proceeded to subdivide the great diocese over which Wilfrid ruled, and to make suffragan bishops of Lindisfarne, Hexham, and Witherne. Wilfrid, whether or not he approved of the principle of subdivision, refused to allow Theodore's right to make it, and appealed to the central authority at Rome, whither he at once went. Theodore replied by consecrating three bishops in Wilfrid's own church at York and dividing his whole bishopric between them.

An attempt was made by his enemies to prevent Wilfrid from reaching Rome, but by a singular coincidence Winfrid, Bishop of Lichfield, happened to be going to Rome at the same time, and the singularity of the name led to his being stopped while Wilfrid got through safely. At Rome a council was called by Pope Agatho to decide the case, and Wilfrid appeared before it in person, while Theodore was represented. The case was decided in Wilfrid's favour, and the intruding bishops were removed. Wilfrid was to return to York, and since subdivision of his diocese was needed, he was to appoint others as his coadjutors. He came back to Northumbria with this decision, but the king, though not disputing the right of Rome to settle the question, said that Wilfrid had brought the decision and put him in prison at Bambrough. After a time this imprisonment was converted to exile, and he was driven from the kingdom of

Northumbria. He went south to Sussex where the heathen inhabitants had so inhospitably received him fifteen years before, and preached as a missionary at Selsey.

In 686 a reconciliation took place between Theodore and Wilfrid, who had then been working in Sussex for five years. Through Theodore's good offices Wilfrid was received back in Northumbria, where Aldfrid was now king. He became Bishop of Hexham at once, and before long, when York again fell vacant, he took possession there once more. For some years all went well, but at the end of that time great difficulties arose with the king because Wilfrid utterly refused to recognize what had been done by Theodore but annulled by Rome in the matter of the subdivision of his diocese, and he once more left York and appealed to Rome. He reached Rome for the third and last time in 704.

The proceedings at Rome were very lengthy, but after some months Wilfrid was again victorious. Archbishop Brihtwald was to hold a synod and see justice done. Wilfrid started again for England but on his way was taken ill at Meaux and nearly died. He recovered, however, and came back to England, where he was reconciled to Brihtwald. A synod was held, and it was decided to give back to Wilfrid, Hexham and Ripon, but not York, a settlement which, though unsatisfactory, he decided to accept, as the principle of Roman authority had been vindicated.

Beyond all others of his time, St. Wilfrid stands out as the great defender of the rights of the Holy See. For that principle he fought all through his life, first against Colman and the Scottish monks from Iona, and then against Theodore and his successor in the See of Canterbury; and much of his life was spent in exile for this reason. But to him above all others is due the establishment of the authority of the Roman See in England, and for that reason he will always have a very high place among English saints.

Eddius, the biographer of St. Wilfrid, was brought by that saint from Canterbury when he returned to York in 669. His special work was to be in connection with the music of the church of York, and he was to teach the Roman method of chant. He was an inmate of the monastery of Ripon in 709, when St. Wilfrid spent his last days there, and he undertook the work of writing the life of the saint at the request of Acca, St. Wilfrid's successor in the See of Hexham. The best edition of the work is in Raines, "Historians of the Church of York" (Rolls Series).

ARTHUR S. BARNES

Wilgefortis

Wilgefortis

A fabulous female saint known also as UNCUMBER, KUMMERNIS, KOMINA, COMERA, CUMERANA, HULFE, ONTCOMMENE, ONTCOMMER, DIGNEFORTIS, EUTROPIA, REGINFLEDIS, LIVRADE, LIBERATA, etc.

The legend makes her a Christian daughter of a pagan King of Portugal. In order to keep her vow of chastity, she prayed God to disfigure her body, that she might evade the command of her father to marry a pagan prince. God caused a beard to grow on her chin, whereupon her father had her crucified. Connected with this legend is the story of a destitute fiddler to whom, when he played before her image (or before her crucified body), she gave one of her golden boots. Being condemned to death for the theft of the boot, he was granted his request to play before her a second time, and, in presence of all, she kicked off her other boot, thus establishing his innocence.

The legend is not a Christian adaptation of the Hermaphroditus of Greek mythology or of other androgynous myths of pagan antiquity, as it cannot be traced back further than the fifteenth century. It rather originated from a misinterpretation of the famous "Volto Santo" of Lucca, a representation of the crucified Saviour, clothed in a long tunic, His eyes wide open, His long hair falling over His shoulders, and His head covered with a crown. This crucifix, popularly believed to be the work of Nicodemus, is preserved in the Basilica of Lucca and highly venerated by the people. In the early Middle Ages it was common to represent Christ on the cross clothed in a long tunic, and wearing a royal crown; but since the eleventh century this practice has been discontinued. Thus it happened that copies of the "Volto Santo" of Lucca, spread by pilgrims and merchants in various parts of Europe, were no longer recognized as representations of the crucified Saviour, but came to be looked upon as pictures of a woman who had suffered martyrdom.

The name Wilgefortis is usually derived from *Virgo fortis*, but recently Schnürer has shown that Wilgefortis is probably a corruption of *Hilge Vartz* (*Vartz, Fratz*, face), "Holy Face". This would corroborate the opinion that the legend originated in the "Volto Santo". The old English name *Uncumber*, as also the German *Oncommer* and their equivalents in other languages, rose from the popular belief that every one who invokes the saint in the hour of death will die *ohne Kummer*, without anxiety. When the cult of St. Wilgefortis began to spread in the fifteenth and sixteenth centuries, her name found its way into various breviaries and martyrologies. Thus a breviary, printed at Paris for the Diocese of Salisbury in 1533, has a beautiful metric antiphon and prayer in her honour. Her feast is celebrated on 20 July. She is usually represented

nailed to a cross: as a girl of ten or twelve years, frequently with a beard, or as throwing her golden boot to a musician playing before her, sometimes also with one foot bare.

MICHAEL OTT

Wilhelm V, Duke of Bavaria

Wilhelm V, Duke of Bavaria

Son of Duke Albrecht V. Born at Munich, 29 September, 1548; died at Schlessheim, 7 February, 1626. He studied in 1563 at the University of Ingolstadt, but left on account of an outbreak of the pest. Nevertheless, he continued his studies elsewhere until 1568, and retained throughout life a keen interest in learning and art. In 1579 he became the reigning duke. He made a reputation by his strong religious opinions and devotion to the Faith, and was called "the Pious". His life was under the direction of the Jesuits. He attended Mass every day, when possible several times a day, devoted four hours daily to prayer, one to contemplation, and all his spare time to devotional reading. He received the sacraments weekly, and twice a week in the Advent season and during Lent. Whenever possible he took part in public devotions, processions, and the pilgrimages; thus in 1585 he went on a pilgrimage to Loreto and Rome. His court was jestingly called a monastery, and his capital the German Rome. He founded several Jesuit monasteries, in particular that of St. Michael at Munich, and contributed to the missions in China and Japan. He did everything possible in Bavaria and the German Empire to further the Catholic Counter-Reformation, and laboured to prevent the spread of Protestantism. Thus it was largely through his efforts that the Archbishopric of Cologne did not become Protestant, due mainly to the vigorous support he gave his brother Ernst, who had been elected archbishop against Gebhard Truchsess. On the other hand, the manner in which he bestowed benefices upon members of his family makes an unpleasant impression at the present day, though, at that time, this was not considered so unseemly. In the end his brother Ernest had, besides other benefices, five dioceses, and Wilhelm's son Ferdinand was bishop of an equal number; another son intended for the clerical life, Philip, was made Bishop of Ratisbon in 1595 and cardinal in 1596, but died in 1598. Wilhelm had his eldest son Maximilian educated with much care, and in 1597 he resigned the government to Maximilian and led a retired life, devoted to works of piety, asceticism, and charity, and also to the placid enjoyment of his collections of works of art and curiosities.

SCHREIBER, Gesch. des bayrischen Herzogs Wilhelm V. (Munich, 1860); JANSSEN, Gesch. des deutschen Volkes, IV, V, passim; RIEZLER, Gesch. Bayerns, IV (Gotha, 1899), 625-80.

KLEMENS LÖFFLER

Wilhelm of Herle

Wilhelm of Herle

Painter, born at Herle in Dutch Limburg at an unknown date in the fourteenth century; time and place of death unknown. According to the statements of deeds of that period he was active at Cologne from 1358 for some fifteen or twenty years. In 1370 he was paid for paintings that he had made for the *liber juramentorum* of the city. Also remains of frescoes from the town hall that are now preserved in the Walraf-Richartz Museum can certainly be traced to him. It is generally supposed that a painter, Wilhelm of Cologne, mentioned in the "Limburger Chronicle" as "the best painter in German lands" is Wilhelm of Herle, and it has been customary to attribute to him some of the best work in painting of early Cologne, although there is no absolute proof in any one case. His pupil and assistant was Wynrich of Wesel, and Firmenich-Richartz, in particular, has ascribed to Wynrich pictures attributed to Wilhelm, although Aldenhoven and others have protested against this ascription. It is difficult to distinguish the work of Wilhelm from that of the school he founded. The most important paintings about which there is question are the "Madonna with the Bean-Blossom" and its variant the "Madonna with the Pea-Blossom" and the accompanying pictures on the wing-panels of St. Catherine and St. Elizabeth (Cologne and Nuremberg). Other paintings are the "Christ on the Cross" surrounded by a large number of saints (Cologne), and "St. Veronica" (Munich). Among the works of this school is also included the altar of St. Clare in the cathedral of Cologne, in which the Sacrifice of the Mass in the centre is surrounded by twelve scenes from the youth and Passion of Christ.

G. GIETMANN

Cistercian Abbey of Wilhering

Cistercian Abbey of Wilhering

(HILARIA).

Situated on the right bank of the Danube, in the Diocese of Linz, Austria. Ulric of Willeheringen gave his castle for a monastery of regular canons; but as these did not fulfil the conditions required, he removed them and established the Cistercians (1146). Under its first abbot, Geraldus, of the abbey of Runa in Styria, the monastery was richly endowed and placed under the protection of Eberhard, Bishop of Bamberg. After Ulric's death, his brother, Colo, completed the work so well begun. Despite all this, the foundation did not flourish and Henry, the third abbot, having but two subjects,

transferred the abbey to Burkhard, Abbot of Ebrach (1185); hence Wilhering came to be known as its filiation. In the same year Burkhard sent Henry back to Wilhering, accompanied by twelve of his monks; and from this time the abbey prospered. Duke Leopold VI took it under his protection; monastic buildings replaced the old castle, donations enriched them, and many exemptions and privileges were granted by ecclesiastical and secular authorities, especially by Innocent III, Honorius III, and Emperor Frederick II. Three foundations were made, Hohenfurth in Bohemia, Engelszell and Sausenstein in Austria.

This state continued until the revolt of Luther and the many wars of those times causes severe losses both in subjects and income. When the first imperial abbot was appointed (1568) there were but three monks and two novices in the community. In 1587, however, Alexander was nominated abbot, and he inaugurated reform in regular observance and temporal administration and regained possession of much of the monastery's former property; he also reconstructed the monastic buildings. At the end of his rule there were twenty priests, four clerics, and one brother in the community (1641). In 1733 the monastery was destroyed by fire, but was immediately rebuilt under Abbot Bonus Pomerl. It escaped being secularized during the period of Josephinism, though it had much to suffer during the persecution. After these troubles and the Napoleonic wars it prospered, and the buildings, as they stand today, were completed; the church is particularly beautiful. The present and sixty-sixth abbot, Right Rev. Theobald Grasböck, was elected in 1892; this community numbers thirty-nine priests and several clerics. The monks have care of thirty-two parishes besides other positions of importance.

EDMUND M. OBRECHT

Will

Will

(Latin *voluntas*, Gr. *boulesis*, "willing" Ger. *Wille*, Fr. *volonté*).

This article treats of will in its psychological aspect.

- Will and Knowledge
- Will and Feeling
- Education of Will
- Will and Movement
- Experimental Will-Pyschology

The term will as used in Catholic philosophy, may be briefly defined as the faculty of choice; it is classified among the appetites, and is contrasted with those which belong either to the merely sensitive or to the vegetative order: it is thus commonly designated "the rational appetite"; it stands in an authoritative relation to the complex of lower appetites, over which it exercises a preferential control; its specific act, therefore, when it is in full exercise, consists in selecting, by the light of reason, its object from among the various particular, conflicting aims of all the tendencies and faculties of our nature: its object is the good in general (*bonum in communi*); its prerogative is freedom in choosing among different forms of good. As employed in modern philosophy, the term has often a much wider signification. It is frequently used in a loose, generic sense as coextensive with appetite, and in such a way as to include any vital principle of movement *ab intra*, even those which are irrational and instinctive. Thus Bain makes appetency a species of volition, instead of vice-versa. We cannot but think this an abuse of terms. In any case--whatever opinion one holds on the free will controversy--some specific designation is certainly required for that controlling and sovereign faculty in man, which every sane philosophy recognizes as unmistakably distinct from the purely physical impulses and strivings, and from the sensuous desires and conations which are the expressions of our lower nature's needs. And custom has consecrated the term will to this more honourable use.

Will and Knowledge

The description of will, as understood in Catholic philosophy, given above, refers to the will in its fullest and most explicit exercise, the *voluntas deliberata* or *voluntas ut voluntas*, as Saint Thomas speaks. There are, however, many manifestations of will that are less complete than this. Formal choice, preceded by methodical deliberation, is not the only or the most frequent type of volition. Most of our ordinary volition takes the form of spontaneous and immediate reaction upon very simple data. We have to deal with some narrow, concrete situation; we aim at some end apprehended almost without reflection and achieved almost at a stroke; in such a case, will expresses

itself along the lines of least resistance through the subordinate agencies of instinctive action, habit, or rule of thumb. Will, like the cognitive powers, originates in and is developed by experience. This is expressed in the well-known Scholastic axiom, "*Nil volitum nisi præcognitum*" (Nothing can be willed which is not foreknown), taken in conjunction with the other great generalization that all knowledge takes its rise in experience: "*Nil in intellectu quod non prius fuerit in sensu*". All appetition, according to this theory, emerges out of some conscious state, which may be anything from a clear and distinct perception or representation of an object, to a mere vague feeling of want or discomfort, without any direct representation either of the object or the means of satisfaction. The Aristotelean philosophers did not neglect or ignore the significance of this latter kind of consciousness (sometimes called affective). It is true that here, as in dealing with the psychology of other faculties, the Schoolmen did not attempt a genetic account of the will, nor would they admit continuity between the rational will and the lower appetitive states; but in their theory of the passions, they had worked out a very fair classification of the main phenomena--a classification which has not been substantially improved upon by any modern writer; and they showed their appreciation of the close connection between will and emotions by treating both under the general head of appetition. It is still a debatable question whether modern psychology, since Kant, has not unnecessarily complicated the question by introducing the triple division of functions into knowledge, appetites and feeling, in place of the ancient bipartite division into knowledge and appetite.

The doctrine that will arises out of knowledge must not be pressed to mean that will is simply conditioned by knowledge, without in turn conditioning knowledge. The relation is not one-sided. "The mental functions interact, i.e. act reciprocally one upon another" (Sully) or, as Saint Thomas expresses it: "*Voluntas et intellectus mutuo se includunt*" (*Summa theol.*, I, Q. xvi, a. 4 ad 1). Thus, an act of will is the usual condition of attention and of all sustained application of the cognitive faculties. This is recognized in common language. Again the Schoolmen were fond of describing the will as essentially a blind faculty. This means simply that its function is practice, not speculation, doing, not thinking (*versatur circa operabilia*). But on the other hand they admitted that it was an integral part of reason--according to the Scotists indeed, the superior and nobler part, as being the supreme controller and mover ("*Voluntas est motor in toto regno animæ*", Scotus). It is also represented as ruling and exercising command (*imperium*) over the lower faculties. St. Thomas, however, with his usual preference for the cognitive function, puts the *imperium* in the reason rather than the will (*imperium rationis*). Hence arose disputes between the Thomists and other schools, as to whether in the last resort the will was necessarily determined by the practical judgment of the reason. The point, so hotly debated in the medieval schools, concerning

the relative dignity of the two faculties, will and intellect, is perhaps insoluble; at all events it is not vital. The two interact so closely as to be almost inseparable. Hence Spinoza could say with some plausibility: "Voluntas et intellectus unum et idem sunt".

Will and Feeling

An act of will is generally conditioned not only by knowledge, but also by some mode of affective consciousness or feeling. The will is attracted by pleasure. The capital error of the Hedonist school was the doctrine that the will is attracted only by pleasure, that, in the words of Mill, "to find a thing pleasant and to will it are one and the same". This is not true. The object of the will is the good apprehended as such. This is wider than the pleasant. Moreover, the primary tendency of appetency or desire is often towards some object or activity quite distinct from pleasure. Thus in the exercise of the chase, or intellectual research, or the performance of acts of benevolence, the primary object of the will is the accomplishment of a certain positive result, the capture of the game, the solution of the problem, the relief of another's pain, or the like. This may probably awaken pleasant feeling as a consequence. But this pleasure is not the object aimed at, nay the "Hedonistic paradox", as it is styled, consists in this, that if this consequential pleasure be made the direct object of pursuit, it will thereby be destroyed. Thus, an altruistic act done for the sake of the pleasure it brings to the agent is no longer altruism or productive of the pleasure of altruism.

Indeed, the objects of many of the passions which most powerfully impel the will, are ordinarily not pleasures, though they may include relief from pain. Emotions or feelings associated with certain ideas tend to express themselves in action. They may dominate the field of consciousness to the exclusion of every other idea. Thus, the sight or the thought of extreme suffering may carry with it emotions of pity so intense that considerations of justice and prudence will be brushed aside in the effort to bring relief. Such action is impulsive. An impulse is essentially the forcible prompting of a single, strongly affective idea. The will is, in this case, as it were, borne down by feeling, and action is simply the "release" of an emotional strain, being scarcely more truly volitional than laughter or weeping. Bain's description of voluntary action as "feeling-prompted movement", therefore, destroys the essential distinction between voluntary and impulsive action. The same criticism applies to Wundt's analysis of the volitional process. According to him, "impulsive action" is "the starting-point for the development of all volitional acts", from which starting-point volitional acts, properly so called, emerge as the result of the increasing complication of impulses; when this complication takes the form of a conflict, there ensues a process called selection or choice, which determines the victory in one direction or another. From this it is clear that choice is simply a sort of circuitous impulse. "The difference between a voluntary activity (i.e. a complex impulse) and a choice activity is a vanishing quantity." Compare with this

the dictum of Hobbes: "I conceive that in all deliberations, that is to say, in all alternate succession of contrary appetites, the last is that which we call the Will".

The essential weakness of both these accounts and of many others lies in the attempt to reduce choice or deliberation (the specific activity of will, and a patently rational process) to a merely mechanical or biological equation. Catholic philosophy, on the contrary, maintains, on the certain evidence of introspection, that choice is not merely a resultant of impulses, but a superadded formative energy, embodying a rational judgment; it is more than an epitome, or summing-up, of preceding phenomena; it is a criticism of them (see FREE WILL). This aspect the phenomenist psychology of the modern school fails to explain. Though we reject all attempts to identify will with feeling, yet we readily admit the close alliance that exists between these functions. St. Thomas teaches that will acts on the organism only through the medium of feeling, just as in cognition, the rational faculty acts upon the material of experience. ("Sicut in nobis ratio universalis movet, mediante ratione particulari, ita appetites intellectivus qui dicitur voluntas, movet in nobis mediante appetitu sensitivo, unde proximum motivum corporis in nobis est appetitus sensitivus", Summa theol., I, Q. xx, ad 1.) Just as the most abstract intellectual idea has always its "outer clothing" of sense-imagery so volition, itself a spiritual act, is always embodied in a mass of feeling: on such embodiment depends its motive-value. Thus if we analyze an act of self-control we shall find that it consists in the "checking" or "policing" of one tendency by another, and in the act of selective attention by which an idea or ideal is made dynamic, becomes an *idée-force*, and triumphs over its neglected rivals. Hence control of attention is the vital point in the education of the will, for will is simply reason in act, or as Kant put it, the causality of reason, and by acquiring this power of control, reason itself is strengthened.

Motives are the product of selective attention. But selective attention is itself a voluntary act, requiring a motive, an effective stimulus of some kind. Where is this stimulus to come from in the first instance? If we say it is given by selective attention, the question recurs. If we say it is the spontaneous necessary force of an idea, we are landed in determinism, and choice becomes, what we have above denied it to be, merely a slow and circuitous form of impulsive action. The answer to this difficulty would be briefly as follows:

(1) Every practical idea is itself a tendency to the act represented; in fact, it is a beginning or rehearsal of the said act, and, if not inhibited by other tendencies or ideas, would in fact pass into execution at once. Attention to such an idea affords reinforcement to its tendency.

(2) Such reinforcement is given spontaneously to any tendency which is naturally interesting.

(3) The law of interest, the uniform principles governing the influence of the feelings upon the will in its earlier stages, these are an enigma which only an exhaustive knowledge of the physiology of the nervous system, of heredity, and possibly of many other as yet unsuspected factors, could enable us to solve. Leibniz applied his doctrine of *petites perceptions* to its solution, and certainly unconscious elements, whether inherited or stored up from personal experience, have much to do with our actual volitions, and lie at the very bottom of character and temperament; but as yet there is no science, nor even prospect of a science, of these things.

(4) As regards the determinist horn of the dilemma proposed above, the positive truth of human liberty drawn from introspection is too strong to be shaken by any obscurity in the process through which liberty is realized. The facts of consciousness and the postulates of morality are inexplicable on any other than the libertarian hypothesis (see CHARACTER and FREE WILL). Freedom is a necessary consequence of the universal capacity of reason. The power of conceiving and critically contemplating different values or ideals of desirableness, implies that detachment of will in selection (*indifferentia activa*), in which, essentially, freedom consists.

Education of Will

As we have said, control of attention is the vital point in the education of will. In the beginning, the child is entirely the creature of impulse. It is completely engrossed for the time by each successive impression. It exhibits plenty of spontaneity and random action but the direction of these is determined by the liveliest attraction of the moment. As experience extends, rival tendencies and conflicting motives come more and more into play, and the reflective power of the rational faculty begins to waken into existence. The recollection of the results of past experience rises up to check present impulses. As reason develops, the faculty of reflective comparison grows in clearness and strength, and instead of there being a mere struggle between two or more motives or impulses, there gradually emerges a judicial power of valuing or weighing those motives, with the ability of detaining one or other for a longer or shorter period, in the focus of intellectual consciousness. Here we have the beginning of selective attention. Each exertion of reflection strengthens voluntary, as distinguished from merely spontaneous, attention. The child becomes more and more able to attend to the abstract or intellectual representation, in preference to urgent present feeling which seeks to express itself in immediate action. This is furthered by human intercourse, injunctions from parents and others in regard to conduct, and the like. The power of resistance to impulse grows. Each passing inclination, inhibited for the sake of a more durable good or more abstract motive, involves an increase in the power of self-control. The child becomes able to withstand temptation in obedience to precepts or in accordance with general principles.

The power of steady adhesion to fixed purposes grows and, by repeated voluntary acts, habits are formed which in the aggregate constitute formed character.

Will and Movement

The structure of the nervous system of man, it has been well said, prepares us for action. Long before the will, properly so called, comes upon the scene, a whole marvellous vital mechanism has been at work; thus it happens that we find ourselves at the very outset of our rational life possessed of a thousand tendencies, preferences, dexterities--the product partly of inheritance and partly of our infantile experience working by the laws of association and habit. The question, therefore, as to how this early organization and co-ordination of movement take place, though an essential preliminary to the study of will, is nevertheless only a preliminary, and not a constituent, branch of that study. Hence we can deal with it here only briefly. Bain's theory is perhaps the best known--the theory of random or spontaneous movement. According to this account, the nervous system is in its nature an accumulator of energy, which energy under certain obscure organic conditions breaks out in tumultuous, purposeless fashion, without any sensible stimulation either from without or from within. The result of such outpourings of energy is sometimes pleasurable, sometimes the reverse. Nature, by the law of conservation, preserves those movements which produce pleasure while she inhibits other movements. Thus "nature" really works purposively, for these pleasant movements are also for the most part beneficial to the animal. The process is very much the same as "natural selection" in the biological field. As regards this theory we may briefly note as follows:

- (1) It is true, as modern child-psychology shows, that movements are learnt in some way. The child has to learn even the outlines of its own body.
- (2) There is a good deal of apparently purposeless movement in children and all young animals, which, no doubt, constitutes their "motor-education".
- (3) At the same time, it is not so clear that these movements are simply a physical discharge of energy, unattended by conscious antecedents. Some vague feeling of discomfort, of pent-up powers, some appetition or conscious tendency to movement in short, may very well be supposed. There would thus be the germ of a purpose in the creature's first essays at realizing the tendency and satisfying a felt need.

Experimental Will-Psychology

One of the least promising departments of mental life for the experimental psychologist is will. In common with all the higher activities of the soul, the subjection of the phenomena of rational volition to the methods of experimental psychology presents serious difficulties. In addition, the characteristic prerogative of the human will--freedom--would seem to be necessarily recalcitrant against scientific law and measure-

ment, and thus to render hopelessly inapplicable the machinery of the new branch of mental research. However, the problem has been courageously attacked by the Würzburg and Louvain Schools. Different properties of choice, the formation and operation of various kinds of motives, the process of judging values, the transition from volition to habit or spontaneous action, the reaction-time of acts of decision and their realization and other incidental will-phenomena have been made the subject of the most careful investigation and, where possible, calculation.

By the multiplication of experimental choices, and the taking of averages, results of an objective character have been, it is contended, secured. The psychological value of these researches, and the quantity of new light they are likely to shed on all the more important questions connected with the human will, is still a subject of controversy; but the patience skill, and ingenuity, with which these experiments and observations have been carried out, are indisputable.

MICHAEL MAHER JOSEPH BOLLAND

Adrian Willaert

Adrian Willaert

Composer and founder of the Venetian school, b. at Bruges, or, according to other authorities, at Roulers, Netherlands, between 1480 and 1490; d. at Venice, 7 December 1562. Willaert, taught in Paris by Jean Moulin, disciple of Josquin Deprés, first went to Rome in 1516, then to Ferrara, after which he entered the service of King Louis II of Bohemia and Hungary. On 12 Dec., 1527, he accepted the post of choir master of St. Mark's at Venice. Although grounded in the principles of contrapuntal art, Willaert soon fell under the influence of the new tendency, developing in Florence and elsewhere in Italy, to make the harmonic element predominate over the melodic. As there were two choir lofts, one of each side of the main altar of St. Mark's, both provided with an organ, Willaert divided the choral body into two sections, using them either antiphonally or simultaneously. He then composed and performed psalms and other works for two alternating choirs. This innovation met with instantaneous success and strongly influenced the development of the new method. Willaert was no less distinguished as a teacher than as a composer. Among his disciples are: Ciprian de Rore, his successor at St. Mark's; Costanzo Porta; Francesco della Viola; Giuseppe Zarlino; and the two Gabrielis, Andrea and Giovanni. These formed the Venetian school. Willaert left a large number of compositions -- masses, psalms, motets, madrigals, for from four to seven voices -- preserved in collections dating from his time.

JOSEPH OTTEN

Will and Testament of Clerics

Will and Testament of Clerics

Roman law allowed clerics to dispose of their property by will or otherwise. Bishops, however, were incapable of bequeathing goods acquired in the episcopate, these going to pious purposes in the diocese of the deceased. Goods possessed by bishops before entering the episcopate, as well as the property of all clerics dying intestate, passed on to their lawful heirs, or, when these were wanting, to the churches to which the decedents were attached (Cod. Just., lib. I, titt. iii, xli, sections 5,6; Novel., cxxiii, 19; cxxxii 13). Clerics succeeded to the property of intestates in the same manner as laymen [Cod., lib. I, titt. iii, liv (lxvi), sect. 6], and their ecclesiastical earnings were not brought into computation (Cod., lib. I, tit. xxxiii). The same law applied to regulars also (Cod., lib. I, tit. liv, sect. 7), but this was afterwards altered, the community succeeding to the rights of regulars (Novel., v, 5; xcciii, 38). While it is not easy in the mass of legislation of the first eight centuries to determine just what is of ecclesiastical origin, we may conclude that ancient canons forbade the inferior clergy as well as bishops to bequeath property that they had acquired through the church. Early ecclesiastical law gave to bishops the right of ownership and the disposition of property by will, while it was not licit for the clergy of lower grades to own anything, all goods being possessed in common. Property, too, of bishops acquired in the episcopate with funds accruing from the church reverted at death to the diocese [cf. Canon, Apostolorum, nn. 39 (40), 75; Gratian., P. II, Cau. XII, q. 1]. Inventories of private ecclesiastical goods possessed by bishops were prescribed, and the later were not to be bequeathed with the former (Counc. Antioch, A.D. 341, xxiv-v; Counc. Epaon, A.D. 517, xvii).

Private ownership by the clergy of property acquired through family or other sources not ecclesiastical was later acknowledged (III Counc. Carthage, A.D. 397; Gratian., l.x., q. 3). Bishops and clerics of lower degree were forbidden to leave legacies to those outside the Church, even though relatives (Counc. Carthage, xiii), while bishops were anathematized if they named pagan or heretical heirs, or, if dying intestate, their property devolved on such (Codex Eccl. Afric., lxxxi). The Church, when not constituted heir by bishops, was indemnified under certain conditions in France (Coun. Agde, A.D. 506, xxxiii) and in Spain (I Coun. Seville, A.D. 590, i). According to the Councils of Agde (vi) and Rheims (A.D. 625, xx) property bequeathed to a cleric was considered as given to his church. Canons, particularly of the sixth century, directing bishops to

make the Church their heir, affected likewise succession by intestacy (*Agde*, xxxiii). This restriction applied to bishops only: attempts were frequently made to exclude also heirs of the lower clergy. Legislation was enacted against this abuse (*Coun. Paris*, A.D. 615, vii). The contrary practice by which heirs of intestate bishops appropriated church property had to be guarded against, especially in Spain [*Counc. Terragona*, A.D. 516, xii; *Counc. Lerida*, A.D. 546 (?), cap. ult.]. While in Roman law heirs of the clergy succeeded in case of intestacy, care was exercised by the Church that this should be in regard to private property only (*Counc. Antioch*, l.c.; *Chalcedon*, A.D. 451, xxii).

When ecclesiastical benefices were established their income was intended to furnish incumbents proper support: the residue, if any, clerics were encouraged to give in charity while living, and they were forbidden to bequeath it even to pious institutions. The Third Lateran Council in 1179 enacted (*Decr. III*, 26, vii) that this residue (see *JUS SPOLII*) be returned to the church or churches (proportionately) whence it came. The purpose of this legislation was to prevent among the clergy the insidious vice of avarice, to restrain those who would amass wealth for the enriching of relatives, and likewise to enforce the ancient canons, viz. that such property be employed for religious or charitable ends. Alexander III, then reigning, did not disapprove, however of (*Decr. 1. c.*, cap. 12) the custom of clerics bequeathing this surplus for charitable works, with a moderate sum to servants in appreciation for services rendered, though this was not in accordance with the canons. It was decreed towards the end of the fourteenth century (*Thomassin, Vet. et Nov. Eccl. Disciplina*, P.III, 1. 3, lvii, *De Spolis Cleric.*) that these goods or spoils be reserved to the Camera Apostolica or Papal Treasury to be applied to the needs of the universal Church. Paul III (*Romani Pontifices*, a. 1542) insisted on the force of this enactment and admonished those concerned to collect the spoils. Pius IV (*Decens esse*, a. 1560) decreed that all the possessions of clerics of which they could not lawfully dispose be reserved at death to the Papal Treasury: this law was confirmed by Benedict XIV (*Apostolicae servitutis*, a. 1741). Various decrees determine in detail what is embraced in the spoils of clerics. Pius VII transferred these spoils to the Congregation of the Propaganda for the support of the missions. There are, however, many exemptions from the law of spoils, and Rome was always ready, were it necessary, to renounce her title to these goods in favour of the deceased prelate's own church. Special legislation was enacted at times and agreements entered into with civil governments in regard to the estates of clerics. Gradually in the thirteenth and fourteenth centuries it became customary, and a special privilege was often granted by Rome to this effect, for clerics to bequeath their possessions, ecclesiastical authorities acquiescing to avoid numerous suits and litigations, and because too of the difficulty in individual cases of deciding just what constitutes the residue of the ecclesiastical income in question, since during life the surplus may have been given in charity. Many canonists admit (cf.

Bened. XIV, "De Syn.", L. VII, c. ii) that clerics really own or have dominion over this surplus, and hence there is no obligation in justice on the part of legatees of restoring these goods. Nevertheless, the law has not been abrogated, but merely modified by the Council of Trent (Sess. XXV, can. i, De ref.), prohibiting the use of these goods for profane purposes. Consequently by reason of ecclesiastical precept, as well as owing to an obligation in charity, clerics are bound not to bequeath to relatives or others for their own use the income of ecclesiastical benefices. Goods accruing to a cleric from other sources, e.g. from family, literary pursuits, the exercise of fine arts, etc., or even the income of his benefice saved by frugality, may be disposed of without hindrance in life or at death. On account of changed conditions and civil legislation clerics are wont to bequeath all their possessions indiscriminately without regard to the mode of acquisition. These bequests are valid in the external forum, though in conscience the testators may be responsible for the loss suffered by charitable works. In civil law in most countries the status of a cleric differs in no way from that of a layman, and legal heirs enter in when a cleric dies intestate.

It is prescribed that bishops leave to their cathedral sacred utensils purchased with funds received from the diocese. Bishops are admonished (III Plen. Counc. Balt., n. 269) to provide by testament or other legal document for due succession in church property, and to determine what disposition after death is to be made of their personal belongings. Priests too (loc. cit., n. 277) are exhorted to make their will in due season, being mindful in their legacies of the needs of religion and charity. Cardinals when created receive in a brief (De benignitate Sedis Apos.) the right to make a testament. This brief, notwithstanding a previous prohibition of Urban VIII, allows cardinals to bequeath sacred vessels, vestments, and the like, to churches, chapels, pious institutions etc., especially to their own churches or titulars. If they do not avail themselves of this right, the articles in question belong to the papal chapel. This six cardinal bishops and abbots nullius must bequeath such articles to the pope's chapel (Pius IX, "Quum illud", 1 June, 1847). Regulars, whether superiors or subjects, do not enjoy the faculty of making a will, since owing to a vow of obedience they are not their own masters, and secondly because of their vow of poverty they are incapable of ownership (Can. vii, Can. 19, q. 3). What they acquire belongs to their monastery. They may explain or interpret a will made before their profession. A member of the regular clergy who becomes a bishop acquires property for his diocese, not for his community; but even his is incapable of making a will without the permission of the Holy See, since episcopal consecration does not release him from his religious vows. Goods possessed by regulars, who with permission live outside their monastery, belong to the community; the property of those who dwell in the world without permission and of those who are perpetually secularized follow the general law of spoils (Greg. XIII, Officii nostri, a.

1577). Members of orders which have been suppressed by civil authorities may under certain conditions, owing to a special privilege, dispose by will of property acquired. Those who make simple vows only are not deprived of the power to make a will.

Decretals Greg. IX, lib. III, titt. 25, 26; SANTI, Praelect. Jur. Can., lib. III, titt. 25, 26; DE ANGELIS, Praelect Jur. Can., lib. III, titt. 25, 26; BRUNEL in Dict. Christ. Antiquities, s.v. Wills.

ANDREW B. MEEHAN

St. Willehad

St. Willehad

Bishop at Bremen, born in Northumberland before 745; died at Blecacze (Blexen) on the Weser, 8 Nov., 789. He was a friend of Alcuin, and probably received his education at York under St. Egbert. After his ordination, with the permission of King Alchred he was sent to Frisia between 765 and 774. He cannot, therefore, have been a disciple of St. Boniface, as Baronius states in the Roman Martyrology, for St. Boniface had left England in 718 and had died in 754 (755). Willehad came to Dockum, where St. Boniface had received the crown of martyrdom, and made many conversions. He crossed the Lauwers, but met with little success at Hugmarke (now Humsterland in the Diocese of Münster). He was obliged to leave and went to Trianthe (Drenthe in the Diocese of Utrecht). At first all seemed favourable, but later he made little progress. In 780 he was sent by Charlemagne to Wigmodia near the North Sea, between the Weser and the Elbe. There God's blessing accompanied his labours, and he built many churches. The insurrection of the Saxons under Widukind in 782 put an end to his work, many of his companions were killed and his churches destroyed. Willehad escaped and went to Rome, where he was received by Adrian I. He then retired to the Abbey of Echternach, and applied himself to the task of copying books, among others he transcribed the Epistles of St. Paul. When the insurrection had been suppressed by Charlemagne Willehad returned to Wigmodia and continued his labours. He was consecrated bishop at Worms on 13 July, 787, and fixed his residence at Bremen, where he built a cathedral, dedicated on Sunday 1 Nov., 789, in honour of St. Peter. A few days later, while on a missionary tour, he was attacked with a fever and died. His body, buried at the place of his death, was transferred by his successor St. Willericus to the stone church built by him and placed in a chapel. A feast on 13 July commemorates the date of his consecration. During the Reformation his relics were lost. His feast was neglected and then forgotten; by permission, however, of the Sacred Congregation of Rites it was reintroduced in 1901 in the Dioceses of Munster, Osnabrück, and Paderborn to be observed on a vacant day after 8 November. His life was written by a cleric of

Bremen after 838, but perhaps before 860. The account of his miracles was written by St. Ansgar.

FRANCIS MERSHMAN

Pierre Willems

Pierre Willems

Philologist, born at Maastricht, 6 January, 1840; died at Louvain, 23 February, 1898. Following the custom of Belgian students he did not confine himself to the courses at Louvain but went to Paris to hear Oppert, Egger, and Patin, and to Berlin, Utrecht, and Leyden, where he followed the courses of Cobet. On his return in 1865 he was appointed professor of Latin philology at the University of Louvain; here he spent the remainder of his life, the only events being his lectures and his works. His two chief works are "Le droit public romain", first issued under the title, "Les antiquités romaines envisagées au point de vue des institutions politiques" (Louvain, 1870; 7th ed. by his son Joseph Willems, Louvain, 1910), and "Le sénat de la république romaine" (3 vols., Louvain, 1878-85). The first work is a handbook which stops at Constantine in the first three editions and now goes as far as Justinian. The author combined systematic and historical order by dividing the history of Roman institutions into "epochs" and "periods", viz., epoch of royalty, epoch of the republic, epoch of the empire, subdivided into the period of the principate and that of monarchy. In each of these sections Willems studies the conditions of persons, government, and administration. The book is a clear, concise, and very practical compendium, provided with a good bibliography, and is an excellent handbook for students. The book on the Roman Senate is more learned and shows more evidence of personal research. It contains a new opinion concerning the recruiting of the Senate; Willems does not admit that there were plebeian senators in the century following the expulsion of the kings. It was by the exercise of the curule magistracies that the plebs entered the Senate, in fact after 354-200; a plebiscite proposed by the tribune Ovinius and accepted at the end of the fourth century hastened the introduction of the plebeians, and, in short, made the Senate an assembly of former magistrates. The doctrine of Willems was discussed and eventually accepted. He completed his work by a series of studies on the composition of the Roman Senate in 575-179, in 699-55 in his great work, and in A. D. 65 in the "Musée belge" (published by his son, 1902). He also contributed to the "Bulletins" of the Brussels Academy a memoir on the municipal elections of Pompeii (1902). He assisted in the foundation

of the second Belgian periodical for classical philology, "Le Musée belge" (1897), and organized a "Societas philologa", at Louvain, one of the oldest members of which was the Liège professor, Charles Michel, author of the "Recuit d'inscriptions grecques" (1900-12). He belonged to the Flemish party and collected materials for a work on the Flemish dialects, which remains unfinished. While not especially profound Willems was an exact and conscientious scholar.

PAUL LEJAY

St. William

St. William

(WILLIAM FITZHERBERT, also called WILLIAM OF THWAYT).

Archbishop of York. Tradition represents him as nephew of King Stephen, whose sister Emma was believed to have married Herbert of Winchester, treasurer to Henry I. William became a priest, and about 1130 he was canon and treasurer of York. In 1142 he was elected Archbishop of York at the instance of the king, in opposition to the candidature of Henry Murdac, a Cistercian monk. The validity of the election was disputed on the ground of alleged simony and royal influence, and Archbishop Theobald refused to consecrate him pending an appeal to Rome. St. Bernard exercised his powerful influence against William in favour of Murdac, but in 1143 the pope decided that William should be consecrated, if he could clear himself from the accusation of bribery, and if the chapter could show that there had been no undue royal pressure. William proved his innocence so conclusively that the legate consecrated him archbishop at Winchester 26 September, 1143. He set himself at once to carry out reforms in his diocese, and his gentleness and charity soon won him popularity; but he neglected to obtain from Cardinal Hincmar the pallium which Lucius II sent him in 1146, and the pope died before William had been invested. The new pope, Blessed Eugenius III, was himself a Cistercian, and the English Cistercians soon renewed their complaints against William, which St. Bernard supported. Meanwhile Hincmar carried the pallium back to Rome, so that, in 1147, William had to travel there to obtain it, raising the expenses of his journey by sale of treasures and privileges belonging to York. This afforded fresh matter of complaint and finally the pope suspended him from his functions on the ground that he had enthroned the Bishop of Durham without exacting the pledges required by the former pope.

William took refuge with his friend, the King of Sicily, but his partisans in England took an unwise revenge by destroying Fountains Abbey, of which Murdac was now prior. This further inflamed St. William's enemies, who again approached the pope, with the result that in 1147 he deposed the archbishop from his seat; and on the failure of the chapter to elect a successor, he consecrated Murdac in his stead. St. William devoted himself to prayer and mortification at Winchester till 1153, when the pope and St. Bernard were both dead. He then appealed to the new pope, Anastasius IV, for restoration to his see, a request which the death of Murdac in October made it easier to obtain. St. William having received the pallium, returned to York, where he showed the greatest kindness to the Cistercians who had opposed him, and promised full restitution to Fountains Abbey. But his death, so sudden as to cause suspicion of poison, took place within a few weeks. Miracles took place at his tomb, and in 1227 he was canonized by Pope Honorius III. In 1283 his relics were translated to a shrine behind the high altar of York Minster, where they remained till the Reformation. His festival is observed in England on 8 June.

EDWIN BURTON

St. William (Bishop of St-Brieuc)

St. William

Bishop of St-Brieuc, born in the parish of St. Alban, Brittany, between 1178 and 1184; died 1234 (according to some 1137); feast 29 July. Acta SS. (VII, July, 131) narrate only his virtues and miracles, and give no details of his life. From other sources quoted in the "Acta" we learn that his father's name was Oliver Pinchon and his mother's, Jane Fortin. He was elected bishop in 1220 (1225), and considered himself the father of the poor and afflicted of his diocese. He was a defender of the rights of the clergy, and incurred the displeasure of the powerful, so that he was banished. He lived for some time in the Diocese of Poitiers, assisted the sick bishop in his duties, and returned in 1230. He began the building of a cathedral, but died before its completion. He was canonized, 15 April, 1247, by Innocent IV. During the French Revolution his relics were burned.

STADLER, Heiligenlexicon; LOBINEAU, Les vies des saints de Bretagne, II (Paris, 1836), 426.

FRANCIS MERSHMAN
Blessed William (Abbot of Hirschau)

Bl. William

Abbot of Hirschau, monastic reformer, born in Bavaria; died at Hirschau, 5 July 1091. He was educated and took the Benedictine habit at St. Emmeram, Ratisbon. In 1069 he was called to Hirschau to succeed the deposed Abbot Frederick. He at once assumed the management of the monastery, but would not accept the abbatial benediction till after the death of his unjustly deposed predecessor in 1071. Under William's abbacy, Hirschau reached the zenith of its glory and, despite the unusually strict monastic discipline which he introduced from Cluny, the number of priest-monks increased from 15 to 150. He was the first to introduce lay brothers (*fratres laici*, also called *conversi, barbati, or exteriores*) into the German Benedictine monasteries. Before his time there were, indeed, men-servants engaged at the monasteries, but they lived outside the monastery, wore no religious garb, and took no vows. In 1075 William went to Rome to obtain the papal confirmation for the exemption of Hirschau. On this occasion he became acquainted with Gregory VII, with whose reformatory labours he was in deep sympathy and whom he afterwards strongly supported in the great conflict with Henry IV. William had received an excellent education at St. Emmeram, and in the knowledge of the quadrivials he was unsurpassed in his time. He constructed various astronomical instruments, made a sun-dial which showed the variations of the heavenly bodies, the solstices, equinoxes, and other sidereal phenomena ("Bernoldi chronicon" in P. L., CXLVIII, 1404). He was also a skilled musician and made various improvements on the flute (Aribo Scholasticus, "De musica", in P. L., CL, 1334). Besides composing the "Constitutiones Hirsauenses" (P. L., CL, 923-1146), he is the author of a treatise "De astronomia", of which only the prologue is printed (P. L., loc. cit., 1639), and "De musica" (P. L., loc. cit., 1147-78), of which a new critical edition with a German translation was prepared by Hans Müller, "Die Musik Wilhelms von Hirsau" (Frankfort, 1883). William also had a standard edition of the Vulgate made for all the monasteries of the Hirschau reform. He is commemorated in various martyrologies on 4 of 5 July.

KERKER, Wilhelm der Selige, Abt von Hirschau (Tubingen, 1863); HELMSDORFER, Forschungen zur Geschichte des Abtes Wilhelm (Gottingen, 1874); WITTEN, Der selige Wilhelm, Abt von Hirschau (Bonn, 1890); GISEKE, Die Ausbreitung der Hirschauer Regel (Halle, 1877); ALBERS, Hirsau und seine Grundungen in Festschrift zum 1100-jährigen Jubildum des deutschen Campo Santo in Rom (Freiburg, 1897), 115-129; SUSSMANN, Forschungen zur Geschichte des Klosters Hirsau (Halle, 1904).

The earliest life of William was written shortly after his death by his contemporary HAYMO OF HIRSCHAU. Subsequently various legendary additions came to it (P. L., CL, 889-924, a more critical edition by WATENBACH in Mon. Germ. Hist.: Script., XII, 209-225).

MICHAEL OTT

William, Abbot of Marmoutiers

William, Abbot of Marmoutiers

Born in Brittany, died at Marmoutiers, 23 May, 1124. For a time he was Archdeacon of Nantes, but renounced this dignity and became a monk at the Benedictine monastery of Marmoutiers. In 1105 he was elected successor to the deceased Abbot Hilgotus. Archbishop Rudolph II of Tours, who on various occasions had violated the privileges of Marmoutiers, refused to acknowledge William as abbot or to give him the abbatial benediction unless he would not only swear allegiance to him but also confirm his oath by placing his right hand in that of the archbishop. William was willing to do the former but would not yield to the latter. St. Ivo, Bishop of Chartres, in a letter to Paschal II (P.L., CLXII, 126-7), sided with the abbot. William went to Rome and received abbatial benediction from Paschal himself. It seems that, through the intervention of St. Ivo and a few other bishops, the abbot and the Archbishop of Tours were reconciled about 1115 (see Ivo's epistle to William, in P.L., CLXII, 236-7), and to Rudolph, 237-8). In 1106 William took part in the synod of Poitiers, and in 1107 he received the Abbey of Cellen-Brie from the Bishop of Meaux.

MICHAEL OTT

William

William

Abbot of Saint-Bénigne at Dijon, celebrated Cluniac reformer, b. on the Island of Giuglio on Lake Orta near Novara in Piedmont in 962; d. at Fecamp, one of his reformed monasteries in Normandy, 1 January 1031. At the age of seven he was brought as an ablate to the Benedictine monastery of Locedia near Vercelli, and went to Cluny in 987. A year later he was sent by Abbot Majolus to reform the priory of Saint-Saturnin near Avignon and, upon his return to Cluny in 990, was appointed Abbot of Saint-Bénigne at Dijon. He was ordained priest, 7 June 990. As Abbot of Saint-Bénigne he

inaugurated an extensive reform of the Benedictine monasteries in Normandy, Burgundy, and Lorraine. The Bishop of Langres put him at the head of all the monasteries of his diocese and finally he ruled over more than 40 monasteries and about 1200 monks. In all these monasteries he introduced the severe discipline of Cluny and in many of them established schools for the monks and monastic candidates as well as for the laity. At Saint- Bénigne he erected (1001-1018) a church in the Romanesque style, then considered the most beautiful in France. William's literary works, consisting of seven sermons, one mystic treatise on St. Paul's Epistle to the Romans, vii, 15 sq., eight letters to Pope John XIX, St. Odilo, etc., and his testament, are printed in Chevalier [loc. cit. below, 213-860]. Though William has not been formally canonized, he is honoured as a saint in various places. His feast is on 1 January.

CHEVALIER, Le venerable Guillaume, Abbe de Saint-Bénigne de Dijon, reformateur de l'ordre benedictin au XI siecle (Paris and Dijon, 1875); RINGHOLZ in Studien u. Mittheilungen aus dem Benedikiner-Orden, III (Wurzburg and Vienna, 1882), 362-83, chiefly a German resume of the preceding; SACKUR, Die Cluniacenser, I (Halle, 1892-4), 257-69, passim. A reliable Life by RAOUL GLABER, a contemporary and disciple of William, is printed in P.L., XCLII, 697- 720, also in Acta S., I Jan., 57 sq.

MICHAEL OTT

Ven. William Carter

Ven. William Carter

English martyr, born in London, 1548; suffered for treason at Tyburn, 11 January, 1584. Son of John Carter, a draper, and Agnes, his wife, he was apprenticed to John Cawood, queen's printer, on Candlemas Day, 1563, for ten years, and afterwards acted as secretary to Nicholas Harpsfield, last Catholic archdeacon of Canterbury, then a prisoner. On the latter's death he married and set up a press on Tower Hill. Among other Catholic books he printed a new edition (1000 copies) of Dr. Gregory Martin's "A Treatise of Schism", in 1580, for which he was at once arrested and imprisoned in the Gatehouse. Before this he had been in the Poultry Counter from 23 September to 28 October, 1578. He was transferred to the Tower, 1582, and paid for his own diet there down to midsummer, 1583. Having been tortured on the rack, he was indicted at the Old Bailey, 10 Jan., 1584, for having printed Dr. Martin's book, in which was a paragraph where confidence was expressed that the Catholic Faith would triumph, and pious Judith would slay Holofernes. This was interpreted as an incitement to slay the queen, though it obviously had no such meaning.

GILLOW, Bibl. Dict. Eng. Cath., s.v. Carter, Williams; Cath. Rec. Soc. Publ. (London, 1905-), I, 60, 65; II, 228, 229; III, 4, 15; IV, 129, 138; V, 8, 30, 39.

JOHN B. WAINEWRIGHT
Bl. William Exmew

Bl. William Exmew

Carthusian monk and martyr; suffered at Tyburn, 19 June, 1535. He studied at Christ's College, Cambridge, and became a proficient classical scholar. Entering the London Charterhouse, he was soon raised to the office of vicar (sub-prior); in 1534 he was named procurator. Chauncy says that for virtue and learning his like could not be found in the English province of the order. Two days after the Prior of the Charterhouse, Bl. John Houghton, had been put to death (4 May, 1535), W. Exmew and the vicar, Humphrey Middlemore, were denounced to Thomas Cromwell by Thomas Bedyll, one of the royal commissioners, as being "obstinately determined to suffer all extremities rather than to alter their opinion" with regard to the primacy of the pope. Three weeks later they and another monk of the Charterhouse, Sebastian Newdigate, were arrested and thrown into the Marshalsea, where they were made to stand in chains, bound to posts, and were left in that position for thirteen days. After that, they were removed to the Tower. Named in the same indictment as Bl. John Fisher, they were brought to trial at Westminster, 11 June following, and pleaded not guilty, i.e., of high treason, but asserted their staunch adhesion to what the Church taught on the subject of spiritual supremacy and denied that King Henry VIII had any right to the title of head of the Church of England. They were consequently condemned to death as traitors, and were hanged, drawn, and quartered. W. Exmew is one of the fifty-four English martyrs beatified by Leo XIII, 9 December, 1886.

HENDRIKS, *The London Charterhouse* (London, 1889); CHAUNCY, *Hist. aliquot Martyrum Anglorum* (Montreuil-sur-Mer, 1888).

EDMUND GURDON
Blessed William Filby

Bl. William Filby

Born in Oxfordshire between 1557 and 1560; suffered at Tyburn, 30 May, 1582. Educated at Lincoln College, Oxford, he was admitted to the seminary at Reims, 12 October, 1579. He was ordained priest at Reims, 25 March, 1581, and shortly after left for the mission. He was arrested in July, committed to the Tower, removed 14 August to the Marshalsea, and thence back to the Tower again. He was sentenced 17 November, and from that date till he died was loaded with manacles. He was also deprived of his

bedding for two months. With him suffered three other *Beati*, Thomas Cottam, Luke Kirby, and Laurence Richardson (*vere* Johnson).

Blessed Luke Kirby was born in the north of England about 1549, and is said to have graduated M.A., probably at Cambridge. Having been reconciled at Louvain, he entered Douai College in 1576, and was ordained priest at Cambrai in September, 1577. He left Reims for England, 3 May, 1578, but returned 15 July and proceeded to Rome, where he took the college oath at the English College, 23 April, 1579. In June, 1580, he was arrested on landing at Dover, and committed to the Gatehouse, Westminster. Transferred to the Tower, 4 December, he was subjected to the "Scavenger's Daughter" for more than an hour, 9 December. He was condemned, 17 November, 1581, and from 2 April till the day of his death was in irons.

Blessed Laurence Richardson, a son of Richard Johnson, of Great Crosby, Lancashire, was a Fellow of Brasenose College, Oxford, in or before 1569, and supplicated B.A. 25, November, 1572. In 1573 he was at Douai, and on 23 March, 1577, was ordained priest at Cateau-Cambresis. He was sent on the mission 27 July following, and laboured in Lancashire. He was arrested in London on his way to France and imprisoned in Newgate, where he remained until the day of his indictment, 16 November, 1581, when he was committed to the Queen's Bench Prison, and on the day of his condemnation, 17 November, to the Tower, where he had no bedding for two months.

JOHN B. WAINEWRIGHT

Bl. William Hart

Bl. William Hart

Born at Wells, 1558; suffered at York, 15 March, 1583. Elected Trappes Scholar at Lincoln College, Oxford, 25 May, 1571, he supplicated B.A., 18 June, 1574. The same year he followed the rector, John Bridgewater, to Douai. He accompanied the college to Reims, and returned thither after a severe operation at Namur, 22 November, 1578. He took the college oath at the English College, Rome, 23 April, 1579, whence he was ordained priest. On 26 March, 1581, he left Rome, arriving at Reims 13 May, and resuming his journey 22 May. On reaching England he laboured in Yorkshire. He was present at the Mass at which Blessed William Lacy was captured, and only escaped by standing up to his chin in the muddy moat of York Castle. Betrayed by an apostate on Christmas Day, 1582, and thrown into an underground dungeon, he was put into

double irons. After examination before the Dean of York and the Council of the North, he was arraigned at the Lent Assizes.

From the unprofessional account of his trial, which states that he was arraigned on two counts, we may be fairly certain that he was on trial on three, namely: (1) under 13 Eliz. c. 2 for having brought papal writings, to wit his certificate of ordination, into the realm; (2) under 13 Eliz. c. 3. for having gone abroad without royal license; and (3) under 23 Eliz. c. 1. for having reconciled John Wright and one Couling. On what counts he was found guilty does not clearly appear, but he was certainly guilty of the second.

CAMM, Lives of the English Martyrs, II (London, 1904-5), 600-634; GILLOW, Bibl. Dict. Eng. Cath.; Statutes at Large, II (London, 1786-1800); CHALLONER, Missionary Priests, I (Edinburgh, 1877), n. 19.

JOHN B. WAINEWRIGHT

Bl. William Lacy

Bl. William Lacy

Born at "Hanton", Yorkshire (probably Houghton or Tosside, West Riding); suffered at York, 22 Aug., 1582. He married a widow, named Cresswell, whose sons, Arthur and Joseph, became Jesuits. Little is related of his family by his biographers. He had a brother Ralph of Preston in Amounderness, a sister Barbara, and nephews (apparently her sons) Robert and William (Cal. S. P., Dom. add. 1566-79, London, 1871, p. 562). He held a position of emolument under the Crown, possibly as coroner, till about 1565. One of this name, probably a relative, was a corner for the West Riding in 1581-2 (Dasent, "Acts of the Privy Council", xiii, 358). After fourteen years' persecution for his faith, which included imprisonment at Hull, and after the death of his wife, he went abroad and arrived at Reims, 22 June, 1580. On 25 September following he went on to Pont-à-Mousson, and thence to Rome, where, after obtaining a dispensation, he became a priest. The dispensation was necessary before ordination, as Lacy had been married twice, once to a widow. On 10 May, 1581, he was at Loreto on his way to England. He was arrested after a Mass said by Thomas Bell, afterwards an apostate, in York Castle, 22 July, 1582. He suffered great hardships, being loaded with heavy irons, confined in an underground dungeon, and subjected to numerous examinations. He was arraigned on 11 August, probably under 13 Eliz. cc. 2 and 3. With him suffered Blessed Richard Kirkman, born at Addingham, in the West Riding. He arrived at Douai in 1577 and, after the transference of the English College to Reims, was ordained priest on Holy Saturday, 1579. On his return to England in August he seems to have found a refuge with Robert Dymoke, hereditary Champion of England (d. in Lincoln gaol

for his faith, 11 Sept., 1580), at Scrivelsby, Lincolnshire. He was eventually arrested, 8 August, 1582, by Francis Wortley, J.P., and seems to have been arraigned a day or two after under 23 Eliz. c. 1. After condemnation the two martyrs shared one cell in a turret till 10 August, when Blessed Richard was removed to an underground dungeon.

JOHN B. WAINEWRIGHT

William of Auvergne

William of Auvergne

Bishop of Paris, medieval philosopher and theologian. Born at Aurillac in Auvergne towards the end of the twelfth century; died in Paris, 1249. The date of his birth and the circumstances of his early education are unknown. In the first decades of the thirteenth century he went to Paris to study, and became successively teacher in the faculty of arts and in that of theology (about 1220). In 1228 he became Bishop of Paris, continuing, as his official decrees show, to take an active interest in the institution in which he had studied and taught.

His works include several treatises on practical theology, for example, "De virtutibus", "De moribus", "De sacramentis", a dogmatic treatise "De trinitate" (in which there is much that pertains to philosophy as well as to theology), and philosophical works "De universo", "De anima", "De immortalitate animae", the last being merely a rescript of a work bearing the same title by Dominic Gundisalvi. These were collected and published at Nuremberg, 1496, and republished at Venice, in 1591, and at Orléans, 1674. William of Auvergne represents the first stage of the movement which ended in the adoption and adaptation of Aristotle's philosophy as the basis of a systematic exposition of Christian dogma. It was difficult for him to break all at once with the Augustinian method and doctrine which had prevailed in the schools up to this time. Besides, the only text of Aristotle then available was full of errors of translation and of perversions on the part of Arabian commentators. Still he set about the task of rescuing Aristotle from the Arabians, and although he often failed to find a consistent basis of reconciliation between the Augustinian and the Aristotelian elements, he did important work in preparing the way for his more fortunate and more successful followers, Alexander of Hales, Albert the Great, and St. Thomas. He did not cover the whole ground of theology as they did; his "De universo" is neither a "Summa theologica", nor a "Book of Sentences"; it is more specifically an attempt to found a science of

reality on principles opposed to those of the Arabian School. In his theological works he devotes special attention to the Manichean heresy, which in his time had been renewed by the Cathari (q.v.). He devoted attention also to refuting the Arabian doctrine of the eternity of the world. In his interpretation of the Platonic theory of ideas he identifies the intelligible world (*Kosous nontos*) with the Son of God.

UEBERWEG, Hist. of Phil., tr. Morris, II (New York, 1892), 434; TURNER, Hist. of Phil. (Boston, 103), 325, 326. The best French and German works are : VALOIS, Guillaume d'Auvergne (Paris, 1880); BAUMGARTNER, Die Erkenntnisslehre d. Wilh. v. Auvergne (Munster, 1893); GUTTMANN, Die Scholastik des 13 Jahrh. in ihren Beziehungen zum Judentum (Breslau, 1902), 13-32.

WILLIAM TURNER

William of Auxerre

William of Auxerre

A thirteenth-century theologian and professor at the University of Paris. William's name occurs in many of the pontifical documents relating to the University of Paris dating from the first decades of the thirteenth century. From these we learn that he was a *magister* at the university, that he was archdeacon of Beauvais, and that he was one of the three theologians appointed in 1231 by Gregory IX to prepare an amended edition of the physical and metaphysical works of Aristotle which had been placed under a ban by the Council of 1210 because of the errors which were contained both in the inaccurate translation and in the Arabian commentaries accompanying them. Apparently this work of correction was done in Rome; a letter of Gregory IX to King Louis, dated 6 May, 1231, recommends William of Auxerre to the French King and says that the Parisian teacher has laboured "at the Apostolic See, for the reformation of study". William is the author of a work entitled "Summa Aurea", which is not, as it is sometimes described, a mere compendium of the "Books of Sentences" by Peter the Lombard. Both in method and in content it shows a considerable amount of originality, although, like all the Summae of the early thirteenth century, it is influenced by the manner and method of the Lombard. The teacher by whom William was most profoundly influenced was Praepositinus, or Prevostin, of Cremona, Chancellor of the University of Paris from 1206 to 1209. The names of teacher and pupil are mentioned in the same sentence by St. Thomas: *Haec est opinio Praepositini et Autissiodorensis* (in I Sent., XV, q. 11). William was, in turn, the teacher of the Dominican, John of Treviso, one of the first theologians of the Order of Preachers. The importance of the "Summa Aurea" is enhanced by the fact that it was one of the first Summae composed after the introduction

of the metaphysical and physical treatises of Aristotle. The work was published at Paris in 1500. Another edition, without date, by Regnault, is mentioned by Grabmann.

WILLIAM TURNER

William of Champeaux

William of Champeaux

A twelfth-century Scholastic, philosopher, and theologian, b. at Champeaux, near Melun, in the neighbourhood of Paris, about the year 1070; d. at Châlons-sur-Marne, 1121. After having been a pupil of Anselm of Laon, he began in 1103 his career as teacher at the cathedral school of Paris. In 1108, owing chiefly to Abelard's successful attempts to criticize his realistic doctrine of universals, he retired to the Abbey of St. Victor and there continued to give lessons which, no doubt, influenced the mystic school known as that of St. Victor. In 1114 he was made Bishop of Châlons-sur-Marne. Portions of his work "De origine animae" and of a "Liber sententiarum", as well as a dialogue entitled "Dialogus seu alteratio cujusdam Christiani et Judaei", have come down to us. On the problem of universals William held successively a variety of opinions. All of these, however, are on the side exaggerated Realism and opposed both to the Nominalism of Roscelin and to the modified Nominalism of Abelard. In his treatise on the origin of the soul he definitely rejects the theory known as Traducianism and maintains that each and every human soul originates from the creative act of God. Among his contemporaries he enjoyed a very great reputation for learning and sanctity. Among his contemporaries he enjoyed a very great reputation for learning and sanctity. He was, moreover, looked upon by the conservative thinkers of that age as the ablest champion of orthodoxy. His creationist doctrine is his chief title to distinction as a Scholastic philosopher.

LEFEVRE, Les variations de Guillaume de Champeaux, etc. (Lille, 1898); MICHAUD, G. de Champeaux et les écoles de Paris au XII Siecle (Paris, 1867); GRABMAN, Gesch. der schol. Methode (Freiburg, 911), 136 sq.; DE WULF, Hist of Medieval Phil., tr. COFFEY (New York, 1909), 179; TURNER, Hist. of Philosophy (Boston, 1903), 279 sq.

WILLIAM TURNER

William of Conches

William of Conches

A twelfth-century Scholastic philosopher and theologian, b. about the year 1100. After having been a teacher of theology in Paris he became, about the year 1122, the tutor of Henry Plantagenet. Warned by a friend of the danger implied in his Platonic realism as he applied it to theology, he took up the study of philosophy and the physical science of the Arabians. When and where he died is a matter of uncertainty. There is a good deal of discussion in regard to the authorship of the works ascribed to him. It seems probable, however, that he wrote glosses on Plato's "Timaeus", a commentary on Boethius's "Consolations of Philosophy", a dialogue called "Dragmaticon", and a treatise, "Magna de naturis philosophia". William devoted much attention to cosmology and psychology. Having been a student of Bernard of Chartres, he shows the characteristic Humanism, the tendency towards Platonism, and the taste for natural science which distinguish the "Chartrains". He is one of the first of the medieval Christian philosophers to take advantage of the physical and physiological lore of the Arabians. He had access to the writings of the Arabians in the translations made by Constantine the African.

WILLIAM TURNER

William of Digulleville

William of Digulleville

(DEGULLEVILLE).

A French poet of the fourteenth century. Nothing is known of his life, except that he was a monk in the celebrated Cistercian abbey of Chalis. Three allegorical poems are attributed to him with some certainty: "Pélerinage de vie humaine", a description of a journey to Paradise, composed between 1330 and 1332, revised by the author in 1355; "Pélerinage de l'ame", a vision of hell, purgatory, and heaven; "Pélerinage de Jésus-Christ", a verse transposition of the Gospel with the addition of a few allegories, probably composed in 1358. We possess numerous manuscripts of these poems adorned with splendid miniatures, said to be the finest ever made. Several editions of the fifteenth and sixteenth centuries do not give the original text of the author, but a text amended by Peter Virgin, a monk of Clairvaux, or even a prose version made by John Gallopes,

at the request of the Duchess of Anjou. These allegorical poems, containing not less than thirty thousand lines, met with a tremendous success in the Middle Ages, and were circulated throughout France and England. John Lydgate translated them into English, and Chaucer put a few passages into English verse, while John Bunyan imitated them in his famous poem, "Pilgrim's Progress". A new edition has been made by Stürzinger for the Roxburghe Club, London, 1893.

PIAGET in DE JUELEVILLE, *Histoire de la litterature francale*, II (Paris, 1896);
Histoire litteraire de la France, XXIV (Paris, 1856 sqq.).

LOUIS N. DELAMARRE

St. William of Ebelholt

St. William of Ebelholt

(Also called WILLIAM OF PARIS and WILLIAM OF THE PARACLETE.)

Died on Easter Sunday, 1203, and was buried at Ebelholt. He was educated by his uncle Hugh, forty-second Abbot of St-Germain-des-Pres at Paris; and having been ordained subdeacon received a canonry in the Church of Ste-Geneviève-du-Mont. His exemplary life did not commend him to his fellow canons, who tried to rid themselves of his presence, and even prevented by slander his ordination to the diaconate by the Bishop of Paris. William obtained this order from the Bishop of Senlis by his uncle's intercession, and was soon afterwards presented by the canons to the little priory of Epinay. In 1148, by order of Pope Eugene III, the secular canons of Ste-Geneviève were replaced by canons regular from the Parisian monastery of St. Victor, whose prior, Odo, was made abbot of Ste-Genevieve. William soon afterwards joined the new community and was made sub-prior. In this position he showed great zeal for the religious life, and on one occasion opposed the entry of a new prior who had obtained his position irregularly; for this he was punished by Abbot Garin, successor of Odo, but his action was finally supported by Pope Alexander III.

In 1161 Absalom, Bishop of Roskilde, Denmark, sent to Paris the provost of his cathedral to obtain canons regular for the reform of the monastery of St. Thomas of Eskilsöe. In 1165 William journeyed to Denmark with three companions, and became abbot of that house. In spite of difficulties arising from poverty and opposition on the part of the community he reformed the monastery and in 1178 transferred it to Ebelholt, or the Paraclete, in Zeeland. He was entrusted with important business by Absalom, now Archbishop of Lund, and intervened in the case of Philip Augustus of France who was attempting to repudiate his wife Ingelborg, sister of Cnut of Denmark. The genealogy of the Danish kings which he drew up on this occasion to disprove the alleged impediment of consanguinity and two books of his letters, some of which deal with

this affair, have come down to us, and together with an account of probable authenticity of the invention of the relics of Ste-Geneviève in 1161 and a few charters relating to his monastery may be found in P.L., CCIX. An account of his miracles is given in the "Vita" written by one of his younger disciples. He was canonized by Honorius III in 1224. His feast is commemorated on 18 June.

For the Vita and other sources of William's Life see LANGEBEK, *Script. rer. dan.* (9 vols., Copenhagen, 1772-1878), reprinted in P. L., CCIX; PAPERBROCH, *Vita*, with commentary, in *Acta SS.*, I April, 625 sqq.; LAGER, *Ep. XL* in P. L., CLXXXVI.

RAYMUND WEBSTER

St. William of Gellone

St. William of Gellone

Born 755; died 28 May, c. 812; was the second count of Toulouse, having attained that dignity in 790. He is by some writers also given the title of Duke of Aquitaine. This saint is the hero of the ninth-century "Roman de Guillame au court nez", but the story of his life is told in a more reliable form by the anonymous author of the biography which was written soon after the saint's death, or before the eleventh century according to Mabillon, or during the eleventh century according to the Bollandist Henschen. His father's name was Theoderic, his mother's Aldana, and he was in some way connected with the family of Charles the Great, at whose court he was present as a youth. The great emperor employed him against the Saracen invaders from Spain, whom he defeated at Orange. In 804 he founded a Benedictine monastery, since called S. Guilhem le Desert, in the valley of Gellone, near Lodeve in the Diocese of Maguelonne, and subjected it to the famous St. Benedict of Aniane, whose monastery was close at hand. Two years later (806) he himself became a monk at Gellone, where he remained until his death. His testament, granting certain property to Gellone, and another subjecting that monastery to the Abbot of Aniane, are given by Mabillon. His feast is on 28 May, the day of his death.

MABILLON, *Acta SS. O.S.B. saec. IV*, I (Venice, 1735), 67-86; *Acta SS.*, VI May, 154-72.

RAYMUND WEBSTER

William of Jumièges

William of Jumièges

(Surnamed CALCULUS.)

Benedictine historian of the eleventh century. Practically nothing seems to be known of his life except that he was apparently a Norman by birth and became a monk at the royal abbey of Jumièges, in Normandy, where he died about 1090. His only claim to fame consists in his "Historia Normannorum", in eight books, which is the chief authority for the history of the Norman people from 851 to 1127. One of the earliest manuscripts of this work still extent was preserved at Rousen up to the Revolution and is now in the Bibliothèque Nationale at Paris. The first four books of the "Historia" were taken from an earlier work on the same subject, written by Dudon of St. Quentin, whose labours are praised by William. The verdict of more recent times, however, with regard to Dudon,, is that he was given to romancing and that his work was not particularly reliable. Many of his exaggerations have been modified and corrected by William, who made full use of all that was trustworthy in his predecessor's account. Only seven out of the eight books of the "Historia" are from William's own hand, comprising events down to the year 1087. The eighth book, continuing the history as far as the death of Boson, Abbot of Bec, which occurred in 1137, was added by an anonymous author, although his continuation is usually printed as an integral part of the complete work. Ordericus Vitalis drew largely from William's history for the portions of his work that deal with the Normans, as did also Thomas Walsingham inn his "Ypodigma neustriae". The "Historia Normannorum" was first edited and printed at Frankfurt in 1603 and is also included in Camden's collection of English and Norman historians. The style is considered passable for the age in which the writer lived, though it does not come up to the requirements of modern criticism.

DUCHESNE, Hist. Normannorum scriptores (Paris, 1619); BOUQUET, Recueil des historiens de France (Paris, 1752-81); CEILLIER, Hist. gen. des auteurs sacres (Paris, 1757); P.L., CXLIX.

G. CYPRIAN ALSTON

St. William of Maleval

St. William of Maleval

(or ST. WILLIAM THE GREAT).

Died 10 February, 1157; beatified in 1202. His life, written by his disciple Albert, who lived with him during his last year at Maleval, has been lost. The life by Theodobald, or Thibault, given by the Bollandists is unreliable, having been interpolated with the lives of at least two other Williams. After a number of chapters in which he is confused with St. William of Gellone, Duke of Aquitaine, we are told that he went to Rome, where he had an interview with Eugene III, who ordered him to make a pilgrimage to Jerusalem in penance for his sins. Though Theodobald's account of his in-

terview with the pope does not carry conviction, the fact of this visit and his subsequent pilgrimage to Jerusalem is supported by excerpts from the older life, which are preserved by responsories and antiphons in his Office. He seems to have remained at Jerusalem for one or two years, not nine as Theodobald relates. About 1153 he returned to Italy and led a hermit's life in a wood near Pisa, then on Monte Pruno, and finally in 1155 in the desert valley of Stabulum Rodis, later known as Maleval, in the territory of Siena and Bishopric of Grosseto, where he was joined by Albert.

Acta SS., II Feb., 435-91.

RAYMUND WEBSTER

William of Malmesbury

William of Malmesbury

Born 30 November, about 1090; died about 1143. He was educated at Malmesbury, where he became a monk. From his youth he showed a special bent towards history, "Thence it came that not being satisfied with the writing of old I began to write myself". By 1125 he had completed his two works, "Gesta Regum" and "Gesta Pontificum". After this he spent ten years in forming a collection of historical and legal materials, now in the Bodleian library, and writing a history of Glastonbury and its saints, in which he speaks as though he were, for the time at least, an inmate of that abbey. He records that he might more than once have become Abbot of Malmesbury, but he contented himself with the office of librarian. About 1140 he made revisions of the two works "Gesta Regum" and "Gesta Pontificum", and began a new work "Historia novella", a sequel to the former, dealing with the period 1125-42, but in such a desultory way as to show that we have rather the first draft of a book than a completed work. William's authority as a historian is invaluable for the contemporary reign of Stephen, and his records of the earlier Norman kings, being based either on personal knowledge or direct hearsay, are of importance. The "Gesta Pontificum", which owes much to Bede, is the source from which all later writers of early ecclesiastical history of England have chiefly drawn. His method, also derived from Bede, was to recount events so as to show their cause and effect, and in returning to this sound principle he made a great advance on the works of his predecessors. The anecdotes, occasionally irrelevant, which he weaves into his narrative, helped much to preserve its popularity through the Middle Ages. His chief works have been printed by Migne, but the Rolls Series includes the critical edition.

SHARPE, introduction to translation of *Gesta Regum* (London, 1815); BIRCH, Life and Writings of William of Malmesbury in Trans. of Soc. of Lit., X, new series;

HAMILTON, introduction to *Gesta Pontificum* in R. S. (London, 1887-9); NORGATE in Dict. Nat. Biog., with list of his works, whether published or still in MS.

EDWIN BURTON

William of Moerbeke

William of Moerbeke

Scholar, Orientalist, philosopher, and one of the most distinguished men of letters of the thirteenth century, born about 1215; died in 1286. He held intellectual intercourse with the philosopher Thomas Aquinas, the mathematician John Campanus, the naturalist physician Witelo, and the astronomer Henri Bate of Mechlin. In turn he resided at the pontifical court of Viterbo (1268), appeared at the Council of Lyons (1274), and from 1277 until his death occupied the See of Corinth. At the request of Thomas Aquinas he undertook a complete translation of the works of Aristotle or, for some portions, a revision of existing translations, and it is noteworthy that he was the first translator of the "Politics" (c. 1260). The ancient catalogue of Dominican works published by Denifle (Arch. f. Litteratur u. Kirchengesch. d. Mittelaltes, II, 226) states: that "he translated all the books of natural and moral philosophy from Greek into latin, as did Brother Thomas, likewise the books of Proclus and certain others." Henry of Hervodia asserts that these translations were classic in the fourteenth century; they are literal (*de verbo ad verbum*) and faithful, and although without elegance are valuable. Petrus Victorius, a sixteenth-century philologist, praises them highly, and Susemihl, who has published a critical edition of the Greek text of the "Politics", sought to do service even to philologists by adding the translation of William of Moerbeke. The Flemish Dominican translated not only Aristotle but also mathematical treatises (notably the "Catoptries" of Hero of Alexandria and the treatises of Archimedes), commentaries of Simplicius on the Categories of Aristotle and on the "De coelo", and especially the "Theological Elements" of Proclus (the translation is dated Viterbo, 18 May, 1268). Several other of Proclus's works no longer exist save in the Latin versions of William of Moerbeke, which makes the latter more valuable. The same may be said of a treatise of Ptolemy's, likewise translated by the Belgian Dominican, the Greek text of which exists only in fragments. The "Theological Elements" of Proclus together with the "Book of Causes", which compiles them, constitute the fundamental sources of the Neo-Platonic inspirations of the thirteenth century, so that William exercised a real influence on the Neo-Platonic movement, which appeared sporadically in the philosophy of the thirteenth century. The Polish physician Witelo, whose curious personality has been made known by M. Bacumker, wrote his "Perspectives" at the instance of Brother William of Moerbeke, the lover of truth (*veritatis amatori*), to whom he ded-

icated his treatise. Witelo was one of the authorized representatives of Neo-Platonism. It was likewise to William that Henri Bate dedicated his "Astrolabe". William of Moerbeke thus appears as a mind of high culture and extensive relations, a forerunner of humanism, who studied all his life and encouraged others in the path of knowledge.

M. DE WULF

William of Nangis

William of Nangis

(GUILHELMUS).

A medieval chronicler, who takes his name from the City of Nancy, France. All that is known of him is that he was a Benedictine monk and lived in the thirteenth century in the Abbey of Saint-Denis at Paris. According to some scholars he died before 22 July, 1300; according to others not until after 1303. A chronicle by him exists, extending from the creation to the year 1300, but which before the year 1133 has little independent value, as up to this point it depends completely upon the chronicle of Sigbertus of Gemblours. Even for the succeeding period it is only of subordinate importance. After William's death the chronicle was continued to 1340 by an unknown monk of Saint-Denis, and was then carried to 1368 by Johannes of Venette. The best edition is that of Hercule Geraud issued under the title: "Chronique latine de G. de Nangis de 1113 a' 1300 avec les continuations de cette chronique de 1300 à 1368" (2 vols., Paris, 1843). William wrote a brief summary of the chronicle, which included the years 845-1300, and is called "Chronicon abbreviatum regum Francorum". Recently Delisle seems to have found the original of this compendium in the Vatican Library; before this discovery it was only known in a French translation (Chronique abrégée) made by the author himself. William also wrote the biographies of three kings: the "Gesta Ludovici VIII, Francorum regis", the "Gesta Ludovici IX", and the "Gesta Philippi III sive Audacis, regis Franciae", ed. by A. Duchesne in the "Historiae Francorum: Scriptores coaetanei" (5 vols., Paris). The exhaustive researches of Hermann Brosien published in the "Neues Archiv fur altere deutsche Geschichte", IV (1879), 426-509,

show that the two latter biographies, like the chronicle, can be traced back to another author, to the chronicle of the monk Primatus, and are only enlarged by long extracts from Geoffrey of Beaulieu and Gilo de Reims. The "Gesta Ludovici IX", however, seems to have been used in common with Primatus, an earlier authority.

PATRICIUS SCHLAGER

William of Newburgh

William of Newburgh

Historian, b. at Bridlington, Yorkshire, 1136; d. at Newburgh, Yorkshire, 1198, where he went as a boy to the small and recently-founded Augustinian priory. There he remained to the end as an Augustinian canon. There is no evidence that he travelled, and hardly anything is known of what was probably a very uneventful life. It would appear that he wrote his history within a short period of his death; if this was the case he must have long been preparing his materials. His "Historia rerum anglicarum" opens with a short introductory sketch of the reigns of the Conqueror and his sons, followed by a fuller account of that of Stephen. The main purpose of the writer was to produce a philosophical commentary on the history of his own times, and books II-V cover the period 1154-98. They are more than a mere chronicle; they form a real history in which the connection of events is traced, a proper sense of proportion observed, and men and their actions judged from an intelligent and independent point of view.

William of Newburgh, with his contemporary Roger of Hoveden, belongs to the northern school of historians, who carried on the admirable traditions of the Venerable Bede. This was a spirit very unlike that which inspired Geoffrey of Monmouth's mythical "History of the British Kings" with its tales of King Arthur, and William attacks Geoffrey and his legends with great indignation, calling the latter "impudent and shameless lies". This striking illustration of his historic integrity won for him from Freeman the title of "the father of historical criticism", and the compliment is not altogether undeserved. Living in a remote Yorkshire monastery William could not have had an intimate first-hand knowledge of public events, but he used his authorities, such as Symeon of Durham and Henry of Huntingdon, with excellent judgment. Though his chronology is confused and untrustworthy his work is of the greatest value, especially for the early years of the reign of Henry II. The best edition of the History is that edited by R. Howlett for the Rolls Series (Chronicles of Stephen, Henry II, and Richard I, vols. I and II).

HOWLETT, preface to Rolls Series; NORRIS in Dict. Nat. Biog., s. v.; JONES in the Cambridge History of English Literature, I, 171.

F.F. URQUHART

St. William of Norwich

St. William of Norwich

Born 1132; died 22 March, 1144. On Holy Saturday, 25 March, 1144, a boy's corpse showing signs of a violent death was found in Thorpe Wood near Norwich. It was not touched until Easter Monday, where it was buried without any ceremony where it lay. In the meantime a number of young men and boys had visited the spot and the Jews were suspected of the murder on account of the nature of the wounds ["Ex ipso penarum modo" (Thomas of Monmouth, op. cit. below, [p. 35); "non nisi judeos co maxime tempore talia gessisse asseritur" (op. cit., p. 36)]. The body was recognized as that of William, a tanner's apprentice, who with his master had been in the habit of frequenting the houses of certain Jews. The grave was opened by William's uncle, the priest Godwin Stuart, the body recognized, the burial Office read, and the grave recovered. A few days later the diocesan synod met under the presidency of Bishop Eborard, and Stuart accused the Jews of the murder, and offered to prove his accusation by ordeal. But the Jews of the Norwich Jewry were the king's men and under the protection of the sheriff, who pointed out that the bishop had no jurisdiction in the case. The failure to secure a condemnation against the Jews seems to have been largely due to the presence of this strong official who held the castle of Norwich. The only result of Sturt's action at this time was to secure the translation of the body from Thorpe Wood to the monks' cemetery on 24 April. But the cultus of St. William did not become popular, and though one or two miracles are reported during this period (1144-49) it is quite possible that the story of the murder of the Jews might have been forgotten but for the murder of the Jew Eleazer by the followers of Sir Simon de Novers in 1149. The Jews demanded the murderer's punishment, and Bishop Turbe, acting for the accused, who was his own mesne tenant, brought up the murder of the boy William five years earlier as a countercharge. The case was tried before the king at Norwich, but postponed owing, according to Thomas of Monmouth, to the payment by the Jews of much money to the king and his councillors.

For the whole story of William of Norwich our only authority is Thomas of Monmouth, a monk of the cathedral priory of Norwich, and it is only at this point, i.e. at the end of the second book of his "*Vita et Passio*", that he himself came upon the scene in person. He gives the story of the events related in his first two books on hearsay as it was current in the monastery. He seems to have been a man of unlimited credulity even beyond his contemporaries, but probably more deceived, though perhaps by himself, than a deceiver. The ultimate popularity of the cultus which dates from this time seems to have been due to three persons, Bishop Turbe, who succeeded to the

See of Norwich in 1146, Richard de Ferraiis, who became prior in 1150 after the translation to the chapter-house, and Thomas of Monmouth himself, the saint's sacrist. These men were all anxious for reasons of their own to establish the new cultus. In Lent, 1150, Thomas had three visions in which Herbert of Losinga (d. 1119), the founder of the cathedral, appeared and ordered the translation of the body from the monks' cemetery to the chapter-house. At this point the prior Elias died and was succeeded by Richard de Ferrariis, "a staunch supporter of the bishop and of Thomas". The body was translated from the chapter-house to the cathedral in July 1151, and again moved on 5 April, 1154, to the apsidal chapel of the Holy Martyrs to the north of the high altar, now known as the Jesus Chapel. The real spread of the cultus dates from the translation to the cathedral when there was a great burst of enthusiasm accompanied by visions and miracles.

We may now consider the story of the martyrdom as given by Thomas and the evidence adduced by him. William had been in the habit of frequenting the houses of the Jews and was forbidden by his friends to have anything to do with them. On the Monday in Holy Week, 1144, he was decoyed away from his mother by the offer of a place in the archdeacon's kitchen. Next day the messenger and William were seen to enter a Jew's house and from that time William was never again seen alive. On the Wednesday, after a service in the synagogue, the Jews lacerated his head with thorns, crucified him, and pierced his side. For this last scene Thomas produces the evidence of a Christian-serving woman, who, with one eye only, caught sight through a crack in a door of a boy fastened to a post, as she was bringing some hot water at her master's order, presumably to cleanse the body. She afterwards found a boy's belt in the room and in after years pointed out to Thomas the marks of the martyrdom in the room. When, a month after the martyrdom, the body was washed in the cathedral, thorn points were found in the head and traces of martyrdom in the hands, feet, and sides. The servant's evidence was apparently not produced till Thomas was preparing to write his book. On Thursday the Jews take counsel about the disposal of the body, a fact which suggests that, if there is any truth in the story at all, the death of the boy was due to accident, perhaps some rough pranks, as at Inmestar (see below), for if it had been premeditated they would have made all necessary preparations. On Good Friday the Jew Eleazar and another carried the corpse in a sack to Thorpe Wood and were met by a certain Aelward Ded, who discovered the contents of the sack. The Jews bribed the sheriff (always a *bête noire* to Thomas) to extract an oath of secrecy from Aelward and it is only five years later, three years after the formidable sheriff's death, when on his own death-bed, that Aelward tells his tale. In addition to all this Thomas tells us that when the Jews were being charged with the murder they sought to bribe William's brother to hush up the charge and that they tried to bribe Bishop Turbe to

drop his counter-charge in the matter of Eleazar's murder. These attempts at bribery, if true, might well be the natural and guiltless acts of frightened men. But the most telling piece of evidence and the most disastrous in its consequences was that of Theobald, a converted Jew and a monk probably of Norwich Priory. This man told Thomas that "in the ancient writings of his Fathers it was written that the Jews, without the shedding of human blood, could neither obtain their freedom, nor could they ever return to their fatherland. Hence it was laid down by them in ancient times that every year they must sacrifice a Christian in some part of the world" (*Vita*, II, 2), and that in 1144 it had been the lot of the Jews of Norwich.

This has been well named "one of the most notable and disastrous lies of history". The story is the foundation of the blood accusation or accusation of ritual murder against the Jews, which has found currency and gained popular credence from that date to the present day. In the "*Jewish Encyclopedia*", III, 266, may be found a list of the cases of this ritual murder, beginning with William of Norwich. There are 5 other cases given for the twelfth century, 15 for the thirteenth, 10 for the fourteenth, 16 for the fifteenth, 13 for the sixteenth, 8 for the seventeenth, 15 for the eighteenth, and 39 for the nineteenth, going right up to the year 1900. There have been more recent cases still in Eastern Europe. Ritual murder as a Jewish institution has been learnedly and conclusively disproved, e.g. by Strack, *op. cit.* below, and in the case of St. William the evidence is totally insufficient. It seems, however, quite possible that in some cases at least the deaths of these victims were due to rough usage or even deliberate murder on the part of Jews and that some may actually have been slain in *odium fidei*. In this connection we may notice the first case of all, and the only one before St. William, in which Jews are known to have been accused of murdering a Christian child. In 415 at Inmestar in Syria some Jews in a drunken frolic killed a Christian child in mockery of the death of Christ (*Socrates*, VII, xvi). Many popes have either directly or indirectly condemned the blood accusation, and no pope has ever sanctioned it (Strack, *op. cit.*, 177 and v).

RAYMUND WEBSTER

William of Ockham

William of Ockham

Fourteenth-century Scholastic philosopher and controversial writer, born at or near the village of Ockham in Surrey, England, about 1280; died probably at Munich, about 1349. He is said to have studied at Merton College, Oxford, and to have had John Duns Scotus for teacher. At an early age he entered the Order of St. Francis. Towards 1310 he went to Paris, where he may have had Scotus once more for a teacher. About 1320 he became a teacher (*magister*) at the University of Paris. During this portion of his career he composed his works on Aristotelean physics and on logic. In 1323 he resigned his chair at the university in order to devote himself to ecclesiastical politics. In the controversies which were waged at that time between the advocates of the papacy and those who supported the claims of the civil power, he threw his lot with the imperial party, and contributed to the polemical literature of the day a number of pamphlets and treatises, of which the most important are "Opus nonaginta dierum", "Compendium errorum Joannis Papæ XXII", "Quæstiones octo de auctoritate summi pontificis". He was cited before the pontifical Court at Avignon in 1328, but managed to escape and join John of Jandun and Marsilius of Padua, who had taken refuge at the Court of Louis of Bavaria. It was to Louis that he made the boastful offer, "Tu me defendas gladio; ego te defendant calamo".

In his controversial writings William of Ockham appears as the advocate of secular absolutism. He denies the right of the popes to exercise temporal power, or to interfere in any way whatever in the affairs of the Empire. He even went so far as to advocate the validity of the adulterous marriage of Louis's son, on the grounds of political expediency, and the absolute power of the State in such matters. In philosophy William advocated a reform of Scholasticism both in method and in content. The aim of this reformation movement in general was simplification. This aim he formulated in the celebrated "Law of Parsimony", commonly called "Ockham's Razor": "Entia non sunt multiplicanda sine necessitate". With this tendency towards simplification was united a very marked tendency towards skepticism a distrust, namely, of the ability of the human mind to reach certitude in the most important problems of philosophy. Thus, in the process of simplification he denied the existence of intentional species, rejected the distinction between essence and existence, and protested against the Thomistic doctrine of active and passive intellect. His skepticism appears in his doctrine that human reason can prove neither the immortality of the soul nor the existence, unity, and infinity of God. These truths, he teaches, are known to us by Revelation alone. In ethics he is a voluntarist, maintaining that all distinction between right and wrong

depends on the will of God. William's best known contribution to Scholastic philosophy is his theory of universals, which is a modified form of Nominalism, more closely allied to Conceptualism than to Nominalism of the extreme type. The universal, he says, has no existence in the world of reality. Real things are known to us by intuitive knowledge, and not by abstraction. The universal is the object of abstractive knowledge. Therefore, the universal concept has for its object, not a reality existing in the world outside us, but an internal representation which is a product of the understanding itself and which "supposes" in the mind, for the things to which the mind attributes it, that is it holds, for the time being, the place of the things which it represents. It is the term of the reflective act of the mind. Hence the universal is not a mere word, as Roscelin taught, nor a *sermo*, as Abelard held, namely the word as used in the sentence, but the mental substitute for real things, and the term of the reflective process. For this reason Ockham has been called a "Terminist", to distinguish him from Nominalists and Conceptualists.

Ockham's attitude towards the established order in the Church and towards the recognized system of philosophy in the academic world of his day was one of protest. He has, indeed, been called "the first Protestant". Nevertheless, he recognized in his polemical writings the authority of the Church in spiritual matters, and did not diminish that authority in any respect. Similarly, although he rejected the rational demonstration of several truths which are fundamental in the Christian system of theology, he held firmly to the same truths as matters of faith. His effort to simplify Scholasticism was no doubt well-intentioned, and the fact that simplification was the fashion in those days would seem to indicate that a reform was needed. The over-refined subtleties of discussion among the Scholastics themselves, the multiplication of "formalities" by the followers of Scotus, the undue importance attached by some of the Thomists to their interpretation of the intentional species, and the introduction of the abstruse system of terminology which exceeded the bounds of good taste and moderation--all these indicated that the period of decay of Scholasticism had set in. On the other hand, it must be said that, while his purpose may have been the best, and while his effort was directed towards correcting an abuse that really existed, Ockham carried his process of simplification too far, and sacrificed much that was essential in Scholasticism while trying to rid Scholasticism of faults which were incidental.

WILLIAM TURNER

St. William of Paris

St. William of Paris

Abbot of Eskill in Denmark, born 1105; died 1202. He was born of a noble French family, and became a secular canon at Ste Geneviève-du-Mond and, after Suger's reform,

a canon regular. He was sub-prior of the monastery when Bishop Absalom of Lund, who had heard reports of William's sanctity, sent Saxo Grammaticus to Paris to request his assistance in restoring religious discipline in his diocese. The saint acceded to his request, becoming Abbot of Eskill, where he succeeded in bringing back the religious to the primitive observance of their rule. He was canonized on 12 February, 1224, his feast being observed on 6 April.

St. William of Perth

St. William of Perth

(Or ST. WILLIAM OF ROCHESTER).

Martyr, born at Perth; died about 1201. Practically all that is known of this martyr comes from the "Nova legenda Anglie", and that is little. In youth he had been somewhat wild, but on reaching manhood he devoted himself wholly to the service of God. A baker by trade, he was accustomed to set aside every tenth loaf for the poor. He went to Mass daily, and one morning, before it was light, found on the threshold of the church an abandoned child, whom he adopted and to whom he taught his trade. Later he took a vow to visit the Holy Places, and, having received the consecrated wallet and staff, set out with his adopted son, whose name is given as "Cockermay Doucri", which is said to be Scots for "David the Foundling". They stayed three days at Rochester, and purposed to proceed next day to Canterbury, but instead David wilfully misled his benefactor and, with robbery in view, felled him with a blow on the head and cut his throat. The body was discovered by a mad woman, who plaited a garland of flowers and placed it first on the head of the corpse and then her own, whereupon the madness left her. On learning her tale the monks of Rochester carried the body to the cathedral and there buried it. In 1256 the Bishop of Rochester, Lawrence de S. Martino, obtained the canonization of St. William by Pope Innocent IV. A beginning was at once made with his shrine, which was situated in the northeast transept, and attracted crowds of pilgrims. At the same time a small chapel was built at the place of the murder, which was thereafter called Palmersdene. Remains of this chapel are still to be seen near the present St. William's Hospital, on the road leading by Horsted Farm to Maidstone. On 18 and 19 February, 1300, King Edward I gave two donations of seven shillings to the shrine. On 29 November, 1399, Pope Boniface IX granted an indulgence to those who visited and gave alms to the shrine on certain specified days. St. William is represented in a wall-painting, which was discovered in 1883 in Frindsbury church, near Rochester, which is supposed to have been painted about 1256-1266. His feast was kept on 23 May.

JOHN B. WAINEWRIGHT

William of Poitiers

William of Poitiers

Norman historian, born of a noted family, at Préaux near Pont Audemer, Normandy, about 1020. One of his sisters was abbess of a monastery at Préaux. About 1040 he went to make his studies at Poitiers (whence his surname). After leading the life of a knight and taking part in several battles, he took orders, and became chaplain to Duke William the Conqueror, whose history he resolved to write. Hugh, Bishop of Lisieux, brought him to his cathedral and appointed him archdeacon. He fulfilled these duties under Hugh and his successor Gilbert Maminot, who had founded a sort of scholarly academy where astronomical and mathematical questions were discussed. William was considered one of the best informed men of his time; he knew the Greek and Latin authors. He lived to an extreme old age, the date of his death being unknown, but it is placed about 1087. He is chiefly known through Ordericus Vitalis (I, IV, *passim*), who speaks of his talent for versification and says that he communicated his verses to young students in order to instruct them in the poetic art. His sole extant work is his Life of William the Conqueror, "Gesta Guilelmi II, ducis Normannorum, regis Anglorum I". It exists only in a single manuscript (Cottonian Manuscript, British Museum), almost destroyed, according to which the work has been published (ed. Duchesne, "Norman. Scriptores", 178-213). This work was composed as a single writing, and was offered to King William by the author between 1071 and 1077. The beginning (as far as 1047) and the end of the work (from 1068) are lost. According to Ordericus Vitalis the account stopped at 1071. As sources he made use of Dudon de St. Quentin and annals now lost. He also interrogated the witnesses of events and reproduced in part personal recollections. Hence his work has the value of a contemporary source based on direct testimonies. Although the style has the pretentious character of the writings of that period, the composition is careful; the tone is that of a panegyric of William. Among the most important passages must be mentioned the sojourn of Harold in Normandy and the Conquest of England. Unfortunately the first part, dealing with the early life of Duke William, has disappeared. Editions of his work are:

A. Duchesne, "Normannorum Scriptores" (Paris, 1619, 178-213), reproduced in P. L., XLIX, 1216-70; Giles, "Scriptores rerum gestarum Willelmi Conquestoris" (London, 1845), 78-159, French tr. Guizot, "Collection de mémoires relatifs à l'histoire de France" (Paris, 1826), XXIX.

KÖRTING, *Wilhelms von Poitiers Gesta Guilelmi...Ein Beitrag zur anglonormann. Historiographie* (Dresden, 1875); *Histoire littéraire de la France*, VIII, 192-97; DAWSON, *History of Hastings Castle, the castlery, rape and battle of Hastings* (London, 1909).

LOUIS BRÉHIER

William of Ramsey

William of Ramsey

Flourished about 1219. Nothing is known of his life except that he was a monk of Crowland Abbey who had been born at Ramsey, and who wrote lives of saints, some of which are in verse. He has been confused with William of Crowland, Abbot of Ramsey and afterwards of Cluny, who died in 1179. William of Ramsey wrote a poem on the translation of St. Guthlac, a prose account of the translation of St. Neot (printed in *Acta SS.*, VII July, 330), a prose life of St. Waltheof (printed in Michel, "Chroniques anglo-normandes"). Liebermann ascribes to him other works on Waltheof found in the same manuscript, and Baronius regarded him as the author of the Life of St. Edmund of Canterbury published by Surius. Verified lives of St. Fremund, St. Edmund the King, and St. Birinus are attributed to him by Leland.

LELAND, *De rebus britannicis collect.* (London, 1774); HARDY, *Descriptive Catalogue*, I (London, 1862).

EDWIN BURTON

William of St-Amour

William of St-Amour

A thirteenth century theologian and controversialist, born in Burgundy in the first decades of the thirteenth century; died in Paris about 1273. About the year 1250 he became professor of theology at the University of Paris, and, a few years later, became a leader of the so-called "seculars" at the university in their controversy with the mendicants. In 1256 he published his attack on the mendicants, entitled "De periculis novissimorum temporum", which was followed ten years later by the "Liber de Anti-christo". In both of these he went outside the merits of the question in dispute and

with merciless wit poured ridicule on the ways and manners of the friars, while he attacked the principle of mendicancy as unchristian and savouring rather of Antichrist than of Christ. The first of these treatises was condemned to be burned, and the author was banished from France in a decision rendered at Anagni by Alexander VI in 1256. In 1263 William returned to Paris and resumed his work as a teacher. For an account of the dispute at the University of Paris between the "seculars" and the mendicants, in which William of St-Amour took a most prominent part, see MENDICANT FRIARS.

In the course of time the work "De periculis", on account of the vehemence of its attack on the very foundation of the mendicant institutions, became a hindrance rather than a help to the advocates of the university's rights, while on the other side the Franciscans especially were embarrassed by the work entitled "Introductio in evangelium aeternum", commonly supposed to have been written by John of Parma, General of the Franciscans. It was only long after the death of William of St-Amour that the dispute was ended, although at Paris a compromise had been reached between the university and the Franciscans and, somewhat later, between the university and the Dominicans.

WILLIAM TURNER

William of St-Thierry

William of St-Thierry

Theologian and mystic, and so called from the monastery of which he was abbot, b. at Liège about 1085; d. at Signy about 1148. William came of a noble family, and made his studies at the Benedictine Monastery of Saint Nicaise at Reims, together with his brother Simon. Here both embraced the religious life, and were raised to the abbatial dignity, Simon of St. Nicolas-aux-Bois, Diocese of Laon, and William at St-Thierry near Reims in 1119. Prior to this William had known St. Bernard, and had formed with him a close intimacy, which lasted for life. His greatest desire was to live with the saint at Clairvaux, but the latter disapproved of the plan and imposed on him the duty of remaining in charge of the souls which Providence had confided to him. However after having assisted (1140) at St-Médard near Soissons at the first general chapter of the Benedictines, where he suggested wise regulations, William, on the pleas of long infirmities and more and more attracted to a life of retirement, resigned his dignity as abbot (1135), and withdrew to the Cistercian abbey at Signy (diocese of Reims); he did not venture to retire to Clairvaux lest his friend Bernard would refuse to accept

his abdication. Here, amid almost constant suffering, he divided his free time between prayer and study. According to a contemporary annalist his death occurred about the time of the council held at Reims under Pope Eugenius; this council took place in 1148, and his death should be placed in this year or the preceding. The necrology of his abbey dates it 8 September., in any case it was prior to that of St. Bernard (20 August, 1153).

Besides his letters to St. Bernard, William wrote several works which he himself enumerates, somewhat incorrectly, in one of his letters. Among them are: "On the solitary life" (*De vita solitaria*); "On the contemplation of God" (*De Deo contemplando*), modelled on the "Confessions" and "soliloquies" of St. Augustine; "The nature and dignity of Divine love" (*De natura et dignitate amoris*), the sequel to the preceding; "The Mirror of Faith" (*Speculum fidei*); "The Enigma of Faith" (*Aenigma fidei*); "On the Sacrament of the Altar" (*De sacramento altaris liber*), setting forth against the monk Rupert his views on the manner of the presence of Jesus Christ in the Eucharist; "Commentaries on the Canticle of Canticles" (complete), the first according to the conferences of St. Bernard, the second according to St. Ambrose, the third according to St. Gregory the Great; "Commentary on the Epistle of St. Paul to the Romans".

William was the first to deal with the errors of Abelard and to urge St. Bernard against him. He wrote "The Dispute against Abelard" (*Disputatio adversus Petrum Abelardum*), in which are arranged under twelve heads the errors which were condemned by the Council of Sens; the "Disputation of the Fathers against the dogma of Abelard" (*Disputatio catholicorum Patrum adversus dogmata Petri Abelardi*) was a reply to Abelard's apology; "On the errors of Guillaume de Conches" (*De erroribus Guillelmi de Conchis*) was a defence of the true idea of the Trinity. To these works should be added a life of St. Bernard, of which William wrote only the first chapters. His works were first printed by Tissier in "*Bibliotheca Cisterciensis*", IV (Bonofonte, 1669), and republished in P.L., CXXX (Paris, 1885).

BULAEUS, *Historia universitatis Parisiensis* (Paris, 1665), II, 763; *Histoire littéraire de la France* (Paris, 1869), XII; KUTTER, *Wilhelm von St. Thierry ein Repräsentant der mittelalterlichen Frommigkeit* (Gliessen, 1898).

ANTOINE DEGERT

William of Sens

William of Sens

A twelfth-century French architect, supposed to have been born at Sens. He is referred to in September, 1174, as having been the architect who undertook the task of rebuilding the choir of Canterbury cathedral, originally erected by Conrad, the prior of the monastery, and destroyed by fire in that year. A document written by one of

the monks of the monastery, describing the fire, tell us that William of Sens was asked to rebuild the choir. In 1179 or 1178 the architect, in consequence of a fall, had to abandon the work, and returned to France, being succeeded by another architect known as "William the Englishman", who completed the eastern portion of the church, and finished it in 1184. Viollet-le-Duc believed, from the close analogy between the twelfth-century part of Canterbury cathedral and that portion of Sens cathedral constructed about the same time, that the tradition associating the name of William of Sens with Canterbury cathedral was well founded, but he was not able to add very much to our knowledge beyond a statement that his death occurred within a few years after his return to France. Various histories of Canterbury cathedral refer to him, and all the available information respecting him was reproduced by Viollet-le-Duc in his work on French architecture and in a monograph on the cathedral at Sens.

GEORGES CHARLES WILLIAMSON

William of Shoreham

William of Shoreham

(*Or de Schorham.*)

An English religious writer of the Anglo-Norman period, born at Shoreham, near Sevenoaks, in Kent, in the latter half of the twelfth century; died at an unknown date. In 1313 he became Vicar of Chart Sutton, in Kent. As this rector was then a benefice of Leeds priory, it is probable that William was one of the Austin canons at that priory. He is the author of various religious poems, and probably the earliest English version of the complete Psalter. The poems and the Psalter, both on the same manuscript and in the same handwriting, are preserved in the British Museum (Additional manuscripts, No. 17376). The poems were edited for the Percy Society by Thomas Wright (London, 1849). The appearance of William's name in the colophon to some of the poems is sufficient evidence for the authorship, but the fact that the Psalter is not in the Kentish but in the Mercian dialect has led some authorities to contest his authorship of the version of the Psalter. (See VERSIONS OF THE BIBLE.)

WRIGHT, *The religious poems of William de Shoreham* (London, 1849), preface; KONRATH, *Beiträge zur Erklärung u. Textkritik des W. von Schorham* (Berlin, 1878); BUELBRING, *The earliest complete English Psalter together with eleven canticles* (London, 1891).

MICHAEL OTT

William of Turbeville

William of Turbeville

(TURBE, TURBO, or DE TURBEVILLE).

Bishop of Norwich (1146-74), b. about 1095; d. at Norwich in January, 1174; educated in the Benedictine cathedral priory of Norwich, then recently founded by Bishop Herbert de Losinga of Norwich. Here he also made religious profession, became teacher and later prior. He was present at the Easter synod of 1144, at which a secular clergyman, named Godwin Sturt, told the exceedingly improbable story that his nephew William, a boy of about twelve years, had been murdered by the Norwich Jews during the preceding Holy Week. Though many denounced the story of the ritual murder as an imposture, William used all his influence to give credence to it. When Bishop Eborard resigned the See of Norwich to join the Cistercians, the monk-canons elected their prior William as his successor in 1146, despite the strong opposition of John de Caineto, sheriff of Norwich County and a friend of the Jews. William was consecrated by Archbishop Theobald of Canterbury in the same year. As bishop he left nothing undone to spread the cult of the "boy-martyr" William. On four different occasions he had the boy's remains transferred to more honourable places, and in 1168 even erected a chapel in his honor in Household Wood, where the boy's body was said to have been found. It was also at his instance that Thomas of Monmouth, a monk of Norwich priory, wrote "The Life and Miracles of St. William of Norwich", the only extant authority for this legend, which is now commonly discredited.

William was present at the consecration of Bishop Hilary of Chichester in 1147, of Geoffrey of Monmouth, Bishop of St. Asaph, in 1152, and of Archbishop Roger Pont l'Eveque of York, at Westminster Abbey, 10 Oct., 1154, and at the coronation of Henry II, 19 Dec., 1154. On 7 July, 1157, he assisted at the Council of Northampton, and on 3 June, 1162, he was present at the consecration of Archbishop Thomas Becket of Centerbury, whom he firmly supported later in the conflict with Henry II. Though he was prevailed upon to subscribe to the Constitutions of Clarendon (1164), he soon gave unmistakable evidence of his loyalty to the Holy See, and solemnly published the papal excommunication of Earl Hugh of Norfolk in the cathedral of Norwich in 1166. After the murder of Archbishop Becket, 29 Dec., 1166, history makes little mention of William. He was a friend of John of Salisbury, five of whose letters to William are printed in P.L., CXCIX -- nn. 33, 93, 128, 173, 266.

THOMAS OF MONMOUTH, *Life and Miracles of St. William of Norwich*, ed. JESSOPP AND JAMES (Cambridge, 1896); GOULBURN AND SYMONDS, *Life and Letters of Herbert de Losinga*, II (London, 1878).

MICHAEL OTT
William of Tyre

William of Tyre

Archbishop of Tyre and historian, born probably in Palestine, of a European family which had emigrated thither, about 1127-30; died in 1190, the exact date being unknown. It is not known whether he was French or English. His studies, which were made "beyond the seas", in Italy or France, seem to have been very comprehensive, for besides Greek and Latin he learned Arabic, which he knew sufficiently well to write a history of the Mussulmans according to Arabic manuscripts. He knew the Classic authors, and cites Virgil, Horace, Ovid, Livy, Cicero, etc. He was at Tyre in 1165 and had become a cleric; it was he who blessed (29 Aug., 1167) the marriage between Amaury, King of Jerusalem, and Maria Comnena, niece of the Emperor Manuel. He became Archdeacon of Tyre, fulfilled an important diplomatic mission to Manuel Comnenus (relating to the alliance between the Byzantine Empire and the Kingdom of Jerusalem against Egypt), and was tutor to Amaury's son, the unfortunate Baldwin, who was stricken with leprosy. Baldwin IV, who became king in 1174, appointed William chancellor of the kingdom and then Archbishop of Tyre. Threatened by Saladin and rent by internal disorders, the very life of the kingdom was menaced and William was sent to Europe to arrange for a new crusade (1178); he assisted at the Council of the Lateran (1179), held by Alexander III returned by was of Constantinople, and landed in Palestine, 12 May, 1180. Becoming involved in the disturbances of the kingdom, he lost his post of chancellor (1183), and when the clergy of Jerusalem wanted to elected him patriarch the queen- mother, Maria Comnena, preferred Heraclius to him. The end of his life is obscure. He returned to the West to protest to the pope against the appointment of Heraclius and also to arrange a crusading movement. He assisted at the meeting of Gisors, in which the Kings of France and England, Philip Augustus and Henry II, took the cross (1188). According to a suspicious narrative in the chronicle of Ernoul he was poisoned at Rome by an emissary of Heraclius.

William composed an account of the Council of the Lateran of 1179 and "Gesta orientalium principum", a history of the Orient from the time of Mahomet, fragments of which have been preserved in the "Historia orientalis" of Jacques de Vitry. But the chief work of his which has reached us is the "Historia rerum in partibus transmarinis gestarum", or "Historia Hierosolymitana", in twenty- three books. It is a general history of the Crusades and the Kingdom of Jerusalem down to 1184. The work was begun between 1169 and 1173, at the request of King Amaury. The first sixteen books (down to 1144) were composed with the assistance of pre-existing sources, Albert of Aix,

Raimond d'Aguilen, Foucher of Chartres, etc. On the other hand books seventeen to twenty-three have the value of personal memoirs. As chancellor of the kingdom the author consulted documents of the first importance, and he himself took part in the events which he recounts. He is therefore a chief source for the history of the Kingdom of Jerusalem. His account is in general remarkable for its literary charm. Very intelligent and well informed, the author had very broad views; from his stay at Constantinople he acquired a certain admiration for the Byzantine Empire, and his temperate opinions of John and Manuel Comneus are in contrast with the tone of other European chronicles. The book of William of Tyre was continued by Ernoul and Bernard of Corbie down to 1231. Editions: "Historiens occidentaux des croisades", I (Paris, 1844); P.L., CCI, 209-892.

Hist. litt. de la France, XIV, 587-96; PRUTZ, Studien über Wilhelm v. Tyrus in Neues Archiv, VIII, 93-132; DODU, Hist. des institutions monarchiques du royaume de Jérusalem (Paris, 1894); STEVENSON, William of Tyre's Chronology: The Crusaders in the East (Cambridge, 1907), 361-71; CHALANDON, Jean II et Manuel Commene (Paris, 1912), p. xxxvi-xxxviii; MOLINIER, Les sources de l'hist. de France, II (Paris, 1902), 303-04.

LOUIS BREHIER

William of Vercelli

William of Vercelli

(Or WILLIAM OF MONTE VERGINE.)

The founder of the Hermits of Monte Vergine, or Williamites, born 1085; died 25 June, 1142. He was the son of noble parents, both of whom died when he was still a child, and his education was entrusted to one of his kinsmen. At the age of fifteen he made up his mind to renounce the world and lead a life of penance. With this end in view, he went on a pilgrimage to St. James of Compostella, and, not content with the ordinary hardships of such a pilgrimage, he encircled his body with iron bands to increase his suffering. After this journey he started on a pilgrimage to the Holy Land, but it was revealed to him that he would be of greater service to God if he remained in Italy. He built himself a hut on Monte Vergine, wishing to become a hermit and live in solitude, but it was not long before many people flocked to him to put themselves under his guidance, being attracted by the sanctity of his life and the many miracles which he performed. Soon a monastery was built, and by 1119 the Congregation of Monte Vergine (q.v.) was founded. St. William lived at Monte Vergine until the brethren began to murmur against him, saying that the life was too austere, that he gave too much in alms, and so on. He therefore decided to leave Monte Vergine and

thus take away from the monks the cause of their grievances. Roger I of Naples took him under his patronage, and the saint founded many monasteries, both of men and of women, in that kingdom. So edified was the king with the saint's sanctity of life and the wisdom of his counsels that, in order to have him always near him, he built a monastery opposite his palace at Salerno. Knowing by special revelation that his end was at hand, William retired to his monastery of Gugieto, where he died, and was buried in the church.

Acta SS., V June, 112; VI June, 259; RENDA, *Vita. . .S. Gulielmi* (Naples, 1591).

PAUL BROOKFIELD

William of Ware

William of Ware

(William de Warre, Guard, Guarro, Varro or Varron.)

Born at Ware in Herts; the date of his birth and his death are unknown. He flourished 1270-1300. According to Woodford he entered the Order of St. Francis in his youth and Little thinks he may have been the "Frater G de Ver" who was at the London convent about 1250. He was S.T.P. of Paris, where most of his life was spent. Pitts calls him S. T. P. of Oxford, but his name does not occur in the list of Franciscan Masters at Oxford. That he studied there is not improbable, but there is no authority for the statement. He is said by Dugdale to have been a pupil of Alexander of Hales (d. 1245), and several authorities concur with Bartholomew of Pisa (1399) in calling him the teacher of Duns Scotus. Wadding tells us that on the tomb of Scotus in the old Franciscan church at Cologne was inscribed: "Magister Gulielmus Varro Præceptor Scoti". Scotus mentions William twice in his works (*Quæst. super libros metaph. Aristotelis*, lib. V, q. 10). He was renowned for his deep knowledge of both Aristotelean and Christian philosophy, and because of the solidity of his teaching he came to be styled "Doctor Fundatus" by Wilmot and later writers. William's "Commentary on the Sentences" may be found in many fourteenth-century manuscripts, e.g. at Oxford in Merton College, MS. 103-104; it has never been printed. Other works of his enumerated by Wadding are: "Lecturæ theologicæ" (1 vol.); "Quodlibeticæ quæstiones" (1 vol.); "Quæstiones ordinariæ" (1 vol.), and "Comment. in Aristot." (several volumes). William's teaching on the Immaculate Conception as found in his "Commentary on the Third Book of Sentences" has recently been published apart: "Fr. Gulielmi Guarrae...Quæstiones disputatae de Immac. Concept. B.M.V." (Quaracchi, 1904).

WADDING, *Annales ad an 1304*, no. XXIV, vol. VI, p. 46; IDEM, *Scriptores ord. min.*, (3d ed., 1906), 108; SBARALEA, *Supplementum*, Pt. I (3d ed., 1908), pp. 350-

351; RASHDALL, *The Universities of Europe in the Middle Ages*, II, pt. II (Oxford, 1895), 350; LITTLE, *The Grey Friars in Oxford* (Oxford, 1892), 213.

PASCHAL ROBINSON

William of Waynflete

William of Waynflete

Bishop of Winchester and Chancellor of England, b. towards the end of the fourteenth century; d. at South Waltham, Hampshire, 11 August, 1486. Son of Richard Patten (*alias* Barbour), a gentleman of Waynflete, in Lincolnshire, and of Margery Brereton, he was educated at Winchester College, though not apparently a scholar on the foundation, and at the University of Oxford, where he graduated as bachelor of divinity. He seems to have been ordained sub-deacon at Spalding, the dates are somewhat uncertain) in January, 1420-1, deacon soon afterwards, and priest in 1426. Three years later he was appointed master at Winchester School, and in 1438 Cardinal Beaufort, Bishop of Winchester, presented him to the mastership of St. Mary Magdalene's hospital near that city, a preferment which doubled his income. In 1440 the young King Henry VI visited Winchester and made the acquaintance of Waynflete, whom he selected to be first master and in 1443 provost of his newly-founded college of Eton, near Windsor. Here he laboured with much success for four years, winning high favour and regard from King Henry, who on the death of Beaufort in 1447 nominated Waynflete as his successor in the See of Winchester. Nicholas V confirmed the appointment, and the new bishop was consecrate on 13 July, 1447, in Eton College chapel, and enthroned six months later in Winchester cathedral in presence of the king. Within a year of his taking possession of his see he manifested his zeal for learning by obtaining a royal charter for the foundation of a hall at Oxford dedicated to his old patroness St. Mary Magdalen. Magdalen Hall came into existence in August, 1448, and existed under that title for some ten years, after which it was replaced by the larger foundation, established on the site of the former hospital of St. John, and known ever since as Magdalen College. The buildings, including the chapel, were, as far as erected in the founder's life-time, completed by 1480, and in the following year Waynflete's statutes were approved by Sixtus IV and duly promulgated. Before his death the founder largely increased the endowments of the college, chiefly by the annexation of ecclesiastical and monastic property; and he also provided it with a large and valuable library. A grammar-school, for the education of the choristers and other junior members of the college, likewise formed part of the new foundation.

Returning to Waynflete's early years as Bishop of Winchester, we soon find him involved in the political troubles of the time. The serious rebellion led by Jack Cade

in 1450 was brought to an end mainly through the conciliatory and statesmanlike method in which Waynflete dealt with the insurgents. In the still more formidable disturbances caused by the ambitious schemes of Richard, Duke of York, the bishop never ceased to labour in the cause of peace. His sympathy with the Lancastrian party partly exposed him, of course, to the odium of the Yorkists, who stirred up the people of Winchester against him and even intrigued to deprive him of his see. Henry VI, however, continued to extend to him his fullest confidence, named him visitor of the royal colleges of Eton and King's, Cambridge, and in 1456 appointed him chancellor of the kingdom in succession to Thomas Bourchier. Within a year of his receiving the great seal he found himself involved in the prosecution of his old friend and fellow-student, Reginald Peacocke, Bishop of Chichester, who was tried at Lambeth for teaching and preaching the Lollard errors. Peacocke was deposed from his see, and his books burned not only in London but also in Oxford, in pursuance of a decree obtained by Waynflete from the convocation of the university. The War of the Roses, which broke out in 1458, placed the chancellor in a difficult position. The triumph of Henry at Ludlow was followed by a new outbreak of the Yorkists. Waynflete's efforts for peace and conciliation were fruitless, and he resigned his chancellorship in July, 1460, a few days before the defeat of the Lancastrians at Northampton. A still more decisive victory of the Yorkists on Palm Sunday, 1461, resulted in the proclamation of the Duke of York as king (Edward IV), and lying in hiding for a year, recognized the new order of things and received a full pardon from King Edward. For a few years, released from cares of state, he busied himself with the administration of his diocese and the supervision of Eton College; but in 1470, the revolt of Warwick "the king-maker" having released Henry VI from prison, Waynflete performed the second coronation of his old master. The hopes of the Lancastrians were, however, finally destroyed by their total defeat at Barnet and Tewkesbury, and by the deaths of Henry and his son Edward. Waynflete asked for, and obtained, another full pardon from Edward IV, swore fealty to him and his son, entertained him at Magdalen College, and assisted at his funeral in 1483. Richard III was also received by him at Magdalen, immediately after his coronation, and assigned certain estates to the college in memory of his visit. It was about this time that the venerable bishop, now in the thirty-eighth year of his episcopate, founded and endowed a grammar-school at Waynflete, his native village, in Lincolnshire. Not long afterwards he retired to his palace of South Waltham, where he drew up and signed his will on 27 April, 1486, leaving all his lands to his beloved college at Oxford. He died less than four months later, and was buried in the chantry chapel built by himself behind the choir of Winchester Cathedral, where 5000 masses were by his direction celebrated for the repose of his soul, in honour of

the Five Sacred Wounds. The effigy on his tomb has been thought by his biographers to be an authentic portrait; it is in any case a work of singular power and beauty.

D.O. HUNTER-BLAIR

William of Wykeham

William of Wykeham

Bishop of Winchester, Chancellor of England and founder of Winchester College; b. between July and Sept., 1324; d. 27 Sept., 1404. A native of Wickham, in Hampshire, he was educated at Winchester Grammar School, became secretary to the constable of Winchester Castle, through whom he came under the notice first of the bishop (Edington) and then of King Edward III, into whose service he passed at the age of about twenty-three, in the capacity of architect and surveyor. He superintended much important building, including the reconstruction of Windsor Castle, and was rewarded, according to the bad custom of the times, by receiving valuable ecclesiastical preferments, although not even in minor orders. Between 1357 and 1361 rectories, prebends, canonries, an archdeaconry, and a deaconry were conferred on him, as well as the keepership of a dozen royal castles and manors. It was not, however, until Dec., 1361, that he received minor orders from Bishop Edington, who ordained him priest in the following year. At the same time he became warden of the royal forests in the south of England, and advanced rapidly in the favour of the king, who gave him his entire confidence, consulted him in everything, and named him, in 1364, keeper of the privy seal, an office which so increased his power and influence that, according to Froissart, he "reigned in England, and without him they did nothing". In Oct., 1366, he was elected, on the king's recommendation, to succeed Edington as Bishop of Winchester. The election was, after some delay, confirmed by Pope Urban V, and Wykeham was consecrated on 10 Oct., 1367, having been, a month previously, appointed chancellor of the kingdom.

Raised thus in a few weeks to the richest bishopric and the highest civil office in England, Wykeham was unfortunate in the coincidence of his chancellorship with the serious reverses sustained in the war with France. A cry for the removal of the great

offices of state from the hands of clerics led to Wykeham resigning the great seal in 1372, and gave him more leisure for his episcopal duties. In 1373 he personally visited every church and monastery in his diocese, reformed abuses at Selborne Priory, the hospital of St. Cross, and other religious houses, and made plans for the great educational foundations which were to be the glory of his episcopate. In 1376, however, his work was interrupted by the troubles brought on him by the hostility of John of Gaunt. He was impeached for misgovernment and for misappropriation of state funds; and though only a single minor charge was said to be proved against him, the temporalities of his see were seized, and not released until the death of Edward III. The accession of Richard II saw Wykeham restored to favour; a full pardon was granted to him both by king and parliament, his revenues were restored to him, and he was able to resume the project of founding his college at Oxford. The charter was issued, with royal and papal licence, in 1379; the foundations were laid in 1380; and six years later the college (New College, Oxford) was solemnly inaugurated, the buildings and the endowment being on a scale equally magnificent, and the total number of members on the foundation amounting to no less than a hundred. Side by side with this splendid institution, and closely connected with it, grew up the equally famous grammar school of St. Mary at Winchester, the foundation of which was authorized by papal Bull in 1378, and the charter issued in 1382, providing for the education of seventy-four scholars in preparation for their entering the founder's college at Oxford. This union of grammar school and university was later imitated by Henry VI when founding Eton and King's College, Cambridge; and there are other examples of it. Wykeham was the first founder of a college in which the chapel was an essential part of the design; and his statutes provided for stately and elaborate services, including the daily performance of the Divine office "with chant and note", and the daily singing of seven Masses at the high altar. Every detail of the studies and of the scholastic discipline was regulated by himself; and probably, of all the pre-Reformation colleges of England, Winchester is the one in which (in spite of the change of religion) the original statutes are most closely observed, and the memory of the founder is most deeply venerated. Wykeham's collegiate buildings, finished about 1375, are still in use, but there have been extensive modern additions, and the college still ranks with the greatest of English public schools.

Another important work undertaken by Wykeham was the rebuilding of the nave of his cathedral, or rather its transformation from Norman to Perpendicular. This work, begun by him in 1394, was completed by his successors Cardinal Beaufort and Waynflete. Meanwhile the bishop, after some years of non-interference in state affairs, had for the second time (in 1389) been appointed chancellor, and discharged the office to the satisfaction of Richard II. In little more than two years, however, he finally resigned the position, and from that date until his death took no active part in politics,

although his ability and integrity caused him to be frequently included in committees of the upper house and in royal commissions. He spent the last three years of his life in retirement at his palace of South Waltham, and in 1402 found it necessary to appoint two coadjutor bishops, both fellows of New College. He made his will in July, 1403, bequeathing large sums for charitable purposes and for Masses and suffrages for his soul. Fourteen months later, after several days spent in uninterrupted prayer, he passed peacefully away. According to his own wish he was buried in the chantry built by himself on the south side of the nave of his cathedral, on the site of an altar of the Blessed Virgin. A beautiful altar-tomb, with a recumbent figure, perpetuates the memory of a prelate who, if not specially distinguished as a statesman or a man of learning, was certainly one of the most zealous, generous, and magnanimous occupants of the historic See of Westminster.

D.O. HUNTER-BLAIR

William Perault

William Perault

(PERAULD, PERALDUS, PERALTUS).

Writer and preacher, b. at Perault, France; d. at Lyons; the date of his death is disputed, some placing it before 1260, others extending it to about 1270 or 1275. He studied at the University of Paris, and there, being drawn to the religious life by the preaching perhaps of Blessed Jordan of Saxony, he was received into the Dominican Order. It is thought that Perault was somewhat advanced in years when he embraced the religious state, although the precise date of his entrance into it is also unknown. He entered the order at Paris, but was destined, according to a custom then existing, for the convent at Lyons. At Lyons, where he passed his life, at once contemplative and active, he rendered untold service to the Church by the brilliancy of his writings and preaching and by the charm and splendour of his virtues. His part in ecclesiastical affairs was for a time also very important. For fully ten years he performed all the episcopal functions of the Church of Lyons, having been chosen for this work during the vacancy of the see by Philip of Savoy who, although not in Holy orders, bore the title of Archbishop of Lyons from 1245 to 1267. Because of Perault's long labours in ministering to the needs of the diocese, he himself came to be known as the Bishop or

Archbishop of Lyons. This error was further emphasized by the title of bishop which a later hand added to many of his writings. While, then, we are assured by such trustworthy authors as Gerson, Pere Alexandre, Echard, and Hurter that William Perault was never Archbishop of Lyons, as the authors of the "Gallia christiana" would have us believe, M. Dupin is by no means justified in saying that he was never more than a religious of the Order of Preachers (cf. Touron, "Hist. des hommes illust.", 1, l. 2, 184). Known and reverenced far and wide for singular gifts of nature and grace, he was a man truly powerful in word and work-well deserving the triple title given him by all, of monk, doctor, and apostle.

His most important works are: "Summa de virtutibus et vitiis" (Cologne, 1497, 1618, 1629; Venice, 1492, 1497; Rome, 1557; Lyons, 1668); "Sermones de tempore et de sanctis", which appeared under the name of William III of Paris (Paris, 1494; Cologne, 1629); "De eruditione seu de institutione religiosorum" (Paris, 1512; Louvain, 1575; Lyons, 1585); "De regimine principum", which, as in the Roman edition of 1570, was attributed to St. Thomas and of which, in fact, St. Thomas wrote a part: "Speculum religiosorum seu institutionum vitae spiritualis", which appeared under the name of Humbert V, Master-General of the Order of Preachers.

ECHARD, Script. Ord. Praed., I, 131 sq.; HURTER, Nomenclator; TOURON, Hist. des Hommes Illust., I 182 sq.; L'Annee Dominicaine (Lyons, 1884), 843 sq.

CHARLES J. CALLAN

William the Clerk (Of Normandy)

William the Clerk (of Normandy)

French poet of the thirteenth century. Nothing is known of his life except that he was a clerk of Normandy. Among the works, which may be assigned to him with some certainty, are: "Bestiaire divin" (ed. Hippeau, Caen, 1853), a moral and theological treatise on natural history dealing with man and animals, probably composed about 1210, as the author, in his description of the dove, deplored the sad condition of the Church in England in 1208; "Besant de Dieu", an allegorical poem, composed in 1226 (ed. Martin, Halle, 1869); "Joies Nostre Dame" (ed. Reinsch in "Zeitschrift für Romanische Philologie", III, 1879, p. 2); "Treis moz de l'evesque de Lincoln" (*ibid.*); "Vie de Tobie" (ed. Reinsch in Herrig, "Archiv", 1881). A legend of "St. Magdalen" is also credited to him. The "Roman de Tergus", which is connected with the romances of the Round Table, the "Fabliaux" (short stories), "Prestre et Alison", "Male Honte", and "La fille à la bourgeoise" are no longer regarded as his. Although he probably lived for a time in England, as many Norman clerks did, he did not use the Anglo-Norman dialect, but the French.

Histoire littéraire de la France, XXII, XXIII (Paris, 1856); SEEGER, *Ueber die Sprache des Guillaume le Clerc de Normandie u. über den Verfasser u. die Quelle des Tobias* (Halle, 1881); SCHMIDT, *Guillaume le Clerc de Normandie in Romanische Studien*, IV (1881).

LOUIS N. DELAMARRE

William the Conqueror

William the Conqueror

King of England and Duke of Normandy.

He was the natural son of Robert, Duke of Normandy, his mother, Herleva, being the daughter of a tanner of Falaise. In 1035 Robert set out upon a pilgrimage to the Holy Land, in which he died. Before starting he presented to the nobles this child, then seven years old, demanding their allegiance. "He is little", the father said, "but he will grow, and, if God please, he will mend." In spite of the murder of three of his guardians, and of attempts to kidnap his own person, the child, after a period of anarchy, became the ruler of Normandy in his father's place. He seems to have been a youth of clean life and of much natural piety, while the years of storm and stress through which he passed gave him an endurance and far-sighted resolution of character which lasted to his life's end. In 1047 a serious rebellion of nobles occurred, and William with the aid of Henry, King of France, gained a great victory at Val-ès-Dunes, near Caen, which led, the following year, to the capture of the two strong castles of Alençon and Domfront. Using this as his base of operations, the young duke, in 1054 and the following years, made himself master of the province of Maine and thus became the most powerful vassal of the French Crown, able on occasion to bid defiance to the king himself.

Meanwhile William had begun to take a great interest in English affairs. How far his visit to England in 1051 was directly prompted by designs upon the throne, it is impossible to say. It is in any case likely that his marriage, in spite of the papal prohibition, with Matilda, the daughter of the Earl of Flanders, in 1053, was intended as a check upon the influence exercised in that powerful quarter by Earl Godwin and his sons. Through the mediation of Lanfranc, the future archbishop, the union was legitimized by papal dispensation in 1059, but William and his wife consented to found two abbeys at Caen, by way of penance for their contumacy. Edward the Confessor had been brought up in Normandy, for he was the nephew of Duke Richard II (d. 1026). All through the reign, the king himself and at least a minority of his subjects had turned their eyes across the water, realizing that the Continent represented in general higher religious ideals and higher culture than prevailed at home. Whether

any explicit promise of the succession had been made to the duke may be doubted, but one fact stands out clearly from a mass of obscure and often conflicting details: that King Harold, about the year 1064, finding himself on Norman soil, was constrained to take a solemn oath of allegiance to William. Neither can there be much doubt that this pledge was given with explicit reference to the duke's intention of contesting the English throne. The repudiation of this oath by Harold at the Confessor's death enabled William to assume the character of an avenger of perjury. He was probably sincere enough in believing himself constituted by God champion of the Church, and in obtaining from Pope Alexander II not only a blessing on his enterprise, but the gift of a specially consecrated banner as for a religious crusade. A century later Henry II, when projecting his conquest of Ireland, adopted a similar rôle. At the same time it is not now disputed by impartial historians (e. g. H. C. Davis, or C. Oman) that the claim to establish a better order of things was in fact justified by the event. "The Norman Conquest", says H. C. Davis, "raised the English to that level of culture which the continental people had already reached and left it for the Plantagenets of Anjou to make England in her turn 'a leader among nations'."

After the invasion and the decisive battle of Hastings, William at once marched on London, and there the best and wisest men of the kingdom—for example, such influential prelates as Aldred, Archbishop of York, and St. Wulstan, Bishop of Worcester—came in and tendered submission. Before the end of the year the king was crowned by Aldred (to the exclusion of Stigand) in the newly consecrated abbey-church of Westminster. In 1067 William revisited Normandy, but, owing perhaps in part to the tactlessness or incapacity of the regents, Odo of Bayeux and William Fitzosborn, he was recalled by an alarming series of popular outbreaks: first the south-west, with Exeter for a rallying-point, then the Welsh border, under the Earls Edwin and Morcar, then Northumbria, under Earl Gospatric, to be followed next year (1069) by a still more formidable rising in the north, assisted by the Danes. William met these attempts intrepidly, but sternly. In Northumbria, after the second insurrection, he inflicted a terrible vengeance. The whole country from York to Durham was laid waste, and we learn, for example, from the Domesday Book, that in the district of Amunderness, where there had been sixty-two villages in the Confessor's time, there were in 1087 but sixteen, and these with a vastly reduced population. Neither was this the only instance of such ruthless severity. A terrible penalty was exacted in other centres of rebellion, and we read not only of a wholesale use of fire and sword, but of mutilation and blinding in the case of individual offenders. The Conqueror could respect a brave foe, and he seems, in 1071, to have granted honourable terms to Hereward, the leader of the desperate resistance in the fen-country. But to Waltheof, after the collapse of the rebellion of the earls in 1075, no mercy was shown. The motive was probably

political, for Lanfranc, who was with him at the last, pronounced him guiltless of the offence for which he died.

Having at last reduced the country to submission, William set to work with statesmanlike deliberation to establish his government on a firm and lasting basis. He rewarded his followers with large grants of land, but he was careful to distribute these grants in such a way that the concentration of great territorial power in the same hands was avoided. The new fiefs recorded in Domesday are vast, but scattered. Saxon institutions were as far as possible retained, especially when they might serve as a check upon the power of the great feudatories. For the most part William continued to govern through the sheriffs and the courts of the shire and of the hundred. The national levy of the *fyrd* was retained, and it helped to render the king less dependent upon his vassals. In spite of heavy taxation, the new government was not altogether unpopular, for the Conqueror had confirmed "the laws of Edward", and the people looked to him as their natural protector against feudal oppression. The least acceptable part of the Norman regime was probably the enforcement of the cruel forest laws; but on the other hand, modern authorities are agreed that the chroniclers of a later age enormously exaggerated the devastation said to have been caused in Hampshire by the making of the New Forest.

As for William's ecclesiastical policy, he seems conscientiously to have carried out a programme of wise reform. His appointments of bishops mere on the whole excellent. The separation of the secular and spiritual courts was a measure of supreme and far-reaching importance. The influence of the great monastic revival of Cluny was now, through Lanfranc, brought to bear on many English foundations. To the pope, William was ever careful to show himself a considerate and respectful son, even on such occasions as when he firmly resisted the claim made by Gregory VII to feudal homage. On the other hand, St. Gregory himself commended the king for the zeal he had shown in securing the freedom of the Church, and he was content, while such a spirit prevailed, to leave the sovereign practically free in his appointments to English bishoprics. Altogether Mr. C. Oman does not exaggerate when he tells us that before the Conquest "the typical faults of the dark ages, pluralism, simony, lax observance of the canons, contented ignorance, worldliness in every aspect, were all too prevalent in England"; but he adds that by the Conqueror's wise policy "the condition of the Church alike in the matter of spiritual zeal, of hard work and of learning, was much improved". In the last years of William's reign a great deal of his attention was absorbed by the political complications which threatened his Continental dominions and by the undutiful attitude of his sons. It was in avenging a gibe levelled against him by the King of France that the Conqueror met with an accident on horseback, which terminated fatally 9 Sept., 1087. He had an edifying end and died commanding his soul to Our Lady, "that

by her holy prayers she may reconcile me to her Son, my Lord Jesus Christ". The Saxon chronicler summed up William's character well when he wrote: "He was mild to good men who loved God, and stark beyond all bounds to those who withsaid his will."

(For further details see ENGLAND -- *Before the Reformation.*)

William has found a panegyrist in FREEMAN, *History of the Norman Conquest*, III, IV, V (Oxford, 1870-76); see also LINGARD, *History of England*, I (London, 1849); DAVIS, *England under the Normans and Angevins* (London, 1905); ADAMS in *Political History of England*, II (London, 1905); HUNT in *Dictionary of Nat. Biography*, s. v.; BÖHMER, *Kirche und Staat in England und in der Normandie* (Leipzig, 1899); STENTON, *William the Conqueror* (London, 1908); DUPONT, *Etudes Anglo-Françaises* (Saint-Servan, 1908). The principal sources are the *Gesta Willelmi* of WILLIAM OF POITIERS, the *Anglo-Saxon Chronicle*, the *Historia Ecclesiastica* of ORDERICUS VITALIS, the *Gesta Regum* of WILLIAM OF MALMESBURY and the *Historia Normanorum* of WILLIAM OF JUMIÈGES. On *Domesday Book* and the literature it has evoked, see DOMESDAY BOOK.

HERBERT THURSTON

William the Walloon

William the Walloon

Date of birth unknown; d. (probably) 22 Dec., 1089. He became Abbot of St. Arnoul at Metz in 1050. He continued the good traditions of his predecessor, Abbot Warin, in the government of his monastery, and devoted his leisure to study, especially of the works of St. Jerome and St. Augustine. On 30 June, 1073, Gregory VII wrote to Archbishop Manasses of Reims, rebuking him for his ill treatment of the monks of St-Remi, and ordering him to procure the election of a suitable abbot. William of St-Anoul was elected, but quickly found his position untenable. In spite of promises made to William in person (see his fourth letter), Manasses continued his persecution, and towards the end of 1073 the abbot journeyed to Rome to secure the acceptance of his resignation. In a letter to Manasses, probably sent by William, the pope says that the abbot is very pleasing to him and that he would desire him to retain both abbacies, but that, if he persists in resigning St-Remi, the archbishop is to accept his resignation and seek his advice in the election of a successor. In another letter, to Bishop Herimann of Metz, he informs him that William wishes to return to St-Arnoul, and recommends him to the bishop's charity, "that he may feel that his coming to us has profited him." In the event, Manasses roughly demanded the return of the abbatial crosier and appointed Henry, Abbot of Hoimbliere, in William's place, apparently without consulting him. William returned to Metz, but some twelve years later, though on friendly terms with

Bishop Herimann, weakly allowed himself to be consecrated and intruded into the See of Metz when the Emperor Henry IV drove out the rightful bishop, in 1085. The following year, however, he sought out Herimann, publicly resigned the dignity he had usurped, and retired to the Abbey of Gorze. Shortly afterwards Herimann restored him to his abbey of St-Arnoul.

Of his writings we have seven letters and a prayer of preparation for Mass in honour of St. Augustine. His style is good for the period and shows a considerable knowledge of literature. The first letter is the well-known address of congratulation to Gregory VII on his election to the papacy, reprinted by the Bollandists at the beginning of their commentary on the life of that pope. These remains were discovered by Mabillon at St-Arnoul and first printed by him in his "Analecta vetera", I (Paris, 1675), 247-286.

P.L., CL, 873-90; Hist. litt. de la France, VIII, 305; JAFFE (ed.), Mon. Gregoriana (Berlin, 1865).

RAYMUND WEBSTER

Williamites

Williamites

There were two minor religious orders or congregations of this name: (1) a Benedictine congregation, more often known by the name of its chief house, Monte Vergine (2) the foundations named after St. William of Maleval.

(1) Besides Monte Vergine, St. William of Vercelli founded a considerable number of monasteries, especially in the Kingdom of Naples, including a double monastery for men and women at Guglieto (near Nusco). Celestine III confirmed the congregation by a Bull (4 Nov., 1197). In 1611 there were twenty-six larger and nineteen smaller Williamite houses. Benedict XIV confirmed new constitutions in 1741 to be added to the declarations on the Rule of St. Benedict prescribed by Clement VIII. The mother-house, the only surviving member of the congregation, was affiliated to the Cassinese Congregation of the Primitive Observance in 1879. The community at Monte Vergine retains the white colour of the habit, which is in other respects like that of the black Benedictines. There are said to have been some fifty Williamite nunneries, of which only two survived at the beginning of the eighteenth century. The habit was white with a black veil, and their rule very severe in the matter of fasting and abstinence.

(2) This second congregation was founded by Albert, companion and biographer of St. William of Maleval, and Renaldus, a physician who had settled at Maleval shortly before the saint's death, and was called the Hermits of St. William. It followed the practice of that saint, and quickly spread over Italy, Germany, France, Flanders, and

Hungary. The great austerity of the rule was mitigated by Gregory IX in 1229; at the same time many of the monasteries adopted the Benedictine Rule and others that of St. Augustine. When, in 1256, Alexander IV founded the Hermits of St. Augustine many of the Williamites refused to enter the union and were permitted to exist as a separate body under the Benedictine Rule. In 1435 the order, which about this time numbered fifty-four monasteries in three provinces of Tuscany, Germany, and France, received from the Council of Basle the confirmation of its privileges. The Italian monasteries suffered during the wars in Italy. The last two French houses at Cambrai and Ypres were suppressed by the Congregation of Regulars, while in Germany the greater number came to an end at the Revolution. The chief house at Grevenbroich (founded in 1281) was united to the Cistercians in 1628; the last German house ceased to exist in 1785. The habit was similar to that of the Cistercians.

RAYMUND WEBSTER

Sts. Willibald and Winnebald

Sts. Willibald and Winnebald

(WUNIBALD, WYNNEBALD).

Members of the Order of St. Benedict, brothers, natives probably of Wessex in England, the former, first Bishop of Eichstätt, born on 21 October, 700 (701); died on 7 July, 781 (787); the latter, Abbot of Heidenheim, born in 702; died on 18 (19) December, 761. They were the children of St. Richard, commonly called the King; their mother was a relative of St. Boniface. Willibald entered the Abbey of Waltham in Hampshire at the age of five and was educated by Egwald. He made a pilgrimage to Rome in 722 with his father and brother. Richard died at Lucca and was buried in the Church of St. Frigidian. After an attack of malaria Willibald started from Rome in 724 with two companions on a trip to the Holy Land, passed the winter at Patara, and arrived at Jerusalem on 11 November, 725. He then went to Tyre, to Constantinople, and in 730 arrived at the Abbey of Monte Casino, after having visited the grave of St. Severin of Noricum in Naples. In 740 he was again at Rome, whence he was sent by

Gregory III to Germany. There he was welcomed by St. Boniface, who ordained him on 22 July, 741, and assigned him to missionary work at Eichstätt. Possibly the ordination of Willibald was connected with Boniface's missionary plans regarding the Slavs. On 21 October, 741 (742), Boniface consecrated him bishop at Sülzenbrücken near Gotha. The Diocese of Eichstätt was formed a few years later. Winnebald had, after the departure of his brother for Palestine, lived in a monastery at Rome. In 730 he visited England to procure candidates for the religious state and returned the same year. On his third visit to Rome, St. Boniface received a promise that Winnebald would go to Germany. Winnebald arrived in Thuringia on 30 November, 740, and was ordained priest. He took part in the Concilium Germanicum, 21 April, 744 (742), was present at the Synod of Liptine, 1 March, 745 (743), subscribed Pepin's donation to Fulda, 753; joined the League of Attigny in 762; and subscribed the last will of Remigius, Bishop of Strasburg. With his brother he founded the double monastery of Heidenheim in 752; Winnebald was placed as abbot over the men, and his sister, St. Walburga, governed the female community. Winnebald's body was found incorrupt eighteen years after his death. His name is mentioned in the Benedictine Martyrology. Willibald blessed the new church of Heidenheim in 778. His feast occurs in the Roman Martyrology on 7 July, but in England it is observed by concession of Leo XIII on 9 July. A costly reliquary for his remains was completed in 1269.

FRANCIS MERSHMAN

St. Willibrord

St. Willibrord

Bishop of Utrecht, Apostle of the Frisians, and son of St. Hilgis, born in Northumbria, 658; died at Echternach, Luxemburg, 7 Nov., 739. Willibrord made his early studies at the Abbey of Ripon near York, as a disciple of St. Wilfrid, and then entered the Benedictine Order. When twenty years old he went to Ireland and spent twelve years in the Abbey of Rathmelsigi (identified by some as Mellifont in Co. Louth) under St. Egbert. From him Willibrord and eleven companions received the mission to Frisia, at the request of Pepin. They came to Utrecht but did not remain there, repairing to the court of Pepin. In 692 Willibrord went to Rome, received Apostolic authorization, and returned to his missionary labours. At the wish of Pepin he went for a second time to Rome, was consecrated Bishop of the Frisians by Sergius III (21 Nov., 695) in the Church of St. Cecilia, and given the name of Clement. He also received the pallium from the pope. On his return he laboured among the people assigned to him; to raise recruits for future apostolic work he founded a monastery at Utrecht, where also he built a church in honour of the Holy Redeemer and made it his cathedral. In

698 he established an abbey at the Villa Echternach on the Sure; this villa had been presented to him by St. Irmina, daughter of St. Dagobert II, the donation being legally confirmed in 706.

When Radbod gained possession of all Frisia (716) Willibrord was obliged to leave, and Radbod destroyed most of the churches, replaced them by temples and shrines to the idols, and killed many of the missionaries. Willibrord and his companions made trips between the Maas and the Waal, to the North of Brabant, in Thuringia and Geldria, but met with no success in Denmark and Helgoland. After the death of Radbod he returned (719) and repaired the damages done there, being ably assisted in this work by St. Boniface. Numberless conversions were the result of their labour. Willibrord frequently retired to the Abbey of Echternach to provide more particularly for his own soul; he was buried in the oratory of this abbey, and after death was almost immediately honoured as a saint. Some relics were distributed in various churches, but the greater part remained at the abbey. On 19 Oct., 1031, the relics were placed in a shrine under the main altar of the new basilica. His feast is celebrated on 7 Nov., but in England, by order of Leo XIII, on 29 Nov. Since his burial Echternacht has been a place of pilgrimage, and Alcuin mentions miracles wrought there. The old church was restored in 1862 and consecrated in Sept., 1868. Another solemn translation of the relics took place on 4 June, 1906, from the Church of St. Peter to the new basilica. On this occasion occurred also the annual procession of the holy dancers (see ECHTERNACH, ABBEY OF. -- *The Dancing Procession*). Five bishops in full pontificals assisted; engaged in the dance were 2 Swiss guards, 16 standard-bearers, 3045 singers, 136 priests, 426 musicians, 15,085 dancers, and 2032 players (*Studien u. Mittheilungen*, 1906, 551).

No writing can with certainty be attributed to St. Willibrord except a marginal note in the Calendar of Echternach giving some chronological data. On his testament or last will, which is probably genuine, see "Acts SS.", III Nov., 631. In the national library of Paris (No. 9389) there is a copy of the Gospels under the name of Willibrord; this is an old Irish manuscript and was probably brought by Willibrord from Ireland (Bellesheim, "Gesch. der kath. Kirche in Irland", I, Mainz, 1890, 623).

The *Life* was written by Alcuin and dedicated to BEORN RAD. (Abbot of Echternach). He probably made use of an older one written by a British monk, which is lost. This was used also by THEOFRIC.

FRANCIS MERSHMAN

St. Willigis

St. Willigis

Archbishop of Mainz, d. 23 Feb., 1011. Feast, 23 February or 18 April. Though of humble birth he received a good education, and through the influence of Bishop Volkold of Meissen entered the service of Otto I, and after 971 figured as chancellor of Germany. Otto II in 975 made him Archbishop of Mainz and Archchancellor of the Empire, in which capacity he did valuable service to the State. Hauch (*Kirchengesch. Deutschlands*, III, Leipzig, 1906, 414) calls him an ideal bishop of the tenth century. Well educated himself, he demanded solid learning in his clergy. He was known as a good and fluent speaker. In March, 975, he received the pallium from Benedict VII and was named Primate of Germany. As such, on Christmas, 983, he crowned Otto III at Aachen, and in June, 1002, performed the coronation of Henry II at Mainz; he presided at the Synod of Frankfort, 1007, at which thirty-five bishops signed the Bull of John XVIII for the erection of the Diocese of Bamberg. He always stood in friendly relations with Rome ("Katholik", 1911, 142). In 996 he was in the retinue of Otto III on his journey to Italy, assisted at the consecration of Gregory V and at the synod convened a few days later. In this synod Willigis strongly urged the return of St. Adalbert to Prague, which diocese was a suffragan of Mainz. Willigis had probably consecrated the first bishop, Thietmar (January, 976), at Brumath in Alsace (Hauch, III, 193), and had consecrated St. Adalbert. The latter, unable to bear the opposition to his labours, left his diocese and was, after much correspondence between the Holy See and Willigis, forced to return.

In 997 Gregory V sent the decrees of a synod of Pavia to Willigis, "his vicar", for publication. These friendly relations were somewhat disturbed by the dispute of Willigis with the Bishop of Hildesheim about jurisdiction in the convent at Gundersheim. The convent was originally situated at Brunshausen in the Diocese of Hildesheim, but was transferred to Gundersheim, within the limits of Mainz. Both bishops claimed jurisdiction. After much correspondence and several synods Pope Sylvester declared in favour of Hildesheim. When this sentence was about to be published at a synod of Pohlde (22 June, 1001), Willigis, who was there, left in great excitement in spite of the remonstrances of the delegate, who then placed the sentence of suspension on the archbishop. Formal opposition to Rome was not intended, but if Willigis committed any fault in the matter he publicly rectified all by a declaration at Gundersheim on 5 Jan., 1007, when he resigned all claims to the Bishop of Hildesheim (Katholik, loc. cit., p. 145). In his diocese he laboured by building bridges, constructing roads, and fostering art. In Mainz he built a cathedral and consecrated it on 29 Aug., 1009, in honour of

St. Martin, but on the same day it was destroyed by fire; he greatly helped the restoration of the old Church of St. Victor and built that of St. Stephen. He also built a church at Brunnen, in Nassau. He showed great solicitude for the religious, and substantially aided the monasteries of Bleidenstadt, St. Disibod, and Jechaburg in Thuringia. After death he was buried in the Church of St. Stephen.

MANN, Lives of the Popes, IV (St. Louis, 1910), 372, 391, 399.

FRANCIS MERSHMAN

Williram

Williram

(WALTRAM, WILTRAM).

Scriptural scholar, b. in Franconia (near Worms), Germany; d. in 1085 at Ebersberg, Bavaria. He was a pupil of the celebrated Lanfranc, and, according to Tritheim, studied for some time in the University of Paris. Relinquishing the post of scholastic of the cathedral chapter of Bamberg, he retired to a monastery in Fulda. Soon, Henry III summoned him to the famous Benedictine abbey at Ebersberg, which he ruled with great success for thirty-seven years till his death. He is known principally as the author of a translation and paraphrase of the Canticle of Canticles. In the preface he laments the fact that in Germany grammar and dialectics are held in greater favour than the study of Holy Writ, and expresses his high appreciation of Lanfranc for having devoted himself to a deeper study of the Bible and drawn many German scholars to France. The pages of the work are divided into three columns: The first contains a Latin paraphrase in Leonine hexameters; the second, the text of the Vulgate; and the third, a German exposition in prose. From beginning to end, Williram applies his subject allegorically to Christ and the Church. The numerous still extant manuscripts bear witness to the favour with which the work was received. Hoffmann published two of them in his edition of Williram (Breslau, 1837).

SEEMULLER, Die Handschriften u. Quellen von Willirams deutscher Paraphrase des hohen Liedes (Strasburg, 1877); WALTER, Die deutsche Bibelübersetzung des Mittelalters (Brunswick, 1892); GOSCHLER, Dictionnaire théologique.

CHARLES F. ARNOLD

Wilhelm Wilmers

Wilhelm Wilmers

Professor of philosophy and theology, b. at Boke in Westphalia, 30 January, 1817; d. at Roermond, Holland, 9 May, 1899. He entered the Society of Jesus at Brieg in the canton of Valais, Switzerland, 1834, was expelled from the country with the other Jesuits in 1847, and ordained priest at Ay in Southern France, 1848. Shortly after, he taught philosophy at Issenheim in Alsace, then exegesis at Louvain, theology at Cologne, philosophy at Bonn and Aachen and theology at Maria-Laach. In 1860 Cardinal Geissel requested Wilmer's services as theologian at the provincial council of Cologne. Wilmers also attended the Vatican Council in 1870 as theologian of Bishop Meurin, Vicar Apostolic of Bombay. After a brief residence at Bonn and Munster he went to Ordrupshoj, near Copenhagen, where he wrote a refutation of the attacks of the Protestant preacher Martensen on the Catholic Church. It was translated into Danish by the prefect Apostolic Hermann Grüder, and published under the latter's name with the title: "Det protestanske og katholiske Trosprincip" (Copenhagen, 1875). In 1876 Wilmers was called by Cardinal Archbishop Pie to the theological faculty of Poitiers. In 1880 he lectured on theology to the French Jesuits at St. Helier; afterwards he taught theology on the Island of Jersey. Thenceforward he devoted himself entirely to writing, living first at Ditton-Hall, England, and then at Exaeten in Holland. Besides the above treatise Wilmers wrote: "Lehrbuch der Religion" (1855-57); "Geschichte der Religion" (1856), translated into several languages; "Lehrbuch der Religion fur höhere Lehranstalten" (1869); "Handbuch der Religion" (1871). These treatises were frequently republished. His last works were "De religione revelata" and "De Christi ecclesia" (1897); he nearly finished the third volume of the series "De fide divine", which was published in 1902.

THOLEN, Menologium oder Lebensbilder aus der Gesch. der deutschen Ordensprovinz (Roermond, 1891), printed for private circulation.

N. SCHEID

Diocese of Wilmington

Diocese of Wilmington

(WILMINGTONIENSIS).

Erected 3 March, 1868. It includes what is known as the Delmarvia Peninsula, the State of Delaware, nine counties of Maryland, and two counties of Virginia east of

Chesapeake Bay. The first Catholic mission in this territory was founded at Bohemia Manor, Cecil Co., Maryland, in 1704 by the Jesuits, who were the only priests on the peninsula until 1808, when Rev. Patrick Kenny came to reside at Coffee Run, Delaware (see DELAWARE). The first church in the city of Wilmington was St. Peter's (1808), now the cathedral. The first bishop was Rt. Rev. Thomas A. Becker (q.v.), before his election a priest at Richmond, Virginia. He found in the new diocese only eight priests and fourteen churches, most of these scarcely more than sheds. St. Peter's Orphanage and St. Peter's School were in charge of the Sisters of Charity, two more school had recently been closed, and the sisters withdrawn to Philadelphia. The Catholic population of the whole diocese did not exceed 5000. By constant and untiring effort in the face of extreme poverty, scarcity of vocations, and many other difficulties, Bishop Becker increased the number of churches to twenty-six and the clergy to twenty-one. He brought to the diocese the Benedictine fathers, the Sisters of St. Francis (Glen Riddle, Pa.), and the Sisters of the Visitation. He also founded an orphan asylum for boys. During his episcopate the Catholic population increased to about 18,000.

In 1886 Bishop Becker was transferred to Savannah, Georgia, and was succeeded by Rev. Alfred A. Curtis, at that time chancellor of the Archdiocese of Baltimore. Bishop Curtis was born on 4 July, 1831, in Somerset Co., Maryland, and was therefore a native of the diocese. He was reared as an Episcopalian, and was ordained to the ministry of that church. As such he was stationed a short time at Chestertown, Kent Co., Maryland, in his future diocese. In 1872 he visited England, where he was received into the Church by Cardinal Newman. Returning he entered St. Mary's Seminary, Baltimore, where he was ordained by Archbishop Bayley, 19 Dec., 1874. He was consecrated Bishop of Wilmington of 14 Nov., 1886. To pay off numerous debts contracted in the rapid extension of the diocese by his predecessor and to provide labourers and means to continue the work was a task that called for unusual zeal and energy. Yet so well did he fulfil it that in the ten years of his episcopate the number of churches was increased by thirteen and the clergy by eight. He established a mission for coloured people, placing the Josephite Fathers in charge. He also brought to the diocese the Benedictine and the Ursuline Sisters. One of his chief works is the Visitation Monastery, which he built and had endowed in order that the sisters might become exclusively contemplative according to the primitive rule of their order. He died on 14 July, 1908, and, at his own request his remains were buried within the enclosure of this monastery. In 1896 Bishop Curtis resigned, leaving the diocese with 39 churches served by 29 priests, and with four communities of teaching sisters, 1 contemplative community, 3 orphanages, an industrial school, and a Catholic population of 25,000.

The third and present bishop is the Rt. Rev. John J. Monaghan. He was born 23 May, 1856, at Sumter, South Carolina, and educated at St. Charles College, Ellicott

City, Maryland, and St. Mary's Seminary, Baltimore. He was ordained on 19 Dec., 1880, and served at various posts in the Diocese of Charleston until his appointment as bishop. He was consecrated at St. Peter's Pro-Cathedral on 9 May, 1897. Under his administration the growth of the diocese has continued. Among the most notable of his acts are the introduction of the Oblate Fathers of St. Francis de Sales (1903) and the Little Sisters of the Poor (1903). The former conduct a day college for boys, while the latter care for the aged poor. The churches already in existence have been remodelled, new buildings provided for the orphans, four new churches added in the country and two in the city, a residence for the bishop was purchased, and all placed on a prosperous footing during this administration. The growth of the diocese continues, not with the strides of those dioceses where immigration is large, but, if slowly, yet surely. Over eighty per cent of the Catholic population is in Wilmington and its neighbourhood. The foreign elements are found here almost exclusively. The parochial schools, with a single exception, are in or around the city. The remainder of the diocese is still a missionary district, the Catholics are few and scattered, and some churches are visited only once a month. In the whole diocese the Catholics form less than nine per cent of the population.

Statistics (1911)

Diocesan priests 38; religious 18; churches with resident priests 27; mission churches 21; chapels 5; stations 14; academies 2; college 1; parochial schools 13, with 3900 pupils; orphan asylums 256; industrial school for coloured boys 1, with 60 inmates; religious communities of men 3; communities of women 7; Catholic population 35,000.

JAMES L. MCSWEENY

Richard Wilton

Richard Wilton

Died December 21, 1239. He was a medieval scholar of whom little is known except that he was an Englishman who joined the Trinitarians. His works included a commentary on the "Sentences" of Peter Lombard, a treatise in five books against the heresies of his own age, commentaries on Genesis and the prophecy of Jeremias, three books of quodlibets, a treatise on the immortality of the soul, and four books on Divine grace. All current information is derived from the statements of Oldoinus in his "Athenaeum Romanum", published at Perugia in 1676; but the facts given will not bear examination. Thus it is said that he was nominated Archbishop of Armagh by

Innocent III; but he certainly never became archbishop. He is said to have been created cardinal by Gregory IX with the title of St. Stephen on the Caelian Hill, but his name is not found in the lists of cardinals compiled by de Mas Latrie, or the more recent researches of Conrad Eubel. The additional statement that he was a doctor of Oxford, Cambridge, and Paris is intrinsically impossible, at least so far as Cambridge is concerned.

OLDOINUS, *Athenaeum Romanum* (Perugia, 1676); LELONG, *Bibliotheca Sacra* (Paris, 1723), giving the date of his death as 1439; FABRICIUS, *Bib. Med. AEt.*, VI (Hamburg, 1746), giving date of his date as 1339, by an obvious misprint; HURTER, *Nomenclator Litcrarius* (Innsbruck, 1899).

EDWIN BURTON

Wilton Abbey

Wilton Abbey

A Benedictine convent in Wiltshire, England, three miles from Salisbury. A first foundation was made as a college of secular priests by Earl Wulstan of Wiltshire, about 773, but was after his death (800) changed into a convent for 12 nuns by his widow, St. Alburga, sister of King Egbert. Owing to the consent given by this king he is counted as the first founder of this monastery. St. Alburga herself joined the community, and died at Wilton. King Alfred, after his temporary success against the Danes at Wilton in 871, founded a new convent on the site of the royal palace and united to it the older foundation. The community was to number 26 nuns. Wilton is best known as the home of St. Edith, the child of a "handfast" union between Edgar, King of the English (944-75), and Wulfrid, a lady wearing the veil though not a nun, whom he carried off from Wilton probably in 961. After Edith's birth, Wulfrid refused to enter into a permanent marriage with Edgar and retired with her child to Wilton. Edith, who appears to have been learned, received the veil while a child, at the hands of Bishop Ethelwold of Winchester, and at the age of fifteen refused the abbacy of three houses offered by her father. She built the Church of St. Denis at Wilton, which was consecrated by St. Dunstan, and died shortly afterwards at the age of twenty-three (984). Her feast is on 16 September. St. Edith became the chief patron of Wilton, and is sometimes said to have been abbess. In 1003 Sweyn, King of Denmark, destroyed the town of Wilton, but we do not know whether the monastery shared its fate. Edith, the wife of Edward the Confessor, who had been educated at Wilton, rebuilt in stone the monastery which had formerly been of wood. In 1143 King Stephen made it his headquarters, but was put to flight by Matilda's forces under Robert of Gloucester. The Abbess of Wilton held an entire barony from the king, a privilege shared by only three other English

nunneries, Shaftesbury, Barking, and St. Mary, Winchester. Cecily Bodenham, the last abbess, surrendered her convent on 25 March, 1539. The site was granted to Sir William Herbert, afterwards Earl of Pembroke, who commenced the building of Wilton House, still the abode of his descendants. There are no remains of the ancient buildings.

DUGDALE, *Monasticon Anglicanum*, II (London, 1846), 315; HUNT in Dict. Nat. Biog., s.v. EDITH (London, 1888).

RAYMUND WEBSTER

Wimborne Minster

Wimborne Minster

(*Also WIMBURN or WINBURN*).

Located in Dorsetshire, England. Between the years 705-23 a double monastery like the famous house of St. Hilda at Whitby was founded at Wimborne by Sts. Cuthburga and Quimburga (feast 31 Aug.), sisters of Ine, King of the West Saxons (688-726). The discipline of Wimborne which followed the Benedictine Rule was especially severe in the matter of the nuns' enclosure, into which not even prelates were allowed to enter. Under the Abbess St. Tetta, there were a large number of nuns, among them St. Lioba, who was summoned to Germany by St. Boniface to govern the convent at Bischoffsheim, and her companion St. Thecla, afterwards Abbess of Kitzingen. The monastery was probably destroyed by raiding Danes in the ninth century: every trace of the Saxon buildings has vanished and even the site of St. Cuthburga's Church is uncertain.

Secular canons were established at Wimborne either by King Edward the Confessor or one of his predecessors of the same name. The church was collegiate and a royal free chapel, and is so entered in Domesday Book. The list of the deans, who were of royal appointment, exists from 1224 to 1547. The establishment numbered 17 persons, a dean, 4 prebendaries, 3 vicars, 4 deacons, and 5 singing men. The deanery was in every case held in conjunction with some more important office. Reginald Pole was Dean of Wimborne from 1517 to 1537, being but 17 years of age on his appointment. In 1547 the college was suppressed. The minster is now the Anglican parish church. Its extreme length is 198 feet. The width, exclusive of the transepts, varies from 23 feet in the nave to 21 in the choir and presbytery. There is a western tower 95 feet in height, and another above the transepts (84 feet). The thirteenth-century spire which formerly crowned this latter tower fell in 1600. The present church is the result of gradual growth during the church-building centuries up to the Reformation, without any of the great rebuilding operations such as took place in churches possessing popular shrines or great revenues. The church has suffered considerably at the hands of nineteenth-century

restorers. It contains the beautiful altar-tomb of John Beaufort, Duke of Somerset, and Margaret his wife, the parents of the celebrated Lady Margaret, Foundress of Christ's and St. John's Colleges at Cambridge, and mother of King Henry VII. A small chained library dating from 1686 occupies a room over the vestry.

PERKINS, Wimborne Minster and Christ Church Priory (London, 1902); STANTON, Menology of England and Wales, 431; HUTCHINS, Hist. of Dorsetshire, II, 532; DUGDALE, Monasticon, II, 88; VI, 1452.

RAYMUND WEBSTER

Boniface Wimmer

Boniface Wimmer

Archabbot, b. at Thalmassing, Bavaria, 14 January, 1809; d. at St. Vincent Archabbey, Beatty, Pennsylvania, 8 Dec., 1887. He made his Classical studies at Ratisbon and entered the University of Munich to study law. When some scholarship fell vacant in the Gregorianum he took the competitive examination with a view to studying for the priesthood, and, having won a scholarship, he finished his theological course there and was ordained on 1 August, 1831. After serving one year as curate at Altötting, a well-known place of pilgrimage, he entered the Abbey of Metten, where Benedictine life had just been restored through royal favour, and made his solemn vows on 27 Dec., 1833. For several years he lived the common life of obedience, and during that time he became interested in the matter of foreign missions. Reading much about the neglected condition of the German immigrants in North America he finally made plans and took steps to transplant Benedictine activity into the United States. Several young men offered themselves to him as candidates; in a characteristic letter he explained to them the difficulties and sacrifices incidental to the undertaking and asked them to withdraw their application unless they were willing to carry with him the cross of absolute self-sacrifice and to make the will and the glory of God their sole motive in the undertaking.

With five students and fifteen brother candidates Boniface Wimmer arrived in New York (16 Sept., 1846), where several well-meaning priests did their best to persuade him to abandon his plans, but their prophecies of certain failure did not discourage him. He went to the Diocese of Pittsburgh, and accepted some land which Father H. Lemke, for years associated with the Rev. Prince Gallitzin, had offered him. Conditions here in Carrolltown, proving unfavourable for the undertaking, he moved to a place forty miles east of Pittsburgh and accepted from Bishop O'Connor the location where St. Vincent Archabbey, College, and Seminary stand to-day. Under innumerable difficulties the new foundation slowly grew and prospered. The Louis mission society and

several friends and benefactors helped the cause with pecuniary means. The school and the seminary were visibly blessed in their efforts, and the monastic community did much good by looking after the religious interests of the scattered settlers, and organizing them into parishes. Calls for German-speaking priests came from all sides and many bishops offered to the growing Benedictine community German parishes for which they could not provide suitable priests of their own. In 1855 Father Wimmer became the first abbot of the monastery.

Although he was always willing to help any religious cause to the extent of his means, Father Wimmer repeatedly, in his correspondence with applicants for admission into the order, emphasized the point that the primary object of Benedictine life is not any particular external activity, but the perfect Christian life according to the Rule of Saint Benedict. Often generous to a fault, he never counted the cost when good was to be done, but held fast to this supreme Benedictine law. All his undertakings prospered; he often accepted work that nobody else would undertake because it seemed hopeless, and at the same time, having so spent his available men and means, he turned over the most promising and honorable work to others. At his death five abbeys had grown out of his work and others were in course of formation. Hundreds of priests had been already educated in the schools which he founded, and many a good cause had received a mighty impulse through the Benedictine life which he had spent himself to establish in America.

WALTER STEHLE

Jakob Wimpfeling

Jakob Wimpfeling

Humanist and theologian, b. at Schlettstadt, Alsace, 25 July 1450; d. there, 17 Nov., 1528. He went to the school at Schlettstadt conducted by Ludwig Dringenberg, and from 1464 was a student at the University of Freiburg (baccalaureus, 1466); later he went to Erfurt and Heidelberg (magister, 1471). He then studied canon law for three years, and finally theology. In 1483 he was cathedral preacher at Speyer. In 1498 Philip, the Elector Palatine, called him to Heidelberg as professor of rhetoric and poetry. From 1513 he lived at Schlettstadt, where a circle of pupils and admirers gathered around him. Differences of opinion caused by the Lutheran doctrine broke up this literary society, and Wimpfeling died lonesome and embittered.

His literary career began with a few publications in which he urged the more frequent holding of synods, the veneration of the Blessed Virgin, and an improvement

of the discipline of the clergy. The "Elegantiarum medulla" (1493) is an extract from Valla's books on the elegance of the Latin language. In the "Isidoneus germanicus" (1496) he presented his pedagogical ideals, and opposed Scholasticism. The teaching of grammar should lead to the reading of heathen writers who were not immoral and especially of the Christian writers. He also laid emphasis on learning the practical sciences. His most important work, "Adolescentia" (1500), was intended to supplement "Isidoneus". Here he set forth the ethical side of his pedagogical scheme. The troubles of the Church spring from the bad training of the young; consequently, young people must be trained so as to be well-established in morals. He then discusses the details of twenty laws for young men. He showed himself a fiery patriot in the "Germanic" (1501), which involved him in a feud with Murner. His "Epitome rerum germanicarum" is a short history of the Germans, drawn in some particulars from other historians. In several writings he opposed abuses in the Church. After Luther's excommunication he took part in the attempt to prevail upon the Curia to withdraw the ban. This caused him to be suspected of having written a lampoon on the Curia, "Litancia pro Germania", that was probably composed by Hermann von dem Busche. In 1521 he submitted to the Church, of which he was ever afterwards a loyal son. In 1524 he added to Emser's dialogue against Zwingli's "Canonis missae defensio" a letter to Luther and Zwingli, in which he exhorted them to examine the Scriptures carefully in order to discover for themselves that the Canons of the Mass contains nothing contrary to the doctrines and customs of the early Church. He then retired from the struggle, and was ridiculed by fanatical partisans of Luther as a renegade and a persecutor of heretics. He was one of the best representatives of moderate humanism, one who honestly sought and wanted much that was good, but who generally only half attained his desires.

SCHMIDT, Histoire littéraire de l'Alsace (Paris, 1879), I, 1-187; II, 317- 39;
KNEPPER, Jakob Wimpeling (Freiburg, 1902).

KLEMENS LOFFLER

Konrad Wimpina

Konrad Wimpina

(WIMINAE, WIMINESIS).

Theologian, b. at Buchen in Baden, about 1465; d. at Amorbach in Lower Franconia, 17 May, 1531. His family, whose name was Koch, came from Wimpfen on the Neckar, hence he was called Wimpina. He matriculated at the University of Leipzig (1479-80) and remained there until 1505; in 1481 he obtained the baccalaureate degree, and in 1485 was made *magister*. He was a pupil of Martin Polich of Mellerstadt and an adherent of Thomistic philosophy. In 1491 he was made a member of the philosophical faculty,

in 1494 rector, and in 1494-95 dean. Having taken the theological course, he was made cursor in 1491 and *sententiarius* in 1494; in 1502 he received the degree of licentiate. He was ordained at Wurzburg, in 1495, as subdeacon, about 1500 as priest. He received the degree of Doctor of Theology from Cardinal-Legate Perandi at Leipzig, 1503. In 1505 Elector Joachim I of Brandenburg called Wimpina to Frankfort-on-the-Oder to organize the new university and to be its first rector; he was several times dean of the theological faculty. He received canonries in the cathedrals of Brandenburg and Havelberg, and in 1530 took part in the Diet of Augsburg as theologian of the Elector Joachim, whom he accompanied to Cologne for the election of King Ferdinand. He then retired to his native land.

His first publication, "Ars epistolandi" (1486), and a poem in praise of the university and city of Leipzig (1488) are of little importance. In 1493 Wimpina showed in the "Tractatus de erroribus philosophorum" that Aristotle was wrong in various propositions which disagreed with dogma. As rector he delivered several orations that show wide reading. From 1500-04, in a dispute with his former instructor Polich, Wimpina defended theology and Polich poetry, each attaching the other with exaggerated and personal abuse. Wimpina was one of Luther's first opponents. In 1518 he defended the legend that St. Anne had three husbands in succession and had a child Mary, by each one of them (De d. Annae trinubio), against Sylvius Egranus, in whose defence Luther took part. In the dispute over indulgences Wimpina composed the theses which Johann Tetzel debated at Frankfort, 20 January, 1518. These theses contained the doctrine of the Church, but on the question of indulgences for the dead maintained merely a Scholastic opinion, preached by Tetzel. He also wrote a series of treatises and held disputations against Luther's doctrine. His polemics are combined in the "Anacephalaeosis" (1528), one of the most complete refutations of Lutheranism. In that age of pamphlets the work did not receive the attention it deserved. At the Diet of Augsburg Wimina, Mensing, Redorfer, and Elgersma drew up, against Luther's seventeen Swabian articles, the "Christlichen Unterricht gegen die Bekanntnus M. Luthers". Wimpina was commissioned to confute the "Confessio Augustana", and took part in the disputation about reunion. He was conservative, quiet, of unimpeachable character, immovable in his convictions, but somewhat petty by nature.

Wimpina, *Farrago miscellaneorum*, ed. HOST (Cologne, 1531); MITTERMULLER, Wimpina in *Katholik* (1869), I, 641-81; II, 1-20, 129-65, 257-85, 385-403; NEGWER, Wimpina (Breslau, 1909).

KLEMENS LOFFLER

Ancient See of Winchester

Ancient See of Winchester

(WINTONIA, WINTONIENSIS).

This diocese came into existence in 635 when the great missionary Diocese of Dorchester, founded by St. Birinus in 634 for the Kingdom of Wessex, was subdivided into the Sees of Sherborne and Winchester. The two dioceses were ruled by one bishop until 676, when a real separation was effected. The Diocese of Winchester then consisted of Hampshire, Surrey, and Sussex; but Sussex was afterwards formed into the See of Chichester, and the Isle of Wight was added to Winchester. The church at Winchester, which became the cathedral of the new diocese, had been founded and endowed in 634 by King Cynefils, whose son Coenwealh added more lands to its possessions. When Wessex gradually assumed the supremacy the importance of the see greatly increased. After the metropolitan Sees of Canterbury and York, it ranked first among all English bishoprics till the reformation; this position the Anglican see still enjoys. It gained increased honour by the episcopate and subsequent canonization of St. Swithin, its seventeenth bishop. When his relics were enshrined there the cathedral, which had been under the patronage of St. Amphibalus, was dedicated to St. Swithin. It occupied the site of an earlier edifice dating from the Roman occupation, which had been converted into a pagan temple by the Saxons.

A new cathedral was built by Cynefils, and three hundred years later was enlarged by Bishop Aethelwald, who replaced the secular canons by Benedictine monks and built a large monastery. After the conquest the first Norman bishop, Walkelin, built a cathedral in the Norman style on a site near by; much of his work remains in the present edifice. To this new building (consecrated in 1093) the relics of St. Swithin were solemnly transferred, 15 July. Within its walls took place the burial of William Rufus (1100), the coronation of Richard I (1194), the marriage of Henry IV (1401), and the marriage of Queen Mary (1554). During the Middle Ages the building was gradually transformed from Norman to Gothic; the nave especially affords an interesting example of the way in which such changes were effected. This work, begun by Edington, was continued by the great bishop, William of Wykeham, and his successors. In 1378 Wykeham obtained the pope's license of the foundation of his great school at Winchester, and in 1387 he began the buildings which were opened in 1393. The original foundation provided for a warden, ten fellows, three chaplains, seventy scholars, and sixteen choristers.

The following is the list of bishops of Winchester with the dates of accession (after 909 the chronology is certain):

- Wini, 662-63
- Hlothere (Leutherius), 670-76
- St. Haeddi, 676- 705
- Daniel, 705-44
- Hunfrith, 744-54
- Cyneheard, d. before 778
- Aethelheard, d. before 778
- Ecgbeald, d. 781-85
- Dudd, d. 781-85
- Cynebearht, d. 801-03
- Eahlmund, d. 805-14
- Wigthegn (Wigferth or Wigmund), d. 833
- Herefrith, d. 833
- Eadmund (uncertain)
- Eadhun, d. 838
- Helmstan, 838(?)
- St. Swithin, 852-62
- Ealhfrith, d. 871-77
- Tunbearht, d. 877-79
- Denewulf, 879-909
- St. Frithustan, 909
- St. Beornstan, 931
- Aelfheah, I, 934

- Aelfsige I, 951
- Beorhthelm, 960
- St. Aethelweald I, 963
- St. Aelfheah II, 984
- Ceonwulf, 1006
- Aethelweald II, 1006
- Aelfsige II, 1012 or 1014
- Aelfwine, 1032
- Stigand, 1047
- Aelfsige III (doubtful)
- Walkelin, 1070
- William de Giffard, 1100
- Henry de Blois, 1129
- *Vacancy*, 1171
- Richard Tocliffe, 1174
- Godfrey de Lucy, 1189
- Peter de la Roche, 1204
- *Vacancy*, 1238
- William de Raleigh, 1244
- Aymer de Valence, 1250
- *Vacancy*, 1261
- John of Exeter, 1265
- Nicholas of Ely, 1268
- *Vacancy*, 1280
- John de Pontissara, 1282

- Henry Woodlock, 1305
- John Sandale, 1316
- Reginald Asser, 1320
- John Stratford, 1323
- Adam Orleton, 1333
- William Edingdon, 1346
- William of Wykeham, 1367
- Henry of Beaufort, 1405
- William of Waynflete, 1447
- Peter Courtenay, 1486
- Thomas Langton, 1493
- Richard Fox, 1500
- Thomas Wolsey, 1529
- Stephen Gardiner, 1531
- John White, 1556-60 (last Catholic bishop)

The diocese contained 362 parishes under two archdeaconries, Winchester and Surrey. The arms of the see were gules two keys endorsed in bend, the uppermost argent, the other or, a sword interposed between them in bend sinister, of the second, pommels and hilts of the third.

EDWIN BURTON

Johann Joachim Winckelmann

Johann Joachim Winckelmann

Archaeologist and historian of ancient art, born at Stendal near Magdeburg, in 1717; assassinated at Triest, in 1768.

After a wandering life devoted, in spite of scanty means, to the eager acquisition of knowledge, especially of Classical learning, he settled in Saxony in 1748. Here, close to Dresden with its art treasures, he obtained a position in the library of a count and had opportunities to visit the libraries and art collections of the capital.

He derived much benefit from his acquaintance with the painter Friedrich Oeser, by whom he was led to give his attention to the critical judgment of works of art and who stimulated him to write the work "Gedanken über die Nachahmung der griechischen Werke in der Malerei und Bildhauerkunst" (1755). In this book, written with extravagant enthusiasm for antiquity, the expression, "Noble simplicity and calm greatness of Greek statues", occurs for the first time. Winckelmann was also a friend of the painter Dietrich and the archaeologist Heyne.

In 1754, after Winckelmann had become a Catholic, the king, to whom he had dedicated the work just mentioned, took more interest in him and granted a pension which enabled Winckelmann towards the end of 1755 to undertake his long-desired trip to Rome. By a careful study of the collections of painting at Rome, the libraries, the remains of ancient architecture, and especially the collections of antiquities at the Capitol, the Vatican, and the villas of the Borghesi, Medici, Ludovisi, etc. Winckelmann became the greatest authority in archaeology, a position which he maintained for many years. The painter Mengs did much to encourage his Classical taste, and Cardinal Albani, whose counsellor in learned matters Winckelmann became, proved himself a munificent patron. Winckelmann supervised the buildings erected by the cardinal, enriched his collections, and made known their value. He spent considerable time in Florence, cataloguing the collection of engraved gems belonging to Baron von Stosch. Of more importance were his journeys of investigation to Southern Italy, during which he studied the antiquities of Herculaneum, Pompeii, and Paestum. He was not able to make his much-desired visit to Sicily and Greece, yet this did not prove very detrimental to his life-work and his reputation. Although his history of art is based almost entirely

upon the study of Roman works of art or Roman copies of Greek originals, yet with prophetic glance he had grasped the genuine spirit of antiquity.

As the first literary guide to ancient art, Winckelmann won such fame that several succeeding generations were satisfied to accept his deductions and criticisms without paying much attention to newer discoveries. As a matter of fact, the "Geschichte der Kunst des Altertums" (Dresden, 1764; with notes upon it, Dresden, 1867) compels admiration not only for the industry of the author, who completed the great work while producing other books on various subjects, but, above all, for the spirit in which he grasped and presented, in general correctly, the conception of art of classic times. Occasionally, however, his views are one-sided and extreme. In 1766 a French translation of his history of ancient art was printed at Paris and Amsterdam. In the first part of the work he takes up aesthetic questions and treats of the origin and form of art, and of the different types under which it appeared in various nations. According to him the first and most important point in works of art is the idea embodied, whether original or partly borrowed; the second is beauty, that is, the variety in the simplicity; the third, technic. In the second part of the history, Greek art alone is discussed and it is brought down to the time of the Emperor Severus and Constantinople. Winckelmann's "Monumenti antichi inediti" (2 vols., with 216 plates, Rome, 1767) is a masterpiece of interpretation and explanation. The great archaeologist died a devout and sincere Catholic (*Historisch-politische Blätter*, 1858, 299 sqq.).

G. GIETMANN

Windesheim

Windesheim

An Augustinian monastery situated about four miles south of Zwolle on the IJssel, in the Kingdom of Holland. The congregation of canons regular, of which this was the chief house, was an offshoot of the Brethren of the Common Life and played a considerable part in the reforming movement within the Catholic Church in Holland and Germany during the century which preceded the Reformation. The Brethren of the Common Life, who did not form an order or congregation strictly so called, had become obnoxious to the mendicant friars, and the object of their attacks. To remedy this, Gerard Groot, when on his deathbed (1384), advised that some of the brethren should adopt the rule of an approved order (Chron. Wind., 263). His successor, Florence Radewyns, carried this advice into effect. Six of the brethren, carefully chosen as spe-

cially fitted for the work, among them John, elder brother of Thomas a Kempis, were sent to the monastery of Eymsteyn (founded 1382) to learn the usages of the Augustinian Canons. In 1386 they erected huts for a temporary monastery at Windesheim, and in March of the following year commenced the building of a monastery and church, which were consecrated by Hubert Lebene, titular Bishop of Hippo and auxiliary of Utrecht, on 17 Oct., 1387. At the same time the six brethren took their vows. The real founder of the greatness of Windesheim was Johann Vos, the second prior (1391-1424), under whom the number of religious was greatly increased and many foundations were made. The first of these were Marienborn near Arnheim and Niewlicht near Hoorn (1392). These two houses with Eymsteyn and the mother-house were the first members of the congregation or chapter (*capitulum*) as it was then called. It was approved and received certain privileges from Boniface IX in 1395. The constitutions added to the Rule of St. Augustine were approved by Martin V at the Council of Constance. An annual general chapter was held at Windesheim "after the fashion of the brethren of the Carthusian Order", at which all the priors proffered their resignation. The prior of Windesheim was the superior prior, or head of the congregation, with considerable powers. After 1573 a prior-general was elected from among the priors of the monasteries. The choir Office at first followed in general the Ordinarium of Utrecht (for the reform of the Windesheim liturgical books by Radulfus de Rivo, Dean of Tongres, see Mohlbeg, op. cit. *infra*). The Windesheim Breviary was printed at Louvain in 1546.

The life of the canons was strict, but not over-severe; we are told that a postulant was asked if he could sleep well, eat well, and obey well, "since these three points are the foundation of stability in the monastic life". The constitutions exhibit in many points the influence of the Carthusian statutes. The canons wore a black hood and scapular, with a white tunic and rochet; the lay brothers were dressed in gray.

By 1407 the congregation numbered twelve monasteries. In 1413 it was joined by the seven Brabant houses of the Groenendaal congregation, of which the famous mystic Ruysbroek had been a member, and in 1430 by the twelve houses of the Congregation of Neuss in the Archdiocese of Cologne. When the Windesheim Congregation reached the height of its prosperity towards the end of the fifteenth century, it numbered eighty-six houses of canons, and sixteen of nuns, mostly situated in what is now the kingdom of Holland, and in the ecclesiastical Province of Cologne. Those which survived the Reformation (they still numbered 32 in 1728) were suppressed at the end of the eighteenth or beginning of the nineteenth century. Uden in Holland is the only survivor at the present day (Heimbucher, 11, 43). The destruction of Windesheim itself began in 1572, when the altars in the church were destroyed by the people of Zwolle; the suppression came in 1581. There are now practically no remains of the buildings.

The last prior of Windesheim, Marcellus Lentius (d. 1603), never obtained possession of this monastery.

The Windesheimers numbered many writers, besides copyists and illuminators. Their most famous author was Thomas a' Kempis. Besides ascetical works, they also produced a number of chronicles, of which we may mention the "Chronicle of Windesheim" by Johann Busch. An emendation of the Vulgate text and of the text of various Fathers was also undertaken. Gabriel Biel, "the last German scholastic", was a member of the congregation. A number of books were translated into German, and, besides the regular monastic library, a library of German works was established in each house for lending to the people. The chief historical importance of the Windesheim Canons lies in their reforming work. This was not confined to the reform of monasteries, but was extended to the secular clergy and the laity, whom they especially sought to bring to greater devotion toward the Blessed Sacrament and more frequent communion. The chief of the Windesheim monastic reformers was Johann Busch (b. 1399; d. 1480). This remarkable man was clothed at Windesheim in 1419. At the chapter of 1424 Prior Johann Vos, who knew his own end was near, especially entrusted Busch and Hermann Kanten with the carrying out of his work of reform (*Chron. Wind.*, 51). Grube gives a list of forty-three monasteries (twenty-seven Augustinian, eight Benedictine, five Cistercian, and three Pre-monstratensian), in whose reform Busch had a share; perhaps his greatest conquest was the winning to the side of reform of Johann Hagen, for thirty years (1439-69) Abbot of Bursfeld and the initiator of the Benedictine Congregation known as the Union of Bursfeld. In 1451 Busch was entrusted by his friend Cardinal Nicholas of Cusa, legate of Nicholas V, with the reform of the North German monasteries, and with such labours he was busied till shortly before his death.

Similar work on a smaller scale was carried out by other Windesheimers. Some Protestant writers have claimed the Windesheim reformers as forerunners of the Protestant Reformation. This is a misapprehension of the whole spirit of the canons of Windesheim; their object was the reform of morals, not the overthrow of dogma. The conduct of the communities of Windesheim and Mount St. Agnes, who preferred exile to the non-observance of an interdict published by Martin V, exemplifies their spirit of obedience to the Holy See.

RAYMUND WEBSTER

Feast of the Holy Winding Sheet of Christ

Feast of the Holy Winding Sheet of Christ

In 1206 one of the (supposed) Winding Sheets used at the burial of Christ was brought to Besançon by Otto de La Roche, and the feast of its arrival (*Susceptio*) was ordered to be kept on 11 July. At present it is a double of the first class in the cathedral, and of the second class in the diocese. The Office is very beautiful. Another feast originated about 1495 at Chambéry, in Savoy, to honour the so-called *sudario* of Christ which came there in 1432 from Lirey in Burgundy, and which since 1578 is venerated in the royal chapel of the cathedral of Turin. This feast is celebrated on 4 May, the day after the Invention of the Cross, and was approved in 1506 by Julius II; it is now kept in Savoy, Piedmont, and Sardinia as the patronal feast of the royal House of Savoy (4 May, double of the first class, with octave). A third feast, the Fourth Sunday in Lent (translation to a new shrine in 1092), was during the Middle Ages kept at Compiègne in France, in honour of a winding sheet brought there from Aachen in 877. The feast which since 1831 is contained in the appendix of the Breviary, on the Friday after the Second Sunday in Lent, is independent of any particular relic, but before 1831 it was rarely found on the diocesan calendars. It has not yet found its way into the Baltimore Ordo. The office is taken from the Proprium of Turin.

F.G. HOLWECK

Friedrich Heinrich Hugo Windischmann

Friedrich Heinrich Hugo Windischmann

Orientalist and exegete, b. at Aschaffenburg, 13 December, 1811; d. at Munich, 23 August, 1861. He was a son of the philosopher Karl Joseph Windischmann; studied

philosophy, classical philology, and Sanskrit at Bonn, theology at Bonn and Munich, and Armenian with the Mechitaists at Venice. After receiving the doctorate in theology at Munich, 2 Jan., 1836, he was ordained priest on 13 March following; seven months later he became vicar of the cathedral and secretary of Archbishop Gebtsattel of Munich. In 1838 he was professor-extraordinary of canon law and New-Testament exegesis at Freising, but resigned when appointed canon of the cathedral in 1839. In 1842 he was chosen a member of the Royal Bavarian Academy of Sciences and in 1846 became Vicar-General of Munich. He accompanied Archbishop Reisach to the episcopal conference at Wurzburg in 1848, and was with him in Rome, when the dogma of the Immaculate Conception was defined in 1854. When Reisach was created cardinal and took up his residence in Rome, Windischmann became a simple canon on 27 August, 1856. His fearless defence of the papal and ecclesiastical rights against the frequent encroachments of the State often brought him in conflict with the civil authorities. He was a prudent director of souls and in much demand as a confessor. He was one of the greatest orientalists of his time, being especially versed in the Armenian and Old Persian languages, and in the various Sanskrit dialects. Among his works the following are noteworthy: "Sancara sive de theologumenis Vedanticorum" (Bonn, 1839); "Ueber den Somacultus der Arier" in "Abhandlungen der münchener Akademie" (1846); "Ursagen der arischen Völker" (ib., 1853); "Die persische Anahita oder Anaitis" (ib., 1856); "Mithra" in "Abhandlungen fur die Kunde des Morgenlandes" (1857); and a posthumous work "Zoroastrische Studien" (Munich, 1863). "Vindiciae petrinae" (Ratisborn, 1863), a defence of the Epistles of St. Peter and his coming to Rome, directed against Baur and his school; and "Erklärung des Briefes an die Galater" (Mainz, 1843), an excellent explanation of St. Paul's letter to the Galatians.

STRODL, Friedrich H. H. Windischmann (Munich, 1862); SIGHART, Dr. Fr. Windischmann (Augsburg, 1861); NEVE, Fr. Windischmann et la haute philologie en Allemagne (Paris, 1863).

MICHAEL OTT

Karl Joseph Hieronymus Windischmann

Karl Joseph Hieronymus Windischmann

Philosopher, b. at Mainz, 25 August, 1775; d. at Bonn, 23 April, 1839. He attended the gymnasium at Mainz, and in 1772 took the course in philosophy at the university there. He continued this course at Wurzburg, where he also studied the natural sciences and medicine until 1796. After a year at Vienna he settled in 1797 as a practising physician at Mainz, where he also gave medical lectures. In 1801 the Elector of Mainz, Friedrich Karl Joseph, summoned him to Aschaffenburg as court physician. In 1803

Windischmann became professor of philosophy and history at the institute for philosophy and theology at Aschaffenburg, and in 1818 was appointed professor of philosophy and medicine at the University of Bonn. He took an active part against Hermesianism in the University of Bonn, and when the investigation of Hermesianism began at Rome he was one of the German scholars directed to draw up opinions. The first part of his report was sent to Rome in June, 1834, the second part in March, 1835; the Hermesians consequently attributed to Windischmann a large share in the condemnation of their views.

In his earlier years Windischmann's philosophy, as shown in his work "Ideen zur Physik" (I, Wurzburg and Bamberg, 1805), was a pantheistic mysticism entirely under the influence of Schelling's philosophy of nature. He believed, however, that he could unite it with Christianity. But gradually he worked his way into a positive Christian philosophy. In his chief work, "Die Philosophie im Fortgang der Weltgeschichte", he planned to present the history of philosophy in connection with a positive Christian philosophy of history, although this latter, it must be said, was influenced by Hegel. But the work was not finished; its four volumes (Bonn, 1827-34) only treated China and Japan. Among his other writings are: "Untersuchungen über Astrologie, Alchimie und Magic" (Frankfort, 1813); "Ueber Etwas, das der Heilkunst Noth thut" (Leipzig, 1824), in which he opposed the materialistic tendency in medical science, and sought to combine the science with Christian philosophy; "Das Gericht des Herrn über Europa (Frankfort, 1814); "Ueber den Begriff der christl. Philosophie" (Bonn, 1823). He wrote supplementary treatises for Leiber's translation ("Abendstunden zu St. Petersburg", Frankfort, 1824) of De Maistre. His last work was the editing of Friedrich von Schlegel's "Philosophische Vorlesungen" (Bonn, 1836-37).

Windischmann's biography was written by his son FRIEDRICH WINDISCHMANN, Aus dem Leben eines Katholiken in Histor. polit. Blatter, V (1840), 257-269, 343-365; LAUCHERT in Allgemeine Deutsche Biographie, XL, 420-422; WERNER, Gesch. der kathol. Theologie (Munich, 1866), 413-14, 436-40.

FREIDRICH LAUCHERT

Rose Window

Rose Window

A circular window, with mullions and traceries generally radiating from the centre, and filled with stained glasses. The term is suggested by the fancied resemblance of the window with its traceries to the rose and its petals. The rose window is one of the most beautiful and characteristic features of medieval architecture, especially of the French Gothic, in which it achieved its most perfect development. Its origin is to be

found in the Roman *oculus*. During the Romanesque period the oculus became a window, and from about the middle of the twelfth century its dimensions began to increase with the development of gothic or Gothic architecture. By the middle of the thirteenth century it had attained the greatest possible size -- the entire width of the nave. Its possible size -- the entire width of the nave. Its splendour continued in France until the misfortunes of the later fourteenth and fifteenth centuries prevented the construction of large churches. The most beautiful examples of rose windows are to be found in the Ile de France and the adjoining provinces, Picardy and Champagne. The earliest important examples are the west rose of the Cathedral of Mantes (c. 1200); the west rose of Notre Dame of Paris (c. 1220), the most beautiful of all, and those of Laon and Chartres. In all these cases the rose was put under a circular arch. The next important step was to put it under a pointed arch, as was done in the beautiful rose windows of the Cathedral of Reims, 1230, as well in the transepts as in the later roses of the facade. Thereupon the rose was inscribed in square, with pierced spandrels as in the transepts of Notre Dame of Paris (1257). The last step was to place the rose in the tier of lower windows, in which case it became the centre of a vast window composition, covering the whole end of the transepts, as in Rouen Cathedral.

In England the use of the rose window was usually confined to the transepts, although roses of great span were constructed in Byland Abbey and in the east front of Old St. Paul's, London. In Germany it was more frequently used as well in the Romanesque as in the Gothic period; a fine example is in the facade of the Cathedral of Strassburg. In Italy it was particularly used by the Lombard architects, as in San Zeno, Verona, and in the Cathedral of Modena, and in the Tuscan Gothic churches like the Cathedrals of Siena and Orvieto. These roses were always filled with stained glasses of great beauty, adding not a little to the picturesque effect of the interior of the cathedral.

G. KRIEHN

Windows in Church Architecture

Windows in Church Architecture

From the beginning Christian churches, in contrast to the ancient temples, were intended to be places for the assembling of the faithful. The temperament of the people of the East and of the South where Christian houses of worship first appeared, required the admission of much light by large openings in the walls, that is, by windows. As a matter of fact the early Christian basilicas were richly provided with large windows, placed partly in the central nave, that was raised for this purpose, partly in the side aisles and facade. In Western Europe, or rather in the countries under Roman influence,

the places where the windows existed on the side aisles can no longer be identified with absolute certainty, owing to the chapels and additions that were later frequently built. In the East, however, where it was customary to select isolated sites for church buildings large windows were the rule. The place of the window was determined by the architectural membering of the basilica, the distance between two columns generally indicating the position of a window. However, there were endless exceptions to this rule in the East; thus at Bakusa in Syria the windows are close together as well as over the columns; at Kalat-Seman each intercolumnar space contained two windows. In general two or three windows united in a group, as was later the rule in Roman architecture, were even then of frequent occurrence in the early Christian architecture of Asia Minor. The form of the window is nearly everywhere the same; a rectangle that usually has a rounded top, but seldom a straight lintel. When the latter is used it is generally balanced by a semicircular arch of wedge-shaped stones. Ornamentation of the windows was hardly possible in the basilicas of Western Europe, which were generally built of brick, while the Syrian stone churches, and as an exceptional case those of the school of Spoleto, displayed rich contours and ribbon-like ornamentation. Of that troublous period which extended to the time of Charlemagne and later until the beginning of Romanesque art, few monuments remain that give a clear conception of the window architecture then in vogue. According to Haupt's researches, the windows of the earliest Germanic churches had a round arch above, which was generally a hollowed stone. Towards the bottom these windows, strange to say, were frequently somewhat broader than above. It was not unusual in Spain, England, and France to finish the window-casement with a horseshoe arch, the upper part being formed by two stone shafts set obliquely, that is, like ribs of an arch. An example of this method is found at Deerhurst in England. The windows of this period are frequently very different on the inner and outer sides, the richer ornamentation being found on the inner side, as at Saint-Germain-des-Pré in France where there are engaged columns and ornamented archivolts.

Up to the twelfth century the windows of the Romanesque churches had small openings for light, a sloping intrados, and an inclined sill. Originally without decoration, they later received a framework, that is, they were surrounded by a border of slender shafts as by a frame. In the further development these round shafts received small bases and capitals, the intrados was divided into rectangular intervals in which small columns were set. Gothic art adopted this framework, merely changing the round arch into a pointed one, and later replacing the rectangular intervals of the intrados by flutings. As the style grew the small capitals of the round shafts were abandoned and later the shafts themselves, by which the style returned to the simple framework. The late Gothic ceased to use even the framework and employed the sloping intrados alone,

without further ornament. Naturally there were innumerable exceptions to the development sketched here only in its general features. In Romanesque art the sills had originally only a slight inclination. This gradually became greater until it became more than a right angle. characteristic of the Romanesque style is the grouping together of two to four windows, the so-called clustered window. Above the window the flat surface of the arch remained without ornamentation or was pierced by small round windows. Romanesque art used, in addition to windows enclosed by the round arch, others surrounded by the trefoil or fan-arch, and even openings for light entirely Baroque in design with arbitrarily curved arches. In the Gothic period the windows were longer and broader, in a number of cathedrals they almost replace the walls. Although the clustered window with three openings did not entirely disappear, yet it was more customary to use two narrow windows combined by a common shaft and a common pointed arch above them. The shafts grew constantly more slender and a circular arch was introduced under the pointed arch. This led in the course of time to the appearance of tracery which was so largely used in window ornamentation in the Gothic period that it became almost the most important consideration in the construction of windows. Tracery is formed by setting together separate parts of a circle called foils; their points of contact are named cusps. By means of tracery the pointed arches of the windows were constantly filled with new forms and devices, simple in the early Gothic, artificial and confused the more the style developed, until finally in the late Gothic or Flamboyant style the wavy tracery was used which no longer consisted of circles and segments of circles but assumed forms comparable to flames, a style particularly in vogue in England and France. Towards the end of the Gothic period greater sobriety of form came into use and tracery began to decline. The elaboration undergone by the tracery was also shared by the shafts of the windows and intrados. Undivided at first they gradually received richer contours and were separated into main and subordinate pillars. The earliest tracery of which the date is known is that still existing in the choir chapels of the cathedral at Reims (1211).

The Renaissance returned to the round-arched clustered windows of the Romanesque style, particularly in brick buildings. Still light openings with slender connexions between them and enclosed in rectangular frames are to be found in houses built of stone, particularly in the late Renaissance. They generally received as ornament, in imitation of antiquity, a frame of broad profile, which at the height of the Renaissance was generally surrounded by two supports, pilasters, or columns, and the entablature

rested upon these. Framing of this kind has many forms, but the following are the most noticeable styles:

- The opening for light is enclosed by a frame running parallel to it which has the profile of an architrave and generally has a horizontal cornice as a finish at the top (simple framework);
- instead of the simple framework supports, pillars, pilasters, or columns, are arranged on the perpendicular sides, which carry above them a straight entablature, a gable-cornice, or an archivolt (truss-frame);
- the most frequent and most artistic form is the combination of the simple frame and the truss-frame, from which spring the most varied combinations, as sometimes the simple frame encloses a truss-frame, or the reverse, or sometimes two truss-frames are combined with each other (combined frame);
- abandoning frames and supports the openings for light are surrounded only by quarry-faced ashlar. In costly buildings the windows had an ornamental finish below, either a breast-moulding resting on consoles, or a panel surrounded by a frame or carried by supports.

The Baroque style added to the round-arched and rectangular light- openings those in the shape of a basket handle-arch and even of an oval shape, and sought to enrich them by drawing in the corners and by curving the sides in and out. This led to the appearance of a great variety of lines the number and lack of repose of which is characteristic of the Baroque. The framing which the Renaissance had given the windows remained customary during the Baroque period, but in agreement with the entire development of the style they were augmented, were more artificial, and had less repose. The most frequently used was the flat or profiled framing, in which the cornice no longer ran parallel to the light- opening, but assumed an independent arbitrary form; at times the frame was interrupted by quarry-faced ashlar. The support-framing was seldom used, the combined framing was changed so that the frames were no longer laid one by the other, but one over the other, only a small part of the under one being visible on the two sides. The part of the frame above the window received a rich development; it was generally either a horizontal cornice or a gable cornice; where the windows were arched it also followed the curved line, with the result of an unlimited variety of artistic forms. Classicism first abandoned the combination of the two framings, it next gave up the truss-frame, so that finally nothing remained of the former variety but the simple unadorned frame with or without a top piece. As regards the Louis XVI and Empire styles the simplifying of the frame was retained and ornament-

ation was limited almost exclusively to the top-piece, which was supported by consoles and adorned with garlands of fruit and other ornaments in imitation of the antique.

BEDA KLEINSCHMIDT

Windsor

Windsor

A town of great antiquity, on the Thames, in Berkshire, England; quaintly rendered *Ventus Morbidus* in some medieval documents, the name being really from the Saxon *Windels-or*, "winding shore". The manor was granted by St. Edward the Confessor to the Abbey of Westminster, and the town became a free borough under Edward I. The chief interest of Windsor lies in the castle, one of the most famous royal residences in the world. There was a palace and stronghold here in the time of the Saxon Heptarchy, and the great mound on which stands the Round Tower (itself rebuilt by Edward III) is of this date. The castle, which was extensively added to by Henry III, has been for centuries the favourite residence of English kings, many of whom, including Edward III and Henry VI, were born there. A chapel existed in the castle from early times; but the present sumptuous Chapel of St. George, considered the finest example of perpendicular architecture in England, was built by Edward IV, who was buried in it, as were several of his successors. St. Edward's (now the Albert Memorial) Chapel was the burial place of Cardinal Wolsey, who constructed a magnificent tomb for himself. This chapel was used for Catholic worship in the reign of James II, who received the papal nuncio there in 1687. Under George IV nearly a million sterling was spent on altering and practically rebuilding the castle, according to the plans of Wyatville. Many royal marriages have taken place during the last century in St. George's Chapel, which is a richly-endowed royal peculiar, served by a dean, a college of canons and minor clerics, and a staff of highly-trained choristers. The chapel is the headquarters of the Knights of the Garter (established by Edward III), for whom a special prayer is said at every service held within its walls.

D.O. HUNTER-BLAIR

Ludwig Windthorst

Ludwig Windthorst

Born near Osnabrück, 17 January, 1812; died 14 March, 1891. He came from a family of lawyers of Lower Saxony. As a pupil at the gymnasium he was industrious, shrewd and cautious, quiet, not carried away by the tendencies of his time, and these

qualities he retained throughout life. He studied at Gottingen and Heidelberg, and in 1836 established himself as a lawyer at Osnabruck and soon married. There his professional ability and his attitude in religion won him the confidence of the Catholic clergy. In 1842, at their instance, the sovereign, the King of Hanover, appointed him president of the Catholic state board of Hanover for churches and schools. In this office Windthorst gained a knowledge of the great difficulties existing in Germany between nearly all the governments and their Catholic subjects. By the enactment of the Imperial Delegates of 1803, the great majority of German Catholics, who until then had generally enjoyed spiritual autonomy were made subjects of Protestant states. The Catholics had little interest in the rulers thus forced upon them; the governments were not accustomed to a policy compatible with the rights and freedom of the Catholic Church. Thorough knowledge of the subject and tactful caution were necessary before a reconciliation could be brought about. Owing to the efforts of Windthorst, such an adjustment was made in Hanover, while the tension in several other German states grew continually greater, and finally led to the Kulturkampf. Windthorst's official experience especially impressed upon him the great importance to the future of Catholicism in Germany of a legal adjustment of the relations between the Church and the state schools.

In 1848, when the Revolution in Germany led to the restoration of the Hanoverian Constitution, which the king had annulled in 1837, Windthorst was elected a member of the Diet. This brought him into the career for which he had the most talent, and supplied him with the interests which thenceforward were most completely to occupy him. He at once developed great skill in the debate and a decided talent for bringing others into organization under his own leadership. He devoted himself to solving two problems which at that era were of the most importance for all German statesmen:

- After getting rid of absolutism and bureaucracy, how, and how far, were the people to share in legislation and administration?
- How could a national confederation be founded in which the unity of the German nation might attain politically powerful expression?

In his efforts to solve the former question Windthorst held in general with the moderate Liberals; to bring about a national confederation he joined the Great German Party (see GERMANY), without, however, disputing the claim that the lead in economic and commercial policy as well as some other prerogatives should be conceded to Prussia. He soon attained such importance in the Hanoverian Diet that in the spring of 1851 he was elected president of that chamber -- an honour that had fallen to no other Catholic of Hanover -- and in November, 1851, was appointed minister of justice.

He was minister only for a short period, as he did not consider the king's policy strictly constitutional. At the close of 1853 he returned to parliamentary life. In 1862 the king again summoned him to the ministry, where he remained until 1865.

Up to this period Windthorst's activities and reputation had been limited to Hanover. In 1866 Hanover became a Prussian province, and in 1867 the North German Confederation was founded. This gave Windthorst the opportunity to acquire not only national, but also international fame. From 1867 he was a member both of the Reichstag and of the Prussian Landtag. By 1874 he had gained for himself in both of these bodies a very prominent position. He was at first a member of no party, but when, in 1868, deputies from Southern Germany appeared for the first time in the Reichstag, for the discussion of economic questions, Windthorst collected those deputies who did not hold with the National Liberals and combined them so skilfully with the particularist Hanoverians, Prussians, and Saxons that the combination was unexpectedly able to defeat a National Liberal bill designed to secure the intervention of the South-German deputies in all national affairs. This majority was a prelude to the organization of the Centre Party under Windthorst's guidance. Windthorst did not found that party, neither did he assume its leadership at once. For although the Centre was formed as a purely political party with a definite constitutional, social, and ecclesiastico-political programme, still it should be taken into consideration that, at the close of 1870, it was largely made up of Catholics. Windthorst, from the beginning of his career, had performed the greatest services for the Catholic cause in Hanover, and had always been a loyal Catholic, but as a leader, he had not the reputation of Mallinckrodt and Reichensperger, because he had never taken an active part in the ecclesiastical and ecclesiastico-political movement among German Catholics. Now, however, he began to take part regularly in Catholic Congresses, where he soon became the orator for the final address, which he made famous. The outbreak of the Kulturkampf in Prussia gave him a splendid opportunity to show himself the champion of the Church in Parliament.

When Mallinckrodt died in 1874, Windthorst was proclaimed leader both of the Centre Party and of the German Catholics. In another direction, too, the years 1867-74 were decisive for him. As early as the fifties Bismarck and he were not in accord politically. The division between the two men was continually deepened by the course of events: in 1866 Bismarck excluded Austria from Germany and annexed Hanover; in 1868 he made an agreement with Windthorst concerning the restitution of the King of Hanover's private fortune, a contract which, however, Bismarck refused to carry out. In 1867 Windthorst had indirectly opposed Bismarck in the Zollparlament, by forming a majority against the National Liberals. Bismarck's anger reached its height when Windthorst joined the Centre Party. Bismarck said that this party would maintain

itself independently of him and would incessantly push their constitutional demands. The chancellor could not tolerate any rival to his own importance, neither was he really a friend of parliamentary government. He attacked the Church all the more violently, therefore, in the Kulturkampf, because it was defended by a strong and independent popular party (see KULTURKAMPF). On the other hand, Windthorst acted in harmony with his political past when he sought to make it plain that he opposed the Kulturkampf measures not merely as an infringement with Prussian constitutional rights in particular and the political convictions of the age in general. As the leader of the Centre, and in full agreement with it, he interested himself for all the rights and liberties of the German people, whenever these liberties were disregarded by the Government or the Police, or were limited by legislation; his efforts, on the contrary, were rather for their enlargement. He was not afraid to let his party wear out Bismarck with constant opposition, so that the chancellor might the sooner be ready to abandon the Kulturkampf.

At the same time Windthorst was on the alert to secure a position for his party which should offer better prospects than that into which it has been forced from the beginning. For in ecclesiastico-political questions the Centre was then condemned to occupy the position of an isolated minority, because of the peculiarly obstinate sectarian antipathy to Catholics in Germany. The masses showed very little direct interest in the second article of the Centrist programme -- the defence of the federal character of the empire, which was threatened by the Liberals. No matter what the Centre might do to prove its soundness in constitutional questions, the Liberals still remained, for the mass of the people, the party which had first begun the struggle against absolutism. As new political undertakings, there now offered themselves the increasing free-trade tendency of the nation and the need of a comprehensive labour policy. Sooner than the leaders of the other parties Windthorst comprehended that these problems were quickly assuming an absorbing interest for the German people, and by the end of 1876 he occupied himself zealously with them. The victory was his. In 1879 the Centre turned the scale for the introduction of a protective tariff, and formed the controlling spirit of the parties by the aid of which the government was able, after 1880, to pass the workingmen's insurance laws, and later the laws for the protection of workingmen. From a minority continually in opposition it became an active, influential part of the majority. The political character of the Centre Party received its final cast in its economic and socio-political labours. Windthorst, repeatedly maintained this character of the party against the misconception formed of it by the papal Curia -- a misconception due to incorrect knowledge of the facts, and which saw in the Centre a Catholic party somewhat like that in Belgium. Nor did politics prevent the Centre from repeatedly giving its attention to the interests of the Church. It was the influence which

it attained during the eighties in the entire political life of Germany, in addition to reasons of foreign policy, that obliged Bismarck to abandon the Kulturkampf. Windthorst felt keenly chagrined that he was not able at the same time to secure the passage of laws settling the share of the Church in the Prussian common schools. The struggle over the Christian spirit in the schools had to be left to the future.

As recompense for all this he had the satisfaction that his party grew constantly more willing to accept his political views and methods. In order to make certain that the voters were trained in the spirit in which the Centre acted politically, he effected, in the autumn of 1890, the founding of the "Peoples Union for Catholic Germany", as a school for Catholic men with many hundreds of thousands of pupils to train them, apologetically, socially, economically, and politically. The spirit of Windthorst still lives in the Centre party and in the Peoples Union. His beautiful memorial is the Church of the Blessed Virgin at Hanover, where he is buried, and for the construction of which he generously gave the money presented to him for personal use by the Catholics of Germany.

MARTIN SPAHN

Thomas Wingham

Thomas Wingham

Born in London, 5 January, 1846; died there, 24 March, 1893. He studied music at Wylde's London Academy, and later entered the Royal Academy of Music, where he had for his teacher in theory William Sterndale Bennett, and, in piano playing, Harold Thomas. In 1817 Wingham became himself professor of piano playing in the same institution. At about the same period he obtained the post of choirmaster at the Brompton Oratory. Wingham's sound musicianship and ability were soon proved by the artistic excellence for which the performances at the Oratory became known during his incumbency. He was the artistic pioneer who prepared the way for the musico-liturgical conditions which have since followed. Among his compositions are four symphonies, six overtures, several instrumental works in smaller form, two masses, and a "Te Deum", most of which, though frequently performed during the author's lifetime, have remained in manuscript.

JOSEPH OTTEN

Winnebago Indians

Winnebago Indians

A tribe of Siouan stock closely related in speech to the Iowa, Missouri, and Oto, and more remotely to the Dakota and Ponca. The name Winnebago signifies "filthy water" (Chippewa, *winipeg*), and was originally applied to the lake near which the tribe was living in the seventeenth century. They called themselves *Horogi*, "fish-eaters", or *Hochungarra*, "trout nation". The first white man to visit them was Nicollet, who found them by the shores of Green Bay, Wisconsin, in 1634, surrounded by the Sauk and Foxes and the Menominee, Algonquin tribes. They are referred to, but not by the name of Winnebago, by the Jesuits in 1636. On the west they were then in contact with their kindred Iowa; their art and culture was influenced by the neighbouring Siouan and Algonquin, but they were not much more advanced in warfare than the generality of the Dakota. Tribal traditions say they had resided at Red Banks, Lake Michigan, before coming to Green Bay, and the Jesuit relation of 1671 states that they had previously been defeated and captured by the Illinois, but had been later given their liberty. The Jesuits Allouez and Dablon spent the winter of 1669-70 among them. In the first half of the eighteenth century they were friendly towards the French, with whom they carried on commerce, and were slow to form an alliance with the English on the downfall of the French colonial power. Eventually, however, they proved their loyalty to them, especially during the War of Independence and the War of 1812. By the treaties of 1825 and 1832 they were granted a reservation on the Mississippi north of the River Iowa in exchange for their lands south of the Wisconsin and Fox Rivers; in 1846 they were transferred to Minnesota and in 1856 were at Blue Earth, but were removed again owing to the Sioux war, and finally sent to the Omaha lands in Nebraska. In 1886 the tribe numbered 2152, and in 1910 had increased to 2333, of whom 1063 were in Nebraska and 12270 in Wisconsin, whither many returned from the reservation. The Winnebago lived in wigwams with rush-mat coverings; they were not advanced in agriculture, but lived chiefly on fish, wild rice, and game, and obtained sugar from the maple tree.

The religious belief of the Winnebago resembled those of the Dakota and central Algonquins, their chief deity being the Manuna or earth-maker. Their mythology is chiefly Siouan, and relates in particular to five individuals created by Manuna to free the world from evil spirits and giants. The Winnebago had a tradition of the Deluge; their paradise was in the skies, and the Milky Way they believed to be the path by which those who died journeyed to heaven. The tribe have two great ceremonies. The Mankani or medicine dance, which takes place in summer and is performed by the

members of the secret society, has for its object the prolongation of life and the inspiration of virtues. The latter is accomplished by the "shooting" ceremony, that is the pretended shooting of a shell in an otter-skin bag into the body of the candidate for initiation. The other feast, *Wagigo*, takes place in winter, and is intended to increase the martial spirit of the tribe by propitiating all their deities with offerings of food and deerskins. Little is known of various other minor dances, such as the Snake, Ghost, and Grizzly-Bear. The Winnebago had twelve clans, four in the Air division, eight in the Earth division. Generally an Air individual had to marry an Earth, and vice-versa. The lodge of the Thunderbird, and Air clan, possessed the right of sanctuary; while that of the Bear, an Earth clan, was the war and punishment lodge.

A.A. MACERLEAN

St. Winnoc

St. Winnoc

Abbot or Prior or Wormhoult, died 716 or 717. Three lives of this saint are extant: the best of these, the first life, was written by a monk of St. Bertin in the middle of the ninth century, or perhaps a century earlier. St. Winnoc is generally called a Breton, but the Bollandist de Smedt shows that he was more probably of British origin. He came to Flanders, to the Monastery of St. Sithiu, then ruled by St. Bertin, with three companions, and was soon afterwards sent to found at Wormhoult, a dependent cell or priory (not an abbey, as it is generally called). It is not known what rule, Columbanian or Benedictine, was followed at this time in the two monasteries. When enfeebled by old age, St. Winnoc is said to have received supernatural assistance in the task of grinding corn for his brethren and the poor; a monk who, out of curiosity, came to see how the old man did so much work, was struck blind, but healed by the saint's intercession. Many other miracles followed his death, which occurred 6 November, 716 or 717. We only know the year from fourteenth-century tradition. The popularity of St. Winnoc's cultus is attested by the frequent insertion of his name in liturgical documents and the numerous translations of his remains, which have been preserved at Bergues-St-Winnoc to the present day. His feast is kept on 6 November, that of his translation on 18 September; a third, the Exaltation of St. Winnoc, was formerly kept on 20 February.

RAYMUND WEBSTER
Diocese of Winona

Diocese of Winona

(WINONENSIS).

Established in 1889, suffragan of St. Paul, comprises the following counties in southern Minnesota: Winona, Wabasha, Olmstead, Dodge, Steele, Waseca, Blue Earth, Watonwan, Cottonwood, Murray, Pipestone, Rock, Nobles, Jackson, Faribault, Martin, Freeborn, Mower, Fillmore, and Houston. The area of the diocese is 12,282 square miles.

The early Catholic voyagers and missionaries visited many parts of Minnesota now under the jurisdiction of the Bishop of Winona. In 1660 Groseilliers and Radisson made a visit to the Prairie Sioux in southern or south-western Minnesota. There are, however, no definite records showing what route they took or how far they travelled; in all probability they followed the course of the Minnesota River. In 1680 Father Hennepin, accompanied by Antoine Augelle and Michael Accault, set out from Fort Creve-coeur to explore the Upper Mississippi. On the Minnesota shore, the territory which they passed on the journey from La Crescent to Lake City now belongs to the Diocese of Winona. In 1683 Nicholas Perrot established a trading-post at or near the site of the present city of Wabasha. With him was the Jesuit Father Joseph Jean Marest who laboured as a missionary among the Sioux Indians. More than a century and a half had elapsed when Bishop Loras, in 1839, journeyed from Dubuque to Mendota to minister to the few Catholics who had but recently settled in that vicinity. In 1840 Father Galtier was sent to Mendota. He was the first parish priest to exercise the sacred ministry in Minnesota. During his pastorate at Mendota, Father Galtier made many visits to Wabasha. Here, in 1839, Augustine Rocque had erected a trading-post. At Mr. Rocque's home Father Galtier assembled the early settlers and offered for them the Holy Sacrifice of the Mass. In April, 1843, Monsignor Ravoux, travelling from Mendota to Dubuque, visited, among other places, Wabasha and Winona. In his "Memoirs" he writes that Winona was then "a prairie without inhabitants". In fact, when Bishop Cretin came to St. Paul as its first bishop in 1851, no systematic attempt at settlement had been made in what is now the Diocese of Winona. On 2 February, 1855, at Mankato, Monsignor Ravoux celebrated what was very probably the first Mass ever offered in south-western Minnesota. In June of the same year Bishop Cretin visited Mankato and organized the parish of St. Peter and St. Paul. Father Sommereisen became its first pastor on 16 March, 1856. Many of the missions in south-western Minnesota were established by the Jesuits, who took charge of the parish at Mankato on 27 January,

1874. In 1856 Bishop Cretin visited Winona and organized a parish for the few Catholics whom he found there. In 1857 he placed the parish under the care of the Rev. Thomas Murray. Monsignor Oster, then a young priest on mission duty in Minnesota, made occasional visits to Winona. In July, 1858, the Rev. Michael Prendergast became the first resident pastor. Besides his duties in Winona, Father Prendergast had charge of the Catholics in Wabasha, Olmstead, Houston, Fillmore, Steele, and Mower Counties. In 1856 Bishop Cretin visited Brownsville, Caledonia, Rushford, Chatfield, Buckley Settlement (now St. Bridget's), and many other places in southern Minnesota. He was the pioneer bishop of St. Paul, and the founder of the pioneer parishes in the present Diocese of Winona.

With the advent of the railroads, southern Minnesota developed rapidly. It is a rich agricultural district, well adapted to the needs of diversified farming. So well did the Church flourish in this section of the state that in 1889 southern Minnesota was made a diocese, with Winona as the episcopal city, and the Rev. Joseph B. Cotter its first bishop. Bishop Cotter was born at Liverpool, England, 19 November, 1844. He was ordained priest by Bishop Grace at St. Paul, 23 May, 1911. Shortly after his ordination he was sent to Winona as pastor of the Church of St. Thomas. With Bishop McGolrick of Duluth and the late Bishop Shanley of Fargo, he was consecrated in the cathedral at St. Paul, 27 December, 1889. He died in Winona, 27 June, 1909. When the diocese was formed, Bishop Cotter had 45 diocesan priests and 4 religious. There were 45 churches with resident pastors, 49 mission churches, 15 stations, and 19 parish schools, attended by 2650 pupils. At his death in 1909 there were in his diocese, 85 diocesan priests and 7 religious; 72 churches with resident priest; 44 missions with churches; 8 station; 28 parish schools, attended by 4630 pupils. As second Bishop of Winona, Pius X, on 4 March, 1910, selected the Rev. P.R. Heffron, rector of the St. Paul Seminary. Born in New York City in 1860, he spent his boyhood near Rochester, Minnesota. He was ordained on 22 Dec., 1884, and became pastor of the cathedral, St. Paul, in 1889. In 1896 he was made vice-rector and in the following year rector of the St. Paul Seminary. On the day of his consecration as Bishop of Winona, 19 May, 1910, six bishops were consecrated for the Province of St. Paul. Bishop Heffron was installed at Winona, 24 May, 1910. As a monument to the memory of his predecessor he erected in Winona (1911) the "Cotter School for Boys", of which the Christian Brothers have charge. In the fall of 1911 work was started at Terrace Heights, Winona, on the foundation of a college for young men. Bishop Heffron has likewise established a diocesan journal entitled "The Winona Courier", which is published monthly at Winona.

JOHN P. SHERMAN

Jakob Benignus Winslow

Jakob Benignus Winslow

(WINSLOW).

Physician and anatomist, b. at Odense, Denmark, 27 April, 1669; d. in Paris, 3 April, 1760. He finished his high school studies at Odense in 1687, and then attended the University of Copenhagen, where he studied philosophy and theology; later he chose the medical profession and obtained the degree of B.M. in 1694. Receiving a royal scholarship, Winslow went for his further training to foreign countries in 1697, and to Paris in the spring of 1698. While here he became acquainted with the Catholic religion. A thorough study of the controverted questions, which he had undertaken to strengthen himself in the Lutheran faith, brought him into the Church. Bosuet himself received his confession of faith, 8 Oct., 1699.

His conversion made his return to Denmark impossible. Disregarding economic difficulties he continued his medical studies under Duverney, and in the autumn of 1704 received, free of expense, the degree of licentiate. In 1711 he married Maria Catharina Gilles, by whom he had a son, who died young, and a daughter. In 1721 he was made professor of surgery, in 1723 interpreter of German at the royal library, in 1728 regent of the medical faculty, and in 1743 professor of anatomy and surgery at the Jardin du Roi. The chief reason why Winslow did not gain this professorship until so late in life, notwithstanding his eminent qualifications, was his outspoken opinions in opposition to Jansenism, which had brought down on him the enmity of the entire body of professors at the Sorbonne. In 1745 he opened the anatomical theatre, which had been built under his supervision. Beside his duties as professor, Winslow had a large practice at several hospitals and, in addition, numberless private patients, among whom was Louis XIV up to the time of his death in 1715. Winslow also found time for scientific investigations. His most noted publication is the "Exposition anatomique de la structure du corps humain" (Paris, 1732; London, 1733), which was translated into all civilized languages, and spread his reputation throughout the whole of Europe. As early as 1708 he was made a member of the Academy of Sciences at Paris; later he became a member of the Academy at Berlin. On his gravestone in Saint-Entienne du Mont is the inscription: "Ortu et genere nobilis, nobilior virtute et doctrina".

PHILLIP VON KETTENBURG

St. Winwallus

St. Winwallus

Abbot of Landevennec; d. 3 March, probably at the beginning of the sixth century, though the exact year is not known. There are some fifty forms of his name, ranging from Wynwallow through such variants as Wingaloeus, Waloway, Wynolatus, Vin-guavally, Venole, Valois, Ouignoualey, Gweno, Gunnolo, to Bennoc. The original form is undistinguishable. In England the commonest are Winwalloc or Winwalloe; in France, Guenole or Guingalois.

His father, Fracan, was a British chieftain who fled before Saxon invaders to Brittany, where the saint was born. After considerable difficulty in overcoming his father's objections, Winwallus entered the religious life under the guidance of St. Budoc on the Island of Laurels near Isleverte. After residing here for some time he determined to go to Ireland to place himself under the great St. Patrick, but was deterred by a dream in which that saint appeared to him forbidding the journey, but telling him he must soon leave St. Budoc. Accordingly he set out with eleven companions, and, after a time spent in extraordinary austerities on the Island of Tibidi at the mouth of the River Aven, finally settled at Landevennec, where he founded a monastery on a rocky headland not far from Brest. After his death many miracles were ascribed to him. His body was carried to Flanders at the time of the Norman forays. Relics were preserved at Montreuil-sur-Mer (where a church was dedicated to him under the name of St. Walow), at St. Peter's in Ghent, and elsewhere. His tomb was to be seen in the church of Landevennec up to the beginning of the nineteenth century. The Abbey of

Landevennec became Benedictine in the ninth century, and was in the hands of the Congregation of St. Maur at the final suppression. St. Winwallus's feast is kept on 3 March, ad that of his translation on 28 April. His name has been preserved in the dedications of churches in the Anglican parishes of Wonastow in Monmouthshire (where he is known as St. Wonnow), and of Gunwalloc, St. Cleer, and Landewednack in Cornwall. It was been suggested that the last-named parish got its name from some monastic dependency of Landevennec.

RAYMUND WEBSTER

Ninian Winzet

Ninian Winzet

Benedictine abbot and controversial writer, b. at Renfrew, Scotland, 1518; d. at Ratisbon, 21 Sept., 1592. Educated (probably, though not certainly) at Glasgow University, he was ordained priest in 1540, and about 1551 became master of Linlithgow grammar school, and a little later provost of the collegiate church of St. Michael. When John Knox's "rascal multitude" was devastating the churches of Scotland in 1559, Winzet is said by Bishop Leslie to have publicly disputed with Knox at Linlithgow. After the change of religion in 1560 he was, with other ecclesiastics and teachers who refused to conform to Protestantism, ejected from his office. On Queen Mary's arrival in Edinburgh he went thither, at once threw himself into combat against the new doctrines, and published in 1562 his most famous work, "Certane Tractatis" -- the first addressed to the queen, clergy, and nobles, the second to Knox, and the third to the provost and magistrates of Edinburgh. Their ability and erudition made an immediate impression. Winzet, who seems for a time to have been Mary's confessor, was just bringing out his "Last Blast of the Trompet of Godis Worde", when it was stopped by the civil authority, and the author fled from Scotland, reaching Louvain in Sept., 1562. Here he wrote a preface to his "Buke of Four Scoir Thre Questions" (collected from his earlier polemical writings in manuscript), which was published at Antwerp in Oct., 1563, with a postscript addressed to Knox; and a little later his translation of the "Commonitorium" of Vincent of Lerins, dedicated to Queen Mary, also appeared at Antwerp. From 1565 to 1570 Winzet resided in Paris, prosecuting his studies at the university and apparently doing tutorial work also, as well as acting for a time as proctor for the "natio Anglicana seu Germanica".

In 1571 he was attached by Queen Mary, then a captive in England, to the service of Bishop Leslie, her ambassador in London; but on Leslie's committal to the Tower Winzet returned to France, and stayed for a time at Douai. From 1575 to 1577 he was in Rome, and in June, 1577, Pope Gregory XIII appointed him abbot of St. James's Scots monastery at Ratisbon, dispensing him from the regular year's novitiate. He received the abbatial blessing in Rome from Goldwell, the exiled Bishop of St. Asaph, at once entered on his new duties, and succeeded by his energy and zeal in repairing the shattered fortunes of St. James's, which had suffered greatly in the upheaval of the Reformation. By his wise administration and efforts in the cause of education he won the favour and regard both of the Emperor Rudolph VI and of the Duke of Bavaria. During his fifteen years' tenure of the abbacy he continued his literary labours, publishing his "Flagellum Sectariorum" and "Velitatio in Georgium Buchananum" in 1581, as well as other works, some of them now lost. He died at Ratisbon, and was buried in the sanctuary of St. James's Church, where a monument with a eulogistic Latin epitaph marks his grave.

D.O. HUNTER-BLAIR

Wipo

Wipo

(WIPPO).

Apparently a native of Burgundy, lived in the first half of the eleventh century. He was chaplain to Emperor Konrad II, whose biography he wrote in chronicle form, "Gesta Chuonradi II imperatoris", and presented to Konrad's son, Henry III, in 1046 not long after the latter was crowned. Wipo fully understands his subject, is fresh and animated, and, though affectionate, not a mere eulogist or a flatterer, for he sees Konrad's failings clearly. But he does not fully grasp the general conditions of the age, especially the emperor's manifold relations to the ruling princes and the Church. His style is simple and fluent, and his language well-chosen. Among his extant writings are the maxims, "Proverbia" (1027 or 1028), and "Tetralogus Heinrici" in rhymed hexameters. Presented to Emperor Henry in 1041. It is a eulogy of the emperor mixed

with earnest exhortations, emphasizing that right and law are the real foundations of the throne. He wrote the beautiful Easter sequence, "Victimae paschali laudes", and a touching lament in Latin on Konrad's death. The best edition of his works is that of Breslau, "Wiponis Gesta Chuonradi II ceteraque quae supersunt opera" (Hanover, 1878; German tr. by Pfluger, Berlin, 1877; by Wattenbach, Leipzig, 1892).

PATRICIUS SCHLAGER

Nigel Wireker

Nigel Wireker

Satirist, lived about 1190. He describes himself as old in the "Speculum Stultorum", which was written apparently before 1180. He claims to have known St. Thomas of Canterbury personally, so it was probably before 1170 that he became a monk of Christ Church, Canterbury, where he was, at any rate, from 1186 to 1193, and where he is said by Leland (Collect. III, 8 and Script. I, 228) to have been precentor. In 1189 he was one of the delegates from the monks to King Richard in their dispute with Archbishop Baldwin. The surname Wireker rests on the authority of Bale, and there is ground for thinking that his contemporaries knew him as "Nigellus de Longo Campo". He was certainly an intimate friend, and may have been a relative, of William Longchamp the Chancellor.

The following are his works, all in Latin: (1) "Speculum Stultorum", in elegiacs, with a prose introduction, both addressed to one "Willelmus", who has been identified with Longchamp. This, one of the most popular of medieval satires, is extant in many MSS. and early printed editions, and is included in Wright's "Anglo- Latin Satirical Poets" (Rolls Series, 1872, I, 3). It narrates the adventures of an ass named Brunellus or Burnellus (whence the poem is cited by Chaucer as "Daun Burnel the asse" in the Nun's Priest's Tale, "Canterbury Tales", line 15328) in quest of a longer tail. Brunellus, who represents the discontented and ambitious monk, goes first to Salernum for drugs to make his tail grow; losing these on the way home, he studies for a time in Paris, but making no progress he thinks of joining a religious order, and resolves to found a new one, taking the easiest part from each of the existing rules; finally he is recaptured by his old master. Nigel makes full use of the opportunities afforded by this framework for satirizing the manners and customs of his time, especially the vices prevalent among the Paris students and in the several religious orders; (2) "Contra Curiales et Officiales Clericos", a prose treatise, with a prologue in elegiacs, addressed to William Longchamp as Bishop of Ely, Legate, and Chancellor (printed by Wright, I, 146), and evidently

written in 1193-94. As its title suggests, it is a reproof (though affectionate in tone) to Longehamp, and to all who like him attempt to combine the ministries of Church and State.

Nothing else of Nigel's has been printed (with one doubtful exception mentioned below); but several poems are attributed to him (as Nigellus de Longe Campo) in a thirteenth-century MS. which belonged to Christ Church priory (Brit. Mus., Vesp. D, xix). These include (a) verses to Honorius, Prior of Christ Church 1186-88, an elegy on his death (21 Oct., 1188), and another on that of St. Thomas (29 Dex., 1170); (b) "Miracula S. Mariae Virginis"; (c) "Passio S. Laurentii"; (d) "Vita Pauli Primi Eremitae". Among them is also the well known poem on monastic life, beginning "Quid deceat monachum, vel qualis debeat esse", which appears in many editions of St. Anselm's works, and which has also been claimed for Alexander Neckham (Wright, II, 175), and for Roger of Caen (Hist. Litt. de la France, VIII, 421). Another MS. (Brit. Mus., Vitell. A. xi) contains a metrical catalogue of the archbishops of Canterbury down to Richard (d. 1184), which is most probably by Nigel. Wright also credits him (I, 231) with the poem beginning "Si mihi credideris, linguam cohiebabis, et aulae"; but this is really John of Salisbury's "Entheticus ad Polycraticum".

HERBERT in Dict. Nat. Biog., s.v. Nigel, called Wireker; WARD, Catalogue of Romances, II, 691-5; BALE, Index Britanniae Scriptorum, ed. POOLE and BATESON, 310-12; WRIGHT, op. cit., and Biog. Brit. Lit., Anglo-Norman period, 351-58.

J.A. HERBERT

Wigand Wirt

Wigand Wirt

Theologian, born at Frankfort about 1460; died at Steyer, 30 June, 1519. He entered the Dominican Order at Frankfort, where he also, after his religious profession, made his ecclesiastical studies, obtaining on their completion the lectorate in theology. His literary activity began in 1494 with the publication of a polemical work in which he attacked the doctrine of the Immaculate Conception incidentally treated by John Trithemius in his "De laudibus S. Annae". The wide circulation of the work called forth much opposition from those in sympathy with the views of Trithemius, and while on 12 September, 1495, a reconciliation was effected between the contending authors, the announcement of a disputation on that subject for 18 June, 1501, by the Observantine John Spengler, was the occasion of renewing the controversy. Wirt, however, found a new opponent in Father Conrad Hensel, who, flinging his invectives against the entire order, forced the latter to turn with their complaint to the Bishop of Strasburg. The process instituted to settle the affair began on 24 September, 1501, and concluded in

1503 in favour of Hensel. But the matter had not yet come to an end. During the process Wirt published the "Defensio Bullae Sixitinae sive Extravagantis grave nimis". In 1483 Sixtus IV forbade the opponents to charge each other with heresy. The prohibition was renewed by Alexander VI on 20 February, 1503. But the Bull and its confirmation were now interpreted by the opponents of the Dominicans in the sense that the pope forbade the denial of the Immaculate Conception, an interpretation which renewed the controversy in all its bitterness. In reply to the "Concordia curatorum et fratum mendicantium" of Wigand Trebellius, Wirt published his "Dialogus apologeticus". His severe attack on the Observantines and their leader, John Spengler, prompted the Archbishop of Mainz in 1506 to forbid the reading of the work. In the meantime Wirt was elected prior in Stuttgart, and in this capacity posted on the doors of the convent church a document in which he accused his opponents as promoters of heresy. The matter was then taken to Rome where, in 1512, it was decided against Wirt. At his death he was prior of the convent at Steyer.

JOSEPH SCHROEDER

Wisconsin

Wisconsin

Known as the "Badger State", admitted to the Union on 29 May, 1848, the seventeenth state admitted, after the original thirteen. It is bounded on the east by Lake Michigan, on the north by the upper Peninsula of the State of Michigan and by Lake Superior, on the west by Minnesota and St. Croix Rivers, and on the south by Illinois. It lies between 42°30' and 47°3' N. lat., and between 86°49' and 92°54' W. long. Its greatest length from north to south is about 300 miles, and its greatest breadth from east to west about 250 miles.

PHYSICAL FEATURES

Its surface is rolling in character, and it forms, with the upper Peninsula of Michigan, a sort of plateau between the lakes and rivers which bound it on the east, north, and west. The levels range from about 600 feet to nearly 2000 feet above the sea, and the natural grade divides the state into two great drainage basins. The state, including the Apostle Islands in Lake Superior, Washington Island and a number of small island at the entrance to Green Bay, has a total area of 56,066 square miles, of which 810 are water surface. Its long boundary upon Lake Michigan and the indentation formed by Green Bay give it many advantages in respect to the marine traffic, which

is growing to such enormous proportions upon the Great Lakes; and it possesses much water power, capable of extended development. Lakes of great natural beauty are numerous throughout the state. The population in 1890 was 1,686,880, exclusive of 6450 persons specially enumerated; in 1900 it had grown to 2,069,042; and in 1910 it was 2,333,860 or 42.2 persons to the square mile. Thus, the increase of population from 1890 to 1900 was between 22 and 23 per cent., while the increase from 1900 to 1910 was between 12 and 13 percent.

RESOURCES

Wisconsin ranks high in agriculture, hay and grain being the most important crops, and oats and Indian corn the largest cereal crops, together with a large production of barley, rye, buckwheat, potatoes, and sugar beets. In the southern part of the state large cranberry marshes are to be found. There are extensive apple orchards, and other orchards are being successfully developed. The dairy industry is very important, the production of milk, cheese, and butter being large and of great value. In 1910 there were in the state: 2,587,000 neat cattle (including 1,506,000 milk cows), 669,000 horses, 1,034,000 sheep, and 1,651,000 swine. Up to 1908 the state was the chief source of the white pine supply, and has always produced red pine, hemlock, and white spruce in large quantities. The forests are still considerable, in spite of heavy losses through forest fires. The state forest reserve, which is managed by the State Board of Forestry, exceed 250,000 acres. As a great manufacturing state, the value of the output increased from \$9,293,068 in 1850 to \$360,818,942 in 1900 and to \$590,306,000 in 1909. The most important articles are lumber, paper and wood pulp, cheese, butter, and condensed milk, steel products, leather, beer, flour, meat, agricultural implements, carriages and wagons, and clothing. Great quantities of iron ore, zinc, and lead are mined; granite, limestone, and sandstone are quarried, and cream-coloured brick is manufactured extensively from deposits of clay along the shores of Lake Michigan.

COMMUNICATION

The railroad system is well developed and subject to regulation, as to prices and accommodations, by a state commission. In 1909 the railroads of the state covered 7512 miles. The marine traffic is very large, and the natural harbours along Lake Michigan are gradually being developed. Grain, flour, lumber, and iron ore are extensively exported by water, and immense cargoes of coal are returned from the east. Milwaukee is the only port of entry in the state. Its imports in 1909 were \$4,493,635 and its exports \$244,890.

HISTORY

French Dominion

The first French form of the name Wisconsin was Misconsing, which gradually developed into Oisconsin. When English became the language of the territory, the spelling was changed and finally the present form was adopted officially. Wisconsin formed part of the vast New World, to which Spain made a general claim under the name of Florida, but no Spaniard appears to have come within hundreds of miles of the present state boundaries. In 1608 Quebec was founded as the capital of New France, and the French missionaries and fur-traders pushed westward into the wilderness, New France claiming by virtue of discovery the whole great inland water system. It was not until 1634, however, that Nicolet, an interpreter, who had lived with the Huron Indians, was sent by Champlain, Governor of New France, into what we call the Northwest. He landed, in what is now Wisconsin, somewhere upon the shores of Green Bay, and was welcomed as a god by the Indians. Twenty years later two French fur-traders, Radisson and Groseilliers, wintered near Green Bay, and in the spring of 1655 ascended the Fox River, crossed to the Wisconsin River, and some time the following year explored the shores of Lake Superior and returned to Quebec. Three years later, with other fur-traders and accompanied by friendly Indians, they were again on Lake Superior, where they heard rumours of copper mines and somewhere on the southern shore they built a rough fort. On this expedition they wandered as far west as Minnesota, and ultimately returned in safety to Canada. The Jesuit missionaries had gained a foothold among the Huron Indians in Ontario, and when, after a disastrous war with the Iroquois, the Hurons fled to northern Wisconsin, they were followed in 1660 by Father Menard. The following spring the missionary, with one white companion, visited the Huron villages on the Chippewa and Black Rivers, crossed to the Wisconsin River, and descended it for some distance, where at a portage Father Menard disappeared and was never again heard of. In 1665 his place was taken by Father Allouez, who instructed the roving Indians of various tribes, which had been scattered by the Iroquois, and in 1669 he was relieved by Father Marquette, whose zeal and the labours and romance attaching to whose ventures have connected his name indissolubly with the history of this part of the country. In 1666 Perrot, a fur-trader, had visited the tribes near Green Bay and persuaded the Potawatomi to send a delegation to Montreal to see the Governor of New France. Father Allouez in 1669 was again in the vicinity of Green Bay, where he wintered. In the early spring he visited various Indian villages, returning in the late spring to Sault Ste Marie, but coming back in the same autumn with Father Dablon, when several missions were founded. In 1671 the representative of New France at Sault Ste Marie took formal possession of the Northwest in the name of the King of France. The following year Father Allouez and Father André worked at the extension of the missions.

In 1673 Father Marquette began his wanderings. He and Jolliet entered Green Bay, passed up the Fox River, portaged to the Wisconsin River, followed the latter to its mouth, went down the Mississippi to the mouth of the Arkansas, and here planted a cross and started to retrace their way. They went up the Mississippi River and the Illinois River to the site of the present city of Chicago, where they portaged to Lake Michigan, and arrived safely in September at the mission which Father Allouez had built at De Pere, and in their journey encountered many Indians of the more southerly tribes. The following year Marquette with two assistants set out to establish a mission among the Illinois tribes. From Green Bay they portaged to Lake Michigan and travelled in canoes to the mouth of the Chicago River, where they wintered, and resuming their journey in the spring they went as far as the site of the present city of Peoria. Then Father Marquette, stricken with a mortal illness, turned northwards again, but died on the journey (19 May, 1675). Meantime Father Allouez and Fathers Andre' and Silvy continued their missionary work around Green Bay, and in 1677 Father Albanel arrived at De Pere as superior of the missions in that part of the world. The same year Father Allouez went south to the Illinois. In the two following years Duluth explored the western end of Lake Superior and discovered a new route to the Mississippi; in 1679 LaSalle, who had received from the King of France a monopoly of the western fur trade, arrived at Green bay in the first sailing vessel ever seen on the Great Lakes. This vessel went back loaded with furs, while La Salle and a strong party came south on the west shore of Lake Michigan in canoes, despite the wild weather, and made a landing in Milwaukee Bay, finally proceeding to the Illinois country. Hence Father Hennepin, a Recollect friar, with two companions explored the Upper Mississippi and were taken prisoners by the Sioux, ultimately to be rescued, however, by Duluth, who with them crossed by the route of the Wisconsin and Fox Rivers to De Pere, and in 1683 defended that mission against an attack by the Iroquois. The meeting out of justice to the Indians, who had murdered Frenchmen, made Lake Superior safe for French traders.

In 1685 Perrot became commandant of the west; he established trading posts on the Mississippi, and, in 1690, discovered the lead mines in south-western Wisconsin, which were destined to have such an important effect upon the development of the district. The route from Green Bay by the Fox and Wisconsin Rivers had become the most travelled, but the wars between the Indians had rendered this route unsafe, and in 1693 Frontenac ordered Le Sueur to keep open the route from Lake Superior to the Mississippi. In 1696, however, licences for fur trading were revoked, western outposts were recalled, and the forts abandoned. In 1698 Father Buisson de St. Cosme came south along the western shore of Lake Michigan to the Chicago portage, visiting on the way an Indian village near the present site of Sheboygan, and stopping also at Milwaukee and at the site of the present city of Racine. Two years later Le Sueur, with

a party of miners from France, went up the Mississippi to examine various lead deposits, among others those of Wisconsin. In 1701 peace was made between the Iroquois and the north-western tribes, a large number of Indians from Wisconsin attending the council at Montreal, and in 1702 the trader, St-Denis, paid the Fox Indians liberally to allow his trading canoes to reach the Mississippi once more over the Fox-Wisconsin route, which had been for some years untravelled by white men. But a few years later, the Indian wars recurring, the trade routes became again unsafe. In 1716 La Porte, having been ordered to conduct a campaign against the hostile Indians, arrived at Green Bay with 800 men, and shortly afterwards peace was concluded and hostages given. In 1718 it was reported that there was a settlement of French traders at Green Bay, where a fort had been built. In 1727 a fort was built on Lake Pepin in order to split the alliance of Indian tribes in this neighbourhood and furnish a basis for a further advance westward, but in the following year this was abandoned, and it was not until 1731 that the Fox tribe, after years of warfare, was broken and to a great extent dispersed. In 1738 Louis Denis, Sieur de la Ronde, secured a permit to work the Lake Superior copper mines, and shortly thereafter lead mining was inaugurated in south-western Wisconsin. Fur trading continued on a large scale (on co-partnership being said to have cleared 100,000 *livres* per year from the Wisconsin fur trade alone), and gradually the various Indian tribes were reconciled to each other under French influence. Wisconsin Indians took part in Braddock's defeat, in the siege of Fort William Henry, and in the defence of Quebec, and in 1760 dispatched a party to the defence of Montreal, but retired before its fall.

British Dominion

Upon the fall of New France Wisconsin became British territory and was under military authority. In 1761 a British detachment took over the old French fort at Green Bay and garrisoned it, and British traders began to come in from Albany. In 1763 the formal cession took place; this was quickly followed by the conspiracy of Pontiac. The Wisconsin Indians, however, were divided in sentiment, but upon the whole were friendly to the British, although the fall of Mackinac rendered necessary the evacuation of Green Bay. In 1774 Wisconsin was annexed to the Province of Quebec. During the war for Independence Wisconsin Indians assisted the British, and a punitive expedition sent out by the Americans reached the south-western part of Wisconsin. In 1783 the Treaty of Paris was concluded, ceding to the United States all British territory east of the Mississippi.

American Dominion

It was not, however, until 1796 that the British finally evacuated their military posts on the Upper Lakes, and during this period Wisconsin was practically controlled by British fur-trading companies. Massachusetts, Connecticut, and Virginia claimed

territorial rights over Wisconsin, but subsequently ceded their claims to the Federal Government for the formation of the great Northwest Territory, a national domain out of which new states were to be carved. In 1800 the Northwest Territory was cut in two and Wisconsin became a part of the western division, known as Indiana Territory. In 1809 the State of Indiana was carved out of the territory of that name, and the remaining part, including Wisconsin, became Illinois Territory. In 1818 the State of Illinois was carved out of that territory and the balance, including Wisconsin, became Michigan Territory. In 1836 Wisconsin Territory was created, including the present states of Minnesota and Iowa and a great part of North Dakota and South Dakota. In 1838 the Territory of Iowa was formed out of a part of Wisconsin Territory. In 1848 Wisconsin was admitted as a state, reduced to the present boundaries, the rest of that domain becoming the Territory of Minnesota. Meanwhile, Dubuque had visited Prairie du Chien and obtained permission of the Fox Indians to work the lead mines. Settlers had come in; Indian outbreaks had been suppressed; the war of 1812 had come and gone, and Fort Shelby, the first American post in Wisconsin, at Prairie du Chien, had been captured and later abandoned by the British; the Indians had renewed their allegiance to the United States, the fur-trade had been restricted to American citizens, Astor's American Fur Company had operated in Wisconsin, and Government fur-trading factories had been established at Green Bay and Prairie du Chien. The first school in Wisconsin was opened at Green Bay in 1817. In 1818 Solomon Juneau arrived at Milwaukee, bought out the trading post of his father-in-law, and began the work which has caused him to be considered the founder of the metropolis of the state. The land claims of the French settlers were adjusted, and in 1821 the first steamer on the Upper Lakes appeared in Lake Michigan. In 1822 the Government fur-trading factory system was abolished, and in the same year the rush of speculators to the lead mines in south-western Wisconsin began. In 1832 occurred the Black Hawk War, which, strange to say, appeared to advertise Wisconsin in the east, and increased immigration to its borders. In 1833 Milwaukee was platted, and the first newspaper in Wisconsin was established at Green Bay. In 1846, the people having voted in favour of a state Government and the enabling act having been passed, the first Constitutional Convention opened at Madison, but in April of the following year the suggested Constitution was rejected by popular vote. In December, 1847, the second Constitutional convention gathered, and on 13 March, 1848, the second Constitution was adopted by the people and Wisconsin admitted into the Union under Act of Congress, 29 May. The population was then about 220,000. In 1848, owing to the revolutionary troubles in Europe, there flowed into Milwaukee and the eastern counties of the state a very large German immigration. These immigrants and their descendants have done much to colour the character and habits of the community. There has been a considerable Irish immigra-

tion, followed by a great Polish immigration; of later years Italians and Slavs have come in large numbers.

In 1854 at Ripon the Republican party was organized, and in the same year a fugitive slave, named Glover, was arrested at Racine and was rescued from the Milwaukee jail by a mob. Sherman M. Booth, a fiery Abolitionist, was arrested for complicity in the rescue and the Supreme Court of the state discharged him, deciding that the Fugitive Slave law of 1850 was void. This decision was afterwards reversed by the Supreme Court of the United States, and Booth was re-arrested, but was pardoned by President Buchanan. In 1856 occurred the famous *quo warranto* proceeding, by which Barstow, the Democratic nominee, was ousted from the office of governor by Bashford, the Republican candidate. Wisconsin played a prominent part in the Civil War, furnishing over 90,000 troops, of whom nearly 11,000 lost their lives. The famous "Iron Brigade" was composed chiefly of Wisconsin troops, commanded by a Wisconsin officer. In 1869 began the agitation for the regulation of railway rates, and in 1874 the so-called Potter Law was passed which limited freight and passenger charges and which was upheld as constitutional by the Supreme Court of the state. Feeling ran very high and two years later that law was repealed. In 1885 iron ore of an excellent grade was discovered in the Gogebic Range and a great boom began. In 1889 the Legislature passed an Act, known as the Bennett Law, which required compulsory education in the English language. This Act contained some very objectionable features, which caused much indignation among the foreign-speaking citizens, and generally among Catholics and Lutherans, who considered it an attack on the parochial schools. The Lutheran authorities denounced it, and it was vigorously opposed by Archbishop Heiss of Milwaukee, Bishop Flasch of Racine, and Bishop Katzer of Green Bay. During the agitation which followed, the first two bishops died and the burden of the closing stages of the fight fell upon Bishop Katzer's shoulders. The Democrats took up the issue, demanding the repeal of the law, and the state campaign of 1890 was marked by exceeding bitterness. The Democrats carried the state by 30,000 plurality, and the law was immediately repealed.

In 1890 was decided the famous Edgerton Bible case, in which the Supreme Court of the state held that Bible reading in the public school schools is sectarian instruction and, therefore, violative of the Constitution. In 1892 the Supreme Court nullified the gerrymander passed by the Democratic Legislature, and in 1893 required former state treasurers or their bondsmen to refund the interest which such treasurers had received on state moneys, deposited by them in banks. In the Spanish-American War Wisconsin sent over 5000 men to the front. The leading feature of the history of the last ten years in Wisconsin has been the so-called progressive movement in which this state has taken the lead. Much experimental legislation has been passed and several state com-

missions, with very extensive powers, have been created. Officials have been forbidden to receive railway passes, the system of taxing railways has been changed from a license to an ad valorem system, the primary election law, inheritance tax law, Workmen's Compensation law, and Income Tax law have been passed, the law of Apprenticeship has been thoroughly revised and modernized, a Civil Service Act has been passed, a railway commission created with power to regulate rates, a State Board of Forestry organized, cities have been authorized to establish a commission form of government, child labour and the labour of women have been regulated, and factory inspection provided for. At present (1912) the state is much divided between those who wish to carry this class of legislation still farther and those who think that it has already been carried too far for the prosperity of the community.

EDUCATION

The state educational system consists of a state university, normal schools, high schools, and common schools. The university, situated at Madison, the capital of the state, was provided for by Act of territorial legislature in 1836, but nothing further was done until after Wisconsin was admitted to statehood in 1848, when, in accordance with the new Constitution, the Legislature provided for the establishment of a university to be governed by a board of regents. Meantime, Congress had authorized the secretary of the treasury to set aside two townships within the territory of Wisconsin for the use and support of a university and the title to these lands vested in the state upon its admission to the Union. The state Constitution provided for the sale of these lands from time to time for the establishment of a university fund. In 1854 Congress made a further grant of lands to be sold for the benefit of the university. The income of the fund proving, however, insufficient, the capital was drawn upon, and ultimately the state began to make direct appropriations. The university is now supported partly by the income of such Federal grants, partly by taxation, partly by fees of students, and to a small extent by private gifts. It includes a college of letters and science, a college of engineering, a law school, a college of agriculture, a medical school, a college of music, an observatory, and a university extension division. The grant total of students, given in the bulletin for May, 1911, is 5538, in the charge of several hundred professors and assistants. The state appropriations for the biennium ending 30 June, 1910, were \$2,371,593, while other sources of income, including over \$700,000 from students' fees, etc., brought the grant total of university receipts for that biennium up to \$3,293,445.73. The total expenditure by the state for educational purposes for 1910 was \$13,126,359.06, of which upwards of \$10,6000,000 was expended for common schools, high schools, and graded schools. School attendance for children between seven and fourteen years of age who live within two miles of school by the nearest travelled public highway is compulsory. There are twenty-two day schools for the deaf,

and in 1909, out of 285 high schools, twenty-eight were township high schools. The state normal schools are supported to some extent by the interest of an endowment created by the sale of swamp and overflowed lands, and as to the balance by an annual state tax. A state library commission maintains circulating free public libraries comprising more than 40,000 volumes. The total enrollment in public schools for 1909-10 exceeded 460,000, accommodated in 7769 school houses and taught by 14,729 teachers. Educational institutions of collegiate rank are: Beloit College (1846); Carroll College (1846), Waukesha; Lawrence College (1847, Appleton; Concordia College (1881); Marquette University (1864) and Milwaukie-Downer College (1895) for women; Milton College (1867), Milton; North-western University (1865), Watertown; Ripon College (1851), Ripon; Wayland University (1855), Beaver Dam; and the following Catholic schools: St. Clara Academy (1847), Sinsiniwa; St. Francis Seminary, St. Francis; and St. Lawrence College, Mt. Calvary. There are also many private academic and trade or technical schools and six industrial schools for Indians. Religious statistics show that in 1906 the Catholic Church had 505,264 members, the various Lutheran bodies 284,286, the Methodist bodies 57,473, the Congregationalists 26,163, and the Baptists 21,716.

The Catholic Church maintains a large number of parochial schools and some high schools and academies. Marquette University in Milwaukee (the metropolis of the state), under the control of the Jesuits, has affiliated to itself various educational institutions in that city and has in all its departments about 2000 students. It is estimated that there are over 65,000 children in the Catholic parochial schools of the state. There is a numerous attendance at Lutheran parochial schools. At St. Francis, near Milwaukee, is situated the provincial seminary for the education of priests, with upwards of 150 students in philosophy and theology. Catholic charities are numerous and generously supported. The liberal laws of the state permit the organization by private individuals of industrial schools and home-finding associations. Thus the Sisters of the Good Shepherd in Milwaukee control two corporations, one of which is organized under the industrial school statutes and receives on commitment by the courts numerous incorrigible girls. The home-finding societies receive dependent children on commitment by the courts, and thereupon become the guardians of such children and may consent to their adoption. The Catholic infant asylums house about 500 infants and the orphan asylums nearly 1000 children. The new Saint Mary's Hospital in Milwaukee, conducted by the Sisters of Charity, is one of the largest and finest hospitals in the Northwest, and its work is, to a great extent, purely charitable work.

LEGISLATION

Wisconsin is a code state. The laws have been several times revised, the latest complete revision being in 1898; since which time there has been much legislation of

a so-called progressive nature. Certain public service corporations and the life-insurance companies pay taxes or license fees directly to the state in lieu of other taxes. All public service corporations are under the control of a state commission, and since the amendments of 1911 their bonds must be approved by that commission. A Workmen's Compensation Law, compulsory as to the dealing of state and municipalities with their employees, voluntary as to the dealings of private employers with their employees, was passed in 1911, and has been held constitutional, except as to some minor details left for future determination. There are stringent laws concerning factory inspection, apprenticeship, and the labour of women and children, administered by a state commission. A graduated Income Tax Law, exempting moneys and credits from direct taxation, passed in 1911, has been held constitutional *per se*, though many provisions contained in it have been left for future determination. State, county, and municipal officers are nominated at primary elections, and the Corrupt Practices Act of 1911 rigidly limits the expenditures by candidates and on their behalf, forbids the employment of workers at the election booths on election day, and requires that all political advertisements inserted in newspapers shall embody a statement as to authorship and price paid. Below the Supreme Court, whose members are elected for terms of ten years, are the circuit courts, whose judges are elected for terms of six years, the circuit courts being vested with the full jurisdiction of the common law. The county courts of the state handle probate matters and deal with the commitment of the insane and certain special subjects and in some counties have a limited civil jurisdiction; and from the county courts appeals lie to the circuit courts, where matters are tried *de novo*. Special courts having jurisdiction in criminal matters are created from time to time by act of Legislature, and justice courts exist under the Constitution, having civil jurisdiction up to \$200 and certain criminal jurisdiction. An attempt was recently made to drive the justice courts out of Milwaukee County without constitutional amendment, by the creation of a so-called Civil Court of limited jurisdiction, from which appeals lie (as they do from justice courts) to the circuit court.

Laws Directly Affecting Religion

Freedom of worship is guaranteed by Article I, Sections 18 and 19, of the Constitution of the state, as follows: "The right of every man to worship Almighty God according to the dictates of his own conscience shall never be infringed; nor shall any man be compelled to attend, erect, or support any place of worship, or to maintain any ministry, against consent; nor shall any control of, or interference with, the rights of conscience be permitted, or any preference be given by law to any religious establishments or modes of worship, nor shall any money be drawn from the treasury for the benefit of religious societies, or religious or theological seminaries."

"No religious test shall ever be required as a qualification for any office of public trust under the state, and no person shall be rendered incompetent to give evidence in any court of law or equity in consequence of his opinions on the subject of religion." Sunday is a legal holiday and upon that day saloons are to be closed (a law not enforced). Barber shops, warehouses, and workhouses are also to be closed on Sunday, except for works of charity or necessity. The law permits affirmation subject to the pains and penalties of perjury in lieu of an oath. The seal of confession is protected by statute, Sec. 4074, Statutes of 1898: "A clergyman or other minister of any religion shall not be allowed to disclose a confession made to him in his professional character, in the course of discipline enjoined by the rules or practice of the religious body to which he belongs, without consent thereto by the party confessing."

A very recent decision (June, 1912) by the Supreme Court of the state, however, holds that one of the session laws destroys the rule of confidence between physician and patient, in regard to two matters concerning which the physician may be compelled to testify; and since the statutes protecting the seal of confession and the confidential character of communications between husband and wife, and lawyer and client are of the same nature, it may be doubted whether the seal of confession is now preserved as to those two matters by the statute thus changed and construed. The decision was rendered by a divided court, the dissenting opinion vigorously asserting that the law thus laid down would break the seal of the confessional and cause the imprisonment of priests for refusal to answer such questions.

Laws Affecting Religious Work

There are special provisions concerning the incorporation of Catholic churches. The bishop of each diocese is declared the only trustee of each church in his diocese, and he may cause any congregation to be incorporated by adding four more members as trustees. The bishop himself, the vicar-general of the diocese, the pastor of the congregation, and two laymen, to be elected by the congregation, are to constitute the five trustees of the corporation. Such corporations are given extensive powers as to acquiring and disposing of real estate and in general as to the management of their affairs. The bishop, vicar-general, and pastor remain trustees *ex officio* and their successors take their places. The laymen are elected for terms of two years. The bishop is president, the pastor vice-president, and the laymen are to serve as treasurer and secretary. In case of the dissolution of the corporation, its property is to vest in the bishop of the diocese. Personal property owned by any religious or benevolent association, used exclusively for the purposes of such association, and its real property, if not leased or not otherwise used for pecuniary profit, necessary for the location and convenience of its buildings and embracing the same but not exceeding ten acres, and the lands reserved for the grounds of a chartered college or university not exceeding forty acres

and parsonages whether of local churches or districts and whether occupied permanently or tented for the benefit of the pastors, are exempt from taxation. The statute exempts "Ministers of the Gospel or of any religious society" from jury service.

Marriage

Marriage is declared to be a civil contract. Marriage licenses are required under penalty of the imposition of a fine on any person performing a marriage without the licence, but the lack of a licence apparently does not invalidate the marriage itself. Married women are given extensive property rights, and a married woman may convey, bequeath, and devise her separate estate without consent of her husband. He is, however, entitled to her services, and, with certain exceptions, her earnings belong to him. In case of the husband's death intestate, the wife has the right to his homestead not exceeding \$5000 in value, net, during widowhood; her dower, consisting of one-third of the net rents and profits of the real estate, for life; and a child's share of his personality, in addition to certain special provisions and the right to an allowance during the settlement of the estate. In case no issue is born of a marriage, husband and wife inherit from each other in case of intestacy; where issue is born alive he has an estate by courtesy in case of her intestacy; but the wife, by will, may cut her husband off entirely, whereas the provisions for the wife are reserved to her in case she elects not to take under her husband's will, or is not provided for therein; with the one exception that, in case of a husband's death testate and his widow's election to take under the law, her share of his personality shall not exceed one-third. A woman attains her majority at the age of twenty-one, but the guardianship of her person is transferred to her husband if she marries while a minor; and if she marries when over eighteen and under twenty-one, the court having jurisdiction may in its discretion terminate the guardianship of her property and turn the same over to her. Marriage may be contracted by males of eighteen and females of fifteen, but no marriage licence will be issued to a male under twenty-one, or a female under eighteen without the consent of parent or guardian, unless such party has been previously married. The judges may grant dispensations from the licence law. Marriage may be annulled for various causes existing at the time of marriage, namely:

- 1 incurable impotency, of which plaintiff was ignorant at the time of the marriage;
- 2 consanguinity or affinity, when the parties are nearer of kin than first cousins, computed according to the rules of the civil law, whether of the half or of the whole blood, provided that, when such marriage has not been annulled during the lifetime of the parties, the validity shall not be inquired into after the death of either party;
- 3 when either party has another spouse living;

- 4 when fraud, force, or coercion has been used; at the suit of the injured party, unless confirmed by his or her subsequent act;
- 5 insanity, idiocy, or such want of understanding as renders either party incapable of consenting, at the suit of the other, or of a guardian of the non compos, or at his own suit upon regaining reason, unless after regaining reason he has confirmed the marriage, provided that the party compos mentis, being the applicant, shall have been ignorant of the other's mental condition and shall not have confirmed it subsequent to such person regaining reason;
- 6 at the suit of the wife, when she was under the age of sixteen at the time of the marriage, unless she has confirmed the marriage after arriving at such age;
- 7 at the suit of the husband when he was under eighteen at the time of the marriage unless he has confirmed it after arriving at such age.

Divorce

Divorce is absolute or limited. Absolute divorce may be granted for any of the following causes:

- 1 adultery;
- 2 impotency;
- 3 when either party, subsequent to the marriage, has been sentenced to imprisonment for three years or more and no pardon shall restore such party to conjugal rights;
- 4 for wilful desertion for one year next preceding the commencement of the action;
- 5 for cruel and inhuman treatment of the wife by the husband, or the husband by the wife or when the wife is given to intoxication;
- 6 when the husband or wife has been an habitual drunkard for one year immediately preceding the commencement of the action;
- 7 whenever there has been a voluntary separation for five years next preceding the commencement of the action.

Limited divorce may be granted for the fourth, fifth, and sixth causes above specified; for extreme cruelty of either party; or on the wife's complaint when the husband, being of sufficient ability, shall refuse or neglect to provide for her, or when his conduct towards her renders it improper and unsafe for her to live with him. In all divorce suits

the county is to be represented by counsel. Under the amendments of 1911, when the matter is determined judgment is entered, fully determining the rights of the parties, but the same is not effective, except for the purposes of an appeal, until one year from the date of its entry. At the expiration of one year the judgment becomes absolute unless meantime reversed, modified, or vacated, or unless an appeal be pending or the court otherwise orders. Sentence to imprisonment for life (there is not capital punishment in Wisconsin) dissolves marriage *ipso facto*, and no subsequent pardon restores the felon to his marital rights.

Sale of Liquor

Local option prevails in Wisconsin. There is a Sunday closing law which is not enforced. No saloon may be located within 300 feet of a church or school house, or within one mile of a hospital for the insane; a recent law restricts the number of saloons in each community and makes it unlawful to open saloons in certain new localities without the consent of a specified percentage of the neighbors.

Prisons and Reformatories

The state prison is located at Waupun, and there are several reform schools conducted or subsidized by the state. In Milwaukee a juvenile court has been established, before which are brought delinquent children, as well as dependent children, and in many instances delinquent children have been placed upon probation with good results. In the criminal courts the probation system has recently been introduced, particularly for the benefit of first offenders, and while it is too early to tell what the results will be, the prospects are very hopeful.

Wills and Testaments

A will (except a noncupative will) must be in writing, signed by the testator, and published and declared in the presence of at least two attesting witnesses who must sign in the presence of the testator and in the presence of each other; but beneficial devises, legacies, and gifts given to an attesting witness or to the husband or wife of an attesting witness are void unless there are two other competent witnesses to the will, provided that if such witness or the husband or wife of such witness would have been entitled to a share of the estate were the will not established; then such share, or so much thereof as will not exceed the legacy or bequest made in the will, shall be saved to him. No particular form of attestation is required. The power of alienating real estate may not be suspended for more than two lives in being and twenty-one years thereafter, except when granted to (a) a literary or charitable corporation organized under the laws of Wisconsin for its sole use and benefit; (b) a cemetery corporation, association, or society, or when granted (c) as a contingent remainder in fee on certain conditions; but there is no statute against perpetuities in personal property. There are no other restrictions upon the manner in which a woman may dispose of her estate by will, and

the only other restrictions upon a man's right of disposition are the privileges reserved to his wife as specified above. Devises and bequests to charitable corporations organized under the laws of Wisconsin are except from inheritance tax, but such a disposition to foreign charities receives only the exemption and is subject to the same tax as though left to an individual, a stranger to the blood of the testator.

Cemeteries

Cemeteries may be owned by cemetery associations, churches, or individuals. If owned by such associations any lot therein is, after one interment, inalienable, without the consent of a majority of the trustees, and on the death of the owner descends to his heirs. In some cases an absolute deed to a lot in a Catholic cemetery is refused, and simply a certificate is issued giving certain rights to the holder of it.

PAUL D. CARPENTER

Book of Wisdom

Book of Wisdom

One of the deutero-canonical writings of the Old Testament, placed in the Vulgate between the Canticle of Canticles and Ecclesiasticus.

I. TITLE

The oldest headings ascribe the book to Solomon, the representative of Hebrew wisdom. In the Syriac translation, the title is: "the Book of the Great Wisdom of Solomon"; and in the Old Latin Version, the heading reads: "Sapientia Salomonis". The earliest Greek manuscripts -- the Vaticanus, the Sinaiticus, the Alexandrinus -- have a similar inscription, and the Eastern and the Western Fathers of the first three centuries generally speak of "the Wisdom of Solomon" when quoting that inspired writing, although some of them use in this connection such honorific designations as *he theia Sophia* (the Divine Wisdom), *Panaretos Sophia* (All Virtuous Wisdom). In the Vulgate, the title is: "Liber Sapientiae", "the Book of Wisdom". In non-Catholic Versions, the ordinary heading is: "the Wisdom of Solomon", in contradistinction to Ecclesiasticus, which is usually entitled: "the Wisdom of Jesus, the Son of Sirach".

II. CONTENTS

The book contains two general parts, the first nine chapters treating of Wisdom under its more speculative aspect, and the last ten chapters dealing with Wisdom from

an historical standpoint. The following is the author's train of thought in the speculative part (chaps. i-ix). Addressing himself to kings, the writer teaches that ungodliness is alien to Wisdom and courts punishment and death (i), and he sets forth and refutes the arguments which the wicked advance to the contrary: according to him, the frame of mind of the ungodly is contrary to man's immortal destiny; their present life is only in appearance happier than that of the righteous; and their ultimate fate is an unquestionable proof of the folly of their course (ii-v). He thereupon exhorts kings to seek Wisdom, which is more needful to them than to ordinary mortals (vi, 1-21), and describes his own happy experience in the quest and possession of that Wisdom which is the Splendour of God and is bestowed by Him on earnest suppliants (vi, 22-viii). He subjoins the prayer (ix) by which he has himself begged that Wisdom and God's Holy Spirit might be sent down to him from heaven, and which concludes with the reflection that men of old were guided by Wisdom -- a reflection which forms a natural transition to the review of Israel's ancient history, which constitutes the second part of his work. The author's line of thought in this historical part (ix-xix) may also easily be pointed out. He commends God's wisdom (1) for its dealings with the patriarchs from Adam to Moses (x-xi, 4); (2) for its just, and also merciful, conduct towards the idolatrous inhabitants of Egypt and Chanaan (xi, 5-xii); (3) in its contrast with the utter foolishness and consequent immorality of idolatry under its various forms (xiii, xiv); finally (4), for its discriminating protection over Israel during the plagues of Egypt, and at the crossing of the Red Sea, a protection which has been extended to all times and places.

III. UNITY AND INTEGRITY

Most contemporary scholars admit the unity of the Book of Wisdom. The whole work is pervaded by one and the same general purpose, viz., that of giving a solemn warning against the folly of ungodliness. Its two principal parts are intimately bound by a natural transition (ix, 18), which has in no way the appearance of an editorial insertion. Its subdivisions, which might, at first sight, be regarded as foreign to the primitive plan of the author, are, when closely examined, seen to be part and parcel of that plan: this is the case, for instance, with the section relative to the origin and the consequences of idolatry (xiii, xiv), inasmuch as this section is consciously prepared by the writer's treatment of God's wisdom in its dealings with the idolatrous inhabitants of Egypt and Chanaan, in the immediately preceding subdivision (xi, 5-xii). Not only is there no break observable in the carrying-out of the plan, but favourite expressions, turns of speech, and single words are found in all the sections of the work, and furnish a further proof that the Book of Wisdom is no mere compilation, but a literary unit.

The integrity of the book is no less certain than its unity. Every impartial examiner of the work can readily see that nothing in it suggests that the book has come down

to us otherwise than in its primitive form. Like Ecclesiasticus, Wisdom has indeed no inscription similar to those which open the Books of Proverbs and Ecclesiastes; but plainly, in the case of Wisdom, as in the case of Ecclesiasticus, this absence is no necessary sign that the work is fragmentary at the beginning. Nor can the Book of Wisdom be rightly considered as mutilated at the end, for its last present verse forms a proper close to the work as planned by the author. As regards the few passages of Wisdom which certain critics have treated as later Christian interpolations (ii, 24; iii, 13; iv, 1; xiv, 7), it is plain that were these passages such as they are claimed, their presence would not vitiate the substantial integrity of the work, and further, that closely examined, they yield a sense perfectly consistent with the author's Jewish frame of mind.

IV. LANGUAGE AND AUTHORSHIP

In view of the ancient heading: "the Wisdom of Solomon"; some scholars have surmised that the Book of Wisdom was composed in Hebrew, like the other works ascribed to Solomon by their title (Proverbs, Ecclesiastes, Canticle of Canticles). To substantiate this position they have appealed to the Hebraisms of the work; to its parallelisms, a distinct feature of Hebrew poetry; to its constant use of simple connecting particles (*kai, de, gar, oti*, etc.), the usual articulations of Hebrew sentences; to Greek expressions traceable, as they thought, to wrong renderings from a Hebrew original, etc. Ingenious as these arguments may appear, they prove no more than that the author of the Book of Wisdom was a Hebrew, writing Greek with a distinctly Jewish cast of mind. As far back as St. Jerome (*Praef. in libros Salomonis*), it has been felt that not Hebrew but Greek was the original language of the Book of Wisdom, and this verdict is so powerfully confirmed by the literary features of the entire Greek text, that one may well wonder that the theory of an ancient Hebrew original, or of any original other than Greek, should have ever been seriously maintained.

Of course the fact that the entire Book of Wisdom was composed in Greek rules out its Solomonic authorship. It is indeed true that ecclesiastical writers of the first centuries commonly assumed this authorship on the basis of the title of the book, apparently confirmed by those passages (ix, 7, 8, 12; cf. vii, 1, 5; viii, 13, 14, etc.) where the one speaking is clearly King Solomon. But this view of the matter never was unanimous in the Early Christian Church, and in the course of time a middle position between its total affirmation and its total rejection was suggested. The Book of Wisdom, it was said, is Solomon's inasmuch as it is based on Solomonic works which are now lost, but which were known to and utilized by a hellenistic Jew centuries after Solomon's death. This middle view is but a weak attempt at saving something of the full Solomonic authorship affirmed in earlier ages. "It is a supposition which has no positive arguments in its favour, and which, in itself, is improbable, since it assumes the existence of Solomonic writings of which there is no trace, and which would have been known only

to the writer of the Book of Wisdom" (Cornely-Hagen, "Introd. in Libros Sacros, Compendium," Paris, 1909, p. 361). At the present day, it is freely admitted that Solomon is not the writer of the Book of Wisdom, "which has been ascribed to him because its author, through a literary fiction, speaks as if he were the Son of David" (Vigouroux, "Manuel Biblique", II, n. 868. See also the notice prefixed to the Book of Wisdom in the current editions of the Douai Version). Besides Solomon, the writer to whom the authorship of the work has been oftenest ascribed is Philo, chiefly on the ground of a general agreement in respect to doctrines, between the author of Wisdom and Philo, the celebrated Jewish philosopher of Alexandria (d. about A. D. 40). The truth of the matter is that the doctrinal differences between the Book of Wisdom and Philo's writings are such as to preclude a common authorship. Philo's allegorical treatment of Scriptural narratives is utterly foreign to the frame of mind of the writer of the Book of Wisdom. His view of the origin of idolatry conflicts on several points with that of the author of the Book of Wisdom. Above all, his description of Divine wisdom bespeaks as to conception, style, and manner of presentation, a later stage of Alexandrian thought than that found in Wisdom. The authorship of the work has been at times ascribed to Zorobabel, as though this Jewish leader could have written in Greek; to the Alexandrian Aristobulus (second cent. B.C.), as though this courtier could have inveighed against kings after the manner of the Book of Wisdom (vi, 1; etc.); and finally, to Apollo (cf. Acts, xviii, 24), as though this was not a mere supposition contrary to the presence of the book in the Alexandrian Canon. All these variations as to authorship prove that the author's name is really unknown (cf. the notice prefixed to Wisdom in the Douay Version).

V. PLACE AND DATE OF COMPOSITION

Whoever examines attentively the Book of Wisdom can readily see that its unknown author was not a Palestinian Jew, but an Alexandrian Jew. Monotheistic as the writer is throughout his work, he evinces an acquaintance with Greek thought and philosophical terms (he calls God "the Author of beauty": xiii, 3; styles Providence *pronoia*: xiv, 3; xvii, 2; speaks of *oule amorphos*, "the formless material" of the universe, after Plato's manner: xi, 17; numbers four cardinal virtues in accordance with Aristotle's school: viii, 7; etc.), which is superior to anything found in Palestine. His remarkably good Greek, his political allusions, the local colouring of details, his rebuke of distinctly Egyptian idolatry, etc., point to Alexandria, as to the great centre of mixed Jewish and heathen population, where the author felt called upon to address his eloquent warning against the splendid and debasing Polytheism and Epicurean indifference by which too many of his fellow Jews had been gradually and deeply influenced. And this inference from internal data is confirmed by the fact that the Book of Wisdom is found not in the Palestinian, but in the Alexandrian, Canon of the Old Testament. Had the work

originated in Palestine, its powerful arraignment of idolatry and its exalted teaching concerning the future life would have naturally secured for it a place within the Canon of the Jews of Palestine. But, as it was composed in Alexandria, its worth was fully appreciated and its sacred character recognized only by the fellow-countrymen of the author.

It is more difficult to ascertain the date than the place of composition of the Book of Wisdom. It is universally admitted that when the writer describes a period of moral degradation and persecution under unrighteous rulers who are threatened with heavy judgment, he has in view the time of either Ptolemy IV Philopator (221-204 B.C.), or Ptolemy VII Physicon (145-117 B.C.), for it is only under these depraved princes that the Egyptian Jews had to endure persecution. But it is confessedly difficult to decide which of these two monarchs the author of Wisdom had actually in view. It is even possible that the work "was published after the demise of those princes, for otherwise it would have but increased their tyrannical rage" (Lesêtre, "Manuel d'Introduction", II, 445).

VI. TEXT AND VERSIONS

The original text of the Book of Wisdom is preserved in five uncial manuscripts (the Vaticanus, the Siniticus, the Alexandrinus, the Ephremiticus, and the Venetus) and in ten cursives (two of which are incomplete). Its most accurate form is found in the Vaticanus (fourth century), the Venetus (eighth or ninth century), and the cursive 68. The principal critical works on the Greek text are those of Reusch (Friburg, 1861), Fritsche (Leipzig, 1871), Deane (Oxford, 1881), Sweete (Cambridge, 1897), and Cornely-Zorell (Paris, 1910). Foremost among the ancient versions stands the Vulgate, which presents the Old Latin Version somewhat revised by St. Jerome. It is in general a close and accurate rendering of the original Greek, with occasional additions, a few of which probably point to primitive readings no longer extant in the Greek. The Syriac Version is less faithful, and the Armenian more literal, than the Vulgate. Among the modern versions, the German translation of Siegfried in Kautzsch's "Apocryphen und Pseudepigraphen des A.T." (Tübingen, 1900), and the French version of the Abbé Crampon (Paris, 1905), deserve a special mention.

VII. DOCTRINE OF THE BOOK

As might well be expected, the doctrinal teachings of this deutero-canonical writing are, in substance, those of the other inspired books of the Old Testament. The Book of Wisdom knows of only one God, the God of the universe, and the Yahweh of the Hebrews. This one God is "He who is" (xiii, 1), and His holiness is utterly opposed to moral evil (i, 1-3). He is the absolute master of the world [xi, 22 (23)], which He has created out of "formless matter" [xi, 18 (17)], a Platonic expression which in no way

affirms the eternity of matter, but points back to the chaotic condition described in Gen., i, 2. A living God, He made man after His image, creating him for immortality (ii, 23), so that death entered the world only through the envy of the Devil (ii, 24). His Providence (*pronoia*) extends to all things, great and small [vi, 8 (7); xi, 26 (25); etc.], taking a fatherly care of all things (xiv, 3), and in particular, of His chosen people (xix, 20, sqq.). He makes Himself known to men through His wonderful works (xiii, 1-5), and exercises His mercy towards them all [xi, 24 (23), xii, 16; xv, 1], His very enemies included (xii, 8 sqq.).

The central idea of the book is "Wisdom", which appears in the work under two principal aspects. In its relation to man, Wisdom is here, as in the other Sapiential Books, the perfection of knowledge showing itself in action. It is particularly described as resident only in righteous men (i, 4, 5), as a principle soliciting man's will (vi, 14, sqq.), as within God's gift (vii, 15; viii, 3, 4), and as bestowed by Him on earnest suppliants (viii, 21-ix). Through its power, man triumphs over evil (vii, 30), and through its possession, one may secure for himself the promises of both the present and the future life (viii, 16, 13). Wisdom is to be prized above all things (vii, 8-11; viii, 6-9), and whoever despises it is doomed to unhappiness (iii, 11). In direct relation to God, Wisdom is personified, and her nature, attributes, and operation are no less than Divine. She is with God from eternity, the partner of His throne, and the sharer of His thoughts (viii, 3; ix, 4, 9). She is an emanation from His glory (vii, 25), the brightness of His everlasting light and the mirror of His power and goodness (vii, 26). Wisdom is one, and yet can do everything; although immutable, she makes all things new (vii, 27), with an activity greater than any motion (vii, 23). When God formed the world, Wisdom was present (ix, 9), and she gives to men all the virtues which they need in every station and condition of life (vii, 27; viii, 21; x, 1, 21; xi). Wisdom is also identified with the "Word" of God (ix, 1; etc.), and is represented as immanent with the "Holy Spirit", to whom a Divine nature and Divine operations are likewise ascribed (i, 5-7; vii, 22, 23; ix, 17). Exalted doctrines such as these stand in a vital connection with the New Testament revelation of the mystery of the Blessed Trinity; while other passages of the Book of Wisdom (ii, 13, 16-18; xviii, 14-16) find their fulfilment in Christ, the Incarnate "Word", and "the Wisdom of God". In other aspects too, notably with regard to its eschatological teaching (iii-v), the Book of Wisdom presents a wonderful preparation to the New Testament Revelation. The New Testament writers appear perfectly familiar with this deutero-canonical writing (cf. Matt., xxvii, 42, 43, with Wis., ii, 13, 18; Rom., xi, 34, with Wis., ix, 13; Eph., vi, 13, 17, with Wis., v, 18, 19; Heb., i, 3, with Wis., vii, 26; etc. It is true that to justify their rejection of the Book of Wisdom from the Canon, many Protestants have claimed that in viii, 19-20, its author admits the error

of the pre-existence of the human soul. But this incriminated passage, when viewed in the light of its context, yields a perfectly orthodox sense.

FRANCIS E. GIGOT

Daughters of Wisdom

Daughters of Wisdom

(LES FILLES DE LA SAGESSE).

Founded at Poitiers by Blessed Louis-Marie Grignion de Montfort in 1703. While he was temporary chaplain of the hospital of Poitiers in 1707, he associated into a little community some pious but variously afflicted girls, and gave them a rule of life, the main points of which have been retained in the Rule of the Daughters of Wisdom. In their meeting-room, called by Montfort *La Sagesse* (wisdom), he placed a large wooden cross, to indicate that true wisdom is in the "foolishness" of the cross. This community of poor, crippled, blind, and sickly girls was destined, under God's providence, to give a solid religious training to Louise Trichet, known in religion as Sister Marie-Louise of Jesus. When de Montfort judged her sufficiently advanced in virtue, he gave her a new religious habit, which has been minutely copied by the Daughters of Wisdom. It consists of an ashen-gray woollen dress and a black cape worn over the habit. Their coif and neckerchief are of white linen. They wear slippers instead of shoes. Ten years she alone wore the much-ridiculed dress. In 1712 a companion was given to Marie-Louise in the person of Catharine Brunet (Sister Conception). In 1715, at the request of the Bishop of La Rochelle, de Montfort called upon his spiritual daughters to teach the children of the poor in that city. Henceforth the congregation was both hospitaller and teaching. The founder appointed Sister Marie-Louise superioress of the congregation. On 22 Aug., 1715, Montfort gave the habit of Wisdom to Sister Ste Croix and Sister Incarnation.

The congregation strives to acquire heavenly wisdom by imitating the Incarnate Wisdom, Jesus Christ. The means for imitating Christ is a special devotion to the Blessed Virgin. De Montfort calls it "True Devotion" or "Holy Bondage of Mary", because it mainly consists (1) in consecrating themselves entirely to Our Lady and (2) in serving her lovingly as a slave. The saint, with his keen perception of Mary's greatness and our own unworthiness, preferred the appellation "slave or bondman" to "child or

servant of Mary". Once consecrated to Mary, the sisters perform all their actions in the spirit inculcated in de Montfort's "Treatise of the True Devotion to the Blessed Virgin". When he died in 1716, the community numbered only four sisters. In 1720 the site of their mother-house was acquired at Saint-Laurent-sur-Sevre, where he was laid to rest. Henceforth the life of Marie-Louise was to be a series of travels necessitated by new foundations and by visits to all her communities; in 1750 there were already thirty. She died on 27 April, 1759. Under her successor, Sister Anastasie (1759-68), lay sisters were admitted into the congregation. They wear a black habit, a brown kerchief on weekdays, and a white one on Sundays. When in the chapel or out of the convent they wear a black cape. The lay sisters are over 700. Art. 26 of the first part of the constitution provides that both lay and choir sisters, at the end of five years probation, be sent to the mother-house (at Saint-Laurent-sur-Sèvre, La Vendée, France), where they remain about two months preparing themselves for their perpetual vows.

On 31 Jan., 1794, twenty-six sisters, who had remained in the convent at Saint-Laurent-sur-Sevre, were fastened two and two like criminals. One was hacked to pieces; another slain in her sick-bed, and her corpse dragged through the village. The others were thrown into a squalid prison at Nantes, where eight of them died of starvation. One sister was put to death at Coron; another was wounded by a sabre-cut, and left for dead; two were massacred at Longeron, and two more on the road to Le Mans. Of those imprisoned there, four died of exhaustion. At Poitiers three sisters were exhibited in a public square and the inscription "Harbourers of fanatic priests" placed above their heads. They spent eight months in prison at Le Brouage; they were forced, in the cold winter months, to uproot with their hands the grass that grew between the paving-stones of the streets. At Nantes two sisters were guillotined. At Rennes the heads of Sister Véronique and Jouin fell under the guillotine. Three others, meanwhile exhibited with an iron collar (*carcan*) around their necks, when apprised of the execution of their companions, and threatened with a similar fate, simply replied: "God's holy Will be done". At La Cuille Sister St. Emily was subjected to revolting maltreatment. Sister St. Eugenie's fortitude astonished the Revolutionary Committee of La Rochelle. "Enough, gentlemen, my last word is this: the guillotine seems set up for good. Take me there. An oath against my conscience you will never get from me." On being promised personal safety, she besought her judges not to be separated from her companions. She was imprisoned at Bruges. At Rochefort-en-Terre Sister Mechtilde died of fright at seeing the revolutionaries. Her three companions, imprisoned at Vannes, were refused even a little straw to lie on. From the prison the superioress addressed a pathetic appeal to the municipality. Relief came too late, at least for her. She died after a year's imprisonment. Her two companions were set free. Still when nurses were needed to take care of the wounded and sick soldiers in the hospital at Brest, the im-

prisoned sisters, 70 in number, were sent there. They were the first to resume the religious habit in 1800.

Under Napoleon the Daughters of Wisdom recovered most of their former houses, were granted 30,000 francs for building purposes, and an annuity of 12,000 francs. This was faithfully paid until 1848. It was in 1810, when Napoleon was temporarily the master of Europe, that, at his call, the Sisters of Wisdom left French soil for the first time to nurse the wounded soldiers at Antwerp. Numerous medals were bestowed on the congregation by Napoleon, and by every French Government since; Spain, Prussia, and Belgium have honoured them for nursing the wounded or plague-stricken soldiers of those countries; as a congregation they have been acknowledged in the Apostolic Brief of Leo XII in 1825; they were canonically approved, together with the Fathers of the Company of Mary, in 1853; they were placed under Cardinal Vincenze Vanntuelli as protector, and favoured by two important decrees in 1893 and 1898 securing the integrity of Montfort's institution; and they received the definitive approbation of the constitutions of Montfort's double foundation in 1904.

In 1800 the membership of the community was 260; in 1810, 509; in 1830, 710; in 1840, 1400. To-day there are 5400, distributed among 430 houses. Their principal novitiate is the mother-house. The present French Government has replaced them by lay nurses in the important naval and military hospitals of Toulon, Brest, Cherbourg, Boulogne, and others, in the state prisons, in the Maisons Centrales (prisons for women) of Cadillac and Clermont. Not less than 250 of their educational establishments have been closed. They are in charge of hospitals, insane asylums, orthopaedic institutes, orphan homes, training schools, apprentice shops, protectories, poor-houses, magdalen institutions, kindergartens, day nurseries, boarding-schools, day-schools, and parochial schools. The Asile des Vieillards, founded at Clamart (Paris) by Duchess Galiera, deserves a special mention for the uniqueness of its purpose. It is a home for aged and indigent artists, literary and scientific men, or noblemen.

In 1812 the Daughters of Wisdom took charge of the institution for deaf-mutes at La Chartreuse d'Auray. Trained by Miss Duler and by the Abbé Sicard, the sisters made rapid progress in this new field of usefulness. They improved the methods of their masters, and, in turn, became the teachers of several other religious communities. Today the Daughters of Wisdom direct the institutes of the blind and deaf-mutes in seven departments; at La Chartreuse, Larnay, Orléans, Lille, Laon, Besançon, and Toulouse. Larnay gained world-wide renown after the publication of Louis Arnould's "Une ame en prison", in which he graphically describes the method pursued by Sister Marguerite for the education of Marie Heurtin, deaf-mute and blind from her birth. Before Sister Marguerite, Sister St. Médulle had worked on similar lines, in instructing Germaine Cambon and Marthe Obrecht. What the famous Abbé de l'Epée considered

almost impossible has been successfully accomplished by Sisters St. Medulle and Marguerite, and is zealously continued by the Daughters of Wisdom. Marie Herutin herself has been very serviceable in teaching her similarly afflicted companions. The deaf-mutes of Larnay manufacture, under the direction of their teachers, church vestments which experts have declared to rival the products of the ateliers of Paris and Toulouse. A unique religious congregation, "the Little Religious of Our Lady of the Seven Dolours", sprang from the Larnay Institute. It was founded in 1849 for the deaf-mutes of Larnay by Canon de Larnay, and approved by Cardinal Pie. Since 1898 it has been affiliated to the Daughters of Wisdom. Their rule has been approved by Pius X.

Belgium

In 1846 the Daughters of Wisdom crossed the French frontier and settled at Tournai. Of the establishments of the congregation on Belgian soil, the principal ones are located at Tournai, Antwerp, Brussels, and Malines. Holland.-In 1880 the Daughters of Wisdom made their first foundation at Schimmert, Limburg, in the Netherlands, where they have since opened a boarding-school, a novitiate for the Dutch Province, and a kindergarten. Among their other establishments in Holland are schools at Rotterdam (in 1905) and an institute for defective children at Druten.

Italy

The Hospital Sant'Andrea, Genoa, with its branches San Filippo and Coronata; houses in Rome, Turin, Gorno, Nettuno, and San Remo. The novitiate of the Italian Province at San Giorgio (Monferrato).

Switzerland

Establishments at Sonnenwyl and Bonnefontaine.

Denmark

Establishment at Roskilde. Hayti.-1871, the number of establishments today is 45, with 250 teachers and nurses.

Colombia

Houses at Villavicencio (1905), Medina (1906), and Gachala (1911).

Central Africa

In the Vicariate Apostolic of Shire, houses at Nugludi and Utale.

England

(1) Abbey House, Romsey, Hampshire (1891), 17 sisters, 80 orphan boys. (2) La Sagesse Convent, Golder's Green, London, N.W., boarding-school and day-school. (3) La Sagesse Convent, Grassendale, Liverpool, a juniorate destined to recruit English-speaking members for the congregation. The Sisters also visit the poor and take care of them in their homes. Evening school for girls; 15 sisters. (4) Our Lady of the Sacred Heart, Moorfield Convent, Preston (1905), an orphan home for girls, who are taught domestic science; also a home of retreat for ladies (21 sisters). (5) Our Lady's Convent,

Gateshead-on-Tyne (1906), boarding-school and day-school, 14 sisters, 80 pupils. (6) Romsey, near de Montfort College, of the Company of Mary, one house; the sisters have charge of the kitchen, laundry, linen-room, and infirmary of the college.

Canada

(1) In Ontario: Cumming's Bridge, near Ottawa, the provincial house of the Canadian province, and a novitiate for English and French-speaking young ladies. Also, a boarding-school and the parochial schools. Other houses: Sturgeon Falls, Blind River, Cyrville, Alfred and St. Thomas Lefavre. (2) In Quebec: Montfort (1884), Huberdeau, St. Jovite, St. Agathe des Monts, Papineauville (2 houses), Cheneville, Grenville, and two hospitals in Montreal; St. Justine, for children; St. Hélène. Also domiciliary visiting of the poor. (3) New Brunswick: Edmundston, a boarding-school and a day-school. (4) Alberta: Red Deer, Castor, and Calgary.

United States

Maine: St. Agatha, a high school, a boarding-school and day-school, and a hospital at Grand Isle; parochial schools. New York: Ozone Park, Long Island, Our Lady of Wisdom Academy, boarding-school, day school, and parochial school; 27 sisters, 80 boarders. There they admit little boys up to the age of ten. Port Jefferson, St. Charles' Home for blind, crippled, and defective children; 30 sisters, 250 inmates.

Blessed Louis-Marie Grignion de Montfort (London, 1892), 11, *passim*; Life and Select Writings of the Venerable servant of God, Louis-Marie Grignion de Montfort (London, 1870), 322-30; TEXIER, Marie-Louise de Jesus, premiere superieure de la Congregation de la Sagesse (Paris and Poitiers, 1901), 310-21; fontENEAU, Histoire de la Congregation de la Sagesse (Paris and Poitiers, 1878); ARNOULD, Une Ame en Prison (Paris, 1904); Constitution des Filles de la Sagesse (Rome, 1905); additional information from Le Bulletin Trimestriel and Lettres Circulaires of the Superior General of the Company of Mary and of the Daughters of Wisdom.

JOHN H. BEMELMANS

Nicholas Cardinal Wiseman

Nicholas Patrick Wiseman

Cardinal, first Archbishop of Westminster; b. at Seville, 2 Aug., 1802; d. in London, 15 Feb., 1865, younger son of James Wiseman, a merchant of Irish family resident in Seville, by his second wife, Xaviera Strange. On his father's death in 1805 he was taken to Ireland by his mother, and after two years at school in Waterford was, with his brother, placed at Ushaw College, Durham, founded seventeen years previously, where the distinguished historian John Lingard, Wiseman's lifelong friend, was then vice-president. At Ushaw Nicholas resolved to embrace the life of a priest, and in 1818 he

was chosen as one of the first batch of students for the English College in Rome, which had just been revived after having been closed for twenty years owing to the French occupation. Soon after his arrival he was received in audience, with five other English students, by Pius VII, who made them a kind and encouraging address; and his next six years were devoted to hard and regular study, under the strict discipline of the college. He attained distinction in the natural sciences as well as in dogmatic and scholastic theology, and in July, 1824, took his degree of Doctor of Divinity, after successfully sustaining a public disputation before a great audience of learned men, including at least one future pope. Eight months later, on 19 March, 1825, he was ordained priest. His particular bent had always been towards Syriac and other Oriental studies, and this was encouraged by his superiors. The learning and research evidenced in his work, "Horae Syriacae", which appeared in 1827, established his reputation as an oriental scholar. Already vice-rector of the English College, and thus enjoying an official status in Rome, he was named by Leo XII, soon after the publication of his book, supernumerary professor of Hebrew and Syro-Chaldaic in the Sapienza University, and soon found himself in communication, by letter or otherwise, with all the great Orientalists of the day, such as Bunsen, Scholz, Ackermann, and Tholuck.

By the pope's wish he undertook at this time a course of English sermons for the benefit of English visitors to Rome, and in June, 1828, while still only in his twenty-sixth year, he became Rector of the English College. This position gave him the status of official representative of the English Catholics in Rome, and brought many external duties into his life, hitherto devoted chiefly to study, lecturing, and preaching. Noted as a linguist -- "he can speak with readiness and point", wrote Newman of him some years later, "in half-a-dozen languages, without being detected for a foreigner in any one of them" -- he received and entertained at the college distinguished visitors from every European country, and was equally popular with them all. Gladstone, Newman, Hurrell Froude, Archbishop Trench, Macaulay, Monckton-Milnes, and Manning were among the eminent Englishmen who made his acquaintance during the twelve years of his rectorship; and he had much interesting intercourse also with Lamennais, then bent on his scheme of reconciling Democracy with Ultramontanism, and his devoted friends Lacordaire, Montalembert, and Rio. Fr. Ignatius Spencer, afterwards the famous Passionist, who entered the English College in 1830, had much to do with the turning of Wiseman's thoughts towards the possible return of England to Catholic unity; and this was deepened by his conversations with Newman and Fronde when they visited Rome in 1833. Meanwhile he was busy with the preparation of his lectures "On the Connection between Science and Revealed Religion", which were delivered in 1835, and greatly added to his reputation, although they embodied some theories which have been superseded since. They won unstinted praise from such critics as Bunsen,

Milnes, Dollinger, Lepsius, and Cardinal Mai, and raised Wiseman to perhaps the highest point he was to attain as a student and a man of letters. His quiet life of study was indeed, though he hardly knew it, now practically at an end; and the last thirty years of his career were destined to be largely taken up with an active participation in the events following on the general religious reaction in Europe, of which the Oxford Movement in England was one of the most remarkable fruits. Wiseman's correspondence at this time evinces his keen and ardent sympathy with the widespread religious revival associated with such names as those of Ozanam and Lacordaire in France, Schlegel and Gorres in Germany, and Manzoni and others in Italy. He was in constant correspondence with Dollinger (whom he brought into relations with Lingard), expressed unbounded admiration for his Church History, then being published, and hoped through him to establish co-operation between German and English Catholics.

In the autumn of 1835 Wiseman came to England for a year's sojourn, full of fervent hopes for the future of Catholicism in that country. But he had never lived there himself under the numbing pressure of the penal laws; and it was a shock to him to realize that the long down-trodden "English papists", from whom that oppression had only recently been removed by the Emancipation Act of 1829, were not in the least ripe for any vigorous forward movement or prominent participation in public life. Nor was any particular encouragement in this direction given to them in the exhortations or pastoral letters of their ecclesiastical superiors, whose chief anxiety seemed to be lest the piety of their flocks might be adversely affected by their new-born liberty of action. Wiseman's enthusiasm, however, was not damped by the somewhat chilly atmosphere of English Catholicism. He began without delay a course of lectures, addressed alike to Catholics and Protestants, which at once attracted large audiences, and from which, wrote a well-qualified critic, dated "the beginning of a serious revival of Catholicism in England." The lectures were resumed in the following year, in the largest Catholic church in London, with even greater success. Some distinguished converts -- among them the eminent architect Welby Pugin -- were received into the Church: Wiseman was presented with a costly testimonial, and was invited to write for a popular encyclopedia an article on the Catholic Church. He gave evidence of his power as a temperate yet forcible apologist, in his admirable defence of Catholicism against a violent attack published by John Poynder -- a defence which W. E. Gladstone described as "a masterpiece of clear and unanswerable argument"; and in the same year, 1836, he took the important step of founding, in association with Daniel O'Connell and Michael Quin (who became the first editor), the "Dublin Review", with the object, as he himself stated, not only of rousing English Catholics to a greater enthusiasm for their religion, but of exhibiting to the representatives of English thought

generally the variety, comprehensiveness, and elasticity of the Catholic system as he had been taught to regard it.

In the autumn of 1836 Wiseman returned to Rome, and for four more years held his post of rector of the English College. While in no way slackening in the conscientious performance of his duties, he found himself gradually more and more drawn towards, and personally interested in, the important religious movement developing in England; and this feeling was strengthened by his intercourse with Macaulay and Gladstone, of whom he saw much when they visited Rome in 1838. He welcomed in them that spirit of outside sympathy with Catholicism which had already seemed to him so striking and encouraging a phenomenon in men like von Ranke, A. W. Schlegel, and even Victor Hugo; and his correspondence during this period shows how in the midst of his multifarious duties in Rome he longed to be at the heart of the movement in England, working for it with all the versatile gifts at his command, and with all the personal influence which he could wield. He visited England in the summer of 1839; and besides his active public engagements at that time -- giving retreats at Oscott and elsewhere, preaching at the opening of the new churches which were rising all over the country, and working, in conjunction with Father Spencer, for the spread of a new spirit of prayer and piety among English Catholics -- there appeared from his pen, in the "Dublin Review", the famous article on St. Augustine and the Donatists which was a turning-point in the Oxford Movement, and pressed home the parallel between the Donatists and the Tractarians with a convincing logic which placed many of the latter, in Newman's famous words, "on their death-bed as regarded the Church of England." Three months after the publication of this momentous article, Wiseman returned to Rome; but he felt himself, as his letters show, that the future of his life's work was to be not in Rome but in England.

In 1840 Gregory XVI raised the number of English vicars Apostolic from four to eight; and Wiseman was nominated coadjutor to Bishop Walsh of the Central District, and president of Oscott College. After making a retreat with the Passionists he was consecrated on 4 June, in the chapel of the English College, with the title of Bishop of Melipotamus, and held an ordination service next day. He left Rome on 1 Aug., after twenty-two years' residence there, and took up his residence at Oscott, which it was his design from the first to make a centre in the work of drawing the Catholic-minded party in the Anglican Church towards Rome. No encouragement in this idea was forthcoming from his scholastic colleagues in the college, and the only support he received was in the unwavering sympathy of Father Spencer, and the enthusiasm of A. W. Pugin, a constant visitor at Oscott. Other distinguished men visited Wiseman there, such as Lords Spencer and Lyttelton, Daniel O'Connell, the Duc de Bordeaux, and many more; and though not interested in the routine of college life, and a great bishop

rather than a successful president, he gave a prestige and distinction to Oscott which no one else could have done. A profound liturgist, he was most particular about the proper carrying-out of the ceremonial of the Church; and his humour, geniality, and kindness made him an especial favourite with the younger members of the college.

On the publication of the famous Tract 90, written to justify the simultaneous adherence to the Thirty-Nine Articles and to the Decrees of Trent by Anglican clergymen, Wiseman entered upon direct correspondence with Newman; and after more than four years of perplexity, doubt, and disappointed hopes, he had the happiness of confirming him at Oscott, subsequent to his reception into the Catholic Church. But neither Newman's own conversion, nor that of a large number of his most distinguished disciples, sufficed to break down the wall of reserve and suspicion which had always separated the "Old English" Catholics, such as Lingard and his school, from the leaders of the Oxford Movement. The sincerity of their Catholic leanings had been doubted when they were Protestants; and the sincerity of their conversion was equally suspected now that they were Catholics. Wiseman, on the other hand, saw in every fresh accession new ground for serious hope for the return of England to Catholic unity. He enlisted the prayers of many Continental bishops for this intention, and worked unceasingly to promote a cordial understanding between new converts and old Catholics, and to make the Oxford neophytes at home in their new surroundings. Many of them found shelter and occupation at Oscott, and the "Dublin Review" was strengthened by an infusion of new writers from their ranks. Deeply interested, as was natural, in the future of Newman and his immediate followers, Wiseman concerned himself closely with the project, ultimately realized in Birmingham, of founding an Oratory in England.

Meanwhile he had himself been appointed pro-vicar Apostolic of the London District, and had (in July, 1847) visited Rome on business of the utmost importance in relation to English Catholicism. He was deputed by his brother bishops to submit to the Holy See the question of revising the constitution of the Church in England, and of substituting for the vicars Apostolic a regular hierarchy, such as had existed in Ireland throughout the darkest days of the penal laws, and had recently been established in Australia. In the changed circumstances of English Catholicism some new code of laws was imperatively called for to supplement the obsolete constitution of 1753; but the project of creating a hierarchy, which Wiseman favoured as the true solution of the question, was strongly opposed by many English Catholics, headed by Cardinal Acton, the only English member of the Sacred College. The negotiations on the matter with the Holy See were interrupted by the exciting and important political events which followed the accession of Pius IX and the national Italian rising against Austria. Wiseman returned to England charged with the duty of appealing to the British Government for support of the Papacy in carrying out its policy of Liberalism. Bishop

Ullathorne was sent out to Rome early in 1848 to continue in Wiseman's place the negotiations on the question of the hierarchy for England; and he left on record his admiration of the calm and detailed consideration given to the subject by the authorities, at a time when revolution and disorder were almost at their height. All the evidence forthcoming seemed to show that the British Government could find no reasonable cause of offence in the proposed measure; and it was on the point of being carried out when the Revolution burst in Rome, and the pope's flight to Gaeta delayed the actual execution of the project for nearly two years.

Soon after Wiseman's return to England he succeeded Dr. Walsh as vicar Apostolic of the London District, and threw himself into his episcopal work with characteristic activity and zeal. The means he relied on for quickening the spiritual life of the district were, first, the frequent giving of retreats and missions both for clergy and laity, and secondly the revival of religious orders, which had of course become entirely extinct in England under the penal laws. Within two years he founded no less than ten religious communities in London, and had the satisfaction of seeing many of the converts either joining one of these communities, or working harmoniously as secular priests with the other clergy of the district. A notable event in the annals of the London Catholics was the opening, at which Wiseman assisted, of the great Gothic Church of St. George's, Southwark, designed by Pugin, in July 1848. Fourteen bishops, 240 priests, and representatives of many religious orders took part in the opening ceremonies, which were described in no unfriendly spirit by the metropolitan Press. A function on this scale in the capital of England indicated, as was said at the time, that the English Catholic Church had indeed "come out of the catacombs"; but Wiseman had still much to content with in the shape of strong opposition, on the part of both clergy and laity of the old school, to what was called the "Romanizing" and "innovating" spirit of the new bishop. In matters of devotion as well as of Church discipline every development was regarded by this party with suspicion and distrust; and no greater proof could be adduced of the tact, prudence, and firmness of Wiseman in his difficult office, than the fact that in less than three years he had practically disarmed his opponents, and had won over to his own views, not only the rank and file, but the leaders of the party which had at first most strenuously resisted him.

In the spring of 1850, just after the Gorham decision of the Privy Council, declaring the doctrine of baptismal regeneration to be an open question in the Church of England, had resulted in a new influx of distinguished converts to Catholicism, Wiseman received the news of his impending elevation to the cardinalate, carrying with it, as he supposed, the obligation of permanent residence in Rome. Deeply as he regretted the prospect of a lifelong severance from his work in England, he loyally submitted to the pope's behest, and left England, as he thought for ever, on 16 Aug. Meanwhile strong repres-

entations were being made at Rome with the view of retaining his services at home; and he was able to write, immediately after his first audience of Pius IX, that it was decided that the English hierarchy was to be proclaimed without delay, and that he was to return to England as its chief. At a consistory held on 30 Sept. Nicholas Wiseman was named a cardinal priest, with the title of St. Pudentiana. The papal Brief re-establishing the hierarchy had been issued on the previous day; and on 7 Oct. the newly-created cardinal Archbishop of Westminster announced the event to English Catholics in his famous pastoral "from outside the Flaminian Gate".

He left Rome a few days later, travelling by Florence, Venice, and Vienna, where he was the emperor's guest; and it was here that he first learned from a leading article in the "*Times*", worded in the most hostile terms, something of the sudden storm of bitter feeling aroused in England, not by his own elevation of the Sacred College, but by the creation of an English Catholic hierarchy with territorial titles. Wiseman instantly wrote to the Premier, Lord John Russell, to deprecate the misconception in the public mind of the papal act; but by the time he reached England, in Nov., 1850, the fanatical fury of the agitation caused by the so-called "Papal aggression"; was at its height. Every article printed by the "*Times*" on the subject was more bitter than its predecessor: the premier's famous letter to the Bishop of Durham, inveighing against the pope's action as "insolent and insidious", fanned the flame: Queen Victoria showed her sympathy with the agitation in her reply to an address from the Anglican bishops; riotous public meetings, and the burning in effigy of pope, cardinals, and prelates, kept the whole country in a state of ferment for several weeks; and Wiseman in his progress through London was frequently hooted, and stones were thrown at the windows of his carriage. Nothing daunted, he instantly set about the composition of his masterly "Appeal to the Reason and Good Feeling of the English people on the subject of the Catholic Hierarchy", a pamphlet of some thirty pages, addressed to the people themselves rather than to the educated minority who in the writer's view had so grossly and inexcusably misled them. The cogency and ability of the appeal was frankly recognized by the English Press, and the political enemies of the government were not slow to point out the inconsistency of its dealings with the Catholics of England and Ireland. The cardinal followed up the publication of his treatise by delivering a course of lectures on the same lines in St. George's Cathedral, and the note struck by him was taken up by Gladstone in the House of Commons. The Ecclesiastical Titles Bill, making the assumption by Catholics of episcopal titles in the United Kingdom a penal offence, was introduced into Parliament early in 1851, and became law on 1 Aug.; but it was a dead letter from the first, as Gladstone had the courage and prescience to declare that it would be. Its provisions were never enforced, and it was repealed during Gladstone's first premiership twenty years later. By the end of 1851 the No-popery agitation, as short-

lived as it was violent, was dead and buried, the last nail having been knocked into its coffin by the unrivalled irony and brilliant rhetoric of the lectures on "The Present Position of Catholics", delivered by Newman in Birmingham in the summer of this year.

The anti-Catholic storm having been lulled, Wiseman made it his business to endeavour to restore those amicable relations between Catholics and Protestants which had inevitably been somewhat disturbed by the recent outburst. He had many personal friends outside Catholic circles, and his wide range of knowledge on many neutral subjects such as natural science, archaeology, and Oriental studies, made him welcome in general society. No one could be less like the "wily Roman prelate" of anti-popery fiction than the genial and thoroughly English gentleman, whose appearance, bearing, and conversation disarmed the prejudices and enlisted the sympathy of all with whom he was brought into contact. Not only by personal intercourse with his fellow-countrymen, but by his frequent appearances on the lecture-platform, he did much to influence public opinion in favour of Catholics. His lectures were at first chiefly on religious subjects, delivered in Catholic chapels in various parts of the country; but as time went on, and the many-sided character of his attainments became better known to the public, he was frequently asked to give addresses on topics connected with archaeology, art, and literature, not only in London but in Liverpool, Manchester, and other important centres. Large audiences, including many persons of distinction, attended on these occasions; and the speaker's graceful eloquence, genial personality, and sympathetic voice and manner, enhanced the impression wrought by his intimate knowledge of the various subjects with which he dealt. His delivery was fluent and his style brilliant, and characterized by a command of poetic imagery in which probably few public speakers have surpassed or equalled him.

While the cardinal slowly but surely advanced in the popular regard and esteem, as his gifts and qualities became more widely known, he was faced with many internal difficulties in the government of the Church in England. The divergence of views, on questions of church policy and administration, between the old school of ecclesiastics (who were opposed as much to what they call the "importation of modern Roman ideas" as to the influx of converts and the re-establishment of regular orders in England) and the enthusiastic recruits from Oxford such as Oakley, Talbot, Faber, and Ward, had by no means disappeared. Wiseman himself was regarded, even by some of his brother bishops, as something of an autocrat; and both before and after the first provincial synod held by him at Oscott (when Newman preached his famous sermon on the Second Spring), there was considerable agitation for the appointment of irremovable parish priests and for the election of bishops by the diocesan clergy. Wiseman met these difficulties with his usual courage, moderation, and tact, steadfastly refusing

to be drawn in to party controversies or to allow any public manifestation of party spirit. He went to Rome in the autumn of 1853 to explain matters personally to Pius IX, who showed him every mark of confidence and kindness, and gave full approval to his ecclesiastical policy.

It was during this visit to Rome that Wiseman projected, and commenced to execute, the writing of by far the most popular book that came from his versatile pen -- the beautiful romance of "Fabiola", which was meant to be the first of a series of tales illustrative of different periods of the Church's life. The book appeared at the end of 1854, and its success was immediate and phenomenal. Translations of it were published in almost every European language, and the most eminent scholars of the day were unanimous in its praise. All this greatly consoled the cardinal when troubled and harassed by many vexations, and a spirit of new cheerfulness and courage breathes from a sermon preached by him in May, 1855, dwelling in thankfulness and hope on the revival of Catholicism in England. In the autumn of 1855 he delivered, and afterwards published, four lectures on concordats, in connection with the concordat recently concluded between Austria and the Holy See. The subject was treated with his usual exhaustive eloquence, and the lectures made a great impression, four editions of them being printed, as well as a German version with which the Emperor of Austria expressed himself highly pleased.

The increasing pressure of episcopal and metropolitan duties, as well as his greatly impaired health, induced Wiseman in 1855 to petition Rome for a coadjutor, and Rt. Rev. George Errington, Bishop of Plymouth, was appointed (with right of succession to the archbishop) in April of that year. He had worked under the cardinal both in Rome and at Oscott, and they were intimate friends; but their differences of character and temperament were so marked that Errington foresaw from the first, if Wiseman did not, that the new relation between them would be one full of difficulty. A rigorous disciplinarian of a somewhat narrow type, the coadjutor was bound, in matters of diocesan administration, to come into collision with a chief who disliked the routine of business, and was apt to decide questions rather as prompted by his own wide and generous impulses than according to the strict letter of the law. Before the year was out Errington had expressed in Rome his dissatisfaction with his position and his readiness to retire from it.

For the moment the difficulties were smoothed over, but they were subsequently accentuated by the rapid rise to prominence in the archdiocese of Henry Edward Manning, who founded in London, in 1856, his congregation of Oblates of St. Charles, and became in the same year provost of the metropolitan chapter. The story of the series of misunderstandings between Wiseman and Manning on one side, and Errington and the Westminster canons on the other, has been told at length, though

not with complete accuracy or impartiality, in Purcell's "Life of Manning", and, in more trustworthy fashion, in Ward's "Life of Wiseman" (see also MANNING). Errington, gravely offended at the charges of anti-Roman spirit brought against him, persistently refused to resign his office; and as it became increasingly manifest that he and the cardinal could not work together with any advantage to the archdiocese, he was removed from the coadjutorship by papal Decree dated 22 July, 1860. He declined the offer of the Archbishop of Trinidad, and spent the rest of his life in retirement in the Diocese of Clifton.

Wiseman's domestic trials during 1858 were agreeably varied by his visit to Ireland in the early autumn of that year -- a visit which the enthusiasm of Irish Catholics transformed into a kind of triumphal progress, and during which he delivered, in different parts of the island, sermons, lectures, and addresses afterwards printed in a volume of four hundred pages. Cheered by the warmth of the welcome accorded him by Irishmen of every class and creed, he returned home, improved in spirits if not in health, to find himself engrossed not only with the affairs of his archdiocese, but with the march of political events in Rome and Italy, in which he was very keenly interested. He had lately published his "Recollections of the Last Four Popes", which had roused much interest both in England and on the Continent. His fervent loyalty to Pius IX found vent in a pastoral which he addressed from Rome, early in 1860, to the English Catholics asking for contributions to the needs of the Holy See. Later he founded an Academia in London, chiefly at the instance of Manning, who hoped through its means to kindle an enthusiasm for the temporal power of the pope. Wiseman's own idea, reflected in his inaugural lecture in June, 1861, was rather than the new institution should encourage the scholarly and scientific researches which so greatly interested him. Both these objects were advocated in the early papers read at the Academia by Dr. Rock, W.G. Ward, and others. After 1860 Wiseman, realizing that his health was permanently broken, lived chiefly in the country, leaving the conduct of diocesan affairs largely in the hands of Manning who possessed his entire confidence, though he was at this time far from popular in the archdiocese. Wiseman thought it prudent, early in 1861, to remove the Oblates from the diocesan seminary. He visited Rome that year, and again in 1862, in connection with the canonization of the Japanese martyrs, and was treated by Pius IX with special kindness and favour. We find him during the next two years, notwithstanding increasing bodily weakness, working with unabated zeal to redress Catholic grievances, especially with regard to poor schools, and the position of Catholic soldiers and sailors, as well as the inmates of prisons, reformatories, and work-houses. He attended a great Catholic Congress at Mechlin in June, 1863, and gave an address in French dealing with the progress of the Church in England since the Emancipation Act of 1829. Later in the same year he interested himself warmly in the

work undertaken by Herbert (afterwards Cardinal) Vaughan, of founding a college for Foreign Missions in England. One of his last public utterances was an indignant pastoral published in May, 1864, in which, with his unfailing loyalty to the Holy See, he protested against the enthusiastic welcome of Garibaldi in England, and especially against the adulation paid by Anglican bishops to a man who had openly avowed his sympathy with Atheism. In the following October he assisted at the consecration of the Bishop of Bruges, and on his return home occupied himself with the writing of a lecture on Shakespeare, which he hoped to deliver at the Royal Institution on 27 Jan., 1865. When that date arrived, however, he was already on his death-bed. His last weeks were spent in religious exercises and preparation for death. The news of his illness and death evoked expressions of general sympathy from men of every class and every creed; and the practically unanimous voice of the Press testified to the high place he had won for himself in the respect and affections of his fellow-countrymen, to the astonishing change which had been wrought in fifteen years in the feelings entertained towards him by the people of England. His funeral at Kensal Green was made the occasion of an extraordinary popular demonstration, taking place, as the "Times" remarked, "amid such tokens of public interest, and almost of sorrow, as do not often mark the funerals even of our most illustrious dead".

WARD, Life and Times of Cardinal Wiseman, with three illustrative portraits (London, 1898); GILLOW, Bibl. Dict. Eng. Cath., s. v., with a complete list of his published works; WHITE, Memoir of Cardinal Wiseman (London, 1867); MILNES (LORD HOUGHTON), Monographs (London, 1873); MORRIS, The Last Illness of Cardinal Wiseman (London, 1865); Dublin Review (Jan., 1865); and Memorial (April, 1865).

D.O. HUNTER-BLAIR

Witchcraft

Witchcraft

It is not easy to draw a clear distinction between magic and witchcraft. Both are concerned with the producing of effects beyond the natural powers of man by agencies other than the Divine (cf. OCCULT ART, OCCULTISM). But in witchcraft, as commonly understood, there is involved the idea of a diabolical pact or at least an appeal to the intervention of the spirits of evil. In such cases this supernatural aid is usually invoked either to compass the death of some obnoxious person, or to awaken the passion of love in those who are the objects of desire, or to call up the dead, or to bring calamity or impotence upon enemies, rivals, and fancied oppressors. This is not an

exhaustive enumeration, but these represent some of the principal purposes that witchcraft has been made to serve at nearly all periods of the world's history.

In the traditional belief, not only of the dark ages, but of post-Reformation times, the witches or wizards addicted to such practices entered into a compact with Satan, adjured Christ and the Sacraments, observed "the witches' sabbath" — performing infernal rites which often took the shape of a parody of the Mass or the offices of the Church — paid Divine honour to the Prince of Darkness, and in return received from him preternatural powers, such as those of riding through the air on a broomstick, assuming different shapes at will, and tormenting their chosen victims, while an imp or "familiar spirit" was placed at their disposal, able and willing to perform any service that might be needed to further their nefarious purposes.

The belief in witchcraft and its practice seem to have existed among all primitive peoples. Both in ancient Egypt and in Babylonia it played a conspicuous part, as existing records plainly show. It will be sufficient to quote a short section from the recently recovered Code of Hammurabi (about 2000 B.C.). It is there prescribed,

If a man has laid a charge of witchcraft and has not justified it, he upon whom the witchcraft is laid shall go to the holy river; he shall plunge into the holy river and if the holy river overcome him, he who accused him shall take to himself his house.

In the Holy Scripture references to witchcraft are frequent, and the strong condemnations of such practices which we read there do not seem to be based so much upon the supposition of fraud as upon the "abomination" of the magic in itself. (See [Deuteronomy 18:11-12](#); [Exodus 22:18](#), "wizards thou shalt not suffer to live" — A.V. "Thou shalt not suffer a witch to live".) The whole narrative of Saul's visit to the witch of Endor ([I Kings 28](#)) implies the reality of the witch's evocation of the shade of Samuel; and from [Leviticus 20:27](#): "A man or woman in whom there is a pythonical or divining spirit, dying let them die: they shall stone them: Their blood be upon them", we should naturally infer that the divining spirit was not a mere imposture. The prohibitions of sorcery in the New Testament leave the same impression ([Galatians 5:20](#), compared with [Apocalypse 21:8](#); 22:15; and [Acts 8:9](#); 13:6). Supposing that the belief in witchcraft were an idle superstition, it would be strange that the suggestion should nowhere be made that the evil of these practices only lay in the pretending to the possession of powers which did not really exist.

We are led to draw the same conclusion from the attitude of the early Church. Probably that attitude was not a little influenced by the criminal legislation of the Empire as well as by Jewish feeling. The law of the Twelve Tables already assumes the reality of magical powers, and the terms of the frequent references in Horace to Canidia

allow us to see the odium in which such sorceresses were held. Under the Empire, in the third century, the punishment of burning alive was enacted by the State against witches who compassed another person's death through their enchantments (Julius Paulus, "Sent.", V, 23, 17). The ecclesiastical legislation followed a similar but milder course.

The Council of Elvira (306), Canon 6, refused the holy Viaticum to those who had killed a man by a spell (*per maleficium*) and adds the reason that such a crime could not be effected "without idolatry"; which probably mens without the aid of the Devil, devil-worship and idolatry being then convertible terms. Similarly canon 24 of the Council of Ancyra (314) imposes five years of penance upon those who consult magicians, and here again the offence is treated as being a practical participation in paganism. This legislation represented the mind of the Church for many centuries. Similar penalties were enacted at the Eastern council in Trullo (692), while certain early Irish canons in the far West treated sorcery as a crime to be visited with excommunication until adequate penance had been performed.

None the less the general desire of the clergy to check fanaticism is well illustrated by such a council as that of Paderborn (785). Although it enacts that sorcerers are to be reduced to serfdom and made over to the service of the Church, a decree was also passed in the following terms: "Whosoever, blinded by the devil and infected with pagan errors, holds another person for a witch that eats human flesh, and therefore burns her, eats her flesh, or gives it to others to eat, shall be punished with death". Altogether it may be said that in the first thirteen hundred years of the Christian era we find no trace of that fierce denunciation and persecution of supposed sorceresses which characterized the cruel witch hunts of a later age. In these earlier centuries a few individual prosecutions for witchcraft took place, and in some of these torture (permitted by the Roman civil law) apparently took place. Pope Nicholas I, indeed (A.D. 866), prohibited the use of torture, and a similar decree may be found in the Pseudo-Isidorian Decretals. In spite of this it was not everywhere given up. Also we must notice that a good many suspected witches were subjected to the ordeal of cold water, but as the sinking of the victim was regarded as a proof of her innocence, we may reasonably believe that the verdicts so arrived at were generally verdicts of acquittal. On many different occasions ecclesiastics who spoke with authority did their best to disabuse the people of their belief in witchcraft. This for instance is the general purport of the book, "Contra insulam vulgi opinionem de grandine et tonitruis" (Against the foolish belief of the common sort concerning hail and thunder), written by Saint Agobard (d. 841), Archbishop of Lyons (P.L., CIV, 147). Still more to the point is the section of the work, "De ecclesiasticis disciplinis" ascribed to Regino of Prüm (A.D. 906). In section 364 we read: This also is not to be passed over that "certain abandoned women, turning aside to follow

Satan, being seduced by the illusions and phantasms of demons, believe and openly profess that in the dead of night they ride upon certain beasts along with the pagan goddess Diana and a countless horde of women and that in these silent hours they fly over vast tracts of country and obey her as their mistress, while on other nights they are summoned to pay her homage." And then he goes on to remark that if it were only the women themselves were deluded it would be a matter of little consequence, but unfortunately an immense number of people (*innumera multitudo*) believe these things to be true and believing them depart from the true Faith, so that practically speaking they fall into Paganism. And in this account he says "it is the duty of priests earnestly to instruct the people that these things are absolutely untrue and that such imaginings are planted in the minds of misbelieving folk, not by a Divine spirit, but by the spirit of evil" (P.L., CXXXII, 352; cf. *ibid.*, 284). It would, as Hansen has shown (Zauberwahn, pp. 81-82), be far too sweeping a conclusion to infer that the Carlovingian Church by this utterance proclaimed its disbelief in witchcraft, but the passage at least proves that in regard to such matters a saner and more critical spirit had begun to prevail among the clergy.

The "Decretum" of Burchard, Bishop of Worms (about 1020), and especially its 19th book, often known separately as the "Corrector", is another work of great importance. Burchard, or the teachers from whom he has compiled his treatise, still believes in some forms of witchcraft — in magical potions, for instance, which may produce impotence or abortion. But he altogether rejects the possibility of many of the marvellous powers with which witches were popularly credited. Such, for example, were the nocturnal riding through the air, the changing of a person's disposition from love to hate, the control of thunder, rain, and sunshine, the transformation of a man into an animal, the intercourse of incubi and succubi with human beings. Not only the attempt to practise such things but the very belief in their possibility is treated by him as a sin for which the confessor must require his penitent to do a serious assigned penance. Gregory VII in 1080 wrote to King Harold of Denmark forbidding witches to be put to death upon presumption of their having caused storms or failure of crops or pestilence. Neither were these the only examples of an effort to stem the tide of unjust suspicion to which these poor creatures were exposed. See for example the Weihenstephan case discussed by Weiland in the "Zeitschrift f. Kirchengesch.", IX, 592.

On the other hand, after the middle of the thirteenth century, the then recently-constituted Papal Inquisition began to concern itself with charges of witchcraft. Alexander IV, indeed, ruled (1258) that the inquisitors should limit their intervention to those cases in which there was some clear presumption of heretical belief (*manifeste haeresim saparent*), but Hansen shows reason for supposing that heretical tendencies were very readily inferred from almost any sort of magical practices. Neither is this

altogether surprising when we remember how freely the Cathari parodied Catholic ritual in their "consolamentum" and other rites, and how easily the Manichaean dualism of their system might be interpreted as a homage to the powers of darkness. It was at any rate at Toulouse, the hot-bed of Catharan infection, that we meet in 1275 the earliest example of a witch burned to death after judicial sentence of an inquisitor, who was in this case a certain Hugues de Baniol (Cauzons, "La Magic", II, 217). The woman, probably half crazy, "confessed" to having brought forth a monster after intercourse with an evil spirit and to having nourished it with babies' flesh which she procured in her nocturnal expeditions. The possibility of such carnal intercourse between human beings and demons was unfortunately accepted by some of the great schoolmen, even, for example, by St. Thomas Aquinas and St. Bonaventure.

Nevertheless within the Church itself there was always a strong common-sense reaction against this theorizing, a reaction which more especially manifested itself in the confession manuals of the close of the fifteenth century. These were largely compiled by men who were in actual contact with the people, and who realized the harm effected by the extravagance of these superstitious beliefs. Stephen Lanzkranna, for instance, treated the belief in women who rode about at night, hobgoblins, were-wolves, and "other such heathen nonsensical impostures", as one of the greatest of sins. Moreover this common-sense influence was a powerful one. Speaking of the synods held in Bavaria, so unfriendly a witness as Riezler (Hexenprozesse in Bayern, p. 32) declares that "among the official representatives of the Church this healthier tendency remained the prevalent one down to the threshold of the witch-trial epidemic, that is until far on in the sixteenth century". Even as late as the Salzburg Provincial Synod of 1569 (Dalham, "Concilia Salisburgensia", p. 372), we find indication of a strong tendency to prevent as far as possible the imposition of the death penalty in cases of reputed witchcraft, by insisting that these things were diabolical illusions. Still there can be no doubt that during the fourteenth century certain papal constitutions of John XXII and Benedict XII (see Hansen, "Quellen und Untersuchungen", pp. 2-15) did very much to stimulate the prosecution by the inquisitors of witches and others engaged in magical practices, especially in the south of France. In a witch trial on a large scale carried on at Toulouse in 1334, out of sixty-three persons accused of offences of this kind, eight were handed over to the secular arm to be burned and the rest were imprisoned either for life or for a long term of years. Two of the condemned, both elderly women, after repeated application of torture, confessed that they had assisted at witches' sabbaths, had there worshipped the Devil, had been guilty of indecencies with him and with the other persons present, and had eaten the flesh of infants whom they had carried off by night from their nurses (Hansen, "Zauberwahn", 315; and "Quellen und Untersuchungen", 451). In 1324 Petronilla de Midia was burnt at Kilkenny in Ireland at the

instance of Richard, Bishop of Ossory; but analogous cases in the British Isles seem to have been very rare. During this period the secular courts proceeded against witchcraft with equal or even greater severity than the ecclesiastical tribunals, and here also torture was employed and burning at the stake. Fire was the punishment juridically appointed for this offence in the secular codes known as the "Sachsenspiegel" (1225) and the "Schwabenspiegel" (1275). Indeed during the thirteenth and fourteenth centuries no prosecutions for witchcraft are known to have been undertaken in Germany by the papal inquisitors. About the year 1400 we find wholesale witch-prosecutions being carried out at Berne in Switzerland by Peter de Gruyères, who, despite the assertions of Riezler, was unquestionably a secular judge (see Hansen, "Quellen, etc.", 91 n.), and other campaigns — for example in the Valais (1428-1434) when 200 witches were put to death, or at Briancon in 1437 when over 150 suffered, some of them by drowning — were carried on by the secular courts. The victims of the inquisitors, e.g. at Heidelberg in 1447; or in Savoy in 1462, do not seem to have been quite so numerous. In France at this period the crime of witchcraft was frequently designated as "Vauderie" through some confusion seemingly with the followers of the heretic, Peter Waldes. But this confusion between sorcery and a particular form of heresy was unfortunately bound to bring a still larger number of persons under the jealous scrutiny of the inquisitors.

It will be readily understood from the foregoing that the importance attached by many older writers to the Bull, "Summis desiderantes affectibus", of Pope Innocent VIII (1484), as though this papal document were responsible for the witch mania of the two succeeding centuries, is altogether illusory. Not only had an active campaign against most forms of sorcery already been going on for a long period, but in the matter of procedure, of punishments, of judges, etc., Innocent's Bull enacted nothing new. Its direct purport was simply to ratify the powers already conferred upon Henry Institoris and James Sprenger, inquisitors, to deal with persons of every class and with every form of crime (for example, with witchcraft as well as heresy), and it called upon the Bishop of Strasburg to lend the inquisitors all possible support.

Indirectly, however, by specifying the evil practices charged against the witches — for example their intercourse with incubi and succubi, their interference with the parturition of women and animals, the damage they did to cattle and the fruits of the earth, their power and malice in the infliction of pain and disease, the hindrance caused to men in their conjugal relations, and the witches' repudiation of the faith of their baptism — the pope must no doubt be considered to affirm the reality of these alleged phenomena. But, as even Hansen points out (Zauberwahn, 468, n. 3) "it is perfectly obvious that the Bull pronounces no dogmatic decision"; neither does the form suggest that the pope wishes to bind anyone to believe more about the reality of witchcraft

than is involved in the utterances of Holy Scripture. Probably the most disastrous episode was the publication a year or two later, by the same inquisitors, of the book "Malleus Maleficarum" (the hammer of witches). This work is divided into three parts, the first two of which deal with the reality of witchcraft as established by the Bible, etc., as well as its nature and horrors and the manner of dealing with it, while the third lays down practical rules for procedure whether the trial be conducted in an ecclesiastical or a secular court. There can be no doubt that the book, owing to its reproduction by the printing press, exercised great influence. It contained, indeed, nothing that was new. The "Formicaris" of John Nider, which had been written nearly fifty years earlier, exhibits just as intimate a knowledge of the supposed phenomena of sorcery. But the "Malleus" professed (in part fraudulently) to have been approved by the University of Cologne, and it was sensational in the stigma it attached to witchcraft as a worse crime than heresy and in its notable animus against the female sex. The subject at once began to attract attention even in the world of letters. Ulrich Molitoris a year or two later published a work, "De Lamiis", which, though disagreeing with the more extravagant of the representations made in the "Malleus", did not question the existence of witches. Other divines and popular preachers joined in the discussion, and, though many voices were raised on the side of common sense, the publicity thus given to these matters inflamed the popular imagination. Certainly the immediate effects of Innocent VIII's Bull have been greatly exaggerated. Institoris started a witch campaign at Innsbruck in 1485, but here his procedure was severely criticised and resisted by the Bishop of Brixen (see Janssen, "Hist. of Germ. People", Eng. tr., XVI, 249-251). So far as the papal inquisitors were concerned, the Bull, especially in Germany, heralded the close rather than the commencement of their activity. The witch-trials of the sixteenth and seventeenth centuries were for the most part in secular hands.

One fact which is absolutely certain is that, so far as Luther, Calvin, and their followers were concerned, the popular belief in the power of the Devil as exercised through witchcraft and other magic practices was developed beyond all measure. Naturally Luther did not appeal to the papal Bull. He looked only to the Bible, and it was in virtue of the Biblical command that he advocated the extermination of witches. But no portion of Janssen's "History" is more unanswerable than the fourth and fifth chapters of the last volume (vol. XVI of the English edition, in which he attributes a large, if not the greater, share of the responsibility for the witch mania to the Reformers).

The penal code known as the Carolina (1532) decreed that sorcery throughout the German empire should be treated as a criminal offence, and if it purported to inflict injury upon any person the witch was to be burnt at the stake. In 1572 Augustus of Saxony imposed the penalty of burning for witchcraft of every kind, including simple fortunetelling. On the whole, greater activity in hunting down witches was shown in

the Protestant districts of Germany than in the Catholic provinces. Striking examples are given by Janssen. In Osnabruck, in 1583, 121 persons were burned in three months. At Wolfenbuttenl in 1593 as many as ten witches were often burned in one day. It was not until 1563 that any effective resistance to the persecution began to be offered. This came first from a Protestant of Cleues, John Weyer, and other protests were shortly afterwards published in the same sense by Ewich and Witekind. On the other hand, Jean Bodin, a French Protestant lawyer, replied to Weyer in 1580 with much asperity, and in 1589 the Catholic Bishop Binsfeld and Father Delrio, a Jesuit, wrote on the same side, though Delrio wished to mitigate the severity of the witch trials and denounced the excessive use of torture. Bodin's book was answered amongst others by the Englishman Reginald Scott in his "Discoverie of Witchcraft" (1584), but this answer was ordered to be burned by James I, who replied to it in his "Daemonologie".

Perhaps the most effective protest on the side of humanity and enlightenment was offered by the Jesuit Friedrich von Spee, who in 1631 published his "Cautio criminalis" and who fought against the craze by every means in his power. This cruel persecution seems to have extended to all parts of the world. In the sixteenth century there were cases in which witches were condemned by lay tribunals and burned in the immediate neighbourhood of Rome. Pope Gregory XV, however, in his Constitution, "omnipotentis" (1623), recommended a milder procedure, and in 1657 an Instruction of the Inquisition brought effective remonstrances to bear upon the cruelty shown in these prosecutions. England and Scotland, of course, were by no means exempt from the same epidemic of cruelty, though witches were not usually burned. As to the number of executions in Great Britain it seems impossible to form any safe estimate. One statement declares that 30,000, another that 3000, were hanged in England during the rule of the Parliament (Notestein, op. cit. infra, p. 194). Stearne the witchfinder boasted that he personally knew of 200 executions. Howell, writing in 1648, says that within the compass of two years near upon 300 witches were arraigned, and the major part executed, in Essex and Suffolk only (*ibid.*, 195). In Scotland there is the same lack of statistics. A careful article by Legge in the "Scottish Review" (Oct., 1891) estimates that during the sixteenth and seventeenth centuries "3400 persons perished". For a small population such as that of Scotland, this number is enormous, but many authorities, though confessedly only guessing, have given a much higher estimate. Even America was not exempt from this plague. The well-known Cotton Mather, in his "Wonders of the Invisible World" (1693), gives an account of 19 executions of witches in New England, where one poor creature was pressed to death.

In modern times, considerable attention has been given to the subject by Hexham and others. At the end of the seventeenth century the persecution almost everywhere began to slacken, and early in the eighteenth it practically ceased. Torture was abolished

in Prussia in 1754, in Bavaria in 1807, in Hanover in 1822. The last trial for witchcraft in Germany was in 1749 at Würzburg, but in Switzerland a girl was executed for this offence in the Protestant Canton of Glarus in 1783. There seems to be no evidence to support the allegation sometimes made that women suspected of witchcraft were formally tried and put to death in Mexico late in the nineteenth century (see *Stimmen aus Maria-Laach*, XXXII, 1887, p. 378).

The question of the reality of witchcraft is one upon which it is not easy to pass a confident judgment. In the face of Holy Scripture and the teaching of the Fathers and theologians the abstract possibility of a pact with the Devil and of a diabolical interference in human affairs can hardly be denied, but no one can read the literature of the subject without realizing the awful cruelties to which this belief and without being convinced that in 99 cases out of 100 the allegations rest upon nothing better than pure delusion. The most bewildering circumstance is the fact that in a large number of witch prosecutions the confessions of the victims, often involving all kinds of satanic horrors, have been made spontaneously and apparently without threat or fear of torture. Also the full admission of guilt seems constantly to have been confirmed on the scaffold when the poor suffered had nothing to gain or lose by the confession. One can only record the fact as a psychological problem, and point out that the same tendency seems to manifest itself in other similar cases. The most remarkable instance, perhaps, is one mentioned by St. Agobard in the ninth century (P.L., CIV, 158). A certain Grimaldus, Duke of Beneventum, was accused, in the panic engendered by a plague that was destroying all the cattle, of sending men out with poisoned dust to spread infection among the flocks and herds. These men, when arrested and questioned, persisted, says Agobard, in affirming their guilt, though the absurdity was patent.

JANASSEN-PASTOR, *Gesch. des deutschen Volkes*, VIII, tr. HERBERT THURSTON

Witness

Witness

One who is present, bears testimony, furnishes evidence or proof. Witnesses are employed in various ecclesiastical matters, as in civil, in proof of a statement, fact, or contract. According to various circumstances a witness is one who is personally present and sees some act or occurrence and can bear testimony thereto; one who on request or in behalf of a party subscribes his name to an instrument to attest the genuineness of its execution; one who gives testimony on the trial of a cause, appearing before a court, judge, or other official to be examined under oath. The espousals of Catholics ("Ne temere") to be binding must be in writing, signed by the contracting parties and ordinarily by two witnesses, or by a pastor or ordinary, each within his own territory, as sole witnesses. In case either or both parties are unable for any cause to write, an additional witness is necessary. Catholics are incapable of entering into lawful wedlock ("Ne temere") except in the presence of a parish priest, or ordinary, or other priest duly delegated, and two witnesses. Though not necessary for validity of the act, the Church desires in both cases that these witnesses be Catholics (S.O., 19 Aug., 1891). Witnesses of a marriage sign no ecclesiastical document, though they may be called upon by the state to attest by their own hand certain civil records. Sponsors at baptism and confirmation are not properly witnesses; they assist for other purposes (see RELATIONSHIP). A canonical precept, when employed, must be delivered in the presence of the vicar general or two others as witnesses (Cum magnopere, VII). Ecclesiastical documents are attested or witnessed as circumstances require, e.g., by the chancellor, clerk of the court, prothonotary apostolic. Expert witnesses to some extent have a place in canon law. In ecclesiastical trials witnesses are adduced to prove a fact directly, or indirectly, i.e., by establishing the falsity of the contrary.

The essential qualifications of a witness are knowledge of the fact at issue and truthfulness: he must be an eye-witness and trustworthy. Hearsay witnesses, however, are admitted, if necessary, in matters not of a criminal nature, e.g., in proof of consanguinity or other relationship, baptism, etc. Anyone not expressly prohibited may

testify. Some, as the insane, infants, the blind or deaf, where sight or hearing is necessary for a knowledge of the facts in question, are excluded by the natural law; others by canon law, as those who are bribed or suborned, those who are infamous in law or in fact, convicted perjurors, excommunicated persons, all in a word whose veracity may be justly suspected. The law likewise rejects those who on account of affection or enmity may be biased, as well as those who may be specially interested in the case. Parents as a rule are not admitted for their children, particularly when the rights of a third party are at stake, or against them and vice-versa; relatives for one another; lawyers for their clients; accomplices or enemies for or against one another; Jews or heretics against Christians; lay persons against clerics, except their own interests are at stake, or there are no clerics to testify; minors or women in criminal cases tried criminally, unless their testimony is necessary, or they testify in favor of the accused. Clerics, unless compelled by civil authorities, are not allowed to testify against the accused when sentence of death is to be imposed (see IRREGULARITY). There are many exceptions to these general statements. A witness is more easily admitted in favour of a person than against him, and in civil than in criminal trials. No one is tolerated as a witness in his own case. Hence, those who are engaged in a similar cause, a judge who has adjudicated a like case, etc. are excluded. False witnesses are those who under oath prevaricate or conceal the truth that they are bound to tell: they are guilty of perjury, and if convicted are infamous in law. Notaries or others by altering or falsifying documents substantially become guilty of forgery (q.v.). (See ESPOUSALS; PROOF; EXAMINATION.)

ANDREW B. MEEHAN

Francis Xavier Witt

Francis Xavier Witt

Reformer of church music, founder of the St. Cecilia Society for German-speaking countries, and composer, b. at Walderbach, Upper Palatinate, 9 Feb., 1834; d. at Landshut, Bavaria, 2 Dec., 1888. The son of a school teacher, Witt was instructed in singing and piano and violin playing from his earliest youth, and when he entered upon his Classical studies at Ratisbon he became a member of the cathedral choir under the direction of Joseph Schrems, through whose masterful interpretations of the long neglected sixteenth-century composers, Dr. Proske's reform ideas were beginning to be put into practice. Witt's unusual musical gifts enabled him to grasp and remember every composition performed by the choir, and his musical development received

from his humanistic, philosophic, and theological studies a solid foundation. Ordained priest, 11 June, 1856, for the next three years he was assistant pastor in Oberschneiding. Although so zealous for the care of souls that for a time he thought seriously of becoming a missionary, he continued the study of music in all its branches, and acquired the remarkable technical, historical, and aesthetic knowledge and equipment so necessary for his future work. On 17 Aug., 1859, he was called to the theological seminary at Ratisbon as teacher of Gregorian chant, homiletics, and catechetics. After three years he applied for the position of director of the Sodality of the Blessed Virgin Mary and choirmaster at the Church of St. Emmeran in Ratisbon. On 1 Jan., 1866, appeared the first number of his papers, "Fliegende Blatter fur Kirchenmusik", for teachers, organists, and choirmasters, founded, according to his own words, to make war upon existing conditions in church music. The journal met with immediate success, and continues its mission to this day. He also served the cause of reform with great effect as a forceful speaker and as a composer. On 1 Jan., 1868, he began the publication of "Musica Sacra", a complement to "Fliedende Blatter", for the adequate treatment of all questions regarding the relation of music to the liturgy. During the same year, at the general diet of German Catholics held at Bamberg, Witt founded the St. Cecilia Society for Germany, Austria, and Switzerland. At the request of twenty-nine bishops the society was approved and given a cardinal protector by the Holy See in 1870. Witt served as its president for twenty years. In 1873 he became pastor of the parish of Schatzhofen, but, two years later, failing health forced him to retire to Landshut, where he spent the last ten years of his life without pastoral charge. Father Witt united practically all the requisites of a successful reformer. Indomitable energy and a highly artistic temperament were made to serve the theologian and zealous pastor who realized the harm which was being done to the faithful by unworthy music. With his vigorous pen and spoken word he urged upon church musicians, priests, and laymen the moral obligation of obeying the laws of the Church, and a return to the Gregorian chant as the basis and informing principle of all music for liturgical use. His reform ideas, propagated through the St. Cecilia Society with its 14,000 members, several music schools, and a large number of journals devoted to the cause, have not only transformed musical conditions in the countries where they were put forth, but have had an echo throughout the Catholic world. As a composer Witt created a style entirely his own. Virility in his melodic material, vivid and striking declamation of the text, masterful contrapuntal construction, spontaneity, and organic cohesion are some of the characteristics of his works. He wrote more than twenty masses for different combinations of voices, some with organ, some with orchestra accompaniment, and others a cappella, litanies, motets, covering practically the whole liturgical year, and a large number of other compositions,

most of which are standard and included in the repertoire of the best choirs throughout the world.

JOSEPH OTTEN

Wittenberg (City and University)

Wittenberg

The city is in Prussian Saxony and was founded by Albert the Bear (d. 1170). He had conquered the surrounding territory from the Slavs and replaced them by German colonists, especially by Flemings from the lower Rhine. These colonists settled near the citadel fortified against the Slavs on the boundary, and called the spot *Wittenborg* (white mountain). Albert's son, Bernhard, became Duke of Saxony, and founded the Ascanian line of the Dukes of Saxony. His grandson, Albert II (1260-98), was the ancestor of the line of Saxe-Wittenberg whose capital was Wittenberg. In 1293 the city received its franchises. In 1356 the electoral dignity was granted to the Dukes of Saxe-Wittenberg. When the line became extinct in 1422, the country fell to Frederick the Warlike of Wettin and his descendants. During the reigns of Frederick the Wise (1486-1525) and his two successors, Wittenberg became once more the capital of the country. After the battle of Muhlberg (1547) the Emperor Charles V entered Wittenberg as a conqueror and took the electoral dignity from John Frederick. Wittenberg and the Electoral domain were given to the Albertine line, who retained it until it was transferred to Prussia in 1815.

In 1238 a Franciscan monastery was founded at Wittenberg, and in 1365 a monastery of the Hermits of St. Augustine. There were two churches, the town-church and the castle-church. In 1892 the latter was restored to its old appearance; it contains fine pictures by the two Lucas Cranachs, and interesting tombs. Since 1858 a Catholic parish has also existed at Wittenberg. It contains 860 persons; the Protestant population numbers 19,500.

The University of Wittenberg

The university was founded by Frederick the Wise and was opened, 18 Oct., 1502. Professor Martin Polich of Leipzig was its first rector. Funds were provided by the benefices, which belonged to the collegiate chapter of All Saints connected with the castle-church, being increased to eighty; the canons were to be the professors of the university. The theological faculty became the most distinguished of the four faculties. Luther was a member of it; he first lectured on philosophy, and from 1509 he lectured also on theology. On 31 Oct., 1517, he fastened his theses against indulgences on the

castle-church. As the students were chiefly from Northern Germany the university was an important factor in the spread of Protestantism. Wittenberg was one of the first cities to accept Luther's doctrine. As early as 25 Oct., 1521, the Augustinians suppressed private Masses. From New Year, 1522, the Lutheran service was used in the town-church and the communion given under both kinds. In 1523 Bugenhagen became the first Lutheran pastor of Wittenberg. During Luther's stay at the Wartburg, Carlstadt had begun the Iconoclastic outbreak. Luther, however, hastened back and restored order.

Among the associates of Luther at Wittenberg were: Melanchthon, who in union with Luther reorganized the university on a Humanistic basis, rejecting Scholasticism; Johannes Bugenhagen; Justus Jonas; Kaspar Cruciger; Georg Major; and Matthias Flacius Illyricus. Although the professors taught, and wrote learned and popular works, which were circulated throughout the world by the printers Johann Grunenberg, Melchior Lotter, and Hans Lufft, these two occupations were not the limit of their activities. They also went into the different cities to organize the Protestant system of congregations and schools; thus Bugenhagen went to Brunswick, Hamburg, and Hildesheim; Amsdorf went to Magdenburg; Jonas to Halle and Ratisbon. All these circumstances made Wittenberg the chief school of Protestant theology. In the doctrinal disputes that soon broke out the position of the theological faculty had great influence. Among the later theologians should be mentioned: Paul Eber (d. 1569); Leonhard Hutter (d. 1616); AEgidius Bunnius (d. 1603); Polycarp Leyser (d. 1610); Johannes Forster (d. 1556); and Abraham Calov (d. 1686). Theology was the great study of Wittenberg, and it cast the other faculties into the shade. Yet the university had also distinguished scholars in the faculty of law: Henning Goden, the last Catholic provost of the castle-church (d. 1521), and Jerome Schurff (d. 1554); and in that of medicine: Salomon Alberti (d. 1600), Daniel Sennert (d. 1637), and Konrad Viktor Schneider (d. 1680).

From the beginning of the eighteenth century the fame of the university was a thing of the past. The theologians of Wittenberg, who clung to the old and antiquated methods, had no share in the Pietistic revival of Protestantism. In 1815 the university was closed; in 1817 it was united with the University of Halle, which since then has been called the University of Halle-Wittenberg. The old university building is now a barrack, while the Augsteum, which also served for university purposes, has been used as a seminary for preachers since 1817. Part of the old library is at Halle, and part is still kept at the seminary for preachers.

KLEMENS LOFFLER

George Michael Wittman

George Michael Wittman

Bishop-elect of Ratisbon, b. near Pleistein, Oberpfalz, Bavaria, 22 (23?) Jan., 1760; d. at Ratisbon, 8 March, 1833. He studied first with the Jesuits, then with the Benedictines at Amberg (1769-78), and at the University of Heidelberg (1778-9). On 21 Dec., 1782, he was ordained priest and after doing parish work at Kenmath, Kaltenbrunn, and Miesbrunn he became professor and *subregens* at the diocesan seminary of Ratisbon in 1788 and *regens* in 1802. From 1804 he was also pastor of the cathedral. In 1829 he was appointed auxiliary Bishop of Ratisbon and consecrated titular Bishop of Comana. In 1830, when the coadjutor Sailer became ordinary of Ratisbon, Wittmann was made his vicar-general; and after Sailer's death he was nominated Bishop of Ratisbon, 1 July, 1832, but died before his preconization. He exerted an estimable influence for good on the candidates (numbering over fifteen hundred) whom he prepared for the priesthood during the forty-five years of his connection with the seminary. By his zeal, charity, and exemplary life, he gained the affection and esteem of all. He was buried in the cathedral of Ratisbon, where a monument was erected to his memory by Conrad Eberhard. His chief literary works are: "Principia catholica de sacra Scriptura" (Ratisbon, 1793); "Annotationes in Pentateuchum Moysis" (Ibid., 1796); "De horarum canonicarum utilitate morali" (Augsburg, 1801); "Anmahnung zum Colibate" (s. l., 1804; Ratisbon, 1834); "Confessarius pro aetate juvenili" (Sulzbach, 1832). Wittmann also prepared with Feneberg a translation of the New Testament (Nuremberg, 1808; latest edition, Sulzbach, 1878). For a time he availed himself of the services of the Protestant Bible Society of London to spread his translation among the people, but in 1820 he severed all relations with this society.

MITTERMULLER, Leben und Wirken des frommen Bisch., Michel Wittmann (Landshut, 1859); MEHLER, Lebensbeschreibung des frommen Bisch. Michael Wittmann (Ratisbon, 1894); HAHN, Bisch. Michael Wittmann, das Bild eines frommen und segensreichen Lebens (Ratisbon, 1860).

MICHAEL OTT

Patrizius Wittman

Patrizius Wittman

Catholic journalist, b. at Ellwanger, Würtemberg, 4 January, 1818; d. at Munich, 3 October, 1883. He was the son of Johann Wittmann, a stonemason, and his wife Maria Anna Hirschele. His standing as a pupil in the Latin school of his native town gained him a free scholarship in the *convictus* attached to the Ehinger gymnasium, and eventually led to a similar scholarship in the Wilhelmsstift at Tübingen. Wishing to become a priest, he devoted his time at the university (1838-40) to theological and philosophical studies, gained three prizes, and passed a brilliant examination. His strictly orthodox Catholic views, however, soon brought him into conflict with the Liberal tendencies then prevailing and he was dismissed from the Wilhelmsstift [cf. Herbst, "Gottesgabe", I (Augsburg, 1840), 2]. Through Dr. Riffel, professor at Giessen, he obtained employment on the journal "Sion", published at Augsburg under the editorship of Dr. Ferdinand Herbst, pastor of the town church. Dr. Dollinger induced Wittmann to issue his "Die Herrlichkeit der Kirche in ihren Missionen seit der Glaubensspaltung" (2 vols., Augsburg, 1841), which was very well received. In 1841 he obtained the degree of Doctor of Philosophy and settled at Augsburg, becoming editor-in-chief of the periodical "Sion", and increasing its circulation. His marriage with a rich widow, Caroline Munding, of Dinkelscherben, bound him more closely to the city of St. Ulrich and for over thirty years he laboured there with unflagging zeal for faith and learning, Church and people. His "Allgemeine Geschichte der katholischen Missionen" (1846 and 1850) was the first treatment of this subject in German; the second volume of the work treats mainly of the conversion of the Indian tribes in America. A political paper founded by him, "Stadt und Landbote", still exists as a local Catholic journal with a wide circulation under the title "Neue Augsburger Zeitung". Another periodical, however, his "Sendbote", a successful champion of "Ultramontane" interests and a zealous promoter of the Society of St. Boniface (Bonifatiusverein), has lately (1912), after sixty years of existence, ceased to appear.

Dr. Wittmann was also largely instrumental in the founding of a mother-house of the Sisters of Charity and of a hospice and home for workmen under the direction of the Capuchins. He was noted speaker at conventions and other assemblies, and an active worker for churches and benevolent societies, and in many instances served as the guardian of widows and orphans. He was also a generous patron of young students. After the death of his wife in 1869, Wittmann lived for ten years with his only son, first at Munich, then at Bamberg, and returning, in 1883, with his son to Munich, died there of apoplexy. He was buried in the Catholic cemetery at Augsburg. In recognition

of his services Pius IX gave him the order of St. Gregory. The general board of managers of the Bonifatiusverein established at Merseburg an annual commemoration in perpetuity for him and his descendants.

LAUCHERT in Allgemeine deutsche Biographie, s. v. WITTMANN; also articles in Catholic periodicals of Bavaria, Swabia, etc.

PIUS WITTMANN

Georg Witzel

Georg Witzel

(WICELIUS).

Theologian, b. at Vacha, Province of Hesse, 1501; d. at Mainz, 16 Feb., 1573. He received his primary and academic education in the schools of Schmalkalden, Eisenach, and Halle; spent two years in the University of Erfurt, and seven months in that of Wittenberg. Following the wish of his father he was ordained priest in 1520 and appointed Vicar of Vacha. In 1524, however, the teachings of Luther attracted him. Abandoning the Faith, he married, and the following year was appointed to the pastorate of Wenigenlupnitz by James Strauss, and a little later to that of Niemeck by Luther himself. He now began a thorough study of the Scriptures and the Fathers, and soon became convinced that the Church of Luther was not the true Church and that Lutheran morals did not make for the betterment of the people. To express his dissatisfaction with the new teaching, he wrote in 1527 two works which he sent to the theologians of Wittenberg without, however, receiving any satisfaction from them. To give more emphatic expression to his conviction of the error of the new religion, he resigned his charge in 1531 and returned with his family to Vacha. Here he spent two years in extreme poverty. In 1532 he published, under the pseudonym Agricola Phaquis, his "Pro defensione bonorum operum", a work which aroused all the bitterness of his enemies. Among his works published at this time his "Apologia" (Leipzig, 1533) deserves special mention, since in it he gives his reasons for returning to the Church of Rome.

Owing to Witzel's untiring opposition to the doctrinal novelties of the age, he was forced to leave Vacha. He proceeded to Eisleben, and in 1538 was called to Dresden. Here he conceived a plan of reunion, which took the form of a public disputation in Leipzig in 1539. He had already (1537) published his "Methodus concordiae ecclesiasticae", and for the new disputation he prepared "Typus prioris Ecclesiae" in which he proposed the Church of the first centuries as the ideal to be sought for. His endeavours for reunion, however, were without result. Opposition forced him to flee to Bohemia, thence to Berlin. The rapid progress of heresy soon convinced him that here too his efforts would be fruitless, and he forthwith proceeded to Fulda, where he directed his

efforts towards defending the Church; but in 1554 he was again forced to flee, now to Mainz, where he spent the remainder of his life in literary work and probably as professor at the university. The number of Witzel's works is extraordinarily large. Rass in his "Convertiten" enumerates ninety-four, but this is far from complete.

HURTER, Nomenclator, I, 8; RASS, Die Convertiten, I (Freiburg, 1886-80), 123 sqq.; HOLZHAUSEN, G. Witzel u. die kirchliche Union in Zeitschr. fur histor. Theologie (1849), 382 sqq.; SCHMIDT, G. Witzel, Ein Altkatholik des 16. Jahrhunderts (Vienna, 1876); PASTOR, Reunionsbestrebungen (Freiburg, 1879), 140 sqq.; DOLLINGER, Die Reformation, I (Ratisbon, 1846), 28 sqq.

JOSEPH SCHROEDER

Wladislaw

Diocese of Wladislaw

(Polish WLOCLAWEK; Latin VLADISLAVIENSIS ET POMERANIAE).

The historical origin of this diocese is not known precisely. The city of Wladislaw, or Wloclawek, in the government of Warsaw, contains more than 40,000 Catholics. The old Polish historians follow John Dlugosz, the fifteenth century annalist, who narrates that Mieczyslaw, the first Polish king (962-92), after receiving baptism in 966, founded the two Archbishopsrics of Gnesen and Cracow, and seven dioceses, among which was Kruszwica, or Wloclawek. But as Dlugosz cites no historical document to prove his statement, no confidence can be placed in it. Bougufal, or Boguchwal, Bishop of Posen (d. 1253), another Polish chronicler, attributed the foundation of this diocese to Mieczyslaw II (1025-34), but again without documentary support for his statement. Julian Bartoszewicz, another Polish writer ("Encyklopedia Powszechna", Warsaw, 1860, III, 636), taking a Bull of Eugene III as his authority, places the foundation as far back as 1148; but this very Bull contradicts the assertion by mentioning this diocese as already existing in 1123, placing it under the special protection of the Holy See. Other historians attribute its foundation to Boleslaus the Brave (*Chrobry*) (922-1025); others again to Boleslaus the Bold (*Smialy*) (1058-80). This last opinion seems improbable, as the letter of Gregory VII to Boleslaus the Bold, dated 20 April, 1075, not only does not mention the Diocese of Kruszwica or of Wloclawek, but deplores the scarcity of bishops in the Kingdom of Poland (see Bielowski, "Mon. Poloniae hist.", III, Lemberg, 1864, pp. 367-71). The only conclusion, therefore, by the light of historical documents, is that the Diocese of Wloclawek dates from the earlier half of the twelfth century. (See Fijalek, "Ustalenie chronologii biskupow wloclawskich", Cracow, 1894, pp. 7, 8.)

According to Dlugosz the first episcopal see of the Diocese of Wloclawek was at Kruszwica, a city in the territory of Kujawa. Under Bishop Onoldus (1161-80) the see

was transferred to Włocławek. But this notice, passed over by other historians (see Rzepnicki, op. cit. in bibliography, II, 1, 2), is contradicted by a Bull of Eugene III, dated from Reims, 4 April, 1148, "Venerabili fratri Warnero, Vlotislaviensi episcopo" (Rzyszczewski, "Cod. dipl. Poloniae", II, pt. I, Warsaw, 1848, p. 1-4). This Bull mentions that Ægidius, Bishop of Tusculum, afterwards cardinal legate in Poland under Callistus II (Probably in 1123), determined the boundaries of the Diocese of Włocławek, which, must, therefore, have existed in the first quarter of the twelfth century. On the other hand, historical documents are lacking to show clearly whether Kruszwica ever had a bishop. Chodynski supposes that it may have been the seat of a parish priest invested with the episcopal dignity. But, as has already been pointed out, there are no positive data to establish this hypothesis.

In its historical beginnings the Diocese of Włocławek comprised the whole territory of Kujawa (Ziemia Kujawska) divided into the two palatinates of Inowrocław and Brest. Subsequently the territory extending from the left bank of the Vistula, and from the River Noteć, to the Baltic was added. This added territory is called, in Polish, Pomerania; in German, Pomerella. Under Bishop Mathias Lubienski its territory was increased by the villages of Ciechocin, Dobrzejewice, Chelmica, Zaduszniki, Nowogrod, and Złotoria, taken from the jurisdiction of Płock. This cession was confirmed by Urban VIII in 1640. In 1764 Bishop Antonius Ostrowski obtained from the Archbishop of Gnesen the city of Wolborz with adjacent villages and the church of the Franciscans at Smarzewice, an arrangement confirmed by the Holy See on 13 August of the same year. Kujawia was divided into two archdeaconries; Kruszwica and Włocławek, while Pomerania, after the thirteenth century, formed a separate archdeaconry. These three archdeaconries existed until the first partition of Poland. According to an historical document of 1326 cited by Theiner (Mon. hist. Pol., I, 268), the archdeaconry of Kruszwica comprised 22 parishes; that of Włocławek, 30; that of Pomerania, 9. In 1577 there were 118 churches in Kujawia; in 1633 there were 123, and 149 in Pomerania. In 1769 the diocese, harassed by wars and Protestantism, counted only 242; and in the same year there were 160,988 Catholic families.

In 1818 the Diocese of Włocławek underwent a complete change of boundaries, pursuant to the Bull "Ex imposita nobis" of Pius VII. All Pomerania, with the cities of Kruszwica, Strzelno, Bydgoszcz, and Inowrocław, passed under the dominion of Prussia. The new diocese took the name of Włocławek and Kalisz (Vladislaviensis seu Calissiensis). Of its 344 churches only 59 belonged to the old diocese, the rest being taken from the Dioceses of Posen, Płock, Cracow, Breslau, and Gnesen. In 1912 the Diocese of Włocławek and Kalisz comprised 13 deaneries (Włocławek, Nieszawa, Kalisz, Kola, Konin, Sieradz, Słupca, Turek, Wielun, Piotrkow, Częstochowa, Lask, Radomsk), with 352 parish or subsidiary churches. The total number of churches was

511, of which 286 were of stone and 125 of wood; the chapels numbered 176, of which 114 were of stone. The Catholic population was 1,461,147. The most important centres were Wloclawek, with 40,500 souls; Brest (Brzesc), famous for the councils held there, out of which grew the Ruthenian Uniat Church, 6000 Catholics; Sluzewo, 8500 Catholics; Kalisz, 22,000; Konin, 7200; Sieradz, 9600; Szadek, 7000; Zagorow, 8306; Turek, 11,100; Wielun, 7123; Piotrkow, 30,000; Czenstochowa, 70,000; Klobucko, 14,000; Truskolasy, 10,764; Pabjanice, 15,000; Radomsk, 20,514.

The first Bishop of Kruszwica -- which was the first episcopal see of the Diocese of Wloclawek according to Dlugosz -- was Lucidus, who died in 993. Between 993 and 1133 the old Polish historians give the names of eight bishops: Maurice, or Lawrence, Marcellus, Venatus, Andreas, John Baptist, Paulinus, Baldwin, and Suidger. But this list is apocryphal and at most, according to Chodynski, gives the names of the parish priests of Kruszwica or of the superiors of a monastery which existed there. The first Bishop of Wloclawek, whose name occurs in the Bull of Eugene III of 1148, is Warner. He was succeeded by Onoldus, an Italian by birth (1161-80). According to Chodynski's list, Onoldus was followed by two bishops, Rudgerus (d. 1170) and Wunelphus, or Wunulphus, or Onolphus (d. 1187). These two are omitted in Fijalek's list, and his authority is of greater historical value than Chodynski's. From 1187 to 1198 one Stephen, a German by birth, according to Rzepnicki, is called *episcopus Cuiaviensis*. Then followed Ogerius, an Italian (1207-12); Bartha, a Roman (1215-20), who took part in the Synod of Woborz (1215); Michael, a Pole (1222-52), who restored the archdeaconry of Kruszwica, suppressed by Ogeris; Wolmir (1252-75); Adalbertus, Alberus, or Alber (1275-83); Wislaw (1284-1300); Gerward (1300-23), who had to contend with the efforts of the Prussian Knights of the Cross to wrest some of his territory from him; Mathias Golanczowski (1323-68), who abdicated in 1364; Zbilut Golanczowski (13364-83); Teodryk (1383-84); John, Prince of Opole (1384-89; 1402-21); Henry, Prince of Lignica (1389-98); Nicholas of Curow (1399-1402); John Pella of Niewiesz (1421-28); John Szafraniec (1428-33), chancellor of the Kingdom of Poland; Ladislaus of Oporowa (1422-49); Nicholas Lasocki (1449-50), who died at Terni returning from Rome, whither he had gone as ambassador for Casimir Jagiellonczyk (1147-92); John Gruszczynski (1449-63), chancellor of the kingdom; John Lutka (1463-64); James of Siena (1464-73); Zbigniew of Olesnica (1473-80); Andrew of Oporowa (1481-83); Peter Moszynski (1484-94); Creslao (Krzeslau) of Kurozwenk (1494-1503), chancellor of the kingdom; Vincentius Przerenbski (1503-13); Mathias of Drzewice (1513-31); John Karnowski (1531-38); Lucas of Gorka (1538-42); Nicholas Dziergowski (1543-46); Andreas Zebrzydowski (1546-51); John Drohojowski (1551-57); James Uchanski (1557-61); Nicholas Wolski (1562-67); Stanislaus Karnkowski (1567-81), who published the documents of the provincial Synod of Gnesen (1578); Jerome Rozdrazewski (1581-

1600), who died at Rome in the odour of sanctity; John Tarnowski(1600-03); Peter Tylicki (1604-07); Adalbert Baranowski (1607-08); Mathias Petrokowski (1608-09); Lawrence Gembicki (1609-15); Paul Wolucki (1616-22); Andreas Lipski (1623-31); Mathias Lubienski (1631-41); Nicholas Gniewosz (1642-54); Florian Czartoryski (1654-74); John Gembicki (1674-75); Stanislaus Sarnowski (1677-80); Bonaventure Modalinski (1681-91); Stanislaus Dambski (1691-99); Stanislaus Szembek (1699-1706); Felician Szanawski (1707-20); Christopher Szembek (1720-38); Adam Grabowski (1738-41); Valens Czapski (1741-51); Antonius Dembowski (152-62); Antonius Ostrowski (1762-66); Joseph Rybinski (1777-1806). On the death of Rybinski the See of Wloclawek remained vacant for nine years. Francis Malczewski was bishop from 1815 to 1818. In 1819 the Diocese of Wloclawek, with new boundaries determined by the Bull "Ex imposita nobis", received as its bishop Andrew Wollowicz (1819-22), who was succeeded by Joseph Stephen Kozmian (1823-31). The see then remained vacant until 1837, when Valentine Tomazewski was elected bishop (1837-50). He was followed by Nicholas Blocki (d. 1851); John Michael Marzewski (1856-57); Vincent Popiel (1867-83); Alexander Beresniewicz (1883-1902); Stanislaus Casimir Zdzitowiecki.

The see also had suffragan bishops; the first of whom there is any mention was Ubricus, suffragan of John, Prince of Opole (1402-21). Kreslaus of Kurozwenk obtained an edict in virtue of which the abbots of the Cistercian Monastery of Koronow had the dignity of suffragan bishops of their dioceses; but the decree was not obeyed. Mathias Drjewicki had the canon Alexander of Miszin consecrated as his suffragan bishop in 1515, with the title of Bishop of Margarita. Bishop Karnowski endeavoured, by means of a capitular constitution, to obtain that the suffragan bishops of his diocese should be elected from among the prelates and canons of Wloclawek. Bishop Ostrowski obtained from the Holy See a new suffragan bishop for Pomerania, but this suffragan see had only three incumbents: Cyprian Wolicki, Mathias Garnysz, and Ludovicus Gorski.

The religious orders were widely diffused in the Diocese of Wloclawek. In 1173 there arose in Pomerania the famous Cistercian monastery of Oliwa, and in 1251 the no less famous Abbey of Peplin. The Dominicans had monasteries at Dirschau and Brest; the Carmelites at Zakrzew, Marcowice, and Bydgoszcz; the Franciscans at Inowroclaw and Nieszawa. Other orders flourished in the various cities and villages of the diocese -- Paulines (Reformed) Fatebenefratelli (or Order of St. John of God), Jesuits, Piarists, Lazarists. Among the communities of women the most ancient are those of the Premonstatensian Nuns of Zukow, founded in 1210, and the Benedictine Nuns of Zarnowiec, founded in 1213. The convents are now nearly all extinct; the diocese, however, possesses the historic convent of Czenstochowa founded in 1382 and occupied by a community of Paulines, or Hermits of St. Paul. In this convent is a

highly venerated icon of the Blessed Virgin, visited every year by hundreds of thousands of pilgrims. Czenstochowa is the national sanctuary of Poland. The Franciscans still possess monasteries at Kolo, founded in 1456, and at Wloclawek, founded n 1524; the Franciscan Sisters have a monastery at Wielun founded in 1682; the Dominican Sisters, one at Przyrow, founded in 1626. The Sisters of Charity were established at Czenstochowa, Kalisz, Konin, Piotrkow, Sieradz, Wielun, Turek, and Wloclawek. According to official statistics, the number of regulars in the diocese is 37; the number of religious women, 24, besides 55 Sisters of Charity. The present cathedral of Wloclawek was begun in 1340 and completed in 1411. It was extremely wealthy and at the end of the sixteenth century there were 100 clergy attached to it. The Divine offices were celebrated in it uninterruptedly, day and night. The cathedral chapter included eight prelates. At the beginning of the sixteenth century it was established that no one who did not possess a title of nobility could become a canon. Pius IX, in 1862, granted the canons of this cathedral the right to wear the violet mozzetta. The chapter now consists of four prelates and eight canons. At Kalisz there is also an ancient collegiate church to which three prelates and four canons are now attached. The diocese is divided into three general consistories: at Wloclawek, Kalisz, and Piotrkow.

The number of secular priests is 538. The diocesan seminary, founded in 1568 by Bishop Karnkowski, is in a very flourishing condition. The education of the seminarists was in 1719 entrusted to the Lazarists, who continued in the charge until 1864. There are 102 seminarists. In 1910 the professors of the seminary began the publication of a splendid monthly review, "Ateneum kaplanski", which, for solidity of learning and wealth of theological and religious contents holds the first place in the Catholic Press of Poland. The ancient Diocese of Wloclawek had much to suffer from Hussitism, and afterwards from Lutheranism. The negligence of Bishops Zebrzydowski, Drohiowski, and Uchanski contributed to the diffusion of the latter heresy. Pomerania was almost entirely lost to Catholicism. Numerous synods were convoked in the Diocese of Wloclawek. Chodynski mentions the acts and decrees of forty-six *synodi vladislavienses*, of which he publishes a large number. The first of these synods was held in 1227 and the last in 1641.

A. PALMIERI

George Dering Wolff

George Dering Wolff

Editor, b. at Martinsburg, West Virginia, 25 Aug., 1822; d. at Norristown, Pennsylvania, 29 Jan., 1894. His parents were Charlotte Wolff, a woman of great intelligence, and Bernard Crouse Wolff (b. at Martinsburg, 1794), a prominent divine of the German Reformed Church (Lutheran). The family moved to Easton, Pennsylvania, in 1835, the father becoming English pastor there. George graduated A.M. from Marshall College, Mercersburg, Pennsylvania, and there studied law for three years at Easton. Though admitted to the Bar, he never practised, but after a four years' theological course became a minister of the German Reformed Church. The elder Wolff and his son were staunch followers of John Williamson Nevin, who in 1843 began to develop in their sect a system of theology which, whilst bitterly opposing Catholicism, held Christ's Church to be a living organism and sought to restore certain teaching of Christ repudiated by the Reformation (see G. D. Wolff's article "The Mercersburg Movement" in "American Catholic Quarterly", 1878). George Wolff's scholarly attainments and sterling worth brought him many important calls. The inconsistency of his religious tenets finally becoming clear to him, he joined the Catholic Church in 1871. The next year he became editor of the "Catholic Mirror" published at Baltimore, leaving it the year following for the "Catholic Standard" of Philadelphia, of which he died editor-in-chief. His editorial success caused him to be called to join Dr. James J. Corcoran and Father James O'Connor in establishing the "American Catholic Quarterly Review", first issued in Philadelphia, Jan., 1876. Father O'Connor was consecrated bishop in Aug. of that year and went to his laborious vicariate Apostolic in Nebraska. The other two editors sustained the chief worth of the publication until their death. Wolff's articles were largely on matters of apologetic theology. His wife, Sarah Hill, became a convert to Catholicism, as did his brother, Professor Christian Wolff.

In Memoriam, George Dering Wolff in American Catholic Quarterly Review (April, 1894); The Catholic Standard (Philadelphia, Feb., 1894).

REGINA RANDOLPH JENKINS

St. Wolfgang

St. Wolfgang

Bishop of Ratisbon (972-994), born about 934; died at the village of Pupping in upper Austria, 31 October, 994. The name Wolfgang is of early German origin. St. Wolfgang was one of the three brilliant stars of the tenth century, St. Ulrich, St. Conrad, and St. Wolfgang, which illuminated the early medieval period of Germany with the undying splendour of their acts and services. St. Wolfgang sprang from a family of Swabian counts of Pfullingen (Mon. Germ. His.: Script., X, 53). When seven years old he had an ecclesiastic as tutor at home; later he attended the celebrated monastic school on the Reichenau. Here he formed a strong friendship with Henry, brother of Bishop Poppe of Würzburg, whom he followed to Würzburg in order to attend at the cathedral school there the lectures of the noted Italian grammarian, Stephen of Novara. After Henry was made Archbishop of Trier in 956, he called his friend to Trier, where Wolfgang became a teacher in the cathedral school, and also laboured for the reform of the archdiocese, notwithstanding the enmity with which his efforts were met. Wolfgang's residence at Trier greatly influenced his monastic and ascetic tendencies, as here he came into connection with the great reformatory monastery of the tenth century, St. Maximin of Trier, where he made the acquaintance of Ramwold, the teacher of St. Adalbert of Prague. After the death (964) of Archbishop Henry of Trier, Wolfgang entered the Order of St. Benedict in the Abbey of Maria Einsiedeln, Switzerland, and was ordained priest by St. Ulrich in 968.

After their defeat in the battle of the Lechfeld (955), a victory gained with the aid of St. Ulrich, the heathen Magyars settled in ancient Pannonia. As long as they were not converted to Christianity they remained a constant menace to the empire. At the request of St. Ulrich, who clearly saw the danger, and at the desire of the Emperor Otto the Great, St. Wolfgang, according to the abbey annals, was "sent to Magyars" as the most suitable man to evangelize them. He was followed by other missionaries sent by Bishop Piligrim of Nassau, under whose jurisdiction the new missionary region came. After the death of Bishop Michael of Ratisbon (23 September, 972) Bishop Piligrim obtained from the emperor the appointment of Wolfgang as Bishop of Ratisbon (Christmas, 972). Wolfgang's services in this new position were of the highest importance, not only for the diocese, but also for the cause of civilization. As Bishop of Ratisbon, Wolfgang became the tutor of Emperor St. Henry II, who learned from him the principles which governed his saintly and energetic life. Poppe, son of Margrave Luitpold, Archbishop of Trier (1016), and Tagino, Archbishop of Magdeburg (1004-1012), also had him as their teacher.

St. Wolfgang deserves credit for his disciplinary labours in his diocese. His main work in this respect was connected with the ancient and celebrated Abbey of St. Emmeram which he reformed by granting it once more abbots of its own, thus withdrawing it from the control of the bishops of Ratisbon, who for many years had been abbots *in commendam*, a condition of affairs that had been far from beneficial to the abbey and monastic life. In the Benedictine monk Ramwold, whom St. Wolfgang called from St. Maximin at Trier, St. Emmeram received a capable abbot (975). The saint also reformed the convents of Obermunster and Niedermunster at Ratisbon, chiefly by giving them as an example the convent of St. Paul, Mittelmunster, at Ratisbon, which he had founded in 983. He also co-operated in the reform of the ancient and celebrated Benedictine Abbey of Altach (Nieder-altach), which had been founded by the Agilolf dynasty, and which from that time took on new life. He showed genuine episcopal generosity in the liberal manner with which he met the views of the Emperor Otto II regarding the intended reduction in size of his diocese for the benefit of the new Diocese of Prague (975), to which St. Adalbert was appointed first bishop. As prince of the empire he performed his duties towards the emperor and the empire with the utmost scrupulousness and, like St. Ulrich, was one of the mainstays of the Ottonian policies. He took part in the various imperial Diets, and, in the autumn of 978, accompanied the Emperor Otto II on his campaign to Paris, and took part in the great Diet of Verona in June, 983.

St. Wolfgang withdrew as a hermit to a solitary spot, now the Lake of St. Wolfgang, apparently on account of a political dispute, but probably in the course of a journey of inspection to the monastery of Mendsee which was under the direction of the bishops of Ratisbon. He was discovered by a hunter and brought back to Ratisbon. While travelling on the Danube to Pöchlarn in Lower Austria, he fell ill at the village of Pupping, which is between Efferding and the market town of Aschach near Linz, and at his request was carried into the chapel of St. Othmar at Pupping, where he died. His body was taken up the Danube by his friends Count Aribert of Andechs and Archbishop Hartwich of Salzburg to Ratisbon, and was solemnly buried in the crypt of St. Emmeram. Many miracles were performed at his grave; in 1052 he was canonized. Soon after his death many churches chose him as their patron saint, and various towns were named after him. In Christian art he has been especially honoured by the great medieval Tyrolese painter, Michael Pacher (1430-1498), who created an imperishable memorial of him, the high altar of St. Wolfgang. In the panel pictures which are now exhibited in the Old Pinakothek at Munich are depicted in an artistic manner the chief events in the saint's life. The oldest portrait of St. Wolfgang is a miniature, painted about the year 1100 in the celebrated Evangelary of St. Emmeram, now in the library of the castle cathedral at Cracow. A fine modern picture by Schwind is in the Schak

Gallery at Munich. This painting represents the legend of Wolfgang forcing the devil to help him to build a church. In other paintings he is generally depicted in episcopal dress, an axe in the right hand and the crozier in the left, or as a hermit in the wilderness being discovered by a hunter. The axe refers to an event in the life of the saint. After having selected a solitary spot in the wilderness, he prayed and then threw his axe into the thicket; the spot on which the axe fell he regarded as the place where God intended he should build his cell. This axe is still shown in the little market town of St. Wolfgang which sprang up on the spot of the old cell. At the request of the Abbey of St. Emmeram, the life of St. Wolfgang was written by Othlo, a Benedictine monk of St. Emmeram about 1050. This life is especially important for the early medieval history both of the Church and of civilization in Bavaria and Austria, and it forms the basis of all later accounts of the saint. The oldest and best manuscript of this "Life" is in the library of the Abbey of Maria Einsiedeln in Switzerland (MS. No. 322), and has been printed with critical notes in "Mon. Germ. His.: Script.", IV, 524-542. It has also been printed in, "Acta SS.": II November, (Brussels, 1894), 529-537; "Acta SS. O. S. Ben.", V, 812-833; and in P.L., CXLVI, 395-422.

Ikno-graphie, II (Freiburg, 1896), 683; POTTHAST, Bibl. medii aevi, II (Berlin, 1896), 1641.

ULRICH SCHMID

Wolfram von Eschenbach

Wolfram von Eschenbach

Generally regarded as the greatest of Middle-High-German epic poets, date of birth unknown; d. soon after 1216. Our scanty information about his life is derived mainly from his works. He was a Bavarian by birth. The town of Eschenbach, whence he gets his name, is a little southeast of Ansbach in Franconian territory. though of noble birth, he was poor, possibly because he was a younger son. All that he owned was the small estate of Wildenberg (now Wehlenberg) near Ansbach. In his "Parzival" he speaks of the Count of Wertheim as *Min Herre*, whence it has been surmised that he was a vassal of that count. But the words in question may simply be an honorary title. Wolfram lead a wandering life, and after 1203 stayed repeatedly at Eisenach at

the Court of the landgrave Hermann of Thuringia. Parts of his "Parzival" were composed there. After the landgrave's death (1217) the poet returned to his home. The date of his death is uncertain; he certainly survived the landgrave, whose death he alludes to in his poem "Willehaim". He seems to have died soon after his patron, for his last works were left unfinished. He was buried in the Frauenkirche of Eschenbach, where his tomb was still to be seen in the seventeenth century.

Wolfram in his "Parzival" tells us explicitly that he could neither read nor write. His poems were written down from dictation. His knowledge was extensive and varied rather than accurate. He certainly knew French, but only imperfectly; for his proper names often show a curious misunderstanding of French words and phrases. He is the author of some lyric poems and three epics. The lyrics are mostly so-called *Tagelieder* (day-songs), in which lovers are exhorted to part by a watcher who announces the dawn. The poet's fame, however, rests on his epics, above all on his "Parzival", the greatest of Middle High German court epics. It is the well-story of the simpleton who passes through struggle and temptation and in the end wins the highest earthly happiness and becomes King of the Holy Grail. The poem consists of almost 25,000 verses and was composed between the years 1200 and 1216. As is the case with all Middle High German court epics, it is drawn from a French source. The precise relation of the Wolfram's poem to this source is a much mooted question. The most famous French poem on the subject of Parzival is the "Comte del Graal" of Chrestien de Troyes, composed possibly about 1180. Wolfram mentions this work, but cites as his source the work of a Provencal poet, Kyot (Guiot), to whom he gives the preference over Chrestien. But no such work is known, and hence some scholars have declared Kyot to be a fiction. But this seems to be going too far; to-day Kyot's existence is generally admitted. Wolfram's poem certainly contains much that is not found in the work of Chrestien, and which can hardly be explained as pure invention. Originally the Parzival story had an independent existence, being akin to the simpleton-tales familiar from folk-lore. But in Wolfram's work, as before him in Chrestien's, the story appears as part of the romances belonging to the Arthurian cycle; it is also connected with the legend of the Holy Grail.

It is acknowledged that, while Wolfram did not invent the story, he gave to it a deep spiritual meaning. In his "Parzival" the legend of the Holy Grail has found its highest and noblest poetic expression. The title "Titurel" is given to two fragments in strophic form, containing the love story of Sigune and Schionatulander, a mere episode in "Parzival". The name is derived from Titurel, the ancestor of the Knights of the Grail, with whom the introductory strophes are concerned. A later poet treated the same subject at much greater length, and his work, "Der jungere Titurel", for a long time passed as Wolfram's own. The poet's last work was "Willehalm". It relates the

deeds of William of Orange against he Saracens. It is modelled on the French poem "Aliscans" with which Wolfram became acquainted through the landgrave Hermann. The work was left unfinished and was afterwards continued and expanded by Ulrich von Turheim and again by Ulrich von Turlin. The chief edition of Wolfram's works is that of K. Lachmann (Berlin, 1833; 5th edition, 1891); an edition with explanation and commentary is that of K. Bartsch, "Parzifal und Titurel" in "Deutsche Klassiker des Mittelalters", IX-XI, 3 parts (Leipzig, 1875-77); also edited by Paul Piper in Kürschner's "Deutsche National-Litteratr", V, 2 parts; and by E. Martin, "Parzival u. Titurel" (Halle, 1900-03), with commentary. A modernized German version of "Parzival" was given by K. Simrock (6th ed., 1883), G. Botticher (2nd ed., Berlin, 1893), W. Hertz (2nd ed., Stuttgart, 1904), and E. Engelmann (Stuttgart, 1888). An English version was made by Jessie Weston (London, 1894).

Consult the preface and commentary of the editions and translations cited above; also BOTTICHER, Das Hohelied vom Rittertum (Berlin, 1856); SAN MARTE, Leben und Dichten Wolframs von Eschenbach (Magdeburg, 1841).

ARTHUR F.J. REMY

Michael Wolgemut

Michael Wolgemut

Painter and engraver, b. at Nuremberg, 1434; d. there, 1519. He was the most prominent artist of Nuremberg in the fifteenth century, and was selected to paint the great altar-piece for the church of Zwickau. He was the pupil and assistant of Hans Pleydenwurff, and, though a very great master, must not be regarded as the equal of Pleydenwurff, whose technique he carefully copied and adopted. Perhaps his greatest claim to immortality is the fact that he was Durer's master, working with him between 1486 and 1490. "At that time the workshop of Wolgemut must have been one of the busiest in the city, frequented", says Mr. Campbell Dodgson, "by all the best painters, carvers, and wood engravers of the day." Whether Wolgemut himself was a wood engraver is not definitely known, but undoubtedly many of the altar-pieces carved in wood were carved in his workshop, and Veitoss the eminent carver, was one of his friends and companions, and worked with him in the production of carved and painted altar-pieces. He was certainly responsible for some wood-cuts, and the designs for several stained glass windows in Nuremberg are also attributed to him. His most important picture after that of Zurcken is in the parish church at Crailsheim; other paintings by him are at Schwaback, Hersbruck, Munich, and Nuremberg. He was an ardent Catholic, and a man of great devotion, praised by his contemporaries for his upright life.

See the works of THODE on Wolgemut and on the painters of Nuremberg; CAMPBELL DODGSON, Catalogue of German and Flemish Wood-cuts; various articles in The Prussian Year-Book by VAN LOGA, LEHRS, THODE, and SCHEIBLER.

GEORGE CHARLES WILLIAMSON

Louis-François-Michel-Reymond Wolowski

Louis-François-Michel-Reymond Wolowski

Born at Warsaw, 31 Aug., 1810; d. at Gisors, Eure, 15 Aug., 1876. His father, a member of the provisory government which established the Polish Revolution at Warsaw in 1830, sent him to Paris despite his youth as first secretary of legation. When the revolution was quelled, the Wolowski family established themselves at Paris, and in 1836 Louis was a naturalized Frenchman. His creation, as early as 1834, of the "Revue de législation et de jurisprudence" began to assure his reputation as jurist and economist; in 1839 a chair of industrial legislation was created for him at the Conservatory of Arts and Crafts, which he occupied for thirty-two years. In 1855 he became a member of the Académie des Sciences Morales et Politiques. On two occasions Wolowski played a legislative role. Elected representative of the Seine at the Constituent Assembly in 1848 and at the Legislative Assembly in 1849, he directed (10 May, 1848) the attention of the Government to the misfortunes of Poland, and voted for the expedition to Rome and the Loi Falloux. Elected in 1871 representative to the National Assembly, he sat on the left Centre and played a very important part in the financial discussions; in Dec., 1875, he became senator for life. He played an important part in the foundation of the *Crédit Foncier*, whose principal object was the withdrawal of rural property from the expenses of loans and the scourge of hypothecary subrogation. A bimetallist in monetary matters and a free trader in commercial matters, he did not carry economic liberalism so far as to oppose all State intervention in the matter of labour; on the contrary, he had a very important share in the law of 19 May, 1871, which limited the labour of children and women in manufacturing, and which created division inspectors for the supervision of labour. "Wolowski", say M. Jules Rambaud, who studied his work at length, "was animated by sincere piety, concerning which we should not be misled by some epigrams on the ancient economic privileges enjoyed by the clergy."

Among Wolowski's works were: "Des sociétés par actions" (1838); "Des brevets d'invention et des marques de fabrique" (1840); "De l'organisation du travail" (1844); "Etudes d'économie politique et de statistique" (1848); "La banque d'Angleterre et les banques d'Ecosse" (1867); "L'or et l'argent" (1870). He published (1856) a translation of Roscher's "Principles of Political Economy".

LEVASSEUR, La vie et les travaux de Wolowski in Annales du conservatoire des arts et metiers (1876); RAMBAUD, L'oeuvre econ. De Wolowski (Paris, 1882); LAPPERT in CONRAD AND LEXIS, Handwörterbuch der Staatswissenschaften, VII (Jena, 1901).

GEORGES GOYAU

Thomas Cardinal Wolsey

Thomas Wolsey

Cardinal, Archbishop of York, b. at Ipswich, the usually accepted date, 1471, being probably three or four years too early; d. at Leicester Abbey, 29 November, 1530. His father, Robert Wulcy (or Wolsey), was a man of substance, owning property in Ipswich, but it is not known that he was a butcher as commonly reported. The cardinal himself always wrote his name as "Wulcy". He was educated at Oxford, where he took his degree at the age of fifteen, winning the title "the boy bachelor". About 1497 he was elected fellow of Magdalen, and after becoming M. A. was appointed master of the adjoining school. The father of three of his pupils, the Marquis of Dorset, presented him the rectory of Limington in Somerset in October, 1500. He had been ordained priest at Marlborough (10 March, 1498) by the suffragan of the Bishop of Salisbury. He also received other benefices, and became one of the domestic chaplains to the Archbishop of Canterbury, Henry Dean. On the archbishop's death (1503) he became chaplain to Sir Richard Nanfan, who, perceiving his remarkable talent for administration, entrusted him with his financial affairs and introduced him to the notice of King Henry VII. When Sir Richard died in 1507, Wolsey became one of the court chaplains, and was befriended by the influential Bishop of Winchester, Richard Fox. He shortly acquired the livings of Redgrave in Suffolk (1506) and Lydd in Sussex (1508), and about this time the king began to employ him in the diplomatic service; it was probably then that he made the well-known journey into Flanders and back as special envoy to the Emperor Maximilian with such rapidity that when he returned on the third day the king, believing he had not yet started, rebuked him for remissness. As Master of the Rolls his grasp of practical affairs enabled him to initiate reforms which greatly accelerated the business of the Court. On 2 February, 1509, he was made dean of Lincoln, and on the accession of Henry VIII, which happened shortly after, he received an assurance of the continuance of royal favour in his appointment as almoner. During the next year he supplicated for the degrees of B. D. and D. D., and obtained the additional livings of St. Bride's, Fleet Street, London, and Torrington in Devonshire, as well as a prebend in Hereford cathedral. On 17 Feb., 151, he became a canon of Windsor and soon after registrar to the Order of the Garter.

By 1512 he was exercising marked influence in political affairs and his share in the royal favour was already attracting the dislike of the old nobility. In foreign and domestic business alike the king followed his counsel and daily entrusted more power to his hands. Fresh preferment continued to pour in on him. He became successively dean of Hereford (1512), dean of York (1513), dean of St. Stephen's, Westminster, and precentor of London. He began to keep some state and when he accompanied the king to France in June, 1513, he was followed by a train of two hundred gentlemen. He was present through Henry's successful campaign, and at the king's request the pope named him Bishop of Tournay; but he never obtained possession and later on surrendered his claim to the bishopric for an annual pension. Instead he was appointed Bishop of Lincon, the papal bulls being dated 6 February, 1514, and he was consecrated at Lambeth palace on 26 March. In the following September he succeeded Cardinal Bainbridge as Archbishop of York, and on 10 Setember, 1515, was created cardinal with the title "S. Caecilia trans Tiberim", receiving the hat in Westminster Abbey on 18 November. A month later (24 December) he became Lord Chancellor of England, and had thus attained at the early age of forty or there-abouts the highest dignities, spiritual and temporal, that a subject could hope for. His power with the king was so great that the Venetian Ambassador said he now might be called "*Ipse rex*" (the king himself).

Of Wolsey's foreign policy only the main lines can be indicated. His first efforts were to lead the king back to his father's policy of an alliance with France in opposition to Ferdinand of Spain and the Emperor Maximilian. But the French conquest of Milan at the battle of Marignano in 1515 checked this scheme, and led Wolsey to make new treaties with Maximilian and Ferdinand. After Ferdinand's death the cardinal's policy entered on a new phase, calculated to meet the entirely new situation. Ferdinand's successor, Charles V, now held Spain, the Indies, Sicily, Naples, and the Netherlands with reversion of the duchy of Austria. Rivalry between the two young monarchs, Francis and Charles, thus became inevitable, and Wolsey saw the advantage which England would derive from the sense each had of the value of the English alliance. At this time the pope was endeavouring to raise a crusade against the Turks, and Wolsey adroitly succeeded in effecting a universal peace to which the pope and emperor as well as Francis and Charles were parties. Under cover of this peace Wolsey pushed forward his favourite policy of alliance with France. A treaty with France was carried through by the cardinal himself and the other councillors were only called to approve what had already been settled.

But in January, 1519, the situation was again changed by the death of the Emperor Maximilian and the consequent contest for the imperial crown. When Charles was duly elected emperor the rivalry between the houses of Habsburg and Valois was accentuated. Instead of three powers-Maximilian, Francis, and Charles-Wolsey had now

only two to reckon with and to play off against each other. He determined on a policy of neutrality with the view of giving England the decisive power in guiding the destinies of Europe. Meetings between Henry and both the rival monarchs took place; he met Charles at Canterbury and Francis at the celebrated Field of the Cloth of Gold. But a second meeting with the emperor followed immediately and Henry's personal predilections were in favour of an alliance with him rather than with France. Still Wolsey persuaded the king that the neutral policy was the most profitable, especially when war actually broke out. Both parties to the war were soon willing to accept England's mediation, and Wolsey conducted a long conference during which his conduct was more diplomatic than honest, and before the conference was over he signed a secret treaty with the emperor which provided for an offensive and defensive alliance against France. This was a new policy for him to adopt, and it is clear that in this treaty his own wishes were overborne by Henry's desire for a new war with France, and it was not till two abortive campaigns had disillusioned the king that Wolsey was again able to resort to diplomatic measures. This treaty with the emperor was, however, of importance in Wolsey's own life as it opened up the way for his possible election to the papacy.

The death of Leo X (2 December, 1521) gave the emperor an opportunity of exercising his influence in Wolsey's favour as he had promised, but the imperial influence was not in fact brought to bear and Wolsey received very few votes. During the year 1522 the alliance with the emperor continued, and Wolsey was occupied in raising large sums of money for the proposed war against France, becoming thereby still more unpopular with the nation. The new pope, Adrian VI, died on 14 Sept., 1523, and again Wolsey was a candidate for the papacy. The English ambassadors at Rome were confident that the united influence of Charles and Henry would secure his election, but again Charles deceived him and Clement VII was chosen. The new pope not only confirmed his legateship for life, but gave him the Bishopric of Durham in addition to his Archbishopric of York. Upon this Wolsey resigned the See of Bath and Wells which he had held *in commendam* since 1518. It does not seem that Wolsey personally was particularly anxious to become pope, though doubtless he would have accepted the position had he been chosen. On the election of Pope Clement he wrote, "For my part, as I take God to record, I am more joyous thereof than if it had fortuned upon my person", and Anglian historians, such as Bishop Creighton and Dr. James Gairdner, accept this as representing his genuine feelings. The alliance with the emperor, which had always been against Wolsey's better judgment, did not survive the events of 1523. Henry could not make war again for want of means, and Charles now distrusted him; so Wolsey reverted to his original idea of alliance with France, but he was not able to do much until 1525, when the defeat and capture of Francis at the battle of Pavia made

the dominant power of Charles a danger to all Europe. In face of this peril Henry reluctantly made a new treaty with France. It was a bold policy for Wolsey, for, having incurred the jealousy of the nobility by his power, he had aroused the hostility of the people by financial exactions, and he provoked the enmity of all by the extravagant pomp with which he surrounded himself on all his public appearances. He could rely only on the king's favour, and he knew that to lose this was complete ruin. Just at this critical juncture the king raised the question of the divorce from Queen Katharine in order that he might marry Anne Boleyn. This personal matter "widened into unexpected issues and consumed Wolsey's energies till it led to his fall" (Creighton, p. 150). Wolsey did not wish Henry to marry Anne, but he was not averse to ridding himself of Katharine's adverse political influence, for her sympathy with her nephew the emperor caused her to dislike Wolsey's French policy. So he lent himself to forward the king's wishes. The first steps were taken in his own legatine court, apparently with the idea that if this tribunal pronounced against the validity of the king's marriage the pope would confirm the sentence. But Katharine learned of the king's plan and prepared to defend her rights. As she could count on the sympathy of both pope and emperor the king despatched Wolsey to persuade the French king to bring sufficient pressure to bear on the pope to counteract the influence of Charles. The scheme was to deliver the pope from Charles V, who had sacked Rome, in the hope that Clement's gratitude would induce him to favour the king with regard to the divorce.

The history of the divorce question has been treated of under the articles CLEMENT VII and HENRY VIII; it will suffice here to note Wolsey's attitude. When he returned to England he heard for the first time of Knight's embassy to Rome, and thus learnt that he no longer enjoyed the king's complete confidence. And though Anne Boleyn and the king, realizing that he might yet be useful, treated him with friendliness and consideration, he realized that in Anne he had a serious political rival. When the pope appointed Cardinal Campeggio to try the case in England with Wolsey, the English cardinal soon learnt that the matter was entirely in his colleague's hands. All Campeggio's efforts to avoid holding the trial at all having failed, the court sat at Blackfriars on 18 June, 1529. Before this Anne Boleyn, regarding Wolsey as responsible for the long delay, had set herself to bring about his fall. The failure of the trial rendered this possible, and during August and September he was kept at a distance from the Court and was known to be in disgrace. In November a bill of indictment was preferred against him, and on 19 November he had to surrender the great seal of England. On 22 November he was forced to sign a deed confessing that he had incurred a *praemunire* and surrendering all his vast possessions to the king. On 30 November judgment was given that he should be out of the king's possession and should forfeit all his lands and goods. He remained at Esher through the winter, disgraced, though not without occa-

sional messages of kindness from the king. His health, which had been bad for many years, now failed seriously. In February he received a general pardon, and the possessions of his archbishopric were restored to him, except York House, which he had to convey to the king. He was then allowed to retire to York, where he spent the last six months of his life in devotion and a sincere effort to do his duty as a bishop. Though he had been worldly and his private life had not been stainless, he had always been a Catholic. His last days were embittered by the news that the king intended to suppress the two colleges, at Ipswich and Oxford, which he had founded with such care. The former perished, but Christ's College survived, though not in the completeness he had intended. He was in residence at Cawood near York, preparatory to being enthroned in York minster, when, on 4 November, commissioners from the king came to arrest him on a charge of high treason. Slowly and as an invalid he travelled towards London, knowing well what to expect. "Master Kingston, I see the matter against me now it is framed; but if I had served God as diligently as I have done the king He would not have given me over in my gray hairs." The end came at Leicester Abbey where on arrival he told the abbot, "I am come to leave my bones among you."

He died unregretted by any save his immediate attendants, yet he had given his life unselfishly to the interests of his country, and no Englishman has ever surpassed him in the genius with which he directed both the foreign and domestic relations of England, so as to make each undertaking help his great design of making her the centre of European politics. His foreign policy, though planned on great and heroic lines, was severely practical. Its object was to help English trade and to maintain peace, to secure union with Scotland, and to effect judicious ecclesiastical reforms. He looked for a European settlement of the difficulties that beset the Church and desired England to take the leading part therein. His failure was owing to the selfishness of Henry. The question of the divorce not only led to the fall of Wolsey, but withdrew England for generations from European politics and made her, not the leader that Wolsey had dreamed of, but a nation apart.

Of the contemporary accounts of Wolsey, POLYDORE VERGIL (who had been imprisoned by the cardinal) in his *Anglica Historia* and HALL in his *Chronicle* are equally prejudiced and hostile. So too are the rhymes of SKELTON. Opposed to these is CAVENDISH, *Life of Wolsey*, which gives a vivid and touching personal account abounding in intimate touches (latest reprint, London, 1887). All the volumes of State Papers from 1509 to 1530 are of importance and their publication in recent years has superseded all the earlier lives of Wolsey. The results of the careful study of these documents may be obtained in BREWER, *Reign of Henry VIII* (London, 1884) and, in briefer form, in CREIGHTON, *Cardinal Wolsey* (London, 1888). A Catholic view

is represented by TAUNTON, Thomas Wolsey, Legate and Reformer (London, 1901).

EDWIN BURTON

St. Wolstan

St. Wolstan

Benedictine, and Bishop of Worcester, b. at Long Itchington, Warwickshire, England, about 1008; d. at Worcester, 19 Jan., 1095. Educated at the great monastic schools of Evesham and Peterborough, he resolutely combated and overcame the temptations of his youth, and entered the service of Brithege, Bishop of Worcester, who ordained him priest about 1038. Refusing all ecclesiastical preferment, he became a novice in the great priory of Worcester, and after holding various offices in the monastery became cathedral prior there. He held this position, edifying all by his charity, holiness of life, and strict observance of the rule, until 1062, when the See of Worcester fell vacant by the translation of Bishop Aldred to the Archbishopric of York. Two Roman cardinals, who had been Wolstan's guests at Worcester during Lent, recommended the holy prior to King Edward for the vacant see, to which he was consecrated on 8 September, 1062. Not a man of special learning or commanding intellect, he devoted his whole life to the care of his diocese, visiting, preaching, and confirming without intermission, rebuilding his cathedral in the simple Saxon style, planting new churches everywhere, and retaining the ascetic personal habits which he had acquired in the cloister. His life, notwithstanding his assiduous labours, was one of continuous prayer and recollection; the Psalms were always on his lips, and he recited the Divine Office aloud with his attendants as he rode through the country in discharge of his episcopal duties. Wolstan was the last English bishop appointed under a Saxon king, the last episcopal representative of the Church of Bede and of Cuthbert, and the link between it and the Church of Lanfranc and Anselm. After the Conquest, when nearly all the Saxon nobles and clergy were deprived of their offices and honours in favour of the Normans, Wolstan retained his see, and gradually won the esteem and confidence both of Lanfranc and of the Conqueror himself. Aelred of Rievaulx tells the legend of his being called upon to resign his bishopric, and of his laying his crozier on the tomb of Edward the Confessor at Westminster. The crozier remained immovable -- a sign from heaven, as was believed, that the holy bishop was to retain his see. He survived both William the Conqueror and Lanfranc, and was one of the consecrators of St. Anselm.

D.O. HUNTER-BLAIR

Woman

Woman

Of late years the position of woman in human society has given rise to a discussion which, as part of social unrest, is known under the name of the "woman question", and for which a solution is sought in the movement for the emancipation of women. In theory as in practice the answer to the question varies with the view one takes of life. Christianity with its unchangeable principles, and without misjudging the justifiable demands of the age, undertakes to guide the woman movement also into the right path. The life-task of woman is a double one.

- As an individual woman has the high destiny obligatory upon every human being of acquiring moral perfection.
- As a member of the human race woman is called in union with man to represent humanity and to develop it on all sides.

Both tasks are indissolubly united, so that the one cannot be fully accomplished without the other. The freedom of the woman consists in the possibility of fulfilling unimpeded this double task with its rights and privileges both in public and private life. The limitation of the freedom, whether actual or merely imaginary, necessarily calls forth the effort to do away with the obstructing barriers. In order to judge rightly these efforts known as the "woman movement" the rights and duties of woman in the life of humanity must be correctly stated. For this purpose, however, the first thing necessary is the proper conception of the feminine personality. The sources from which this definition is to be drawn are nature and history.

Nature

The same essentially identical human nature appears in the male and female sex in two-fold personal form; there are, consequently, male and female persons. On the other hand, there is no neutral human person without distinction of sex. Hence follows in the first place, woman's claim to the possession of full and complete human nature, and thus, to complete equality in moral value and position as compared with man before the Creator. It is, therefore, not permissible to take one sex as the one absolutely perfect and as the standard of value for the other. Aristotle's designation of woman as an incomplete or mutilated man ("De animal. gennerat.", II, 3d ed. Berol., 773a) must, therefore, be rejected. The untenable medieval definition, "Femina est mas occasionatus", also arose under Aristotelian influence. The same view isto be found in the "last Scholastic", Dionysius Ryckel ("Opera minora", ed. Tournay, 1907, II, 161a).

The female sex is in some respects inferior to the male sex, both as regards body and soul. On the other hand, woman has qualities which man lacks. With truth does the writer on education, Lorenz Kellner, say: "I call the female sex neither the beautiful nor the weak sex (in the absolute sense). The one designation is the invention equally of sensuality and of flattery; the other owes its currency to masculine arrogance. In its way the female sex is as strong as the male, namely in endurance and patience, in quiet long-suffering, in short, in all that concerns its real sphere, viz., the inner life" (*Lose Blätter*", Collected by von Görgen; Freiburg, 1895, 50). On account of the moral equality of the sexes the moral law for man and woman must also be the same. To assume a lax morality for the man and a rigid one for the woman is an oppressive injustice even from the point of view of common sense. Woman's work is also in itself of equal value with that of a man, as the work performed by both is ennobled by the same human dignity.

The fact that there is no sexually neutral human being has, however, a second consequence. The sexual character can be separated from the human being as something secondary only in thought, not in actuality. The word "person" belongs neither to the soul nor to the body alone; it is rather, that the soul informing the body constitutes the full conception of the human personality only in its union with the body. It is in no way, therefore, permissible to limit differences only to the primary and secondary peculiarities of the body. On the contrary, the indisputable results of anatomical, physiological and psychological research show a difference so far-reaching between man and woman that the following is established as a scientific result: the feminine personality assumes the complete human nature in a different manner from the masculine. According to the intention of the Creator, therefore, the manifestation of human nature in women necessarily differs from its manifestation in man; the social spheres of interests and callings of the sexes are unlike. These distinctions can be diminished or increased by education and custom but cannot be completely annulled. Just as it is not permissible to take one sex as the standard of the other, so from the social point of view it is not allowable to confuse the vocational activities of both. The most manly man and the most feminine woman are the most perfect types of their sexes.

From this far-reaching sexual difference there follows, thirdly, the combination of the sexes for the purpose of an organic social union of the human race, which we call humanity, that is to say humanity cannot be represented by any number, however large, of individuals of like sex but is to be found solely in the social and organic union of man and woman. Thus each man and each woman is, indeed, by nature a complete human being with the high moral vocation already mentioned; on the other hand the entire male sex in itself represents only the half of humanity and the female sex the other half, while one man and one woman together suffice to represent humanity.

Consequently each of the two sexes requires the other for its social complement; a complete social equality would nullify this purpose of the Creator. Evidently the intention at the basis of the differences mentioned is to force the complementary union of the two sexes as a necessity of nature. Accordingly, notwithstanding the equal human dignity, the rights and duties of the woman differ from those of the man in the family and the forms of society which naturally develop from it.

If the two sexes are designed by nature for a homogeneous organic co-operation, then the leading position or a social pre-eminence must necessarily fall to one of them. Man is called by the Creator to this position of leader, as is shown by his entire bodily and intellectual make-up. On the other hand, as the result of this, a certain social subordination in respect to man which in no way injures her personal independence is assigned to woman, as soon as she enters into union with him. Consequently nothing is to be urged on this point of equality of position or of equality of rights and privileges. To deduce from this the inferiority of woman or her degradation to a "second-rate human being" contradicts logic just as much as would the attempt to regard the citizen as an inferior being because he is subordinate to the officials of the state.

It should be emphasized here that man owes his authoritative pre-eminence in society not to personal achievements but to the appointment of the Creator according to the word of the Apostle: "The man . . . is the image and glory of god; but the woman is the glory of the man" (I Cor., xi, 7). The Apostle in this reference to the creation of the first human pair presupposes the image of God in the woman. As this likeness manifests itself exteriorly in man's supremacy over creation (Gen., I, 26), and as man as the born leader of the family first exercised this supremacy, he is called directly God's image in this capacity. Woman takes part in this supremacy only indirectly under the guidance of the man and as his helpmeet. It is impossible to limit the Pauline statement to the single family; and the Apostle himself inferred from this the social position of woman in the Church community. Thus her natural position is assigned to woman in every form of society that springs necessarily from the family. This position is described by St. Thomas Aquinas with classic clearness (*Summa theol.*, I:92:1, ad 2um). This doctrine, which has always been maintained by the Catholic Church, was repeatedly emphasized by Leo XIII. The encyclical "Arcanum", 10 February, 1880, declares: "The husband is ruler of the family and the head of the wife; the woman as flesh of his flesh and bone of his bone is to be subordinate and obedient to the husband, not, however, as a hand-maid but as a companion of such a kind that the obedience given is as honourable as dignified. As, however, the husband ruling represents the image of Christ and the wife obedient the image of the Church, Divine love should at all times set the standard of duty".

Thus the germ of human society, which a sound sociology must take as its starting-point, is not the abstract human individual but the living union of man and woman primarily in the home. The different characteristics in the equipment of the sexes point to such a division of labour between the two that man and woman are to watch over the training of the growing generation, not apart from each other, but jointly and in partnership.

Consequently the activities of both in the social domain may perhaps be compared to two concentric circles of unlike circumference. The external, larger circle represents the vocational labours of the man, the inner circle that of the woman. What the Creator prepared by the difference of endowment is realized in the indissoluble marital union of one man and one woman. The man becomes a father with paternal rights and duties which include the support of the family and, when necessary, their protection. On the other hand, the woman receives with motherhood a series of maternal duties. The social duties of the woman may, therefore, be designated as motherhood, just as it is the duty of man to be the representative of paternal authority. The completely developed feminine personality is thus to be found in the mother. Of course this development of motherhood in the woman is not limited to its physiological aspect. It is rather that this motherly sense and its activity can and should, as the highest development of noble womanhood, precede marriage and can exist without it. As a creature compounded of the spiritual and material, the human being has more than the destiny of continuing his race by generation and birth. It is still more incumbent on him to develop the spiritual and intellectual life by the training which is rightly called the second birth. This training, however, prospers as little without the specific motherly influence, as the bringing of a child into the world without the mother. The community, the nation, the state, however, are, as the necessary natural development of the family, the organized totality of the individual families. Consequently the motherly influence must also extend over these and must be kept within the bounds corresponding to the division of labour between man and woman. In these forms of social life also man must vigorously represent authority, while woman, called to the dignity of the mother, must supplement and aid the labour of the man by her unwearied collaboration. This truth is stated in homely fashion in the expressions "father of the country", "mother of the country". Hence man, as man, and woman, as woman, have to attain the common highest end of moral perfection, which extends beyond time by the fulfillment here below of social duties.

This social vocation, whether in marriage or outside of it, is therefore to be regarded by both as means to an end. (cf. I Tim., ii., 15). If these two reciprocal spheres of activity are taken in the narrowest sense they exclude each other, as the actual task assigned by nature to woman cannot be performed by man, while the reverse is also

true. At the same time there is the mixed domain of the earning of a livelihood in which both sexes work, although in so doing neither can deny his or her characteristic qualities. Here, however, nature forbids competition in the same field, as woman is more engrossed by her peculiar natural duties than man is by his. We may justly speak of "dualism in woman's life". But, the perpetuation and development in civilization of mankind always come first as natural duties. Consequently, according to physical law woman should be spared all industrial burdens which impair her most important duty in life. It remains to be seen how the dictates of nature have been carried out in human history.

History

Christ proved himself to be the central point in the history of mankind, and not least by the change his teaching effected in the position of woman. The testimony of history as to the position of woman in all pre-Christian and non-Christian peoples may be summed up as follows: No people has completely misjudged the natural position of woman, so that everywhere woman appears in greater or less subordination to man. No people, however, has done full justice to the personal dignity of woman; on the contrary, most peoples evidence an alarmingly low moral level by their degrading oppression of woman. Before the Gospel came into the world, man had virtually brought about for woman the condition thus described by Mary Wollstonecraft in the introduction to her "Vindication of the Rights of Woman": "In the government of the physical world it is observable that the female in point of strength is, in general, inferior to the male. This is the law of Nature; and it does not appear to be suspended or abrogated in favor of woman. A degree of physical superiority cannot, therefore, be denied--and it is a noble prerogative! But not is natural preeminence, men endeavor to sink us still lower, merely to render us alluring objects for a moment; and woman, intoxicated by the adoration which men, under the influence of their senses, pay them, do not seek to obtain a durable interest in their hearts, or to become the friends of the fellow-creatures who find amusement in their society."

Contrary to the fundamental principle of historical research, the Darwinian theory of evolution has also been applied to the original position of the sexes. A primitive hetaerism without any permanent marital relation is claimed to be the basis of the later evolution. The first stage of this development, however, is represented as "the right of the mother" or matriarchy, whereby not the man but the woman, it is claimed, represented, among the peoples, the legal head of the family.

However, the researches of Bachofen, Engels, Lubbock, Post, Lippert, Dargun, and others, who wished to produce proof for this hypothesis by generalizing individual phenomena, have been confuted even by strong Darwinians: "No community has been found where women alone could rule" (Starke, "Die primitive Familie", Leipzig, 1888,

69) Like the "primitive peoples" themselves, who have been especially quoted as proofs of this theory, such conditions show themselves to be degenerations. The authenticated reports of the conditions among the civilized races before Christ, as well as the assured results of investigation among "primitive peoples", on the contrary confirm the sentences quoted above. The farther back pre-Christian civilization is traced, the purer and more worthy of mankind are the marriage relations, and consequently the more advantageous the position of woman appears. The position of the sexes to each other among the degraded, so-called savage, races is, in its essential nature, the same as in civilized races. At the same time important although non-essential differences are not excluded, which arise from the differences in the national spirit which has developed in accordance with geographical conditions. Everywhere is to be found the social subordination of woman, everywhere is seen the division of work between the sexes, whereby the care for the primitive household falls to the woman. But contrary to the natural order, the paternal pre-eminence of the man has developed into unlimited tyranny, and the woman is debased to a slave and drudge without rights who gratifies the lusts of the man. Almost without exception polygamy has displaced monogamous marriage. The proofs of this are given in the reliable work of Wilhelm Schneider, "Die Naturvölker, Missverständnisse, Missdeutungen and Misshandlungen" (Paderborn, 1885).

Among the civilized nations of antiquity the Egyptians are distinguished by unusual respect for the female sex. Herodotus calls them (II, xxv) peculiar among the nations in this respect. On numerous inscriptions may be read as the title of the wife the expression "Nebtper" (ruler of the House). The tradition whereby woman belongs in the home is re-echoed from the hieroglyphics of the Egyptians down through the ages, and among all peoples. The same principle lies at the basis of the code of laws given by Hammurabi, which gives the social conditions in Babylon in the third millennium before Christ. The voluptuous cult, which spread from Babel-Assur and which through Phoenician influence poisoned the ancient world, had a particularly injurious effect upon the position of woman. There was no question of the personal rights of woman apart from man either here or among the Persians who were otherwise different in race and customs, even though at times women such as Parysatis, the wife of Darius II, attained great influence over the government of the country. Up to the present time woman's position has remained the same in the ancient civilized countries of eastern Asia, as in India, China, and Japan, or it has become even more degraded. A. Zimmermann, who was well acquainted with conditions in India, stated in 1908: "One of the most terrible abuses is the systematical degradation of the female sex which begins even in early youth" ("Historisch-politische Blätter, CXLII, 371). In 1907 99.3 per cent of the women of India could not read or write. Hindu widows, especially, are exposed

to contempt and ill-treatment. In China the position of woman, owing to the respect shown to mothers or widows, makes a better impression. But, at the same time, woman is branded as a second-rate human being from birth to death. The horrible custom of destroying new-born girls has consequently persisted up to the present time, as is proved by the reform decree issued in 1907 by the viceroy of that time, Juanschikai. According to this, some 70,000 girls are annually killed in the Province of Kiangsi. The binding of the feet is in reality only a means to keep the women at home. The absolute dependence of the wife upon the husband was also maintained as an unyielding custom in old Japan until the late reorganization, as is proved by the "Onna Daigaku" of Kaibara Ekken (1630).

The so-called classical nations of antiquity, the Greeks and Romans, show, as contrasted with the East, a decided dislike to polygamy, which legally at least was never recognized among them. This fortunate natural disposition affected favourably the position of woman without, however, securing for her the social position which naturally belongs to her. Even in the best period of the Greeks and Romans the woman only existed on account of the man. The Homeric descriptions of marital love and devotion show this in the most ideal form. In the later era of degeneration woman had almost entirely lost her influence upon public life, according to the sentence in the oration against the hetaera, "Neära, ascribed to Demosthenes: "We have hetaera for pleasure, concubines for the daily care of the body and wives for the production of full-blooded children and as reliable guardians in the house". The worship of the "virgin Athene" shows probably a dim perception on the part of the Greeks of the exalted position of the virgin independent of man, but led to no practical results favourable to woman. Almost the same is to be said as to the worship of Vesta and of the Vestal virgins among the Romans.

When Christianity appeared it found woman in the Roman world, and Rome itself was by no means an exception, in a position of deep moral degradation, and under the hard *patria potestas* of man. This authority had degenerated into tyranny almost more universally than in China. Originally Roman law, up to the time of the Antonines, limited the power of the father as regards the life and death of his children, and forbade him to murder the boys and the first-born girl. However, the freedom enjoyed by married woman during the empire had as sole result that divorce increased enormously and prostitution was considered a matter of course. After marriage had lost its religious character the women exceeded the men in licence, and thus lost even the influence they had possessed in the early, austere moral Rome (cf. Donaldson, "Woman, Her Position and Influence in Ancient Greece and Rome and among the Early Christians", 1907).

Among the Jews woman had not the position belonging to her from the beginning, as Christ said: "Moses by reason of the hardness of your heart permitted you to put away your wives: but from the beginning it was not so" (Matt., xix, 8). A complete reform was not to be expected from the preparatory and temporary importance of the Old Testament legislation. Allowance was made for the inclination of Orientals to polygamy by the allowing of additional wives. The one-sided *patria potestas* was mitigated; the feeling of reverence for the mother was rigidly impressed upon the children. The laws respecting this remind us of the laws of China. Notwithstanding the fame of individual women, as Miriam the sister of Moses, Deborah, and Judith, the Hebrew woman, in general, had no more rights than the women of other nations; marriage was her sole calling in life (cf. Zschokke, "Das Weib im alten Testamente", Vienna, 1883; and "Die biblischen Frauen des Alten Testamentes", Freiburg, 1882). The Semitic view of woman without the refining influence of Revelation is evidenced among the followers of Islam who trace back their descent to Ismael the son of Abraham. Consequently, the Koran with its many laws respecting women is a code that panders to the uncontrolled passions of Semitic man. Outside of marriage, which in the Mohammedan view is the duty of every woman, woman has neither value nor importance. But the conception of marriage as an intimate union so as to constitute one moral person, has always been foreign to Mohammedanism (cf. Devas, "Studies of Family Life. A Contribution to Social Science", London, 1886).

The history of the pre-Christian era mentions no far-reaching and successful revolt of women to obtain the improvement of their position. Custom finally became an established habit, and found its strongest defenders among the women themselves. It was the teaching of Christ which first brought freedom to the female sex, wherever this teaching was seriously taken as the guide of life. His words applied as well to women: "Seek ye first the kingdom of God and his justice, and all these things shall be added unto you" (Luke, xii, 31). He restored the original life-long monogamous marriage, raised it to the dignity of a sacrament, and also improved the position for woman in purely earthly matters. The most complete personal duality is expressed in the Apostolic exhortation: "For as many of you as have been baptized in Christ have put on Christ . . . there is neither male nor female. For ye are all one in Christ Jesus" (Gal., iii, 27-28; cf. I Cor., xi, 11). Most decisive, however, for the social position of woman was the teaching of Christ on the nobility of freely chosen virginity as contrasted with marriage, to the embracing of which the chosen of both sexes are invited (Matt., xix, 29). According to Paul (I Cor., vii, 25-40) the virgins and widows do well if they persist in the intention not to marry in order to serve God with undivided mind; they indeed do better than those who must divide their attention between care for the husband and the service of God. By this doctrine the female sex in particular was placed in an

independence of man unthought of before. It granted the unmarried woman value and importance without man; and what is more the virgin who renounces marriage from religious motives, acquires precedence above the married woman and enlarges the circle of her motherly influence upon society. Elisabeth Gnauck-Kühne says truly: "The esteem of virginity is the true emancipation of woman in the literal sense".

This elevation of woman centres in Mary the Mother of Jesus, the purest virginity and motherhood, both tender and strong, united in wonderful sublimity. The history of the Catholic Church bears constant testimony of this position of Mary in the history of civilization. The respect for woman rises and falls with the veneration of the Virgin Mother of God. Consequently for art also the Virgin has become the highest representation of the most noble womanhood. This extraordinary elevation of woman in Mary by Christ is in sharp contrast to the extraordinary degradation of female dignity before Christianity. In the renewing of all things in Christ (Eph., I, 10) the restoration of order must be most thorough at that point where the most extreme disorder had prevailed.

However, this emancipation of woman rests upon the same principles which Christ used in His great renewal of nature by grace. Nature was not set aside nor destroyed, but was healed and illumined. Consequently the radical natural differences between man and woman and their separate vocations continue to exist. In Christianized society also man was to act as the lawful representative of authority, and the lawful defender of rights, in the family, just as in the civil, national, and religious community. Therefore, the social position of woman remains in Christianity that of subordination to man, wherever the two sexes by necessity find themselves obliged to supplement each other in common activity. The woman develops her authority, founded in human dignity, in connection with, and subordinate to, the man in domestic society as the mistress of the home. At the same time the indispensable motherly influence extends from the home over the development of law and custom. While, however, man is called to share directly in the affairs of the state, female influence can be ordinarily exerted upon such matters only indirectly. Consequently, it is only in exceptional cases that in Christian kingdoms the direct sovereignty is placed in the hands of woman, as is shown by the women who have ascended thrones. In the Church this exception is excluded, so far as it refers to the clerical office. The same Apostle who so energetically maintained the personal independence of woman, forbids to women authoritative speech in the religious assemblies and the supremacy over man (I Tim., ii, 11, 12). Nevertheless, personalities like Pulcheria, Hildegarde, Catherine of Siena, and Teresa of Jesus show how great the extraordinary, indirect influence of woman can be in the domain of the Church.

From the days of the Apostles, Christianity has never failed to seek and to defend the emancipation of woman in the meaning of its Founder. It must be acknowledged that human passions have frequently prevented the bringing about of a condition fully

corresponding with the ideals. The Christian, indissoluble, sacramental marriage, in which the husband is to copy in respect to the wife the love of Christ for the Church (Eph., v, 25), was steadily defended for the benefit of the woman against the lawlessness of the ruling class. On this point St. Jerome presents the same conception of morals in contrast to heathen immorality in words that have become classic: "The laws of the emperor are to one effect, those of Christ to another . . . in the former the restraints upon impurity are left loose for men . . . among us Christians, on the contrary, the belief is: What is not permitted to women is also forbidden to men, and the same service (that of God) is also judged by the same standard" ("Ep. lxxvii, ad Ocean.", P.L., XXII, 691). The admiring exclamation of the heathen: "What women there are among the Christians!" is the most eloquent testimony to the power of Christianity. The great Church Fathers praise not only their mothers and sisters, but speak of Christian women in general in the same terms of respect as the Gospel. On the other hand, the alleged contempt of the Church Fathers for women is a legend that is kept alive by the lack of knowledge of the Fathers (cf. Mausbach, "Altchristliche und moderne Gedanken über Frauenberuf", 7th ed., München-Gladbach, 1910, 5 sq.).

From the beginning up to the present time, the Christian doctrine of voluntary religious virginity has produced innumerable hosts of virgins dedicated to God who unite their love of God with heroic love of their neighbours, and who perform silent deeds of heroism in the nursing of the sick, in the care of the poor, and in the work of education. The modern era since the French Revolution has far exceeded the earlier centuries in congregations of women for all branches of Christian charity and for the alleviation of all forms of misery. Consequently Christianity has opened to woman the greatest possibilities for development. Mary, the sister of Lazarus, who sat as a disciple at the feet of Jesus, has become a model for the training of woman in Christianity. The study of the Scriptures, which was equally customary both in the East and the West among educated women under the guidance of the Church, remained during the entire Middle Ages the inheritance of the convents. Thus, next to the clergy, the women in the medieval era were more the representatives of learning and education than the men.

The industrial work of women kept pace with the development of civilization. When the guilds arose at the time of the founding of the cities women were not excluded from them. Any idea of the parity of the sexes in this domain was excluded by the consideration of the first natural task of woman. Among indigent women Christianity found that the widows were those most in need of aid. From the days of the Apostles, the Church made special provision for widows (Acts, vi, 1; I Tim., v, 3 sq.), a provision that was one of the chief duties of the bishop. To the Apostolic era also dates back the institution called the viduate, in which widows of proved virtue laboured as Apostolic

assistants in the Church along with the virgins. In the course of time female orders assumed this work, which is carried on most successfully in the missions for heathens. As, during the conversion to Christianity of the German tribes, Anglo-Saxon women aided St. Boniface, the Apostle of Germany, so today permanent success in the missionary countries cannot be attained with the help of virgins consecrated to God. At the end of the nineteenth century some 52,000 sisters, among whom were 10,000 native women, worked in the missions (Louvet, "Les missions cath. du XIXe siècle", 2nd ed., Paris, 1898).

The Modern Woman Question

It follows from what has been said that the social position of woman is, from the Christian point of view, only imperfectly set forth in the expression "Woman belongs at home". On the contrary, her peculiar influence is to extend from the home over State and Church. This was maintained at the beginning of the modern era by the Spanish Humanist, Louis Vives, in his work "De institutione feminae christiana" (1523); and was brought out still more emphatically, in terms corresponding to the needs of his day, by Bishop Fénelon in his pioneerwork "Education des filles" (1687). This Christian emancipation of woman is, however, necessarily checked as soon as its fundamental principles are attacked. These principles consist, on the one hand, of the sacramental dignity of the indissoluble marriage between one pair, and in religious, voluntarily chosen virginity, both of which spring from the Christian teaching that man's true home is in a world beyond the grave and that the same sublime aim is appointed for woman as for man. The other fundamental principle consists of the firm adhesion to the natural organic intimate connection of the sexes.

As far back as Christian antiquity the Manichaean attacks on the sacredness of marriage as those of Jovinian and Vigilantius, which sought to undermine the reverence for virginity, were refuted by Augustine and Jerome. Luther's attack upon religious celibacy and against the sacramental character and indissolubility of marriage, worked permanent injury. The chief result was that woman was again brought into absolute dependence upon man, and the way was made ready for divorce, the results of which press far more heavily upon woman than upon man. After this the natural basis of society and the natural position of woman and the family were shaken to such extent by the French Revolution that the germ of the modern woman's suffrage movement is to be sought there. The anti-Christian ideas of the seventeenth and eighteenth centuries led to a complete break with the medieval Christian conception of society and the state. It was no longer the family or the social principle that was regarded as the basis of the state, but the individual or the ego. Montesquieu, the "father of constitutionalism", made this theory the basis of his "L'Esprit des lois" (1784), and it was sanctioned in the French "Rights of Man". It was entirely logical that Olympe de Gouges

(d. 1793) and the "citizeness" Fontenay, supported by the Marquis de Condorcet, demanded the unconditional political equality of women with men, or "the rights of women". According to these claims every human being has, as a human being, the same human rights; women, as human beings, claim like men with absolute right the same participation in parliament and admission to all public offices. As soon as the leading proposition, though it contradicts nature which knows no sexless human being, is conceded, this corollary must be accepted. Father von Holtzendorff says truly: "Whoever wishes to oppose the right of women to vote must place the principle of parliamentary representation upon another basis . . . as soon as the right to vote is connected only with the individual nature of man, the distinction of sex becomes of no consequence" ("Die Stellung der Frauen", 2nd ed., Hamburg, 1892, 41).

The men of the French Revolution forcibly suppressed the claim of the women to the rights of men, but in so doing condemned their own principle, which was the basis of the demand of the women. The conception of society as composed of individual atoms leads necessarily to the radical emancipation of women, which is sought at the present time by the German Social Democrats and a section of the women of the middle class. In her book, published in 1792, Mary Wollstonecraft advanced this demand with a certain reserve, while John Stuart Mill in his "The Subjection of Women" (1869) championed the unnatural position of women unconditionally. At the present time the English suffragettes have made a practical application of Mill's views as the standard work of radical emancipation (cf. "A Reply to John Stuart Mill on the Subjection of Women", Philadelphia, 1870).

The introduction of these ideas into practical life was promoted chiefly by the change in economic conditions, particularly as this change was used to the detriment of the people by the tendency of an egotistical Liberalism. From the beginning of the nineteenth century manufacturing by machinery changed the sphere of woman's labour and of her industries. In manufacturing countries woman can and must buy many things which were formerly produced as a matter of course by female domestic labour. Thus the traditional household labours of woman became limited, especially in the middle class. The necessity arose for many daughters of families to seek work and profit outside of the home. On the other hand, the unlimited freedom of commerce and trade furnished the opportunity of gaining control of the cheap labour of women to make it serve machinery and the covetousness of the great manufacturers. While this change relieved the woman who still sat at home, it laid upon the homeless working-woman intolerable burdens, injurious alike to soul and body. On account of smaller wages women were used for the work of men and were driven into competition with men. The system of the cheap hand led not only to a certain slavery of woman,

but, in union with the religious indifference that concerned itself only with mundane things, it injured the basis of society, the family.

In this way the actual modern woman question, which is connected at the same time with the livelihood, education, and legal position of woman, arose. In most European countries, on account of the emigration arising from the conditions of traffic and occupation, the number of women exceeds that of men to a considerable degree; for instance in Germany in 1911 there were 900,000 more women than men. In addition, the difficulties of existence cause a considerable number of men to marry at all or too late to found a family, while many are kept from marriage by an unchristian morality. The number of unmarried women, or of women who notwithstanding marriage are not cared for and who are double burdened by the cares of the home and of earning a livelihood, is therefore constantly increasing. The last census of occupations in Germany, that of 1907, gave 8,243,498 women who were earning a living in the principal occupations; this number shows an increase of 3,000,000 over 1895. The statistics of the other countries give proportionate results, although there are hardly two countries in which the woman movement has had exactly the same development. The southern countries of Europe are coming only gradually under the influence of the movement. A regulation of this movement was and is one of the positive necessities of the times. The methodical and energetic attempts to accomplish this date from the year 1848, although the beginnings in England and North America go back much farther. The attempts to solve the woman question varied with the point of view. Three main parties may be distinguished in the movement for the emancipation of women in the present day:

- the radical emancipation which is divided into a middle-class and a Social-Democratic party;
- the moderate or interconfessional conciliatory party;
- the Christian party.

The radical, middle-class emancipation party regards the Women's Rights Convention held 14 July, 1848, at Seneca Falls, U.S., as the date of its birth. Complete parity of the sexes in every direction with contempt for former tradition is the aim of this party. Unlimited participation in the administration of the country, or the right to the political vote, therefore, holds the first place in its efforts. The questions of education and livelihood are made to depend upon the right to vote. This effort reached its height in the founding of the "International Council of Women", from which sprang in 1904 at Berlin the "International Confederation for Woman's Suffrage". "The Woman's

Bible", by Mrs. Stanton, seeks to bring this party into harmony with the Bible. The party has attained its end in the United States in the states of Wyoming (1869), Colorado, Utah (1895), Idaho (1896, South Dakota (1909), and Washington (1910), and also in South Australia, New Zealand (1895), and in Finland. In Norway there has been a limited suffrage for women since 1907. In 1911 Iceland, Denmark, Victoria, California, and Portugal decided to introduce it. In England the suffragists and the suffragettes are battling over it (cf. Mrs. Fawcett, "Women's Suffrage. A short History of a Great Movement", London, 1912.)

In Germany in 1847 Luise Otto-Peters (1819-1895) headed the movement, in order at first with generous courage to aid the suffering women of the working classes. Her efforts resulted in the "Allgemeiner deutscher Frauenverein" (General Union of German Women), which was founded in 1865, and from which in 1899 the radical "Fortschrittlicher Frauenverein" (Progressive Women's Union) separated, while the Luise Otto party remained moderately liberal. In France it was not until the Third Republic that an actual women's movement arose, a radical section of which, "La Fronde", took part in the first revolution. From the start the Social-Democratic party incorporated in its programme the "equality of all rights". Consequently the Social-Democratic women regard themselves as forming one body with the men of their party, while, on the other hand, they keep contemptuously separated from the radical movement among the middle-class women. August Bebel's book, "Die Frau und der Sozialismus", went through fifty editions in the period 1879-1910, and was translated into fourteen languages. In this work the position of woman in the Socialistic state of the future is described. In general the radical middle-class emancipation agrees with the Social-Democratic both in the political and in the ethical spheres. A proof of this is furnished by the works of the Swedish writer Ellen Key, especially by her book "Über Ehe und Liebe", which enjoy a very large circulation throughout the world.

This tendency is not compatible with the standard of nature and of the Gospel. It is, however, a logical consequence of the one-sided principle of individualism which, without regard for God, came into vogue in what is called the "Rights of Man". If woman is to submit to the laws, the authoritative determination of which is assigned to man, she has the right to demand a guarantee that man as legislator will not misuse his right. This essential guarantee, however, is only to be found in the unchangeable authoritative rule of Divine justice that binds man's conscience. This guarantee is given to women in every form of government that is based on Christianity. On the contrary, the proclamation of the "Rights of Man" without regard to God set aside this guarantee and opposed man to woman as the absolute master. Woman's resistance to this was and is an instinctive impulse of moral self-preservation. The "autonomous morality" of Kant and Hegel's state has made justice dependent upon men or man alone far more

than the French "Rights of Man". The relativity and mutability of right and morality have been made a fundamental principle in dechristianized society. "The principles of morals, religion, and law are only what they are, so long as they are universally recognized. Should the conscience of the sum total of individuals reject some of these principles and feel itself bound by other principles, then a change has taken place in morals, law, and religion" (Oppenheim, "Das Gewissen". Basle, 1898, 47).

Woman is defenceless against such teaching when only men are understood under the "totality of individuals". Up to now as a matter of fact only men have been eligible in legislative bodies. On the basis of the so-called autonomous morality, however, woman cannot be denied the right to claim this autonomy for herself. Christianity, which lays the obligation upon both sexes to observe an unalterable and like morality, is powerless to give protection to woman in a dechristianized and churchless country. Consequently, it is only by the restoration of Christianity in society that the rightful and natural relations of man and woman can be once more restored. This Christian reform of society, however, cannot be expected from the radical woman movement, notwithstanding its valuable services for social reform. Besides what has been said, the "movement for the protection of the mother" promoted by it contradicts completely the Christian conception of marriage. (Cf. Mausbach, "Der christliche Familiengedanke im Gegensatz zur modernen Mutterschutzbewegung", Munster, 1908).

The moderate liberal woman movement is also incapable of bringing about a thorough improvement of the situation, such as the times demand. It certainly attained great results in its efforts for the economic elevation of woman, for the reform of the education of women, and for the protection of morality in the first half of the nineteenth century, and has attained still more since 1848 in England, North America, and Germany. The names of Jessie Boucherett, Elizabeth Fry, Mary Carpenter, Florence Nightingale, Lady Aberdeen, Mrs. Paterson, Octavia Hill, Elizabeth Blackwell, Josephine Butler, and others in England, and the names of Luise Otto, Luise Büchner, Maria Calm, Jeannette Schwerin, Auguste Schmidt, Helene Lange, Katharina Scheven, etc., in Germany, are always mentioned with grateful respect. At the same time this party is liable to uncertain wavering on account of the lack of fixed principles and clearly discerned aims. While these women's societies call themselves expressly interdenominational they renounce the motive power of religious conviction and seek exclusively the temporal prosperity of women. Such a setting aside of the highest interests is scarcely compatible with the words of Christ, "Seek ye therefore first the kingdom of God, and his justice, and all these things shall be added unto you" (Matt., vi, 33), and is all the more incompatible with the teaching of Christ on marriage and virginity, which is of the highest importance, particularly for the well-being of woman. A successful solution of the woman question is only to be expected from a reorganization

of modern conditions in accordance with the principles of Christianity, as Anna Jameson (1797-1860) has set forth in the works, "Sisters of Charity" (London, 1855) and "Communion of Labour" (London, 1856). The effort has also frequently been made by Protestants in England, America, and Germany to meet the difficulty in imitation of Catholic charitable work: thus in 1836 the German "Institute of Deaconesses" was established.

In Germany the first attempt to attain a solution of the woman question by orthodox Protestants was made by Elizabeth Gnauck-Kühne, who founded the "Evangelisch-sozialer Kongress" (Protestant Social Congress). At the present day this movement has been represented since 1899 by the "Deutsch-evangelisches Frauenbund" and by the women's society of the "Freie kirchlich-soziale Konferenz". A profound Christian influence upon the woman movement is not to be looked for, however, from these sources. Protestantism is, it must be said, a mutilated kind of Christianity, in which woman is especially injured by the abrogation of the dedication of virginity to God. Still worse is the effect of the constantly increasing decay of Protestantism, in which the denial of the Divinity of Christ constantly gains strength. For this reason the Protestant Church party in the agitation for women's right in predominantly Protestant countries is much smaller than the liberal and radical parties.

Catholic women were the last to take up the agitation. The main reason for this is the impregnability of Catholic principles. Owing to this woman's suffrage did not become a burning question as quickly in the purely Catholic countries as in Protestant and religiously mixed ones. The convents, the indissolubility of sacramental marriage, and the customary charitable works kept in check many difficulties. However, on account of the international character of the movement and the causes which produced it, Catholic women would not finally hold back from co-operation in solving the question, especially as the attack of revolutionary ideas on the Church today is most severe in Catholic countries. For a long time Christian charity has not sufficed for the needs of the present day. Social aid must supplement legal ordinances for the justifiable demands of women. For this purpose the "ligues des femmes chrétiennes" were formed in Belgium in 1893; in France "Le féminisme chrétien" and "L'action sociale des femmes" were founded in 1895, after the international review, "La femme contemporaine", had been established in 1893. In Germany the "Katholisches Frauenbund" was founded in 1904, and the "Katholische Reichs-Frauenorganisation" was established in Austria in 1907, while a woman's society was established in Italy in 1909. In 1910 the "Katholisches Frauen-Weltbund" (International Association of Catholic Women) was established at Brussels on the insistent urging of the "Ligue patriotique des Françaises". Thus an international Catholic women's association exists today, in opposition to the international liberal women's association and the international Social-Democratic union. The

Catholic society competes with these others in seeking to bring about a social reform for the benefit of women in accordance with the principles of the Church.

Apart from the light thrown by Catholic principles on this subject, the solution of the tasks of this Catholic association is made easier by the experience already acquired in the woman's movement. As regards the first branch of the woman question, feminine industry, the opinion has constantly gained ground that "notwithstanding all changes in economic and social life the general and foremost vocation of women remains that of the wife and mother, and it is therefore above all necessary to make the female sex capable and efficient for the duties arising from this calling" (Pierstorff). How far the opportunities for woman's work for a livelihood are to be enlarged should be made to depend upon the question whether the respective work injures or does not injure the physical provision for motherhood. The earnest warnings of physicians agree in this point with the remonstrances of statesmen who are anxious for national prosperity. Thus the speech of the former president, Roosevelt, at the national congress of American mothers at Washington in 1895 met with approval throughout the world. (Cf. Max von Gruber, "Mädchenziehung und Rassenhygiene", Munich, 1910). On the other hand, Catholic Christianity in particular, in accordance with its traditions, demands from the woman of the present day the most intense interest in working-women of all classes, especially interest in those who work in factories or carry on industrial work at home. The achievements of the North American "Working Women's Protective Union" and of the English "National Union for improving the education of all women of all classes" is given to this aim by the "Verband katholischer Vereine erwerbstätiger Frauen und Mädchen" (United Catholic Societies of Working-Women, Married and Unmarried) of Berlin.

The second branch of the woman question, which of necessity follows directly after that of gaining a livelihood, is that of a suitable education. The Catholic Church places here no barriers that have not already been established by nature. Fénelon expresses this necessary limitation thus: "The learning of women like that of men must be limited to the study of those things which belong to their calling; The difference in their activities must also give a different direction to their studies." The entrance of women as students in the universities, which has of late years spread in all countries, is to be judged according to these principles. Far from obstructing such a course in itself, Catholics encourage it. This has led in Germany to the founding of the "Hildegardisverein" for the aid of Catholic women students of higher branches of learning. Moreover, nature also shows here her undeniable regulating power. There is no need to fear the overcrowding of the academic professions by women.

In the medical calling, which next to teaching is the first to be considered in discussing the professions of women, there are at the present time in Germany about 100

women to 30,000 men. For the studious woman as for others who earn a livelihood the academic calling is only a temporary position. The sexes can never be on an equality as regards studies pursued at a university.

The third branch of the woman question, the social legal position of woman, can, as shown from what has been said, only be decided by Catholics in accordance with the organic conception of society, but not in accordance with disintegrating individualism. Therefore the political activity of man is and remains different from that of woman, as has been shown above. It is difficult to unite the direct participation of woman in the political and parliamentary life of the present time with her predominate duty as a mother. If it should be desired to exclude married women or to grant women only the actual vote, the equality sought for would not be attained. On the other hand, the indirect influence of women, which in a well-ordered state makes for the stability of the moral order, would suffer severe injury by political equality. The compromises in favour of the direct participation of women in political life which have of late been proposed and sought here and there by Catholics can be regarded, therefore, only as half-measures. The opposition expressed by many women to the introduction of woman's suffrage, as for instance, the New York State Association opposed to Woman "Suffrage", should be regarded by Catholics as, at least, the voice of common sense. Where the right of women to vote is insisted upon by the majority, the Catholic women will know how to make use of it.

On the other hand modern times demand more than ever the direct participation of woman in public life at those points where she should represent the special interests of women on account of her motherly influence or of her industrial independence. Thus female officials are necessary in the women's departments of factories, official labour bureaux, hospitals, and prisons. Experience proves that female officials are also required for the protection of female honour. The legal question here becomes a question of morals which under the name of "MädchenSchutz" (protection of girls) has been actively promoted by women. Indeed much more must be done for it. In 1897 there was founded at Fribourg, Switzerland, the "Association catholique internationale des oeuvres de protection de la jeune fille", the labours of which extend to all parts of the world. Thus considered the woman movement is a gratifying sign of the times which indicates the return to a healthy state of social conditions.

WOMEN IN ENGLISH-SPEAKING COUNTRIES

The movement for what has been called the emancipation of women, which has been so marked a feature of the nineteenth and twentieth centuries, has made a deeper impression on the English-speaking countries than on any other. The outcry against the unjust oppression of women by manmade laws has grown ever stronger and stronger, though it must be confessed that every successive improvement in the position

of women has also been brought about by manmade laws. The various disabilities imposed by law or custom on women have gradually been removed by legislation, until, at present, in English-speaking countries scarcely anything is needed to woman's perfect equality to man before the law, except the right of suffrage in its widest extent and the admission of women to all national and municipal magistracies, which later will be the inevitable outcome of the removal of all restriction on suffrage. That the gradual amelioration of the legal status of women during the course of ages has removed many crying injustices can not be doubted. Whether, however, all the changes made in their favour will prove unmixed benefits to themselves and to the race, and especially whether the removal of all restriction on suffrage and the admission of women to legislative, judicial, and executive positions of public trust, will be a desirable change in the body politic is doubted by many of all shades of religious belief or no belief, and probably by the majority of Catholics in official and unofficial positions.

In English the word "woman" is a contraction of "wife-man". This indicates that from the earliest times the Anglo-Saxons believed that woman's proper sphere was the domestic one. The earliest English laws treat consequently for the most part of the marriage relation. The so-called "bride-purchase" was not a transaction in barter, but was a contribution on the part of the husband for acquiring part of the family property; while the "morning-gift" was a settlement made on the bride. This custom, though in use among the ancient Teutonic nations, is also found in old Roman laws embodied in Justinian's redaction. King Ethelbert enacted that if a man seduced a wife from her husband the seducer must pay the expenses of the husband's second marriage. As to property, King Ina's code recognizes the wife's claim to one-third of her husband's possessions. At a later date King Edmund I decreed that by prenuptial contract the wife could acquire a right to one-half of the family property, and, if after her husband's decease she remained unmarried, she was entitled to all his possessions, provided children had been born of the union. Monogamy was strictly enforced, and the laws of King Canute decreed as a penalty for adultery that the erring wife's nose and ears should be cut off. Various laws were enacted for the protection of female slaves. After the Norman conquest, even more than in Anglo-Saxon times, the tendency of legislation was rather to legislate around husband and wife than between them. The consequence was that the husband as predominant partner acquired greater rights over his wife's property and person. On his death, however, she always reclaimed her dower-rights and some portion of his possessions. At the same period the Scottish laws regulated, according to the woman's rank, a certain sum to be paid to the lord of a manor on the marriage of a tenant's daughter. We may remark here that the infamous *droit du seigneur* (the right of the lord to pass the first night with his tenant's bride) is a fable of modern date, of which not the slightest trace is found in the laws, histories, or literature

of any civilized country of Europe. The statute law of England dispenses women from all civil duties that are proper to men, such as rendering homage, holding military fiefs, making oath of allegiance, accepting sheriff's service, and the obligations flowing therefrom. They could, however, receive homage and be made constables of a village or castle if such were not one of the national defences. At fourteen, if an heiress, a woman might have livery of land. If she made a will, it was revoked by her subsequent marriage. A woman could not be a witness in court as to a man's status, and she could not accuse a man of murder except in the case that the victim was her husband. Benefit of clergy was not allowed to women in pre-Reformation times, as the idea was repugnant to Catholic feeling. Women might work at trades, and King Edward III, when restricting workmen to the use of one handicraft, excepted women from this rule. There were many early regulations as to the dress of women, the general prescription being that they should be garbed according to the rank of their husbands.

The legislation of the nineteenth and twentieth centuries has done much to relieve women from the disabilities imposed upon them by the old statute law. The principle of modern English law is the reverse of that obtaining in ancient times, for now the tendency of all enactments is to legislate between husband and wife rather than around them. The consequence is that difference of sex is practically disregarded in modern English law-making, except in a few instances concerning marriage and children. In other matters the only disabilities of women that remain in English law are that they can not succeed to an intestate when male heirs exist and that they are deprived of parliamentary suffrage. In some respects women are in advance of men: thus, women may validly marry at twelve and they may make a valid property settlement at seventeen with the approval of the Court, the respective ages for a male being fourteen and twenty. As to the custody of children, the law may now allow to the mother the full control of the offspring and the right of appointing the guardian or of acting as guardian herself, at least while the child is under sixteen years of age. In the case of illegitimate children, while the mother is liable for their support, yet she can obtain an affiliation order from the Court and bind the putative father. Adultery is no crime by English law, and a wife can not obtain a divorce from her husband on such sole ground, though he may from her. Neither adultery nor fornication is punished by English law. Judicial separation and maintenance in the case of desertion are remedies for the wife which have been greatly extended and favoured by late legislation. Action for breach of promise to marry may be brought by either the man or woman, and the promise need not be in writing. In the United States the acts of Congress deal very sparingly with women. The various departments of the Government employ female clerks and appoint hospital matrons and nurses for the army. Wives of citizens of the United States, who might be lawfully naturalized themselves, have the rights of citizens. The questions of property,

franchise, and divorce have been dealt with by the several state legislatures and there is no uniformity, but the main provisions under these heads will be noticed later.

While in ancient times women were occupied in the industries to some extent, yet these industries were generally of a nature that could be exercised within the home. The advent of the changed industrial conditions of the nineteenth century forced women into other employments in order to obtain the necessities of life. The advance was, however, very slow. In 1840 Harriet Martineau stated that there were only seven occupations for women in the United States: needlework, typesetting, bookbinding, cotton factories, household service, keeping boarders, and teaching. All of these occupations were miserably recompensed, but by degrees the better-paid employments in other fields were opened to women. Of the learned professions, medicine was the first to confer its degrees on female practitioners. The earliest diploma in medicine was conferred in 1849 in New York State, and its recipient was licensed in England in 1859, though the latter country did not bestow a medical diploma on a woman until 1865. At the end of the nineteenth century there were some sixty medical colleges in the United States and Canada that educated women. At present females are admitted freely to medical societies and allowed to join in consultation with male physicians. In 1908 the Royal College of Physicians and Surgeons in England admitted women to their diploma and fellowship. In the admission to the profession of law the path of women has been made more difficult. So late as 1903 the British House of Lords decided against the admission of women to the English Bar, though some are employed as solicitors. In the United States, the State of Iowa allowed women to act as legal practitioners in 1869, and many of the states, especially in the Western part of the country, now admit them to practice. In Canada the Ontario Law Society decided to admit women to act as barristers in 1896. As to the third of the learned professions, divinity, it is obvious that the sacred ministry is closed to Catholic women by Divine ordinance. The sects, however, began to admit women ministers as early as 1853 in the United States and, at present, the Unitarians, Congregationalists, United Brethren, Universalists, Methodist Protestants, Free Methodists, Christian (Campbellites), Baptists, and Free Baptists have ordained women to their ministry. In 1910 the Free Christian denomination in England appointed a female minister. Journalism and the arts are also open to women, and they have achieved considerable distinction in those fields.

As to the property, widows and spinsters have equal rights with men according to English law. A married woman may acquire, hold, and dispose of real and personal property as her own separate property. For her contracts her own separate property is held liable, as also for antenuptial debts and agreements, unless a contrary liability can be proved. The husband can not make any settlement regarding his wife's property unless she confirms it. If a married woman has separate property she is liable for the

support of parents, grandparents, children, and even husband, if they have no other means of subsistence. Laws have also been made to protect a wife's property from her husband's influence. In most states of the American Union the proprietary emancipation of women has gone on steadily as in Great Britain. Connecticut, in 1809, was the first state to empower married women to make a will, and New York, in 1848, secured to married women the control of their separate property. These two states have been followed by nearly all the others in granting both privileges. Divorce laws differ in the various states, but the equality of women with men as to grounds for divorce is generally recognized, and alimony is usually accorded to the wife in generous measure. In the practical application of civil and criminal law in the United States, the tendency of late years has been to favour women more than men.

In no field of public endeavour has there raged a fiercer conflict over women's rights than in that of suffrage. In ancient times, even, women had acted as queens regnant, and abbesses had discharged territorial duties, but the general idea of women mixing in public life was discountenanced. The latter half of the nineteenth century saw the movement for the political enfranchisement of women become a serious factor in the body politic. The idea was not entirely new for Margaret Brent, a Catholic, had claimed the right to sit in the Maryland Assembly in 1647, and in revolutionary times, Mercy Otis Warren, Abigail Adams, and others had demanded direct representation for women taxpayers. In England, Mary Astell in 1697 and Mary Wollstonecraft in 1790 were champions of women's rights. After the middle of the nineteenth century women's suffrage societies were formed in Great Britain and the United States, with the result that many men were converted to the idea of women exercising the right of ballot. At the present time women can vote for all officers in Great Britain, except for members of Parliament. They have full suffrage in New Zealand and Australia, and municipal suffrage in most provinces of British North America. In the United States women have equal suffrage with men in six States: Wyoming, Colorado, Utah, Idaho, Washington, and California (1912). Several other states have adopted women suffrage amendments for submission to the people. Thirty states have conferred school suffrage on women, and five grant tax-paying women the right to vote on questions of taxation. There is a National American Women Suffrage Association with headquarters in New York City, but it must also be noted that in 1912 a national association of women opposed to female suffrage was also organized in that city.

The Catholic Church has made no doctrinal pronouncement on the question of women's rights in the present meaning of that term. It has from the beginning vindicated the dignity of womanhood and declared that in spiritual matters man and woman are equal, according to the words of St. Paul: "There is neither male nor female, for you are all one in Christ Jesus" ([Galatians 3:28](#)). The Church has also jealously guarded

the sanctity of home life, now so disastrously infringed by the divorce evil, and while upholding the husband's headship of the family has also vindicated the position of the mother and wife in the household. Where family rights and duties and womanly dignity are not violated in other fields of action, the Church opposes no barrier to woman's progress. As a rule, however, the opinions of the majority of Catholics seem to hold the political activity of women in disfavour. In England some distinguished prelates, among them Cardinal Vaughan, favoured women's suffrage. His Eminence declared: "I believe that the extension of the parliamentary franchise to women upon the same conditions as it is held by men would be a just and beneficial measure, tending to raise rather than to lower the course of national legislation." Cardinal Moran in Australia held similar views: "What does voting mean to a woman? As a mother, she has a special interest in the legislation of her country, for upon it depends the welfare of her children The woman who thinks she is making herself unwomanly by voting is a silly creature" (Quotations from "The Tablet", London, 16 May, 1912). The bishops of Ireland seem rather to favour women's abstention from politics, and this is also the attitude of most American bishops, at least as far as public pronouncements are concerned. Several American prelates have, however, expressed themselves in favour of woman suffrage at least in municipal affairs. In Great Britain a Catholic Women's Suffrage Society was organized in 1912.

Whatever may be the attitude of the prelates of the Church towards the political rights of women, there can be no doubt of their earnest co-operation in all movements for the higher education of women and their social amelioration. In addition to the academies and colleges of the teaching sisterhoods, houses for educating Catholic women in university branches have organized at the Catholic University at Washington and at Cambridge University in England. Women are multiplying in the learned professions in all English-speaking countries. In work along social lines the Church has always had its sisterhoods, whose self-sacrifice and devotion in the cause of the poor and suffering have been beyond all praise. Of late, Catholic women of every station in life have awakened to the great possibilities for good in social work of every kind, and associations such as the Catholic Women's League in England and The United Irish-women in Ireland have been formed. In the United States a movement which has the active support of the Archbishop of Milwaukee and the approval of the former papal delegate, Cardinal Falconio, is on foot (1912) to form a national federation of Catholic women's associations.

WOMEN IN CANON LAW

I. Ulpian (Dig., I, 16, 195) gives a celebrated rule of law which most canonists have embodied in their works: "Women are ineligible to all civil and public offices, and therefore they cannot be judges, nor hold a magistracy, nor act as lawyers, judicial in-

tercessors, or procurators." Public offices are those in which public authority is exercised; civil offices, those connected otherwise with municipal affairs. The reason given by canonists for this prohibition is not the levity, weakness, or fragility of the female sex, but the preservation of the modesty and dignity peculiar to woman. For the preservation of this same modesty many regulations have been made concerning female apparel. Thus, women may not use male attire, a prohibition already found in the Old Testament (Deut., xxii, 15). The canons add, however, that the assumption of the dress of men would be excusable in a case of necessity (Can. *Quoniam* 1, qu. 7), which seems to apply to the well-known case of Bl. Joan of Arc. Women must abstain from all ornament that is unbecoming in a moral sense (Can. *Qui viderit*, 13, c. 42, qu. 5). Some of the ancient Fathers are very severe on the practice of using pigments for the face. St. Cyprian (De habitu virg.) says: "Not only virgins and widows, but married women also, should, I think, be admonished not to disfigure the work and creature of God by using a yellow colour or black powder or rough, nor corrupt the natural lineaments with any lotion whatsoever." It is not held, however, to be a grave transgression when women ornament and paint themselves out of levity or vanity (St. Thomas, II-II:169:2), and if it is done with an upright intention and according to the custom of one's country or one's station in life, it is entirely unblameworthy (*ibid.*, a. 1). Authors are even so benevolent as to say that if the face is painted to hide some natural defect, it is entirely licit, owing to the words of St. Paul (I Cor., xii, 12, 14): "And such as we think to be the less honourable members of the body, about these we put more abundant honour; and those that are our uncomely parts have more abundant comeliness. But our comely parts have no need." Canonists strictly condemn female clothing that does not cover the person properly (Pignatelli, III, consult. 35), and Innocent XI issued an edict against this abuse in the city of Rome.

II. In religious and moral matters, the common obligations and responsibilities of men and women are the same. There is not one law for a man and another for a woman, and in this, of course, the canons follow the teachings of Christ. Women, however, are not capable of certain functions pertaining to religion. Thus, a woman is not capable of receiving sacred orders (cap. *Novae*, 10 de poen.). Certain heretics of the early ages admitted females to the sacred ministry, as the Cataphrygians, the Pепuzians, and the Gnostics, and the Fathers of the Church in arguing against them declare that this is entirely contrary to the Apostolic doctrine. Later, the Lollards and, in our own time, some denominations of Protestants have constituted women ministers. Wyclif and Luther, who taught that all Christians are priests, would logically deny that the sacred ministry must be restricted to the male sex. In the early Church, women are sometimes found with the title bishopess, priestess, deaconess, but they were so denominated because their husbands had been called to the ministry of the altar. There

was, it is true, an order of deaconesses, but these women were never members of the sacred hierarchy nor considered such. St. Paul (I Cor., xiv, 34) declares: "Let women keep silence in the churches: for it is not permitted them to speak, but to be subject, as also the law saith. But if they would learn anything, let them ask their husbands at home. For it is a shame for a woman to speak in the church". The Apostle also says that in the church "ought the woman to have a covering over head, because of the angels" (I Cor., xi, 10). It is not allowed to women, however learned and holy, to teach in monasteries (cap. *Mulier*, 20 de consec.). Ministering at the altar, even in a subordinate capacity, is likewise forbidden. A decree says: "It is prohibited to any woman to presume to approach the altar or minister to the priest" (cap. *Inhibendum*, 1 de co-hab.).; for if a woman should keep silence in church, much more should she abstain from the ministry of the altar, conclude the canonists.

III. Although women are not capable of receiving the power of sacred orders, yet they are capable of some power of jurisdiction. If a female, therefore, succeeds to some office or dignity which has some jurisdiction annexed to it, although she cannot undertake the cure of souls, yet she becomes capable of exercising the jurisdiction herself and of committing the care of souls to a cleric who can lawfully undertake it, and she can confer the benefice upon him (cap. *Dilecta*, de major. et obed.). Abbesses and prioresses, consequently, who have acquired such jurisdiction can exercise the rights of patronage in a parochial church and nominate and install as parish priest the candidate whom the diocesan bishop has approved for the cure of souls (S.C.C., 17 Dec., 1701). Such female patron can also, in virtue of her jurisdiction, deprive clerics subject to her of the benefices she had conferred upon them, by withdrawing the title and possession. In such a case, as the benefice was conferred dependently on the patronage of a female and on the collation of the title and possession, it is concluded that the spiritual right of the clerical incumbent was also dependent on the same, and when they are taken away, his spiritual right in them ceases, as it is presumed that the pope makes the ecclesiastical jurisdiction for the care of souls also dependent on the possession of the benefice in accordance with its rights of patronage. (Cf. Ferraris, below.) The female patron cannot, however, suspend such clerics nor lay them under interdict or excommunication, because a woman cannot inflict censures, as she is incapable of true spiritual jurisdiction (cap. *Dilecta*, de majorit. et obed.). A woman, even though an abbess or prioress having jurisdiction over her nuns, cannot bless publicly, since the office of benediction comes from the power of the keys, of which a woman is incapable. She can, however, bless her subjects in the same manner as parents are wont to give their blessing to their children, but not with any sacramental power even though she have the right to bear the crosier. (See Abbess.) Another species of apparent spiritual jurisdiction was forbidden to female religious superiors by Leo XIII, when by the

Decree "Quemadmodum" (17 December, 1890), he prohibited any enforced manifestation of conscience (q.v.). Pius X in his *motu proprio* on church music (22 Nov., 1903) is moved by the fact than women are canonically prohibited from taking part ministerially in the Divine worship when he declares: "On the same principle, it follows that singers in the church have a real liturgical office, and that, therefore, women, as being incapable of exercising such office, cannot be admitted to form part of the choir or of the musical chapel." This does not prevent women, however, from taking part in congregational singing.

IV. Stringent regulations have been made from the earliest ages of the Church concerning the residence of women in the households of priests. It is true that St. Paul vindicated for himself and St. Barnabas the right of receiving the services of women in his missionary labours like the other Apostles (I Cor., ix, 5), who according to Jewish custom (Luke, viii, 3) employed them in a domestic capacity, yet he warns St. Timothy: "the younger widows avoid" (I Tim., v, 11). If the Apostles themselves were so circumspect, it is not surprising that the Church should make severe rules concerning the dwelling of women in the households of men consecrated to God. The first vestiges of a prohibition are found in the two epistles "Ad virgines" ascribed to St. Clement (A.D. 92-101); St. Cyprian in the third century also warns against the abuse. The Council of Elvira (A.D. 300-306) gives the first ecclesiastical law on the subject: "Let a bishop or any other cleric have residing with him either a sister or virgin daughter, but no strangers" (can. 27). The Council of Nicaea (A.D. 325) permits in a clerical dwelling "the mother, sister, aunt or such proper persons as give no ground for suspicion" (can. 3). This Nicene canon contains the general rule, which has since been retained as to substance in all decrees of councils. According to the present discipline, it is the right of the bishop in diocesan synod, to apply this general rule for his own diocese, more accurately defining it according to circumstances of times, places, and persons. The bishop cannot, however, forbid entirely the employment of women in a domestic capacity in the dwellings of clerics. He can, nevertheless, prohibit the residence of women, even though relatives, in the houses of priests, if they are not of good report. If other priests, such as assistants, live in the parochial house, the bishop can require that the women relatives have the age prescribed by the canons, which is ordinarily forty years. In some dioceses the custom has existed from the Middle Ages, of requiring the permission of the bishop in writing for the employment of female housekeepers, in order that he may be certain that the canonical prescriptions concerning age and reputation are fulfilled. In the Eastern Church, it is entirely forbidden to bishops to have any women residing in their dwellings, and a series of councils from 787 to 1891 have repeated this prohibition under severe penalties. Such rigour of discipline has never been received into the Western Church, though it has been considered proper

that bishops should adhere to the common law of the Church in this matter even more rigorously than priests. As the Church is so solicitous to guard the reputation of clerics in the matter, so she has also enacted many laws concerning their interaction with those of the other sex both at home and abroad.

V. An antiphon in the Office of the Blessed Virgin, "Intercede pro devoto femineo sexu", has given rise to the belief that women are singled out as more devout than men. As a matter of fact, the words usually translated: "Intercede for the devout female sex" means simply "for nuns". The antiphon is taken from a sermon ascribed to St. Augustine (P.L., Serm. 194) in which the author distinguishes clerics and nuns from the rest of the faithful, and employs the term "devoted (i.e. bound by vow) female sex" for the consecrated virgins, according to the ancient custom of the Church.

Besides the books mentioned in the text of the article, the following may be given from the enormous literature on the subject:

I. For the woman question as a whole: Lange and Bäumer, *Handbuch der Frauenbewegung*, v Pts. (Berlin, 1901-02); Rössler, *Die Frauenfrage vom Standpunkt der Natur, der Geschichte und der Offenbarung* (2nd ed., Freiburg, 1907); Cathrein, *Die Frauenfrage* (3d ed., Freiburg, 1909); Mausbach, *Die Stellung der Frau im Menscheisleben: Eine Anwendung katholischer Grundsätze auf die Frauenfrage* (München-Gladbach, 1906); Bekker, *Die Frauenbewegung: Bedeutung, Probleme, Organisation* (Kempten und Munich, 1911); Bettex, *Mann und Weib* (2nd ed., Leipzig, 1900); Lily Braun, *Die Frauenfrage, ihre geschichtliche Entwicklung und ihre wirtschaftliche Seite* (Leipzig, 1901); Wychgram, *Die Kulturaufgaben der Frau* Leipzig, (1910-12); in the following vols.: (1) Krukenberg, *Die Frau in der Familie*; (2) Freudenberg, *Die Frau in die Kultur des öffentlichen Lebens*; (3) Wirminghaus, *Die Frau und die Kultur des Körpers*; (4) Schleker, *Die Kultur der Wohnung*; (5) Bäumer, *Die Frau und das geistige Leben*; (6) Schleker, *Die Frau u. der Haustralt*; Laboulaye, *Recherches sur la condition civile et politique de la femme* (Paris, 1843); Klamm, *Die Frauen* (6 vols., Dresden, 1857-59).

II. Historical: Kavanagh, *The Women of Christianity* (London, 1852); idem, *French Women of Letters* (1862); Weinhold, *Die deutsche Frau im Mittelalter* (3d ed., Vienna, 1897); Bücher, *Die Frauenfrage im Mittelalter* (Tübingen, 1910); Duboc, *Fünfzig Jahre Frauenfrage in Deutschland* (Leipzig, 1896); Norrenberg, *Frauenarbeit und Arbeiterinnenerziehung in deutscher Vorzeit* (Cologne, 1880); Stopes, *British Freedwomen, Their Historical Privilege* (London, 1907); Peters, *Das erste Vierteljahrhundert des allg. deutschen Frauenvereines* (Leipzig, 1908)

III. Modern Woman Question: Bücher, *Die Frauen und ihr Beruf* (5th ed., Leipzig, 1884); Parkes, *Essays of Woman's Work* (1866); von Stein, *Die Frau auf dem sozialen Gebiete* (Stuttgart, 1880); Idem, *Die Frau auf dem Begiete der Nationalökonomie* (6th ed., Stuttgart, 1886); Gnauck-Kühne, *Die deutsche Frau m die Jahrhundertwende* (2nd

ed., Berlin, 1907); Poisson, *La salaire des femmes* (Paris, 1908); Criscuolo, *La donna nella storia del diritto italiano* (Naples, 1890); Ostrogorski, *La femme au point de vue du droit public* (1892); Gnauck-Kühne, *Warum organisieren wir die Arbeiterinnen?* (Hamm, 1903); Idem, *Arbeiterinnenfrage* (München-Gladbach, 1905); Pierstorff, *Frauenarbeit und Frauenfrage* (Jena, 1900); Idem, *Die Frau in der Wirtschaft des XX. Jahrhunderts* in *Handbuch der Politik*, II, Par. 56 (Berlin, 1912); Gerhard and Simon, *Mutterschaft und geistige Arbeit* (Berlin, 1901); Salomon, *Soziale Frauengesetzgebung* (Berlin, 1902); Baumstatter, *Die Rechtsverhältnisse der deutschen Frau nach der geltenden Gesetzgebung* (Cologne, 1900); Dupanloup, *La femme studieuse* (7th ed., Paris, 1900); von Bischof, *Das Studium und die Ausübung der Medizin durch die Frauen* (Munich, 1887); von Schkejarewsky, *Die Unterschiedsmerkmale der männlichen und weiblichen Typen mit Bezug auf die Frage der höheren Frauenbildung* (2nd ed., Würzburg, 1898); *Eine Abrechnung mit der Frauenfrage* (Hamburg und Leipzig, 1906); Sigismund, *Frauenstimmrecht* (Leipzig, 1912); Idem, *Muttererziehung durch Frauenarbeit* (Freiburg, 1910).

AUGUSTINE RÖSSLER WILLIAM H.W. FANNING

Thomas Wood

Thomas Wood

Priest and confessor, b. about 1499; d. in Wisbech Castle before 1588. After being prebendary of Canterbury (11th stall), rector of High Ongar, Essex, and rector of Harlington, Middlesex, in 1554, he was deprived of all three benefices in 1559. He had been vicar of Walthamstow, Essex, 1537-41, Vicar of South Weald, Essex, 1545-58, vicar of Bradwell-by-the-Sea, Essex, 1554- 55, rector of Dean, Hampshire, 1555-59, and had held the 10th stall in Westminster Abbey from 1554 till the Benedictines were restored in 1556. He had also been one of Queen Mary's chaplains, and at her death had been nominated to the Bishopric of St. Asaph's, at the same time that Bishop Goldwell of St. Asaph's had been nominated to the vacant See of Oxford.

It does not appear whence he obtained his degree of B.D. On account of his religion he was committed to the Marshalsea 13 May, 1560, and on 22 April, 1561, gave evidence that he had not said or heard Mass since midsummer, 1559. On 20 Nov., 1561, he was transferred to the Fleet. On 28 Nov., 1569, we find him in the Tower of London, threatened with the rack. He was still there in April, 1570. From the Tower he was removed to the Marshalsea again 14 Oct., 1571, and was still there in 1579, then aged 80, and in July, 1580. The Thomas Woods who was in Salford Fleet in 1582 is probably a different person.

MORRIS, Troubles of our Catholic Forefathers, 2nd series (London, 1875), 239; HARDY, Le Neve's Fasti (Oxford, 1854), I, 59; III, 357; GEE, Elizabethan Clergy (Oxford, 1898), *passim*; Catholic Record Soc. JOHN B. WAINEWRIGHT

Wood-Carving

Wood-Carving

In general, the production from wood of objects of trade or art by means of sharp instruments, as a knife, chisel, file, or drill. Here only that branch of wood-carving is dealt with which produces artistic objects, belonging either to plastic (as statues, crucifixes, and similar carvings), or to industrial art (as arabesques and rosettes), and which serve mainly for the ornamentation of cabinet work. Carvings of the first class belong specifically to wood-sculpture; those of the second class to wood- carving proper; both are treated in this article. It is indeed not easy to maintain a sharp distinction between these two classes in a sketch dealing with the historical development of wood-carving, particularly as they were frequently combined in the production of artistic objects. Moreover, the lack of objects of industrial art among the remains of the first thousand years makes it necessary, in the following summary, to include also examples of wood- sculpture.

Objects carved from wood were frequently used for religious purposes in antiquity, especially by the Egyptians; the early statues of the gods were of wood. Wood-carving, however, did not receive its real development until the Christian era. On account of the perishable character of the material it is easy to understand that only a small amount of the wood-carving of Christian antiquity still exists. These scanty remains show that wood was then partly used for the same church purposes as to-day. A mention should be made here in particular of the wood-sculpture from Bawit in Egypt, namely the figures of two saints and consoles which were acquired in 1898 by the museum at Cairo, and the door of the Basilica of St. Sabrina at Rome, the most important monument of early Christian wood-carving. In the early period reliquaries were frequently made of wood, as were also the episcopal cathedra; these chairs were adorned with ivory carved in relief, as is shown by the celebrated cathedra of Bishop Maximianus

at Ravenna. Originally the entire art of the Germans was expressed by work in wood; the churches were built almost entirely of wood, consequently, it may be assumed that most of the fittings of a church were of the same material. The adornment of the surfaces, which was produced by tooled work, consisted of figures of animals and interlaced geometrical designs in most peculiar interweavings and turnings. However, almost nothing remains of all the perishable objects of the early period, the chairs, coffers, and doors, with the exception of the small reading-desk of St. Radegunde (d. 587) at Poitiers, and the delicately carved door belonging to St. Bertoldo at Parma. This door is probably of Lombard origin; the characteristic German carving and work in geometrical design on the frame and panels make it a very beautiful piece of art. Such carving in low-relief, as shown on the only well-preserved chest of this era in the cathedral at Terracina in Italy, was common throughout the entire early medieval period. This is evidenced from the two wings of a folding-door of the eleventh century in the cathedral of Puy, one of which bears the legend: "Godfredur me fecit" (cf. Haupt, "Die älteste Kunst der Germanen", Leipzig, 1909). The statues of saints and of the Virgin carved from wood, and the carved wooden images of the Saviour, have almost entirely disappeared, owing to the decay of time and the change of taste. Among those that have been preserved is the celebrated "Volto santo di Lucca", a crucified Christ clad in a tunic with sleeves that belongs to the eighth century, also a similar carving of the crucifixion at Emmerich, Prussia, a work of the year 1000. In addition, there are several representations in wood of the Madonna, that, however, can scarcely be included among artistic carved work, as they are entirely covered with plates of gold, a circumstance to which they owe their preservation. Such Madonnas may be found, for example, at Essen and Hildesheim in Prussia. Wooden seats, such as were used to a limited extent in the churches during the early medieval period, are only known from miniatures in the manuscripts and from sculpture in stone. These show that they generally were made of rounded posts, ribs, and boards which were seldom ornamented by carvings. Seats of this sort were retained in Romanesque art down to the twelfth century. A very unusual example of a pew made of turned round timber, belonging to the twelfth century, is to be found in the Museum of Industrial Art at Christiania. Strictly speaking it is turner-and-joiner-work.

Apparently during the entire Romanesque period low-relief was the prevailing method used in wood-carving. Examples of this are the superb framework surrounding the doors in Norwegian churches, as at Flaa and Aal, the scroll-work borders on the choir-stall and wooden reliquary belonging to the former monastery of Lokkum (1244) in Hanover, a few small wooden coffers in various collections, as at Cologne and Vienna, and several chairs in the museum at Christiania. Along with this work in low-relief, however, carvings in higher relief began to appear towards the close of the Romanesque

period, as, for instance, the doors of the Church of Maria im Kapitol at Cologne and the doors of the cathedral of Spoleto. These latter doors, which were finished by Andrea Guvina in 1214, are the greatest achievement of Romanesque wood-carving; the reliefs are five centimeters high and are ornamented with twenty-eight scenes from the life of Christ. Notwithstanding a few excellent productions, wood-carving experienced, in general, no decided development during the Romanesque period. The reason of this was partly the preference of the period for coloured effects, which led to the covering of statues with glittering gold and to the painting of reliquaries and chests, partly in the methods of the joiner work of the period. Cabinets and coffers were not formed of frames and panels and joined together by rabbets and mitres, but were made of heavy boards roughly put together. Consequently it was necessary to hold the boards together by iron mounting, which excluded fine carved work. The custom of ornamenting the wooden reliquaries not with carved work but with paintings also prevailed in the East, as evidenced by the reliquaries found a short time ago in the treasury Sancta Sanctorum at Rome (cf. Grisar, "Sancta Sanctorum", Freiburg, 1908).

If, as already said, it is impossible to write a continuous history of wood-carving down to the close of the twelfth century, on account of the lack of remains, still we are justified in assuming that wood-carving was oftener used for the ornamentation of churches and church furniture during the Romanesque period than it is possible to-day to prove. For the execution of such monumental tasks as large church doors presupposes great practical experience. Thus, at the opening of the Gothic period, wood-carving had reached such a state of development after hundreds of years, that it was able to cope with the many tasks assigned to it, so that we may justly call it a great era of wood-carving. The Gothic period added to the former needs of the Church in carved wood, such as seats, desks, and doors, many new requirements, above all those which had not been possible before the art of carving had fully developed, such as carved altars and choir-stalls, while the demand for statuary carved from wood naturally continued. Starting with those pieces of furniture that make the smallest demands upon the carver and are generally produced by a carpenter, we will speak first of cabinets or cupboards and coffers. The still existing specimens of these that have come down from the early Gothic era belong almost exclusively to the church, consequently the ornamentation is taken in most instances from architecture, as crockets, tracery, and battlements. In addition carved foliage and figures are found, especially on the doors and the top-pieces. Mention should be made of a sacristy cupboard at Wernigerode, Prussia, that is ornamented with carved masks and animals, and a cupboard ornamented with a grape-vine in low relief in the Arena Chapel at Padua. The coffers are generally made of two upright boards as supports, and two or three long boards stretched between; the ornamentation is generally only on the front. The ends are frequently

decorated with single figures, the long side with pointed arches under which stand knights or saints; at a later date the front was also decorated with representations of various scenes. A large and widely scattered group of coffers, which apparently come from Flanders and are generally to be found in England, show on the front St. George's battle with the dragon and the freeing of the king's daughter. England has, indeed, the greatest treasure in church coffers lying neglected in the cathedrals. Mention should be made of the fourteenth-century coffers at Saltwood, Oxford (church of Magdalen College), Derby (St. Peter's church), Chevington, and Brancepeth.

In the same way carpenter and carver shared in the work of making the choir-stalls and altars, which in the course of time were richly ornamented. In the choir-stalls the chief adornment was at the ends, on the supports under the seats or misericords and on the arms of the seats; the ends were decorated with figures of saints and with symbolical animals carved partly in relief and partly in the round. The imagination of the carver had its freest field in the misericords, where in addition to fruits and flowers, the wildest designs of the artist's inventive fancy may be found, the secular and spiritual, serious and gay, satirical and symbolical. The carving on the arms of the stalls was also often more ingenious than artistic. The backs of the stalls were frequently richly decorated not only with architectural ornaments, as crockets, finials, and gabled hood-mouldings on the baldachino, but also with single figures and connected scenes. As examples may be mentioned the choir-stalls in the cathedral at Amiens (1508-1522). Both of these are exceeded in sumptuousness by the carving on a number of stalls in Spain, as those in the cathedral of Seville by Danchard and Nufro Sanchez (d. 1480). It is impossible here to go into the historical details of the development either of the stalls or of the altars made of wood. Carving was an important feature of these latter, especially in Germany and Flanders. The development of these altars is an important chapter in the history of sculpture in wood. They consisted essentially of a shrine, an open or closed one, ornamented with several figures or numerous groups of small ones. The most noted carved altars were the work of artists who were among the most distinguished sculptors of the late Middle Ages. Among these men were Michael Pacher, who made the celebrated altar at St. Wolfgang in Austria, the high altar at Blaubeuren in Swabie by Jörg Syrlin the younger, the altar of the Sacred Blood at Rothenburg by Till Riemenschneider, the altar of the Virgin by Veit Stoss at Cracow, the high altar in Schleswig by Hans Bruggermann.

Down to about 1350 Gothic wood-carving borrowed its ornamentation from stone carving. Later the more frequent use of wood and increased technical skill led to the abandonment of the rigid laws of stone carving, and to the creation of an independent style which attained freer and more brilliant results by the greater delicacy, finer membering, interlacing of lines, and pierced work. These advantages were used with

such skill be the carvers that finally they were conspicuously used in stone-carving also. The creased folds, sharp corners, and edges characteristic of the late Gothic style are probably to be traced back to the cutting knife used in wood-carving. This development of late Gothic wood-carving was largely brought about by the fact that the figures and altars were always painted in a number of colours. The carved work was first covered with a coating of chalk, which was then painted with gay colours and richly gilded, and patterns or inscriptions were impressed upon the seams of the robes and nimbi. This naturally made it unnecessary for the carver to carry out his work into the finest details, as it was to be covered by polychromatic painting. Consequently most of the great carved work of the late Middle Ages is not intended to produce its effect by the details, but by the impression made by the whole. Regarded in this way many wooden altars, by the richness of the ornamental carving, the scenes presented by the figures, and the brilliant decoration of paint and gold, excite a feeling of joy and produce a mystical effect that cannot be produced by a stone altar. Wooden altars are frequently enriched by painted wings. It is, therefore, easy to understand why the carved altars of Flanders, in particular, were largely exported, even as far as Norway and Portugal.

Medieval wood-carving, naturally, was not limited to the production of the pieces of church furniture mentioned above. Besides the choir-stalls other furnishings similarly ornamented were the celebrant's seat (deacon's seat), episcopal throne, doors, pulpits, and reading-desks. In addition there was the vast number of statues of the Madonna and the saints, as well as crucifixes, with which the churches were filled at the close of the Middle Ages, and which, especially in the lands affected by the Reformation, were burned by the wagon-load at the beginning of the schism. Notwithstanding this there is a larger amount of carved work formerly belonging to churches in Germany and Belgium than in any other country, although the art of wood-carving created numerous and worthy productions in France, Italy, Spain, and especially in Scandinavia and England. As an instance of English work should be mentioned the beautiful sepulchral figure of Archbishop Peckham at Canterbury; of French work, the doors of the cathedral at Aix (1504). The style of wood-carving in the late Middle Ages was strongly influenced by the art of painting, since several important German sculptors in wood were also painters, or at least owned studios, such as Michael Pacher, Friedrich Herlin, and Hans Multscher, hence, though the undercutting of the drapery was deep and its design bold, the effect was mean and trivial. The pictorial element was encouraged by the ease with which lime and poplar, which were the woods used in Southern Germany, could be worked; in Northern Germany the preference was for oak.

This brilliant period of wood-carving came to an end in Germany and Switzerland about 1530 on account of the religious turmoil. But there were scattered works of high

excellence produced in these countries by the art of the Renaissance, as, for instance, the choir-stalls in the cathedral at Berne (1522), which have the naïve grace of the early Renaissance, and the stalls in the former monastic church at Wettingen (1603) in Germany, which show the grace and skill of the late Renaissance, the superb stalls in the chapter-chamber of the cathedral at Mainz, the carving on the lower part of which is alive with grotesque figures. Frequent opportunity for artistic carved work was also given by the organ cases, the galleries, the pews, and especially the panels covering the walls of chapter-rooms, and similar ecclesiastical halls. One of the richest panellings in Germany is that of the chapter-room of the cathedral at Munster in Westphalia (1544-1552). Excellent carvings of this period in the Netherlands are the choir-stalls of the Great Church at Dordrecht which picture the entry of Charles V into the city. A fine example of French wood-carving is that of the choir-stalls of Saint-Denis. During this period the greatest triumphs of wood-carving were produced in Italy, the birth-place of the Renaissance. Here this art profited greatly by the development of stone sculpture, and in many pieces of church equipment it sought to compete with work in stone, as in candelabra and reading- desks. However, in Italy it is chiefly the choir-stalls, the thrones of the bishops and abbots, and the cupboards in the sacristies which prove the high artistic development of wood- carving. The ornaments produced in the carved work for churches have in the main the same delicate, attractive grace as those intended for secular purposes. Like the latter they are decorated with vine-work, figures of animals, and fabulous creatures in the most delicate and rich relief. It was customary to employ architects, who were also employed for decorative work in stone, to produce the designs for large works in carved wood, such as choir- stalls. Thus such designs were made in Florence by Benedetto de Majano, in Siena by Ventura di Ser Giuliano, the architect of the church of San Bernardino at Siena. Local tradition seeks to connect distinguished names with the designs for celebrated carved- work; thus in Siena such designs are attributed to Peruzzi, In Perugia to Perugino and Raphael. In general, however, the master who executed the carving usually produced the design. This view is all the more probable as the occupation of wood-carving frequently descended from father to son and thus, as in other branches of work, family traditions arose. This explains in part the often extraordinary technique. We know of a number of artist families of Upper Italy who travelled throughout Italy, exercising their skill in cathedral and monastery churches. Besides these lay master- workmen, various members of different orders gave their attention to wood-carving. Especially celebrated among such are Fra Giovanni da Verona (1457-1525), whose work is to be found in Maria in Organo at Verona, in Lodi, Montoliveto near Siena, and at the Vatican; Fra Damiano Zambelli da Bergamo (1480-1549), whose work is at Bergamo, Milan, Bologna,

Perugia, and Genoa; Fra Rafaele da Brescia (1477-1537), whose carvings are at Bologna and Montioliveto near Siena.

The styles of the Renaissance came into vogue in the making of church equipments through the influence of Brunelleschi and Donatello, and appeared first of all at Florence. As far as wood- carving is concerned the effects of the Renaissance are nowhere better to be observed than in the choir-stalls. It was largely Florentine masters who executed the carved work on the large numbers of choir-stalls that have been preserved in Tuscany and Umbria. Thus Giuliano and Antonio da San Gallo worked on the choir-stalls of the Benedictine Abbey of San Pietro in Perugia, the varied grotesques of which are of extraordinary delicacy. In the late Renaissance the purely ornamental decoration is frequently replaced by scenes containing figures. Among the most important works of this period are the choir-stalls in San Giorgio Maggiore at Venice by Alberto di Brule, and those in Santa Giustina at Padua by Taurino and Andrea Campagnola with pictures carved in relief on the backs. Closely connected with the choir-stalls is the choir- desk which consists of a base shaped like a pedestal, a support formed like a candelabrum, and the book-rest. The base and the support in particular are frequently ornamented with rich carving; examples of such work of the late Renaissance are the desk in the cathedral at Siena and that in San Pietro a Perugia. Another piece of furniture that the art of carving selected for embellishment was the cupboard of the sacristy, the doors of which were artistically ornamented. The most important work of this class is in the new sacristy of the cathedral of Florence; on the panels of this cupboard is a carving in high relief of boys carrying a wreath. The work is that of Giuliano da Majano; it contains individual figures, reliefs, fabulous creatures, and ornaments, and its sumptuousness baffles description, and is hardly to be appreciated from illustrations. It exhibits the technique of the art of wood- carving in a completeness that can scarcely be surpassed. However, regarded purely from the artistic point of view, the works of the early and central period of the Renaissance also exhibit a very high level of wood-carving.

The styles of the succeeding periods may be touched on more briefly, as wood-carving produced but little that was new except that the manner of ornamentation was altered. Perhaps the decoration of the confessional might be considered a novelty. Up to this era the confessional had generally been without adornment. In the Baroque period the confessionals were frequently adorned with large carved wooden figures on each side of the door and had a cornice at the top. The exceedingly high altars which towered in the German churches of this period presented a hitherto unknown problem to wood-carving. This was the decoration of the large twisted columns with garlands and cherubs, and the arranging of angels with huge wings and saints in ecstatic and tortuous positions between the columns as well as on the interrupted gabled pediment.

The production of carved head pieces for the church pews which up to that time had been left without decoration was also a novelty. Much attention was paid to the pulpit. This was especially the case in Belgium where the pulpit was adorned in a very naturalistic manner with mountains, trees, clouds, and groups of figures. During the Baroque period there was a great demand for wood-carving. In 1614 Archduke Albert in Belgium ordered the speedy restoration in the old style of the ecclesiastical objects that had been destroyed during the religious strife. This command was carried out chiefly as regards the inner restoration of the churches, and in this undertaking wood-carving had a large share. In Germany and Austria during the same era the great work of the Counter-Reformation was completed, one result of which was the building or renovation of large numbers of churches, and the production of ornate church furniture, especially of choir-stalls, organ-cases, and confessionals. These furnishings were generally made of wood and richly decorated with the lavish carving and high relief of the Baroque style, or rather frequently overloaded with ornamentation. The decoration consisted of the same flamboyant ornaments, cartouches, and the same scroll-work as were customary in the secular art of the period.

The heaviness of the Baroque was followed by the airiness of the Rococo style, which was succeeded later by the stiff precision of the Empire style. The lack of artistic depth and force in the Empire style is perhaps nowhere more clearly evident than in church furniture. This style may have been able to give a delicate, graceful appearance and a brilliant effect to the ball-room, the theatre, boudoir, and the drawing-room, but it failed so far as church furniture was concerned to inspire in those at prayer a religious frame of mind and a sense of devotion. At the same time it must be conceded to the art of carving of that era that it can show important results in purely decorative work, as seen in the altars, choir-stalls, confessionals, and pulpits of the great churches of the second half of the eighteenth century in Southern Germany and Austria. Examples are the choir-stalls at Wiblingen near Ulm executed by Janurius Zieck (1780), and those in the collegiate church of St. Gall (1765). Large panels with scenes carved in relief from the Old and New Testament framed in the ornamental work of the art of the period form the main scheme of decoration. This sumptuous wooden furniture in many churches was evidence both of the great technical skill of the carver and of the large amount of money expended by those who built the churches. If, however, their united efforts have failed to produce that homelike, mystical warmth of feeling which appeals to the beholder in so many of the simple unadorned works of the Middle Ages, the reason for this must be found in the conditions of the period, which was that of the "Enlightenment". Just as a cold Rationalism prevailed in the theology of that day, so to a certain degree it was also evidenced in ecclesiastical wood-carving.

BEDA KLEINSCHMIDT

Ven. John Woodcock

Ven. John Woodcock

English Franciscan martyr, b. at Leyland, Lancashire, 1603; suffered at Lancaster, 7 August, 1646. His parents, Thomas and Dorothy Woodcock, the latter a Catholic, were of the middle class. He was converted about 1622, and after studying at Saint-Omer for a year was admitted to the English College, Rome, 20 October, 1629. On 16 May, 1630, he joined the Capuchins in Paris, but soon afterwards transferred himself to the English Franciscans at Douai. He received the habit from the Venerable Henry Heath in 1631 and was professed by the Venerable Arthur Bell a year later. For some years he lived at Arras as chaplain to Mr. Sheldon. Late in 1643 he landed at Newcastle-on-Tyne, and was arrested on the first night he spent in Lancashire. After two years' imprisonment in Lancaster Castle, he was condemned, on his own confession, for being a priest, together with two seculars, Edward Bamber and Thomas Whittaker, 6 August, 1646. When he was flung off the ladder the rope broke. Having been hanged a second time, he was cut down and diembowelled alive. The Franciscan nuns at Taunton possess an arm-bone of the martyr.

Nat. Biog.* s.v. Woodcock, Martin.

JOHN B. WAINEWRIGHT

Abraham Woodhead

Abraham Woodhead

Born at Almonbury, Yorkshire, about March, 1609; died at Hoxton, Middlesex, 4 May, 1678. This voluminous controversial writer was educated at University College, Oxford, entering in 1624, becoming fellow in 1633, and proctor in 1641. While travelling abroad in 1645 he began to think of joining the Catholic Church, but the exact date of his reception is not known. Ejected from his fellowship in 1648, he became tutor to the young Duke of Buckingham, and then lived with the Earl of Essex and other friends till 1654, when he and some other Catholics purchased a house at Hoxton, where they lived a community life, occupying themselves in devotion and study. In 1660 his fellowship was restored, but after a brief residence in Oxford he returned to the more congenial surroundings at Hoxton, where, assured of the income of his fellowship, he lived till his death occupied in literary labours. His friend Hearne the antiquarian declared him to be "one of the greatest men that ever this nation produced". Among his numerous books the chief original works were "Ancient Church Government", 5 parts (1662-85); "Guide in Controversies" (1667), and a long appendix thereto (1675); four theological works against Stillingfleet; "Life of Christ" (1685); "Motives to Holy Living" (1688); "Discourse on the Eucharist" (1688); "On Images and Idolatry" (1689), and an incomplete treatise on Antichrist (1689). He also translated the "Life of St. Teresa" and St. Augustine's "Confessions", and paraphrased the Epistles of St. Paul (with Walker and Allestree) and the Apocalypse. A large collection of his unpublished manuscripts, with autograph letters and writings relating to him, which was formed in the eighteenth century by Cuthbert Constable, is now in the possession of Sir Thomas Brooke, F.S.A., of Armitage Bridge, Huddersfield.

BERINGTON, Life of Abraham Woodhead, prefixed to part III of his Ancient Church Government (1736); NICHOLSON, Few particulars relating to Mr. Woodhead's life and works, in MS., but used by COOPER in Dict. Nat. Biog., who also gives a complete list of the works: BROOKE, Catalogue of books and MSS. collected by Thomas Brooke (1891); DODD, Church History, III (Brussels vere Wolverhampton, 1742); WOOD, Athenae Oxonienses (London, 1813-20), Catholic Miscellany (1825); GILLOW in Bibl. Dict. Eng. Cath., with complete list of works.

EDWIN BURTON

Julian Edmund Tenison Woods

Julian Edmund Tenison Woods

Priest and scientist, b. at Southwark, London, 15 Nov., 1832; d. at Sydney, New South Wales, 7 Oct., 1889, sixth son of James Dominick Woods, a lawyer, and Henrietta Mary St. Eloy (a convert), second daughter of Rev. Joseph Tenison, Rector of Donoughmore, Wicklow, Ireland. He was baptized in the Belgian Chapel, Southwark, and was confirmed by Bishop (later Cardinal) Wiseman; he was educated in a Catholic school at Hammersmith, and later at Newington Grammar School, Surrey. For a time he was employed on the staff of the "Times", and became interested in the work of the Catholic schools. In his eighteenth year he entered the Passionist novitiate, but, owing to ill-health, soon left. Going to the South of France he taught in Mont-Bel college for naval cadets at Toulon, where he developed a taste for geology and natural science. In France he met Bishop Willson of Hobart Town, Van Dieman's Land (Tasmania), whom he accompanied thither in 1854 as assistant in the Catholic schools. Later he went to Adelaide, and became sub-editor of the "Adelaide Times". Meanwhile he studied with the Austrian Jesuits at Sevenhill and was ordained priest at St. Patrick's, Adelaide, on 4 January, 1857. A large tract of country in the south-eastern district, having Penola for a centre and extending over 22,000 square miles, was entrusted to his charge. To provide for the Catholic education of the children in his extensive parish he founded at Penola in 1866 the Sisters of St. Joseph of the Sacred Heart, placing a Miss Mary MacKillop in charge of the first school. From this humble beginning the Sisters under Mother Mary (MacKillop) of the Cross have grown into the present flourishing congregation with numerous houses spread over Australia and New Zealand.

In 1866 Bishop Sheil of Adelaide appointed Father Woods his private secretary, chaplain and director-general of schools. In 1867 Sister Mary, later mother-general, advisedly opened the novitiate of the Sisters of St. Joseph at Kensington near Norwood, Adelaide. She spent the whole of her religious life in Australia. In 1869 Father Woods founded the Brothers of the Sacred Heart, putting Brother Camillus (Terence Woods) at their head, for the work of boys' schools. At Father Woods's suggestion Bishop Sheil invited (1869) the Sevenhill Jesuits to establish themselves at Norwood. A gifted missionary, Father Woods, was invited (1870) by Bishop Quinn of Bathurst to give missions in his diocese; and for eleven years he laboured with great success in New South Wales, Queensland, and Tasmania. During his absence, however, difficulties arose; by episcopal authority the Brothers were disbanded and the Sisters for a time dispersed. Their manner of observing poverty and their freedom from diocesan control were objected to. In a short time the storm subsided. Father Tappeiner, S.J., of Norwood, took Father

Woods's place as director and friend. Mother Mary was sent to Rome by Bishop Reynolds, then (1873) administrator of the Diocese of Adelaide. Pius IX, 20 April, 1874, approved of the rule of the Sisters after it had been revised and reported on by Father Anderledy, later General of the Jesuits. The Sisters were allowed to live under central government, possess property, and accept fees for tuition. This was affirmed anew when Leo XIII erected the institute into a congregation, 25 July, 1888. During his apostolic labours Father Woods found opportunity for scientific pursuits.

His "Geological Observations in South Australia" (London, 1862) won him the friendship of Sir Charles Lyell. In 1883 he accepted the invitation of Sir Frederick Weld to visit Singapore. He then explored Malacca for minerals, traversed Java, and spent some time in Siam. That same year he received a gold medal from the King of Holland in recognition of his scientific labours. The British Admiralty requested him to report on the coal resources of the East, as he was probably then the leading authority on this subject. His discoveries were of great benefit to the British navy, and he was munificently recompensed by the Admiralty, which placed his reports in its archives. After visiting China and Japan his health became impaired, and on his homeward journey in H.M.S. "Flying Fish", before landing at Port Darwin, he visited several islands previously unknown. At the request of the government resident at Port Darwin, he thoroughly explored the mineral districts of the Northern Territory of South Australia. After a short visit to Queensland he returned to Sydney, where he gradually became paralysed. Some of his best work was done as an invalid. He received the passionist habit on his death-bed, and was buried in Waverley Cemetery, Sydney. Father Woods was a fellow of the Geological Society of London (1859), and was elected president of the Linnean Society of New South Wales in 1880. In addition to the works mentioned above, he wrote: "Not quite as old as the hills" (Melbourne, 1864); "History of the Discovery and Exploration of Australia" (London, 1865); "Fish and Fisheries of New South Wales" (Sydney, 1882); "Australian Essays"; "Australian Bibliography"; "On Natural History in New South Wales" (Sydney, 1882); "On the Volcano of Taal Philippines" (Sydney, 1887); "North Australia and its Physical Geography" (Adelaide, 1887); "Fisheries in Oriental Regions" (Sydney, 1888); "Anatomy and Life History of Mollusca" (Sydney, 1888), a prize essay which won the W.B. Clarke medal; "Desert Sand Stone of Australia" (Sydney, 1889); "On Vegetation in Malaysia" (Sydney, 1889); and "Geographical Notes in Malaysia and Asia" (Sydney, 1888). The catalogue of the Public Library, Adelaide, contains the names of seventy-nine books, pamphlets, and articles written by Father Woods; the articles, which treat chiefly of geology, conchology, and zoology, were mainly contributed to the journals of the various Australasian scientific societies.

WILLIAM O'DOWLING

Ancient Diocese of Worcester

Ancient Diocese of Worcester

(WIGORNIENSIS.)

Located in England, created in 680 when, at the Synod of Hatfield under St. Theodore, Archbishop of Canterbury, the great Mercian diocese was divided into five sees. Tatfrith, a monk of Whitby, was nominated for bishop, but he died before consecration, and Bosel, one of his fellow monks, was consecrated in his stead. The history of the diocese was singularly uneventful, and it was specially fortunate in the fact that it never was long vacant, as so many other sees frequently were. The lines of its bishops from 680 to 1565 were unbroken. The Mercian kings were profuse in the endowments which they lavished on the cathedral church, which was originally dedicated to St. Peter but afterwards to Our Lady. It was originally served by secular canons, but in the tenth century St. Oswald replaced them by Benedictines. He also rebuilt the cathedral, finishing the work in 983, but in 1041 the Danes burned the city and ruined the cathedral, and it was reserved for another saint, St. Wulstan, to rebuild it (1084-89). The new building frequently suffered from fire (1113, 1180, 1202). In 1216 King John was buried there, between the shrines of the two Worcester saints, Oswald and Wulstan; and two years later the cathedral, once more restored, was consecrated at a great gathering at which the king and many prelates and nobles were present. At various times modifications were made in the structure, which gradually assumed the Early Gothic character it now bears. Probably the Worcester nave is among the earliest instances of English Gothic, dating from the later part of the twelfth century. The transepts are a mixture of Norman and Perpendicular work; the choir, lady chapel, and east transepts are Early English (1224). The crypt alone remains of St. Wulstan's work. The monastic buildings, of which only the cloister, chapter-house, and refectory remain, were on the south and west of the cathedral.

From the time of Henry VII the see was filled by Italian prelates, who represented the king's interest at Rome. Among these was the future Pope Clement VII. It was the special prerogative of the bishop to act as chaplain to the Archbishop of Canterbury, and thus to celebrate Mass at all assemblies of the clergy at which the primate was present. The following is the complete list of bishops:

- Bosel 680
- Oftfor 691
- St. Eegwine 693

- Wilfrith I 718
- Mildred about 743
- Waermund 775
- Tilhere 777
- Heathured (AEthelred) 781
- Denebeorht 798
- Heahbeorht (Eadbert) 822
- Ealhhun (Alwin) about 845
- Waerfrith 873
- AEthelhun 915
- Wilfrith II 922
- Coenweld 929
- St. Dunstan 957
- St. Oswald 961
- Ealdwulf 992
- Wulfstan 1003
- Leofsige 1016
- Beorhtheah 1033
- Lyfing 1038
- AElfric Puttoc 1040
- Lyfing (restored) 1041
- Ealdred 1046
- St. Wulfstan II 1062
- Samson 1096
- Theulf 1113

- Simon 1125
- John de Pageham 1151
- Alured 1158
- Roger 1163
- Baldwin 1180
- William de Narhale 1185
- Robert Fitz-Ralph 1191
- Henry de Soilli 1193
- John de Constantiis 1195
- Mauger 1198
- Walter de Grey 1214
- Silvester de Evesham 1216
- William de Blois 1218
- Walter de Cantelupe 1237
- Nicholas 1266
- Godfrey de Giffard 1268
- William de Gainsborough 1301
- Walter Reynold 1307
- Walter de Maydenston 1313
- Thomas Cobham 1317

Words (In Canon Law)

Words (in Canon Law)

To give the right value to words is a very important factor in the proper interpretation of law, and hence canonists give many rules for the exact acceptation of words, in order that decrees may be correctly understood and the extent of their obligation determined. In general, the authentic interpretation of a law may be made by the legislator, or his successor or superior, but when this is not the case recourse must be had to what is called magisterial, or doctrinal, interpretation. It is for this latter mode that rules have been formed. The words of a law must be understood according to their usual signification, unless it is certain that the legislator intended them to be taken in another sense. When the words are not ambiguous, they must not be twisted into some far-fetched meaning. If the intention of the legislator is known, the interpretation must be according to that, rather than according to the words of a law, even though they seem to have another sense, because the words are then said not to be nude, but clothed with the will of the lawgiver. When a law is conceived in general terms, it is presumed that no exception was intended; that is, where the law makes no exception, interpreters are not allowed to distinguish. In all interpretations, however, that meaning of the words is to be preferred which favours equity rather than strict justice. An argument can be drawn from the contrary sense of the words, provided that nothing follows which is absurd, inappropriate, or contradicted by another law. The provisions of a previous statute are not presumed to be changed beyond the express meaning of the words of a new law.

When a law is penal, its words are to be taken in their strictest sense and not to be extended to their cases beyond those explicitly mentioned; but when a law concedes

favours, its words are to be interpreted according to their widest sense. "In contracts, words are to be taken in their full [plena] meaning, in last wills in a wider [plenior] sense, and in grants of favours in their widest [plenissimi] interpretation" (c. Cum Dilecti, 6 de donat.). When there is a doubt as to the meaning of the words, that sense is to be preferred which does not prejudice the rights of a third person. No words of a law are ever presumed to be superfluous. In interpreting a law the words must be considered in their context. To give a meaning to words that would render a law useless is a false interpretation. When the words of a law are in the future tense, and even when they are in the imperative mood concerning the judge, but not concerning the crime, the penalty is understood to be incurred, not ipso facto, but only after judicial sentence. When the words of a law are doubtful the presumption is in favour of the subjects, not of the lawgiver.

WILLIAM H.W. FANNING

Antiquity of the World

Antiquity of the World

Various attempts have been made to establish the age of the world. Two groups of scientists have especially busied themselves with this question: physicists and geologists. The most notable attempt is that of the physicist Thomson (Lord Kelvin), who based his calculations on Laplace's theory that the earth originated in a fiery fluid magma. While in this magmatic state, the earth as a whole must have reacted to the attraction of the moon as the oceans now do, with ebb and flow. These constant and strong tides must in long intervals have retarded the rotation of the earth to such an extent that 7200 million years ago the earth must have rotated with double its present rapidity. Again, the polar flattening of the earth was likewise caused by this rotation, and Thomson calculated that this flattening could not have been effected to such a degree if the terrestrial crust had been solid, and the rotation of the earth the same as today. Consequently, from the extent of the flattening a conclusion may be drawn as to the rapidity of the rotation at the time of the superficial solidification of the globe. Thomson reckoned that, so long as the earth revolved double as quickly, the flattening at the poles must have been much greater than now, and thus estimated that the solidification of the terrestrial crust occurred less than 1000 million years ago. Thomson later approached the same problem in another way, by using Fourier's laws of thermal conductivity to arrive at the time elapsed since the upper crust became solid. His hypothesis was that at the moment of solidification the whole earth (its covering of stone

and its kernel of iron) must have been of the same temperature (about 3000 degrees Celsius), and that the geothermic level on the upper surface must have been twenty-eight metres; consequently, the time elapsed was in round numbers 100 million years. Some of these suppositions are, however, uncertain. Thus, the initial temperature at the moment of the solidification of the terrestrial crust was set at too high a figure, and the geothermic level was rated too low. Besides, heat-producing processes (e.g., melting heat, heat of chemical composition, radio-active heat, etc.) were not taken into consideration, although these greatly retarded the cooling of the earth. On hypotheses similar to those employed by Lord Kelvin are based the calculations of O. Fischer, who places the age of the world at 33 million years, and, those of Dawson, Mellard Reade, and H.G. Darwin, who place it at 100 million years.

Cl. King pointed out that the cooling could be reckoned only from the time when the terrestrial crust was stable -- that is, so thick that it was no longer disturbed by the movement of the tides of fluid magma. In view of the atmospheric pressure then prevailing, the initial temperature for this terrestrial crust must be taken as 1200 degrees Celsius, and the age of the world set at 10 million years. Thomson subsequently expressed his adhesion to this view. G.F. Becker, on the other hand, pointed out that a crust of only eighty miles in thickness would satisfy the above conditions, that under this crust the red-hot magma would still remain, and that in consequence of the increase of weight a stratification of matter and a change of temperature according to the depth must necessarily be supposed. On the basis of his calculations he set the age of the world at 60 million years. According to the present condition of physical knowledge it may be said that the initial temperature of the terrestrial crust may really have been a little over 1200 degrees Celsius, since otherwise all the particles of stone would not have been knitted together. Accordingly the minimum figure for the time elapsed since the Algonquian period (when, probably, life was first possible) might be placed at 30 million years. This figure, however, appears to be too small, since during the process of cooling quantities of heat (melting heat, etc.) were released. The geologists as a body are of opinion that the interval allowed by the physicists is too short. In reply to Thomson, Sir Archibald Geikie pointed out that enormous periods must unconditionally be supposed to explain the processes on our globe. We know, for example, that the present mountains are very recent developments, that they were preceded by numerous older mountain systems, of which only scanty remains now exist or which have entirely disappeared. For the raising and levelling of each of these mountains an incalculably long period must be granted, since no important diminution can have taken place in the historical era. In the same period of several thousand years, moreover, the relation between mainland and sea has not altered, except in the case of very limited areas. Yet the study of existing continents shows that deep-bedded oceans formerly

occupied their place, and that between these, in many cases, towered a mainland which was sometimes covered with primeval tropical forests, sometimes groaned (like Greenland) under a coating of ice, and again heard the sand storms roar above it.

Facts like these suggest an idea of the great duration of geological eras, but they afford us no data for an exact estimate of this duration. Only details can be calculated in this manner. Thus, for example, we know that Niagara Falls has receded about 12 kilometres since the Diluvial glacial period. On the basis of its annual recession, Lyell has ascribed to this process a period of 36,000 years; the later observations of Gilbert and Woodward have, however, reduced this figure to 7000 years. It was long hoped that the comparison of the denudation of the drainage basins of the individual rivers would afford a measure for geological eras. It has, however, been shown that the Nile lowers the level of its basin about one metre in 17,000 years, while the Po requires only 2400 years; the Indian rivers effect the same result in 5200 years, while the slow streams of Central Europe require 164,000. Equally impossible is it to arrive at any generally legitimate conclusions from the growth of sediments; every observation, however accurately carried out, has only a local value, and consequently no conclusions can be drawn from the extent of the sedimentary rocks of earlier formations. One other method has been tried. The alterations which the fossil remains reveal in successive eras have been employed to divide geological formations into smaller sections or zones. The Jura formation alone has already exhibited more than thirty of such zones; the whole Diluvial period and modern times together, on the other hand, show not the least changes in the organisms, so that the latest section of the world's history, which has already occupied many thousands of years, would be equivalent to a single one of these "zones". It is thus easily understood why evolutionists, who would see the manifold diversity of existing animal and plant forms derived from the same original living organism, make the most excessive demands of all for the most extended geological eras.

In 1900 Gilbert pointed out that only rhythmic processes are a suitable means for calculating geological eras, the rhythms of precession and eccentricity being especially of value. Precession refers to the displacement of the earth's axis, which occurs within a period of 26,000 years. But the alterations in the form of the earth's orbit involve the far more extensive rhythm of eccentricity, the orbit now approximating to the form of a circle, now to that of a comparatively narrow ellipse. Precession and eccentricity influence the climate of our globe, since the summer half-year is longer now for one, now for the other hemisphere, and thus the difference in the length of summer and winter varies. There are, consequently, for each hemisphere maximum and minimum temperatures which return periodically. These conditions form the principle on which James Croll attempted to calculate the glacial period, which lies between the Tertiary and Diluvial epochs. He calculated that a corresponding period of higher ec-

centricity began about 240,000 years ago and lasted until 80,000 years ago, which time he accepts as the glacial period. Other glaciations of the earth probably occurred 750,000; 850,000; 2,500,000; and 2,600,000 years ago, and may be expected in 500,000; 600,000, and 900,000 years -- alternately in the northern and southern hemispheres. In point of fact the traces of a large number of these glacial periods have already been recognized -- for example, the Permian carboniferous glacial period on the borders of the Indian Ocean -- but to admit a rhythm of a few hundreds of thousands of years, we must suppose hundreds of glacial periods to have occurred during the enormous length of geological eras. Besides, the connection between eccentricity and glacial periods has not yet been established.

Of other attempts to calculate the age of the world a few may be mentioned. Newcomb takes as his starting-point the cooling of the sun, and finds that the longest period that can have elapsed since the formation of water on the earth is ten million years. W. Upham, on the other hand, believes that ten times that interval, or 100 million years, must be accepted as having passed since the appearance of the first organisms. T. Mellard Reade approached the question from an entirely different standpoint. He calculated that on an average about 3000 years are necessary to denude the upper surface of the earth one foot, and, taking the processes of denudation and deposition as equal, he arrived at an interval of ninety five million years in round numbers. A. Geikie, who likewise bases his calculations on the deposition of stratified rocks, found as the limits 73 and 680 million years, while McGee, on the same basis of sedimentary formations, estimates that 7000 million years elapsed since the Cambrian period and double that length of time since the formation of the terrestrial crust. Another method adopted by geologists depends on the shrinkage of the earth in consequence of the formation of mountains. Nathorst and Neumayer suppose that the radius of the earth has become about 5 km. shorter since the Silurian period. On this hypothesis and theoretical figures concerning the annual cooling and contraction of the earth M.P. Rudzki bases his investigations, and endeavours to arrive by exact mathematical methods at the time hitherto elapsed, arriving at an interval of 200 million years; by assuming a total shrinkage of 50 km. and employing the cooling theory of Thomson, he places the age of the world at 500 million years.

On the development of mountain chains is based the calculation of P. Krichgauer also. He starts from the hypothesis that 1400 years are on an average necessary to carry away from exposed, and not too flat, sections of mountains as much matter as is contained in an evenly spread layer one metre in depth. The most prominent of the recently formed mountain chains, whose completion is to be referred to the end of the Tertiary period, are found, on the one hand in Central Asia, with crests about 6000 metres high, and, on the other hand, in the Andes of South America with crests about 5000 metres

high -- a mean height of 5500 metres. Of the next older mountain chains, dating from the Carboniferous period, the most undisturbed, however, now possess a mean height of only 1750 metres, so that, supposing the original height to be the same in both instances, an interval of five and a quarter million years must be supposed to have elapsed (between the two formations). But we know that three of such intervals, which is equivalent to 16 million years, elapsed since the end of the pre-Cambrian period (that is, since the appearance of the first organisms); consequently, about sixteen and a half million years separates the pre-Cambrian period from our time. If, furthermore, we take the close of the pre-Cambrian era as the middle of the whole period since the first formation of the terrestrial crust, thirty-three million years have elapsed since that time. Another method might be designated as the chemical method. It was first proposed by J. Joly in 1899. Joly calculated the quantity of sodium in sea water and also in the water carried annually by the rivers to the sea, and thus estimated the interval during which erosion has been proceeding and the time of the deposition of the first sediments. In this manner he arrived at the conclusion that, to convey to the ocean the quantity of sodium which is contained therein, ninety million years are necessary. Basing his enquiries on the comparative absence of lime in the oceans and rivers, Eugene Dubois, in 1900, endeavoured in like manner to contribute to the solution of this question, placing the age of the world at forty-five million years. Finally, E. von Romer approached the question from the consideration of the quantity of salt in the sea-water and of the amount carried by rivers, and estimated that an interval of 160 millions would be necessary to account for present conditions.

The most modern method for determining the age of the world is based on radioactive processes. E. Rutherford has held that from the amount of helium or lead contained by a mineral its age can be calculated. From the analysis of the amount of helium contained by two primary minerals be estimated the interval since the beginning of the Cambrian period at about 140 million years. This new and highly interesting method of determining the age of a mineral containing radium or thorium has been elaborated by R. J. Strutt. Very suitable for these investigations are the crystals of zirconium in igneous rocks, since these evidently retain within them the helium engendered. From zirconium of the various igneous rocks Strutt made the following calculations for the age of the earth: Post or Late Tertiary, less than 100,000 years; Pliocene, two million years; Miocene, six million years; Mesozoic (Triassic?), 50 million years; Palaeozoic, 140 million years; Lower Devonian, 200 million years; Archaic, from 200 to 600 million years. Boltwood developed the method of determining the age of minerals containing a large proportion of uranium from the amount of lead they contain, inasmuch as it is highly probable that lead is the final product of the developments of uranium into radio-active substances. He obtained from minerals containing

uranium which belonged to the same strata values which varied between 1000 and 11,000 millions; the cause of this great variability was that he neglected in his calculation the fact that all these minerals, even in the primary, contained more or less lead, which was not generated in the mineral by radio-active processes. This error in Boltwood's calculation was first pointed out by G. F. Becker. Finally, Soddy has endeavoured to find a maximum for the age of the earth by pointing out that the age of uranium is limited, so that minerals, even though they originally consisted entirely of metallic uranium, have an age of less than 1000 million years.

According to the above-mentioned theories, it can only be said: that since the beginning of the Algonquian period, if we base our calculations on the cooling process of the earth, more than 30 million of years have elapsed and if we base our computations on the theory of radio-activity, less than 600 million years, so that a period of from 100 to 200 million years may perhaps be regarded as the most likely hypothesis.

With the question of the age of the world is very frequently connected the question of the age of man. This can be deduced only from fossilized human remains and from finds of human implements. Many regard the coliths (stone fragments resembling primitive tools) as vestiges of man or of some man-like being, although their artificial origin is not yet proved. No bones of Tertiary man have as yet been discovered, nor any traces of lower precursors of man. The *pithecanthropus erectus* Dub. is now almost universally regarded as a large animal of the species *hylobatidoe*; furthermore, it is not Tertiary, as Dubois supposed, but Diluvial (probably old Diluvial), as has been shown by J. Elbert, W. Velez and the Selenka expedition on the basis of geological and paleontological investigations. It is also very doubtful if the human bones reported by Santiago Rotb, Doring, and Ameghino to have been found in the Pampas formation in Argentina, belong to the Tertiary period; as for the neck-bone (Atlas), found in the Tertiary strata of Monte Hermoso (Argentina), and described by Lehmann-Nitsche under the name *Homo neogaeus*, the attempts hitherto made to prove it of human origin are entirely unconvincing. However, although there is at present no evidence to prove the existence of Tertiary man, it is not impossible that in the near future such evidence may be forthcoming. Especially inadequate have been the investigations in Africa and in the East, where, presumably, we must seek the earliest abode of mankind. Indeed, even in Italy and Greece systematic investigations have only begun. So far France exhibits the greatest number of the abodes and hunting-places of pre-historic man. These and all others whose place in the stratification can be unequivocally determined indicate that the first appearance of man in Europe must be referred to the middle of the Quaternary glacial period. This fact has been established by the investigations of Penck, but especially by those of Boule and Obermaier, who refer the event to the third intermediary glacial period.

The age of the human race is thus largely bound up with the question of the time of the Quaternary glaciation of Europe. We have already given the calculations of James Croll, based on astronomical principles, which place the conclusion of this period about 80,000 years ago and its beginning about 240,000 years ago, so that the first appearance of man would, according to this estimate, have occurred some 160,000 years ago. But, apart from the fact that Croll's hypothesis is based on erroneous assumptions, it has been recognized that all the earlier figures for the age of mankind (Lyell, 100,000 to 200,000 years, Lapparent, 230-240,000 years) must be greatly reduced. For example, it has already been mentioned that the time which Niagara required to recede 12 km., estimated by Lyell at 36,000 years, is now given by Gilbert and Woodward as not more than 7000 years. Similar conditions (the recession of a waterfall since the glacial period) may be studied on the Mississippi in Minnesota, and Winchell came to the astonishing conclusion that this river did not require more than 8000 years to excavate its course. A study of some Scandinavian rivers leads to the same conclusion, and the waterfall on the Tosa, a tributary of Lake Maggiore which has existed since the glacial period, indicates a much shorter interval.

Another method for estimating the age of the cultural remains of Diluvial man is based on the thickness of the layers of clay which is pressed down as dust in the interior of protected caves. As an example may be taken the cave known as Teufelsloch at Stramberg, near Neutitschein in Moravia. This contains traces of man from the lower layer of the Palaeolithic age up to the present. Not far from the entrance, the thickness of the uppermost layer, which extends back to the late pre-historic period, measures 30-70 cm. Below this is found cave clay 30-50 cm. in depth with post-glacial prairie animals and cattle, and still lower 30-40 cm. of earth with glacial prairie animals. The last layer contains most of the traces of man, especially the lower stage of the Early Stone age. One may thus estimate the interval since man's first appearance at from 8000 to 10,000 years. Other calculations based on the deposits made by rivers etc. are much more uncertain, inasmuch as some catastrophe (e.g. an avalanche) might bring more matter in one day than would otherwise be conveyed in 100 years. However, the latter calculations have also their sponsors. Thus, Heim has estimated the postglacial period at 16,000 years on the basis of his observations made on a moraine in the Lake of Lucerne; Bruckner suggests 14,000 to 15,000 years, based on observations of the alluvial deposits of the Aar. Both these figures may, however, be too high. According to Morlot the Finiere required only a period of 10,000 years to form the cone-shaped bank at its mouth on the Lake of Geneva. In this bank Roman bricks were found at a depth of 1-2 m.; two metres deeper, earthen vessels and a pair of bronze tongs; and about 3 metres still deeper, rude pottery and the bones of some domestic animals. The remains dating from the Roman period form the none too reliable basis for the calcu-

lation. On the ground of these and similar calculations Schaafhausen gives the age of mankind as 10,000 to 15,000 years, which, however, is purely an estimate. One thing at least is certain: instead of the 100,000 and more years formerly given, the age of mankind may with much greater probability be placed at about 10,000 years as the mean approximation. We are thus approaching ever nearer to the chronology of the Bible, according to which the Jews reckon that 5673 years have now (1912) elapsed since the creation of the world, or rather of Adam.

LUKAS WAAGEN

Von Worndle Family

Von Wörndle Family

Philip von Wörndle

Of Adelsfried and Weierburg, major of a Tyrolese rifle-corps, commandant in the militia reserve, b. at Hotting-Innsbruck, 9 July, 1755; d. at Linz, Austria, 2 August, 1818. He belonged to an old noble family of the Tyrol and was the son of Joseph Anthony Wörndle, justice of the peace of Sonnenburg, who was reinstated in the nobility in 1763 by Empress Maria Theresa as a reward for his military and patriotic services. Philip von Wörndle received the degree of Doctor of Law at the University of Innsbruck in 1779. At first he was judge of the manor court of the Premonstratensian Abbey of Wilten, then became an advocate. In 1787 he married Elisabeth von Lemmen, by whom he had seven children; in 1800 he married a second wife, Johanna von Lemmen. In 1796 he was the captain of the company raised among those connected with the university which served in the campaign against Lecourbe on the boundary of the Tyrol towards Switzerland and also at Lake Garda. In 1797 he was commander of the reserve of northern Tyrol under General Kerpen in the campaign against Joubert, and as such shared in the victorious but bloody encounter at Springes in which the Tyrolese took part (2 April, 1797). In 1800 he was district military commissioner under Generals Hiller and Jallachich for the upper valley of the Inn. In 1809, under Andreas Hofer, he was Tyrolese under-commissary and head of the national defence for the valley of the Puster. In return for his services he received the Tyrolese commemorative medal and the gold imperial medal. On account of the occupation of the province in 1810 he emigrated to Austria; in 1811 he was a member of the district council at Linz in upper Austria. In 1813 he accompanied, as provincial commissioner, the imperial troops under General Ismer on the campaign for the liberation of southern Tyrol from the French. On account of accusations lodged against him by commissary Roschmann, Wörndle remained in exile from his native country and died in Upper Austria.

Edmund von Wörndle

Grandson of the preceding and son of Johann von Wörndle, clerk of the works for the imperial palace at Vienna, b. 28 July, 1827; d. 3 August, 1906. After attending the high-school at Schossen Abbey, he entered the academy of fine arts at Vienna. In 1846 he began the study of landscape painting at the art-school under Professors Thomas Euder and Franz Steinfeld and continued under them until 1853, frequently receiving academic prizes. At the same time he also attended Führich's lectures on composition and the theory of style; from this sprang his firm adherence, like that of Joseph Anton Koch, to "historic landscape". In 1855 he went on a journey for study to Egypt and Palestine: this was followed by a residence for two years with an imperial pension in Rome and Italy. While in Italy he made large chalk cartoons from his sketches in the Holy Land; these were bought by the picture gallery of the city of Hamburg, while a few of his sketches were finished as oil paintings which were bought by Emperor Francis Joseph I, Cardinal Simor-Grau, the papal nuncio Viale Prela, and others. Some of the cartoons were engraved by the artist on copper; in 1904 the cartoons were published at Munich as chromos. From 1858 he lived at Castle Weierburg, and from 1864 at Muhlau near Innsbruck; from 1874 his permanent residence was at Innsbruck. He produced large numbers of easel pictures and others containing large figures, as: "Christ at Jacob's Well", owned by the Grand Duke of Weimar; "Samson as the Lion-Killer", in the Ferdinandum at Innsbruck; "Hunting-Scenes" owned by Emperor Francis Joseph. In 1877 he painted a series of Tyrolean landscapes for the city savings-bank of Innsbruck; he also painted decorative historical wall-pictures of scenes in the Tyrolese war of liberation in the Hofer-room at Innsbruck, as well as others for the Heart of Jesus chapel completed by his efforts in 1899, in the Hofer-house called "Sand in Passeeir", and landscapes for the corridor of the Kurhaus at Meran. He showed himself to be particularly representative of the Romantic School in the great series of "Parzival" paintings, in which his brother August had some share, which he was commissioned by the Austrian minister of worship and education to execute for the episcopal seminary for boys called the Vinzentinum at Brixen, and which were based on thorough preparatory study of Wolfram von Eschenbach. Lithographic copies of this series have been published at Vienna. A second series of paintings, "Walter von der Vogelweide", in the Ferdinandum at Innsbruck, was published by himself in lithograph in 1894. He was the founder and honorary president of the "Society of Ecclesiastical Art of the Tyrol", for many years a member of the board of directors of the art association of the Tyrol, honorary member of the Veterans' Union of Innsbruck, and in 1904 was made a knight of the Francis Joseph Order. In 1858 he married Sophie von Attlmayr (d. 1898), by whom he had three sons, Hermann, Heinrich, and Wilhelm.

August von Wörndle

Brother of Edmund and son of Johann, b. 22 June, 1829; d. at Vienna, 26 April, 1902. He attended first the school of design of Professor Klieber, then in 1844 the preparatory school of the academy of fine arts, the lectures of Professor Joseph von Führich, and from 1849 Führich's classes for advanced pupils. Later he became Führich's son-in-law. Through the St. Severinus Artists' Association August sold his first easel picture, "The Little Daughter of Jairus", to Empress Caroline Augusta, his "Three Magi" to the imperial picture-gallery at Vienna. In 1853 he went to Venice and Florence, in 1854 to Rome, where he studied under Cornelius and Overbeck and where he remained until 1859. While at Rome he painted numerous religious-historical pictures, collaborated on the cartoons executed by Cornelius for the Campo Santo at Berlin, painted a portrait of Pope Pius IX for Emperor Maximilian of Mexico, and made a copy of Raphael's "Coronation of the Virgin" for the chapel in the house of the Prince Archbishop Cardinal Rauscher in Vienna. After his return to the Tyrol he worked (1861-1868) at Weierburg and Muhlau with his brother on the frescoes of the "Stations of the Cross" for the cemetery of Innsbruck and frescoes for the parish church at Worgl. Under commission of the Archduke Karl Ludwig, Governor of the Tyrol, he painted the frescoes in the chapel of the castle of Ambras. He now settled at Vienna, where in 1868 he produced paintings for the new cathedral of the Virgin, and for the Jesuit college on the Freienberg at Linz. In 1869, at the order of the emperor, he executed a large oil painting, "The Liberation of Vienna from the Turks"; he also in this period painted altar-pictures for Vienna and Styria, and paintings of the stations of the Cross that were sent to Bohemia and Moravia. In 1872 he was appointed teacher of freehand drawing in the Maria Theresa academy for young noblemen at Vienna, a position he held until 1898. While here he executed a number of altar paintings that went particularly to Bohemia. In 1874 he painted frescoes in the cathedral of Salzburg, in 1875-76 he prepared the cartoons for the frescoes in mosaic of the newly erected Votive Church at Vienna, and the easel picture, "Battle of Springes", for the Ferdinandeum at Innsbruck; in 1882 he executed the fresco-painting in the presbytery of the parish church of Isehl, a work for which he was commissioned by the emperor; also compositions for "Parzival" and for Weber's "Dreizehnlinde" (Thirteen Linden Trees). He was also the private teacher of the Archdukes Francis Ferdinand and Otto. The last work he did was the entire fresco ornamentation of the Church of St. Anastasius at Vienna in 1900-01; in recognition of this work he received the cross of the Knights of the Order of Francis Joseph. He was a member of the Austrian commission for historical and artistic remains and of the section for art of the Austrian Leo Association. He married in 1872 Anna von Führich (d. 1909); he had one son, Joseph (d. 1880), and a daughter Paula, now Mother Felicitas, of the Ursuline Nuns at Innsbruck. August von Wörndle is buried at Innsbruck.

Philip von Wörndle (Brixen, 1894).
HEINRICH VON WORNDLE
Christian Worship

Christian Worship

NOTION AND CHARACTERISTICS

The word *worship* (Saxon *weorthscipe*, "honour"; from *worth*, meaning "value", "dignity", "price", and the termination, *ship*; Lat. *cultus*) in its most general sense is homage paid to a person or a thing. In this sense we may speak of hero-worship, worship of the emperor, of demons, of the angels, even of relics, and especially of the Cross. This article will deal with Christian worship according to the following definition: homage paid to God, to Jesus Christ, to His saints, to the beings or even to the objects which have a special relation to God.

There are several degrees of this worship:

- if it is addressed directly to God, it is superior, absolute, supreme worship, or worship of adoration, or, according to the consecrated theological term, a worship of *latria*. This sovereign worship is due to God alone; addressed to a creature it would become idolatry.
- When worship is addressed only indirectly to God, that is, when its object is the veneration of martyrs, of angels, or of saints, it is a subordinate worship dependent on the first, and relative, in so far as it honours the creatures of God for their peculiar relations with Him; it is designated by theologians as the worship of *dulia*, a term denoting servitude, and implying, when used to signify our worship of distinguished servants of God, that their service to Him is their title to our veneration (cf. Chollet, loc. cit., col. 2407, and Bouquillon, *Tractatus de virtute religionis*, I, Bruges, 1880, 22 sq.).
- As the Blessed Virgin has a separate and absolutely supereminent rank among the saints, the worship paid to her is called *hyperdulia* (for the meaning and history of these terms see Suicer, *Thesaurus ecclesiasticus*, 1728).

In accordance with these principles it will readily be understood that a certain worship may be offered even to inanimate objects, such as the relics of a martyr, the Cross of Christ, the Crown of Thorns, or even the statue or picture of a saint. There is here no confusion or danger of idolatry, for this worship is subordinate or dependent. The relic of the saint is venerated because of the link which unites it with the person who

is adored or venerated; while the statue or picture is regarded as having a conventional relation to a person who has a right to our homage -- as being a symbol which reminds us of that person (see Vacant, *Dictionnaire de théologie catholique*, s.v. *Adoration*, and authors cited in bibliography; also ADORATION; IDOLATRY; IMAGES, DEVOTION TO THE BLESSED VIRGIN MARY).

Interior worship is to be distinguished from exterior worship. the former is not manifested by external acts, but consists in internal adoration; but when this inner sentiment is expressed by words or actions, prostration, genuflexion, the sign of the cross, or any other gesture, it becomes exterior worship. Again worship is private or public; the former, which may be an act of external worship, is performed unseen by men or seen by only a few; the second is official worship rendered by men assembled for a religious end and forming a religious society properly so called. This is not the place to show that Christian worship is a worship at once interior and exterior, public and private. It should be interior, otherwise it would be mere comedy, a purely pharisaical worship such as Christ condemned when He told His disciples that they should worship in spirit and the truth. But it should not be purely interior worship, as Sabatier, with certain Protestants and most Deists, maintains (Sabatier, *Esquisse d'une philosophie de la religion*, 1908, 5); for man is not a pure spirit but composed of body and soul, and he should adore God not only in his soul but also in his body. This is the justification of all external manifestations of worship -- genuflexion, prostration, kneeling, standing, the sign of the cross, the lifting-up or imposition of hands. Furthermore, on the same principle it will readily be understood that, in rendering homage to God man may have recourse to animate or inanimate creatures (sacrifice of animals, incense, lights, flowers, etc.). Neither is it difficult to prove that, since man is a social being, his worship should be public and in common with others. Worship in private or even individual worship in public, is not sufficient. Society as such should also render to God the honour due to Him. Furthermore, it is natural that men who believe in the same God and experience towards Him the same sentiments of adoration, gratitude, and love should assemble to praise and thank Him.

But even if this principle of a natural right did not exist to prove the necessity and legitimacy of a social worship, the fact that Christ founded a Church, that is, a society of men professing the same faith, obeying the same laws, united with one another by the closest bonds, implies the existence of the same worship. This religious society founded by Christ should have one and the same worship -- "one Lord, one faith, one baptism. One God and Father of all" (Eph., iv, 5-6). This baptism represents the entire worship, which should be one, addressed to the same God by the same Christ. Hence Christian worship is the worship of the Church, the expression of the same faith, and exercised under the supervision of the ecclesiastical authority. Thus understood worship

depends on the virtue of religion and is the manifestation of that virtue. Finally, theologians usually connect worship also with the virtue of justice; for worship is not an optional act of the creature; God is entitled to the worship of intelligent creatures as a matter of justice.

In Christianity the worship offered to God has a special character which profoundly differentiates it from Jewish worship, for it is the worship of the Trinity, God the Father, Son, and Holy Ghost. The worship of the Jews is directed to God, one, omnipotent, magnificent, sovereign, King of kings, Lord of lords, God of gods, but without distinction of persons. Prayer is addressed to Him as the living God, the Lord God of Israel, the God of Abraham, Issac, and Jacob, the God of our fathers, or simply to the Lord our God. The formula, *to the God of Abraham, Isaac, and Jacob*, remains in use among Christians, but ordinarily God is conceived of by Christians under other titles and with another form. In the worship which Christ paid to God He shows Him to us as the Father. He adores Him as His Father: "I confess to Thee, O Father, Lord of heaven and earth" (Matt., xi. 25; cf. Luke, x, 21); "Abba, Father, all things are possible to thee: remove this chalice from me" (Mark, xiv, 36); "Father, sanctify me . . . Father glorify me . . . Just Father" (John, xvii). Already He seems to claim for Himself a worship of adoration equal to what he gives the Father: "If two of you shall consent upon earth, concerning anything whatsoever they shall ask, it shall be done to them by my Father who is in heaven. For where there are two or three gathered together in my name, there am I in the midst of them" (Matt., xviii, 19, 20). The Apostles and even those who were not His disciples prayed to Him during His life-time: "Lord, if it be thou, bid me to come to thee upon the waters" (Matt., xiv, 28); "Lord, save us, we perish" (Matt., viii, 25); "Lord, if thou wilt, thou canst make me clean" (Matt., viii, 2; cf. Mark, i, 40; Luke, v, 12); "Have mercy on me, O Lord . . . But she came and adored him, saying: Lord, help me" (Matt., xv, 22; 25), etc.

He ordained that baptism should be given in His name as well as in the name of the Father, "baptizing them in the name of the Father, and of the Son, and of the Holy Ghost" (Matt., xxviii, 19). Exorcisms, imposition of hands, anointing of the sick are to be performed in His name: "In my name they shall cast out devils . . . they shall lay their hands upon the sick" (Mark, xvi, 17, 18). In St. John this idea is emphasized: "That all men may honour the Son, as they honour the Father" (v, 23); "Whatsoever you shall ask the Father in my name, that will I do; that the Father may be glorified in the Son. If you will ask me anythhing in my name, he will give it you. Hitherto you have not asked anything in my name. Ask, and you shall receive; that your joy may be full . . . In that day you shall ask in my name" (xvi, 23, 24, 26). No sooner is He ascended to glory than He is beside the Father and in consequence of His equality with Him the object of the worship of the early Christians; "All whatsoever you do" -- St. Paul has

just been speaking of prayer -- "in word or in work, do all in the name of the Lord Jesus Christ, giving thanks to God and the Father by him" (Col., iii, 17), which is like the ending of our own prayers. It seems probable that the prayer for the choice of Matthias was addressed directly to Him: "Thou, Lord, who knowest the hearts of all men" (Acts, i, 24). His name becomes consecrated for prayer in the formulas, "By the name of our Lord Jesus Christ" (Acts, iv, 10), "By the name of thy holy Son Jesus" (Acts, iv, 30). St. Stephen prays to Him: "Lord Jesus, receive my spirit" (Acts, vii, 58). The formulas of exorcism are also in His name: "I command thee (Satan) in the name of Jesus Christ to go out from her (the woman)" (Acts, xvi, 18). Indeed even the Jewish exorcists attempted to make use of this name in their exorcisms: "Some of the Jewish exorcists . . . attempted to invoke over them that had evil spirits, the name of the Lord Jesus, saying: I conjure you by Jesus, whom Paul preacheth" (Acts, xix, 13). In St. Paul expressions like, "Grace to you and peace from God our Father and from the Lord Jesus Christ. I give thanks to my God through Jesus Christ . . . (Christ) Who is above all blessed forever," and others similar are too numerous for quotation. They likewise abound in the Apocalypse, usually in the form of a doxology, e.g. "To him that sitteth on the throne, and to the Lamb, benediction, honour, and glory, and power, for ever and ever . . . Amen" (Apoc., v, 13, 14). The Apostolic Fathers and the writers of the first centuries likewise furnish us with an abundant harvest of similar formulas. (See Cabrol, *Monuments liturgica*, I, Paris, 1900-02, where the texts are collected in chronological order, especially nos. 612, 627, 649, 653, 656, etc., and also Cabrol. *Dict. d'archéologie chrét. et de liturgie*, I, col. 614, 654.)

In virtue of the same principle and of the equality of the Divine Persons in the Trinity, the Holy Ghost also became the object of Christian worship. The formula of baptism was given, as has been seen, *in the Name of the Father, and of the Son, and of the Holy Ghost*. In the doxology the Holy Spirit also has a place with the Father and the Son. In the Mass the Holy Ghost is invoked at the Epiclesis and invited to prepare the sacrifice. The Montanists, who in the second century preached, and awaited, the coming of the Holy Ghost to take the place of the Son and announce a more perfect Gospel, made Him the object of an exclusive worship, which the Church had to repress. But it nevertheless vindicated the adoration of the Holy Ghost, and in 380 the anathemas pronounced by Pope Damasus, in the Fourth Council of Rome, condemned whosoever should deny that the Holy Ghost must be adored like the Father and the Son by every creature (Denzinger, *Enchiridion*, n. 80). These anathemas were renewed by Celestine I and Virgilius, and the ecumenical council of 381 in its symbol, which took its place in the liturgy, formulated its faith in the Holy Ghost, "Who together with the Father and the Son is adored and glorified." These expressions indicate the unity of the adoration of the Father, the Son, and the Holy Ghost; that is, that one or the other

Person of the Trinity may be adored separately but not to the exclusion of the other two.

BEGINNINGS OF CHRISTIAN WORSHIP

It has been, and is still sometimes, asserted that Christ did not establish worship or, rather, that He proscribed external worship and was unwilling to allow any but interior worship, the adoration of the heart "in spirit and in truth." He wished, it is asserted, a religion without priest or altar, and admitted no temple save the soul. The complicated whole which constitutes the Catholic religion is not, according to these writers, of Christian origin and is to be condemned in the name of a purer Christianity. These objections were first formulated by the Protestants of the sixteenth and seventeenth centuries, who violently attacked the ceremonies of the Church, especially the Mass, as being tainted with idolatry and paganism. They have been repeated by Protestants of modern times, which is not astonishing, for if Protestantism is logical it will reach, as certain liberal Protestants have reached, the conclusion that worship should be purely individual and private. Each man should make his worship, like his religion and his creed, in accord with the principles of free inquiry (cf. Sabatier, *Esquisse d'une philosophie de la religion*, 1905, 5). The attacks of the Protestants, especially those of the Protestant Middleton, are cited in the articles on worship by the author of this article, quoted in the bibliography; we cannot here resume this discussion, but will merely summarize the origins of Christian worship.

Christ did not abolish at one stroke the ceremonies of Jewish worship. When it is said that He was satisfied with a wholly interior worship, thereby condemning exterior worship, the assertion is wholly gratuitous and is contradicted by facts. It is certain, on the other hand, that Christ went to the Temple to pray, that he celebrated the Pasch and the Jewish feasts; he received baptism from John, subjected Himself to fasting, laid His hands on the sick, drove out demons with exorcisms, and gave His disciples the power to drive them out in His name. It is almost certain that He carefully observed all the prescriptions of Jewish worship, for a deviation on one point or another would certainly have aroused protests of which some echo would have been preserved in the Gospels. The only point on which a protest of this kind was manifested was the observance of the Sabbath and certain prescriptions which the Pharisees followed in too narrow a spirit. The Apostles and disciples at Jerusalem continued to go to the Temple, as we see in the Acts (ii, 46, 47; iii, 1; v, 21; v, 42, etc.). By the worship in spirit and truth, which was to supplant the ancient worship, is meant less the form of a new worship than the spirit in which worship should be understood. Instead of adoring at Jerusalem or Garizim, men will adore everywhere; the believer will adore in his heart, no matter what his nation, be he Jew, Samaritan, or even Gentile. And he will adore not like the Jews or the Pharisees, with a purely external worship, with the lips, and in

a formalist and hypocritical manner, but with a true and sincere worship, which supposed and implies a pure life and upright conduct.

But it must be recognized that if He did not directly attack the ancient worship, Christ substituted for it a new worship which would by degrees and naturally replace the Jewish worship. First came baptism, which might have been more or less clearly prefigured by the ablution of the Jews, but which assumed a new character in the Gospel and which is truly a new rite, for it is baptism in the name of the Father, and the Son, and the Holy Ghost. It is especially the Eucharist, the Lord's Supper, which recalls the ancient sacrifices. The Eucharist at an early date was enshrined in the Jewish service of the synagogue, profoundly modifying its character, and which also by concomitance, brought about the substitution of Sunday for the Sabbath. This last fact, from the standpoint of Christian worship, is of the utmost importance, on which we cannot dwell here (see SUNDAY). The rites of penance, anointing of the sick, the ceremony of washing of the feet, the imposition of hands on the ministers, some benedictions, invocations, exorcisms, follow close after baptism and the Eucharist, and are mentioned in the New Testament. The Divine Office and the various forms of psalmody are already in germ in the most ancient Christian Synaxaria. Soon came the cult of the martyrs with the ceremonies for the burial of the dead. Sunday and soon Thursday and Friday constitute a Christian week wholly different from the Jewish week, the pivot of which had been the Sabbath. Easter and Pentecost became the pivot of a liturgical year. But this nucleus, which is almost all we know of the primitive Christian liturgy, dates from the first Christian generation. The residuum reached by successive eliminations, and by going back through the centuries, is Christian and exclusively Christian, whatever analogies may be found with the Jewish ceremonies, because the Christian rites, especially the Eucharist, baptism, and the Sunday, have such a determinate significance as to permit of no mistake. This worship is Christian in the sense that the authors of its foremost and essential institutions were Christ and His Apostles, and the institutions are to be found in the Gospels, the Epistles, and the Acts. It has been shown above how this worship differs from the Jewish worship by a new character which is peculiar to it; its object is the Father, the Son, and the Holy Ghost.

JEWISH AND PAGAN INFLUENCES

Although, as we have seen, the Church constituted a worship for itself, it nevertheless retained several memorials of the Jewish religion, which was a preparation for the Christian religion. But even here the originality and independence of the Christian worship are loudly affirmed. Thus the circumcision, which was the great sacrament of Judaism and as it were its distinctive sign, was rejected by the Church. The Temple of Jerusalem, the religious capital of Judaism, was deserted by the Christians, even by those of Jerusalem, and it was never the centre of their worship. They loved to assemble

in private houses to hear the Word, to pray, and to have the breaking of the bread. The Jewish feasts were likewise condemned. Neither the feast of Tabernacles, nor that of Lights, nor that of the Dedication, nor that of Purim left any trace in the Christian calendar. Easter and Pentecost, which kept their Jewish names and even, to a certain extent, their place on the Christian calendar, changed their object, one becoming the feast of the Resurrection and the other that of the Holy Ghost. But what is still more important, as has been said, is that the Church substituted Sunday for the Sabbath. The distinction between clean and unclean animals, which related to Jewish worship, was also rejected in the very beginning. On these questions, therefore, the Church asserted its independence. However, it borrowed certain things from the synagogue. It retained the Sacred Books as the most precious portion of its heritage and at once made them its liturgical books. For they are truly the core and the substance of the Christian liturgical books. The Church also borrowed from the Jews of the Diaspora the form of their meetings in the synagogue on the Sabbath day. At first the Christian meeting, like that of the synagogue, was taken up with the singing of psalms and the reading of the Sacred Books, followed by an exhortation or homily. These are the chief points of Jewish influence on Christian worship.

The question of pagan influences on Christian liturgy is more complicated, and requires lengthy considerations which can only be summarized here; for further details see works of Cabrol cited below in bibliography. According to some, it was through Gnosticism that pagan influences slipped into Christian worship. Gnosticism, they assert, served somewhat as a bridge between paganism and Christianity. This theory, which has been chiefly supported by Renan in his *Origines du christianisme*, has now lost much ground. The truth is rather the contrary. Gnosticism, which borrowed from all sides, borrowed from the Church several of its liturgical practices. This theory is sustained by Matter in his great work on Gnosticism; it is also defended by Probst (*Sakramente u. Sakramentalien*, Tübingen, 1872, 11, 12, sqq.) and Duchesne (Christian Worship, 336). According to others, it was much later, in the fourth century, that the Christian religion allowed itself to be contaminated by polytheism and admitted numerous pagan practices (Harnack, *Das Wesen des Christentums*, Berlin, 1900, 126, 137-38, 148). But most frequently these pretended borrowings are only unmeaning analogies, and when the Church borrowed from the religion of the Gentiles certain general rites which are current in all religions, such as the use of incense, lights, processions, gold and silver ornaments, she did not fail to profoundly change their character. This has been shown by Newman with his usual profundity in several chapters of his *Essay on the Development of Christian Doctrine* (ed. 1894, 169 sqq.). This is admitted even by such writers as Loisy (*L'évangile et l'église*, 186) and Reville (*La religion à Rome sous les Sévères*, 294).

Most of these pretended borrowings have no bearing on the essence of the liturgy. From the very first, Christian worship was in possession of all its organs. Instances have been cited of pagan feasts becoming Christian, of pagan temple consecrated to the worship of the true God, of fountains, of statues of the gods baptized and transformed into Christian patrons. It does not suffice to say, as has been said, that Christianity has been superimposed on paganism, that it is a religion of superimposition. With regard to the cult of the saints which has been especially assailed ["A low type of Christianity was born of the cult of the saints" -- (Harnack, op. cit., 126); in the same sense, Lucius, *Die Anfänge des heiligenkultus in der Christlichen Kirche*, Tübingen, 1904, and Saintyves, *Les saints successors des dieux*, Paris, 1907] a serious and profound study of the subject has led such scholars as Delehaye, Dufourcq, and Vacandard to conclude that the worship of the saints was not borrowed from paganism, and also that it indicates a high type of religion. The pagan gods and heroes never died. Local saints were not, no matter what has been said to the contrary, the local gods dressed up to suit Christianity; the saints are the enemies of the gods as much as their successors. And it is an illusion to believe that by a mysterious transformation the gods and the Graeco-Roman heroes have survived in the Church. There is no proof that a single one of them has even been honoured under the name of a martyr or even under a travesty of his own name (Vacandard, *Etude de critique et d'histoire religieuse*, 3d series: *Les origines du culte des saints*, 211, 212). Moreover it is easy to prove that, given the opposition of principle between Christianity and paganism, the two religions could scarcely borrow from each other. Paganism was based on the worship of many gods, and, at least for the masses, this worship usually consisted of gross fetishism. When piety existed among the pagans it was generally narrow, ignorant, and paltry. The gods were honoured either to win their favour, or to avert their anger, while the god of the Christians desired to be worshipped in spirit and in truth. The worship of the one true God is at the bottom of all Christian liturgy.

In conclusion it may be said that, while admitting that certain customs or rites accepted by Christianity may have existed in paganism, though with a very different significance, we must guard against admitting all the resemblances which have been suggested in recent years between Christian liturgy and pagan religions. In these cases all the evidence of assimilation must be established according to historical methods. Certain analogies between the two rites are merely fortuitous coincidences, and not borrowings. The misconceptions of some scholars of recent years are no longer of any value. There has been an attempt to see in the inscription of Abercius the epitaph of a priest of Cybele and to prove that St. Paul borrowed the Holy Eucharist from the Corinthian mysteries of Eleusis, while certain saints have been made to resemble pagan divinities. Even if some of these comparisons can be sustained, most of them are

founded only on imagination. Space does not permit an enumeration of examples; these will be found in the monographs and articles cited in the bibliography.

CHOLLET, *Culte en general* in Dict. de theolog. cath., III, 2404-27; BOUQUILLION, *Tractatus de virtute religionis*, I (Bruges, 1880); CARROL, *origines liturgiques* (Paris, 1906), 47 sq., 197; IDEM, *les origines du culte catholique* in *Revue pratique d'apologetique* (15 Nov., 1906), 209-23; (1 Dec.), 278-87; IDEM, *L'idolatrie dans l'Eglise* in *Rev. prat. d a pol.* (1 Oct., 1907), 36-46. On MIDDLETON, *A Letter from Rome showing an Exact Conformity between Popery and paganism and its different editiions, and criticism of the work* see CABROL in ALES, Dict. apologetique, s.v. *Cult chretien* and I, 833, 848, where several other Protestant works on the subject are cited; MARANGONI, *Delle cose gentilesche e profane transportate ad uso e ad ornamento delle chiese* (Rome, 1744); HATCH, *Influences of Greek Ideas and usages upon the Christian Church* (London, 1890); BASS MULLINGER in Dict. Christ, Ant., s.v. *Paganism*; KELLNER, *Heortology*, tr. (London and St. Louis, 1908); DUCHESNE, *Christian Worship, Its Origin and Evolution* (London, 1904). There is a refutation of some Protestant prejudices regarding the origin of Christian Worship (London, 1897), *The Liturgy and the Ritual of the Ante-Nicene Church* (London, 1897), 248 sqq. (2nd ed., London, 1912); VACANDARD in *etudes de critique et d'histoire religieuse*, 3d series, *Les origines du culte des saints* (Paris, 1912); DELEHAYE, *Legendes hagiographiques* (Brussels, 1905), esp. the chapter *Reminiscences et survivance patennes*; DUFOURCQ, *Le passe chretien*, IV: *Histoire de l'Eglise du III au X I siecle* (Paris, 1910); BRIDGETT, *The Ritual of the N.T., an Essay on the Principles of the Origin of Catholic ritual in Reference in the N.T.* (London, 1873); OSTERLY AND BOX, *The Religion and Worship of the Synagogue* (London, 1907), especially xiii, xvi to xx; LECLERCQ, *De rei liturgicae in synagogis Ecclesiae analogia in Mon. F. CABROL

Edward Worsley

Edward Worsley

Born in Lancashire, England, 1605; died at Antwerp, 2 Sept., 1676. He is said to have been educated at Oxford, but his name does not occur in the University Registers, and it is equally uncertain that he took Anglican orders. Having become a Jesuit on 7 Sept., 1626, he studied at Liège, where he subsequently became a professor of philosophy, logic, and Scripture, winning a great reputation for talent and erudition. He was made a professed father 20 Sept., 1641. Having laboured for a time in London, he became rector of the college at Liège from 1658 till 1662, where he was made procur-

ator at the professed house at Antwerp. His chief works, mostly written against Stillingfleet, are: "Truth will out" (1665); "Protestancy without Principles" (1668); "Reason and Religion" (1672); "The Infallibility of the Roman Catholic Church" (1674); "A Discourse of Miracles" (1676); and "Anti-Goliath" (1678), published after his death.

DODD, Church History (Brussels) vere Wolverhampton, 1737-42; FOLEY, Records Eng. Prov. S.J., IV and VII (London, 1883); OLIVER, Jesuit Collections (Exeter, 1838); COOPER in Dict. Nat. Biog., s.v.; DE BACKER, Bibl. des ecrivains de la Compagnie de Jesus.

EDWIN BURTON

Thomas Worthington

Thomas Worthington, D.D.

Third President of Douai College, b. 1549 at Blainscough Hall, near Wigan, Lancashire; d. at Biddulph Hall, Staffordshire in 1627. A member of an ancient and wealthy family which gave many members to the Church, and which suffered greatly for staunchness to the Faith, he studied at Brasenose College, Oxford (1566-70), where he graduated in arts (17 Oct., 1570). In Feb., 1573, he went to Douai College to study theology. He visited in England (Nov., 1575), in order to induce his father, who was an occasional conformist, to remove into foreign parts. After his ordination (6 April, 1577), he remained teaching the Roman catechism at Douai till Sept., 1578, and proceeded B. D. at the University of Douai (Jan., 1579). After ten months in England, he returned to Reims, accompanied William afterwards Cardinal, Allen to Rome, and set out again for England, Jan., 1580. He laboured assiduously and successfully, being especially remembered for his zeal in instructing the ignorant poor. In Feb., 1584, when his four nephews, whom he was conveying to Reims, were seized at Great Sankey near Warrington, he managed to escape detection, and to elude the vigilance of his enemies until July, when he was betrayed by a young man whom he had befriended, and seized at his lodgings in Islington. The lord treasurer committed him to the Tower, where he was confined in the "pit" for over two months. In Jan., 1585, with twenty other priests, he was put aboard ship by the queen's warrant of perpetual banishment, and conveyed to Normandy. For the next two years he expounded Holy Scripture at Reims. Sir William Stanley turned traitor in Jan., 1587, and with his Irish regiment entered the Spanish service; on 27 April Worthington became their chaplain at Deventer. He was recalled to Reims on 27 Jan., 1589, to undertake the offices of vice-president and procurator, but resumed his post as chaplain to the regiment at Brussels in July, 1591. He was honoured with the doctorate of divinity in 1588 in the Jesuit college at the University of Trier.

On the death of Dr. Richard Barrett (30 May, 1599) Worthington was appointed President of Douai College (28 June), by the cardinal protector, chiefly through the influence of Father Persons, the nominee of the secular clergy being rejected. The task to which he was set was a difficult one, and he appears to have lacked strength of character to cope with it. Since the return of the college from Reims in 1593 its embarrassments had continually increased, and this condition reacted upon the discipline. Dr. Worthington himself had in 1596 addressed a memorial to the cardinal protector on the state of the Roman College, in which he calls attention to the decline of Douai, which he ascribes to the innovations of Dr. Barrett. His presidency accordingly began with a pontifical visitation of the college, as a result of which new constitutions were drawn up in Rome. It was enacted that not more than sixty persons be supported on the foundation, that no student be admitted unless fitted to begin rhetoric, and that all students be required to take oath to receive sacred orders in due season. The protector also agreed to Dr. Worthington's proposal that a Jesuit be appointed ordinary confessor to the students. This was greatly resented by secular clergy. Worthington had made a vow to follow Cardinal Allen's guidance, and, after Allen's death, he subjected himself to Father Persons by a like vow (29 Dec., 1596). The clergy saw the influence of the Jesuits in every action of the president, and feared a design to hand over the college to the Society. Confidence was further shaken by Worthington's dismissal of the existing professors, and their replacement by young men who explain their author instead of lecturing. Moreover, priests were hurried to the Mission without adequate preparation or training. The climax was reached after the death of Father Persons (April, 1610) when Worthington became reconciled to the archpriest, to whom he offered his resignation. This was declined, but a conference between three representatives of each met at Douai (May, 1612). It petitioned the protector to appoint two of its members to assist the president in reforming the college, but this was met by the protector's "nihil innovandum". This change of policy brought upon Worthington the hostility of the vice-president, Dr. Knatchbull (al. Norton), and of Dr. Singleton, the prefect of studies, and they sent reports derogatory to his conduct and administration to Rome. There followed another pontifical visitation (Oct.---Nov., 1612), which discovered a truly deplorable condition of affairs. Disunion among the superiors, studies disorganized, discipline relaxed, the buildings out of repair, the appointments deficient, and the finances crippled by a heavy debt. Complaints were raised by the students about the inefficiency of their professors, the influence of the Jesuit confessor, and the interference of the Society in the government of the college. As a result Worthington was summoned to Rome (May, 1613) by the cardinal protector, and Dr. Kellison, for whose assistance in reforming the college he had petitioned, was appointed to succeed him (11 Nov.). Worthington was granted an annual pension of 200 crowns, and ap-

pointed an Apostolic notary with a place on the Congregation of the Index. While in Rome he became a member of the Oratory. In 1616 he returned to the English Mission and worked in London and in Staffordshire. He was made titular Archdeacon of Nottinghamshire and Derbyshire. Six months before his death he obtained admission into the Society of Jesus, with permission to make his noviceship upon the mission.

Dr. Worthington was the author of: "The Rosarie of our Ladie, with other Godlie exercises" (Antwerp, 1600), a Latin translation of which was also published at Antwerp in 1613; "Annotations to the Old Testament" (Douai, 1609-10); "A Catalogue of Martyrs in Englaunde for the profession of the Catholique faith (1535-1608)" (Douai, 1608); "Catalogus martyrum in Anglia (1570-1612) cum narratione de origine seminariorum, et de missione sacerdotum in Anglia" (Douai, 1614); "Whyte dyed Black" (1615), against the Calvinist Francis White; "An Anker of Christian Doctrine" (Douai *vere* London, 1622).

The staunchness of Dr. Worthington's four nephews, who were captured at Great Sankey, 12 Feb., 1584 (Thomas aged 16, Robert aged 15, Richard aged 13, and John aged 11), is worthy of perpetual remembrance. Their conflict is recorded in Bridgewater's "Concertatio" (1594), translated in Foley, "Records S. J.", II. Blandishment, promises, threats, stripes, brutality, and cunning were in turn applied in order to obtain information from them of the whereabouts of their uncle, and the names and practices of their Catholic friends, and to induce them to be present at the heretical worship. After some months all effected their escape. Thomas was retaken with his uncle at Islington, and remained a prisoner in the Gatehouse for upwards of two and a half years. He afterwards went abroad, married a niece of Cardinal Allen, and died at Louvain in 1619. Robert reached Reims, 22 Sept., 1584, and was joined there by Richard and John on 13 Oct. What they had undergone resulted in the death of Robert, 18 Feb., 1586, and of Richard, 8 June, 1586. John became a Jesuit, was the first missioner of the Society who settled in Lancashire, and the founder of the extensive Lancashire district; he died on 25 Jan., 1652.

The Five Sacred Wounds

The Five Sacred Wounds

Devotion. The revival of religious life and the zealous activity of St. Bernard and St. Francis in the twelfth and thirteenth centuries, together with the enthusiasm of the Crusaders returning from the Holy Land, gave a wonderful impulse to devotion to the Passion of Jesus Christ and particularly to practices in honour of the Wounds in His Sacred Hands, Feet, and Side. The reason for this devotion was well expressed at a later period in the memorial of the Polish bishops to Clement XIII:

"Moreover, the Five Wounds of Christ are honoured by a Mass and an Office, and on account of these wounds we venerate also the feet, hands and side of the most loving Redeemer, these parts of Our Lord's most holy body being held more worthy of a special cult than the others, precisely because they suffered special pains for our salvation, and because they are decorated with these wounds as with an illustrious mark of love. Therefore, with living faith they cannot be looked upon without a special feeling of religion and devotion" (Nilles, "De rat. fest. SS. Cord. Jesu et Mariae", I, 126).

Many beautiful medieval prayers in honour of the Sacred Wounds, including some attributed to St. Clare of Assisi (indulgenced on 21 November, 1885), have been preserved. St. Mechtilde and St. Gertrude of Helfta were devoted to the Holy Wounds, the latter saint reciting daily a prayer in honour of the 5466 wounds, which, according to a medieval tradition, were inflicted on Jesus during His Passion. In the fourteenth century it was customary in southern Germany to recite fifteen Pater Nosters each day (which thus amounted to 5475 in the course of a year) in memory of the Sacred Wounds. Corresponding to the Mass "Humiliavit" in the Roman Missal, there was in the medieval Missals a special Mass in honour of Christ's Wounds, believed to have been composed by St. John the Evangelist and revealed to Boniface II (532). It was known as the Golden Mass, and was indulgenced by Innocent VI (1362) or John XXII (1334); during its celebration five candles were always lighted. It was popularly held that if anyone should say or hear it on five consecutive days he should never suffer the pains of hell fire (Franz, "Messe im Mittelalter", 159).

The Dominican Rosary also helped to promote devotion to the Sacred Wounds, for while the fifty small beads refer to Mary, the five large beads and the corresponding Pater Nosters are intended to honour the Five Wounds of Christ (Beissel, "Verehrung

Marias", I, 525). Again, in some places it was customary to ring a bell at noon on Fridays, to remind the faithful to recite five Paters and Aves in honour of the Holy Wounds. A corona, or rosary, of the Five Wounds was approved by the Holy See on 11 August, 1823, and again in 1851. It consists of five divisions, each composed of five Glories in honour of Christ's Wounds and one Ave in commemoration of the Sorrowful Mother. The blessing of the beads is reserved to the Passionists.

Feast. The earliest evidence of a feast in honour of the Wounds of Christ comes from the monastery of Fritzlar, Thuringia, where in the fourteenth century a feast was kept on the Friday after the octave of Corpus Christi. The Office was rhythmical (Dreves, "Anal. hymnica", XXIV, 20; Grotfend, "Zeitrechnung", II, 1, 115). In the fifteenth century it had spread to different countries, to Salisbury (England), Huesca and Jaca (Spain), Vienna, and Tours, and was included in the Breviaries of the Carmelites, Franciscans, Dominicans, and other orders (Dreves, op. cit., XXIV, XL, XLII). The Feast of the Five Wounds, celebrated since the Middle Ages at Evora and elsewhere in Portugal on 6 February (at Lisbon on the Friday after Ash-Wednesday) is of historical interest. It commemorates the founding of the Portuguese kingdom in 1139, when, before the battle on the plains of Ourique, Christ appeared to Alfonso Henriquez, promising victory over the Moors and commanding him to insert into the coat of arms of the new kingdom the emblem of the Five Wounds ("Propr. Portugalliae" in Weiss, "Weltgeschichte", III, 251). This feast is celebrated to-day in all Portuguese-speaking countries. The Proprium of Venice of 1766, which contains perhaps the earliest series of movable feasts in honour of Christ's Passion, has the Feast of the Five Wounds on the second Sunday in March; it was granted in 1809 to Leghorn for the Friday after Ash-Wednesday, on which day it is still kept in many dioceses of Tuscany, and elsewhere (Mexico). Since 1831, when the feasts in honour of the Passion were adopted at Rome by the Passionists and the city, this feast was assigned to the Friday after the third Sunday in Lent. The Office is one of those bequeathed to us by the Middle Ages. As this feast is not celebrated in the entire Church, the Office and Mass are placed in the appendix of the Breviary and the Missal.

F.G. HOLWECK

G. Henry Wouters

G. Henry Wouters

Historian, b. at Oostham, Belgian Limburg, 3 May, 1802; d. 5 January, 1872. In 1829 he became professor of moral theology, and later also of ecclesiastical history at the University of Liege. At the reorganization of the University of Louvain in 1834 he became professor of ecclesiastical history to the faculty of theology, which post he filled until 1871. The first edition of his "Historiae ecclesiasticae compendium" appeared in three volumes (1842-43). In its time it had wide renown, and became a classical handbook in many countries. It was supplemented by the "Dissertationes in selecta historiae ecclesiasticae capita", four volumes (1868-72), which was to treat at greater length controverted questions from the earliest times to the Council of Trent, but which stopped at the fourteenth century. He drew his inspiration from Baronius, Pagi, and Noel Alexandre. He regarded ecclesiastical history as an auxiliary science to theology.

JUNGMANN in *Annuaire de l'Universite* (Louvain, 1873).

R. MAERE

Ven. Peter Wright

Ven. Peter Wright

Martyr, b. at Slipton, Northamptonshire, 1603; suffered at Tyburn, 19 May, 1651. After spending ten years in a country solicitor's office he enlisted in the English army in Holland, but deserted after a month, and for two years remained in the Flemish Jesuit Seminary at Ghent. In 1629 he entered the novitiate of the Society at Watten. After holding various offices at Liege and Saint-Omer he became chaplain to Sir Henry Gage's English regiment in the service of Spain. When Gage returned to England in the spring of 1644, Wright went with him and was present at the relief of Basing House, the seat of John, 5th Marquess of Wincheser. On Gage's death (13 January, 1645), at which he was present, Wright became the marquess's chaplain in his London house, where he was arrested on Candlemas Day, 1651. Committed to Newgate, he was eventually condemned at the Old Bailey under 27 Eliz., c. 2. His execution on Whit Monday took place before over twenty thousand spectators. He was allowed to hang till he was dead.

JOHN B. WAINEWRIGHT

William Wright

William Wright

Born at York, 1562; died 18 Jan., 1639. Though he came late (23) to his studies, he then made such good progress that he was many years professor of philosophy at Gratz and Vienna. Coming to help the English Mission in the great troubles that followed the Powder Plot, he became chaplain to the Gages at Hengrave Hall, Suffolk. But he was soon arrested and thrown into the Tower (July, 1607), and later into the White Lion Prison. This was the opportunity of his life. The Catholics had been discouraged by the fall of the archpriest Blackwell, who had taken, and publicly commended, the condemned oath of allegiance (see OATHS, ENGLISH POST-REFORMATION, II); Wright's brother Thomas, an ex-Jesuit and a brilliant scholar, supported him (see bibliography). William Wright disputed publicly against the oath with great vigour and effect; and the Gages, whom he had instructed, courageously refused to take it. Wright's fine qualities drew to him many converts. When the dreaded "plague" ravaged London and attacked the prison, he nursed the sick, buried the dead, and remained almost the only person untouched. In the confusion which followed this visitation he escaped to Leicestershire, where he organized a series of missions, which remained as he left them for many generations. From 1612 onwards he took to writing, and some twelve small volumes are ascribed to him: three of controversy, the rest translations of the works of Becan, Lessius, etc.

J.H. POLLEN

Franz Xaver Freiherr von Wulfen

Franz Xaver Freiherr von Wulfen

Botanist, b. at Belgrade, 5 November, 1728; d. at Klagenfurt, 17 March, 1805. He was the son of the Austrian lieutenant field-marshall, Christian Friedrich von Wulfen.

On completing his studies at Kaschau, Hungary, he joined the Jesuit Order in 1745, and resided as student and teacher (chiefly of mathematics and physics) at Vienna, Graz, Neusohl, Gorz, Lailbach, and (from 1764) Klagenfurt. After the suppression of the Jesuits in 1764 he remained at Klagenfurt until his death. The monument erected to him in 1838 describes him as "equally great as priest, scholar and man". From his twenty-second year he devoted himself with special zeal to botany. His unusual talents, his great exactness in observation and description, and his researches, carried on tirelessly for over fifty years, constitute him one of the leading botanists of the post-Linnaean epoch (the last third of the eighteenth century). He was a member of the academies or scientific societies of Berlin, Erlangen, Göttingen, Jena, Klagenfurt, Ratisbon, and Stockholm, and enjoyed a high repute with botanists of all lands, with whom he carried on an extensive correspondence in Latin, German, French, and other languages. The upland and valley flora of the Eastern Alps was his chief study. An excellent alpinist, he was the pioneer in disclosing and exploring the Austrian Alps. He made numerous trips to the south (on many occasions to the Adriatic Sea) and to the north as far as Holland. He was always collecting plants, phanerogamous and cryptogamous (especially lichens). He discovered many new species, of which he gave masterly descriptions in Latin and which he illustrated with excellent plates. The specific name "*Wulfenii*" was given to many plants in his honour, and N. Jacquin founded the genus "*Wulfenia*", which is still a botanical curiosity. The mineral Wulfenite (yellow lead ore) recalls his mineralogical studies and rich mineral collection. He published mineralogical, zoological, and botanical treatises in various periodicals and collections. Much of his literary work was printed only after his death, for example, his chief work "*Flora, norica phanerogama*" (Vienna, Lex. 8vo, 816 pp.), edited by Fenzl and Graf with a detailed biography of Wulffen as introduction, which was published only in 1858. The full list of his treatises and the rich literature dealing with him is given by Wurzbach.

JOSEPH H. ROMPEL

St. Wulfram

St. Wulfram

(VULFRAMNUS.)

Bishop of Sens, missionary in Frisi, born at Milly near Fontainebleau, probably during the reign of Clovis II (638-56); died 20 March, before 704, in which year a translation of his body took place (Duchesne, "Fastes épiscopaux de l'ancienne Gaule", II, Paris, 1900, 413). His father Fulbert stood high in the esteem of Dagobert I and

Clovis II. Wulfram received a good education, and was ordained priest. He intended to spend a secluded life but was called to the Court of Theodoric III of Neustria and from there was elevated to the episcopacy of Sens, 684 (690, 692). He was present at an assembly of bishops in 693 at Valenciennes. Two years later he resigned and retired to the Abbey of Fontanelle. During the second journey of St. Boniface to Rome Wulfram is said to have preached in Frisia. He tried to convert Radbod, but not succeeding he returned to Fontanelle. Some authorities record another and longer stay in Frisia, but, as neither Bede nor Alcuin mention his missionary labour there, it is barely possible. The relics of the saint were brought to Notre Dame at Abbeville in 1058. His feast is celebrated 20 March.

FRANCIS MERSHMAN

Wurtemberg

Kingdom of Würtemberg

In area the third and in population the fourth of the states of the German Empire. It is situated between Bavaria and Baden. Its area is 7534 sq. miles; in 1910 it had 2,437,574 inhabitants. In 1905 there were 695,808 Catholics, 1,583,745 Protestants, 11,107 other Christians, and 12,053 Jews. The capital is Stuttgart. The kingdom is divided into four circles: Neckar (in which 11 per cent of the inhabitants are Catholics); Black Forest (26 per cent); Jagst (32 per cent); and Danube (62 per cent). The southern part of the country is largely Catholic, as is also the majority of the higher nobility, the members of which were formerly immediate princes of the empire.

The territory includes a part of the old tribal duchy of Alamannia or Swabia (Suevia). The original nucleus of the present kingdom was a Countship of Würtemberg, at the junction of the small rivers Rems and Fils with the Neckar. The name *Württemberg*, originally *Wirtenberg*, is derived from a castle of the same name on the Roten Berg (red mountain) south of Stuttgart. The first known ancestor of the present ruling family is Count Konrad (1081-92); the unbroken succession of rulers began with Count Ulrich I (1241-65). The possessions of the Counts of Würtemberg grew steadily larger. Contrary to the custom in other German states, the principle of primogeniture was established at an early date. Count Eberhard the Bearded (1450-96) was

made a duke in 1495 by the Emperor Maximilian I. In 1803 Würtemberg received the electoral dignity, and in 1805 Napoleon raised it to a kingdom. Like the other states of southern Germany, Würtemberg became a member of the Confederation of the Rhine, and until after the battle of Leipzig (1813) it was an ally of France. In 1815 it entered the German Confederation, in 1866 it supported Austria in the war with Prussia. At the close of the Austro-Prussian war it was obliged, like the other states of South Germany, to form an offensive and defensive alliance with Prussia. When the German Empire was founded in 1871, Würtemberg became a member of the confederation, and was granted, like Bavaria, certain special privileges. The present ruler is King William I (b. 1848), who is childless. Since the Reformation the royal family has been Protestant. Duke Charles Alexander (1733-37) had become a Catholic in 1812, when a general in the Austrian army, before he ascended the throne; he was succeeded in the government successively by his sons, also Catholics: Duke Charles Eugene (1737-93), a despot, spendthrift, and profligate, Duke Louis Eugene (1793-95), and Duke Frederick Eugene (1795-97). The last-named duke married a Prussian princess, and, through the influence of Frederick the Great of Prussia, permitted his children to be brought up as Protestants. The succession of Protestant rulers began with Duke Frederick II (1797-1816), who was made King of Würtemberg in 1805 and after that was called Frederick I. On the death of the present king the Protestant line becomes extinct. The succession to the throne is in a collateral branch descended from Duke Alexander (d. 1833), a brother of the first King of Würtemberg. The son of this Alexander, also named Alexander (d. 1881), married a Catholic princess of the Orleans family and allowed his children to be brought up as Catholics. The heir to the throne is a grandson of this latter Alexander, Duke Albert (b. 1865), or, in case of his death, his son Duke Philip Albert (b. 1893). In 1898 a law bearing upon the Catholic succession to the throne was enacted, which regulated the relations of a Catholic king to the Protestant State Church.

Christianity spread rapidly in the territory of the present Kingdom of Würtemberg in the seventh and eighth centuries. As early as the Roman era it had found a foothold at scattered spots in the second and third centuries, but was not permanently established until the reign of Charlemagne (d. 814). The care both of religious life and of the entire intellectual life was exercised by the monasteries, especially by those of the Benedictines. Probably the most celebrated Benedictine abbey was that of Hirsau, which was founded about 850 and reorganized to conform to the Rule of Cluny by the abbot Blessed Wilhelm (d. 1091). After the Reformation the abbey was a Protestant institution, and in 1692 it was destroyed by the French. Other important Benedictine abbeys were: that at Alpirsbach, in the Kinzigtal, founded in 1095 and existed until 1648; its fine Romanesque abbey church is now used by the Protestants; the abbey at Ellwangen,

founded in 764, from 1460 a house of secular Augustinian Canons which was directly dependent on the Empire, and which was suppressed in 1803; its fine abbey church is in the Romanesque style; the abbey at Murrhardt, founded by the Emperor Louis the Pious, suppressed during the Reformation; a part of it was the celebrated late Romanesque chapel, now used by the Protestants, called Walderichskapelle; the abbey at Weingarten (1052-1802), the richest abbey in Swabia; the abbey at Wiblingen (1093-1806); that at Sweifalten (1089-1803), etc. Two noted Cistercian abbeys which have preserved almost entirely their typical medieval form are: the abbey at Maulbron, founded in 1146, became a Protestant theological seminary in 1556, and the abbey at Bebenhausen, founded in 1185, made a Protestant monastery school in 1560, and since 1807 a royal hunting castle. Among the proofs of the flourishing condition of Catholic life in the cities during the era before the Reformation are some of the celebrated monuments of Gothic architecture, as: the minster at Ulm, now used by the Protestants, which next to Cologne cathedral is the largest church building in Germany, and has an area of about 75,778 sq. feet; the Church of the Holy Cross and of Our Lady, at Schwäbisch-Gmund, without a tower; and the Church of Our lady at Reutlingen, now used by the Protestants. Among the noted Catholic churches of a later date special mention should be made of the Catholic cathedral at Rottenburg (seventeenth century), and the church at Weingarten, a structure of the eighteenth century in the baroque style. This latter church is distinguished for a relic of the Holy Blood, in honour of which a large equestrian procession, called the *Blutritt*, is held annually on the Friday after Ascension Day.

As early as the years 1520-30 the Reformation found entrance into Würtemberg. The extravagance and cruelty of a number of the rulers and the harsh oppression of the people had led to several fierce wars with the cities and revolts of the peasantry; all this prepared the way for the new doctrine. Duke Ulrich (1498-1550), who had been driven from the country on account of his acts of violence and had been put under the ban of the empire in 1519 for murder, became a Protestant. With the aid of Landgrave Philip of Hesse, who is well known on account of his two marriages, Ulrich acquired possession of his territories once more, and introduced the Reformation throughout them, while at the same time he confiscated all the lands of the churches and monasteries. The work of the Reformation was completed by Ulrich's son Duke Christopher (1550-1568). Würtemberg suffered terribly in the great religious struggle known as the Thirty Years War. At the beginning of the nineteenth century it had an area of 2093 sq. miles and 650,000 inhabitants. Owing to the great changes brought about in Germany by Napoleon, Würtemberg obtained during the years 1802-1810 an increase of population that doubled the number of its inhabitants and an increase of territory that gave the country its present extent. This increase added Catholic dis-

tricts once more to the state, which up to then had been entirely Protestant. The additions were, mainly, a large part of the Austrian possessions in Swabia, the lands of the Teutonic Knights, which up till then had been held immediately from the empire, the lands belonging to the provostship of Ellwangen, the lands of various monasteries which had held their territories directly from the empire, etc. A state board called the spiritual council was at once appointed to protect the sovereign rights of the State as against the Catholic Church; since 1816 this board has been called the church council. The newly acquired Catholic districts, however, belonged to different dioceses, e.g. the dioceses of Constance, Augsburg, Wurzburg, and Speyer, consequently a vicar-generalate was created which was provided with a seminary for priests and a Catholic theological faculty at Ellwangen. In 1817, however, the office of the vicariate general and the seminary for priests were transferred to Rottenburg, where they were established in the Carmelite monastery of that place, and the Catholic theological faculty was united with the University of Tübingen.

On 16 Aug., 1821, the papal Bull "Provida sollersque" erected the new Diocese of Rottenburg for the entire territory of Würtemberg; it was united with the Church province of the Upper Rhine and was made suffragan to the Archbishop of Freiburg. The Bull "Ad dominici gregis custodiam", of 11 April, 1827, regulated the right to the appointment of the bishop and of the cathedral canons, and in 1828 Vicar-General von- Keller was enthroned as first bishop. The list of bishops is: Johann Baptist von Keller (d. 1845), Joseph von Lipp (d. 1869), Karl Joseph von Hefele (d. 1893), William von Reiser (d. 1898), Franz Xaver von Lisenmann (d. 1898); since 18 Jan., 1899, Paul Wilhelm von Kepler (b. 1852; ordained priest, 1875). During the decade of 1840 a dispute arose between the bishop and the State concerning the limits of the State's rights of sovereignty and supervision. In 1854 the Government made an agreement with the bishop which, however, was not recognized by the pope. A concordat between the pope and the kingdom, which was made in 1857, was not accepted by the Diet. After this the law of 30 Jan., 1862, made a one-sided adjustment of the relations between State and Church. In most particulars this law repeated the contents of the Concordat, so that up to now actual conflict has been avoided. Würtemberg was spared the violent conflict between Church and State, known as the *Kulturmampf*, which raged in almost all of the German countries of the empire during the years directly following 1870. This peace was due to the kindness of the king, the good sense of the Government, and the moderate position taken by the Diet. It is only of late years that religious differences have become more evident in political life. Much is said in the history of the Church of Würtemberg of the Rottenburg dispute. This was a quarrel between the bishop, the Catholic theological faculty, and the director of the Wilhelm School at Tübingen on the one side, and the heads of the seminary for priests and a large body

of the priests on the other side, as to the religious, scholarly, and moral training of the clergy. The matter was settled by the intervention of the Holy See.

The relations between Church and State are regulated by the law of 30 Jan., 1862. Both the bishop and the vicar-general appointed by him received the rank of nobles. The bishop is elected from among the clergy of the diocese by the cathedral chapter, which consists of a cathedral dean and six canons; the list of candidates is first handed to the ruler, who strikes off the names of the most distasteful to him. The members of the cathedral chapter are selected alternately by the bishop or chapter, the ruler having the same rights as in the election of a bishop. The governmental right of supervision (*jus circa sacra*) is exercised by the Catholic Church council, a board subordinate to the ministry of worship and consisting of secular and ecclesiastical members, which is appointed by the Government. General ordinances issued by the bishop that are not purely ecclesiastical in character, and papal Bulls, Briefs, etc., which touch upon governmental or civil affairs, are subject to the approval of the State. Episcopal or papal decrees in regard to purely ecclesiastical matters need only to be submitted to the State authorities for inspection at the time of their promulgation. For admission to an ecclesiastical office the candidate must have the civil rights of a citizen of Würtemberg, must have attended a gymnasium, have studied at the University of Tübingen, and have passed the final examination of the Catholic theological faculty there. For the training of the clergy there are seminaries for boys connected with the gymnasium at Ehingen and Rottweil, and the Wilhelm School at Tübingen for the students of theology at the University of Tübingen. These three schools are supported by the State. In these institutions the bishop directs the religious training under the supervision of the State; in other respects they are under the direct control of the Government, which is exercised through the Catholic Church council. In particular, the council controls the reception and dismissal of the pupils. The director and his assistants, called *repetents*, are appointed by the bishop. After passing the final theological examination at the university, which comes at the close of a four- years course in theology, the candidates for the priesthood are sent to the seminary for priests at Rottenburg, which is controlled by the bishop alone. The bishop also has charge of the Catholic religious instruction in all schools.

The consent of the State, which can be recalled at any moment, is necessary for the admission of religious orders and congregations and for every new house of an order or congregation. The State treats the vows of the members of the orders as revocable. Up to the present time only female orders have been permitted in Würtemberg. The largest number of houses (about 130) belong to the Sisters of Charity of St. Vincent de Paul, the mother-house being at Untermarchtal; the Congregation of the Third Order of St. Francis has over 100 houses, the mother-house being at Reute. Up to now

the Government has not granted the repeated requests of the bishop and of the Catholic portion of the population for the admission of male orders. The State granted the diocese an endowment from the former property of the Church, e.g. in houses, lands, and revenues in money; this property is administered by the episcopal court under the supervision of the Government. The sustentation fund established in 1808 received definite sums from the revenues of vacant ecclesiastical positions; these amount serve to supplement the salaries of parish priests, to pension retired priests, etc. The fund is administered by the Government and Church together. The administration of the property of the local churches is also regulated by the State (laws of 14 June, 1887, and of 27 July, 1906). A definite allowance is added from the state treasury to the incomes of the priests from their benefices; in 1911 the total amount of state aid was fixed at 225,000 marks annually. Measures are being taken for the reorganization of the financial relations between Church and State. In 1910 the number of churches, chapels, and stations was 1031, of these 698 were parishes; there were 1179 priests, and 29 deaneries. The primary schools are denominational. When the number of Catholics in a commune falls below 60 the Catholics must support a Catholic school out of their own means. The spiritual supervision of the schools was greatly limited in 1903 and 1909. Of the higher schools 4 classical gymnasia and 1 gymnasium with scientific instead of Classical courses are entirely Catholic. All Catholic schools are under a special government board, the Catholic higher school council. There are a number of Catholic educational institutions for poor, orphaned, and sick Catholic children; these institutions are generally conducted by members of the female orders, as is also a government institution, the royal orphanage at Oxenhausen. Religious fraternities and societies are numerous.

HERMAN SACHER

Diocese of Wurzburg

Diocese of Würzburg

(HERBIPOLENSIS).

Located in Bavaria; suffragan of Bamberg. The diocese includes the Bavarian governmental department of Lower Franconia, three communes of Upper Franconia, the Grand- Duchy of Saxe-Meiningen, and several enclaves in Bavaria belonging to the Grand Duchy of Saxe-Weimar (see GERMANY, Map). In 1911 it contained a city deanery with 10 parishes, 34 rural deaneries, 447 parishes and curacies, 62 benefices, 69 local chaplaincies and expositoships, 147 chaplains, 445 parish priests and curates, 35 holders of benefices, 67 local chaplains and expositors, 118 chaplains and assistants, 47 ecclesiastics engaged in administration and teaching, altogether 712 active diocesan priests, 55 retired priests, 121 regulars, 560,000 Catholics, and about 120,000 non-Catholics. The bishop is appointed by the Bavaria Government. The cathedral chapter consists of a provost, a dean, 8 capitulars, 6 prebends, and 1 cathedral preacher. The institutions for the education and training of the priesthood are: the Catholic theological faculty at the University of Würzburg, with 8 professors; the Catholic seminary for priests at Würzburg, with 75 students; the seminary for boys (the *Chilianeum*); and the episcopal house of studies. The following orders are represented in the diocese: Augustinians, 4 monasteries, 37 fathers, 52 brothers; the Benedictine Brotherhood of St. Louis, 1 house, 7 fathers, 20 brothers; Franciscans, 6 monasteries, 19 fathers, 47 brothers; Capuchins, 6 monasteries, 31 fathers, 45 brothers; Carmelites, 1 house, 10 fathers, 10 brothers; Franciscan Conventuals, 2 monasteries, 20 fathers, 24 brothers. Female orders and congregations: English Ladies, 6 convents, 154 sisters; Franciscan Nuns from the mother-house of Maria Stern at Augsburg, 41 houses, 209 sisters; Franciscan Nuns from the mother-house at Dillingen, 16 houses, 114 sisters; Carmelite Nuns, 1 house, 20 sisters; Sisters of the Most Holy Saviour, 1 mother-house, 184 branch houses, 1160 sisters; Sisters of the Childhood of Jesus, 7 houses, 152 sisters; Sisters of Notre-Dame, 23 houses, 182 sisters; Sisters of St. Joseph from the mother-house at Ursberg, 1 house, 87 sisters; Sisters of St. Vincent de Paul from the mother-house at Munich, 1 house, 13 sisters; Ursuline Nuns, 1 house, 43 sisters. Catholic associational life is in a flourishing conditions.

The cathedral at Würzburg, a Romanesque basilica with pier- arches, the most important Romanesque cathedral in Germany, was built between the twelfth and the fourteenth centuries. In the seventeenth century its interior was overloaded with Baroque stucco work and spiral ornamentation; it contains 35 tombs, several by Riemenschneider, of the prince-bishops. At the north end of the transept is the

Schönborn chapel, a domed structure in the most elaborate Rococo style. The Neu-munster Church, or Cathedral, of St. Kilian (Baroque style), built during 711-16 in place of the earlier church over the grave of St. Kilian, contains the bodies of St. Kilian and his companions; the Hauger Collegiate Church, built (1670-83) by Petrini, has a fine dome; the Church of St. Peter, originally Romanesque with a Gothic choir, was enlarged in the Baroque style during 1717-20; the University Church, built by Julius Echter von Mespelbrunn and dedicated in 1591, is a curious mixture of Gothic and Renaissance styles; the Chapel of the Virgin (Marienkapelle), a Gothic church, built 1377-1479, contains numerous figures by Riemenschneider; the Church of St. Adalbero, built 1896-99, is in Romanesque style from the design by Denzinger; the church of St. Burchard, erected in the eleventh century in the Romanesque style on the site of a monastery church built by St. Burchard, was enlarged in Gothic style during 494 to 1497. Outside of Würzburg special mention should be made of the church at Dettelbach and the collegiate church at Aschaffenburg. Places of pilgrimage are: the Church of St. Nicholas (called *Käppele*) near Würzburg; the Franciscan monastery church near Dettelbach, and the Engelberg near Miltenberg.

The first Apostle of Christianity for the territory now included in the Diocese of Würzburg was the Irish missionary, St. Kilian (q.v.), who converted Gozbert the Frankish duke of Thuringia but who fell a sacrifice to the enmity of the duchess. In his castle above Würzburg, Gozbert's son Hetan built the first church dedicated to the Blessed Virgin; on this account the castle received the name of Marienburg. The first mention of Würzburg is in 704, when it is called *Castellum Virtebuch*. A diocese was established in Würzburg by St. Boniface, who in 741 consecrated his friend St. Burchard as bishop; in 742 Pope Zachary confirmed the selection of Burchard. St. Burchard (741-53) built the first cathedral church, and buried there the bodies of St. Kilian and his companions; he connected with the church a monastery which followed the Rule of St. Benedict. Karlmann, the Frankish mayor of the palace, gave great gifts of land to the bishopric. In 752 or 753 the church of Würzburg was granted immunity for all its possessions, also secular jurisdiction, whereby the foundation was laid for the future secular authority of the bishops. Like the majority of his successors, St. Burchard lived at the Marienburg, which he had received from the last duke in exchange for another fortified castle. His successor, St. Megingoz or Megingaud (753- 85), did much towards Christianizing Saxony. Bishop Bernwulf (785- 800) replaced the Benedictine secular clergy at the cathedral by the Brothers of St. Kilian, who led a common life after the rule of Chrodegang of Metz. Arno (855-92) rebuilt the cathedral, which had been destroyed by lightning, on the site of the present cathedral; in 892 he took part in the campaign of Emperor Arnulf against the Duke of Moravia, and was killed by the enemy while celebrating Mass. During the episcopate of Dietho (908-31) the

privileges of the diocese were confirmed anew by Henry I. Burchard II (930-41) rebuilt the cathedral, which had been burned a second time. Poppo I of Henneberg (941-61) obtained for his diocese from Emperor Otto I, whose chancellor he had been, the right of the free election of the bishop. Bishop Henry I of Rothenburg (995-1018) built, on the site of the first cathedral, the Neumunster Cathedral of St. Kilian, and founded the Benedictine Abbey of St. Stephen and the abbey of Augustinian Canons called Haug, in which he himself was buried. He gave an unwilling consent to the separation from his diocese, by Emperor Henry II, of a large part of its territory; this portion was made into an independent diocese, the "imperial" Archdiocese of Bamberg. Bernhard of Rothenburg (1018-33) received from Emperor Henry II the right to the use of the forest in the Steigerwald, and from Emperor Conrad II the right of coinage and of exacting customs. The Saxon Bruno (1034-45), a cousin of Conrad II, laid the cornerstone of the present cathedral, and restored the Abbey of St. Burchard. His nephew and successor, who is venerated as Saint Adalbero of Lambach and Weis (1045-90), sided with the pope in the Conflict of Investitures, took part in the election of both rival kings, and was therefore declared deposed from his bishopric by Emperor Henry IV, and forced into exile. The city and diocese suffered greatly during the struggles in which papal and imperial bishops frequently engaged. During the episcopate of Erlung (106-26), who received from Henry V the formal confirmation of the dignity of a Duke of Eastern Franconia, peace was restored in the diocese. Embrico (1125-47) favoured the founding of monasteries of the reformed orders, as: the Cistercian Abbey of Ebrach; the Premonstratensian Abbey of Zell near Würzburg, established by St. Norbert himself; the Scotch Abbey of St. James in Würzburg. Under Gebhard of Henneberg (1150-59) Frederick Barbarossa celebrated at Würzburg his marriage with Beatrice of Burgundy; Herold of Höchheim (1165-71) received from Barbarossa "complete judicial authority in the entire diocese and duchy of Würzburg and over all countships situated in the diocese or duchy".

The brilliant position which the bishops occupied among the German princes often cost the diocese heavy sacrifices on account of the wars and expeditions to Rome which the bishops were obliged to undertake in the retinue of the emperors; the bishops were involved, not only in the Conflict of Investitures, but also in the struggle of the Hohenstaufen dynasty with the popes. The city of Würzburg made use of this struggle to gain greater freedom from the episcopal power, and strove to obtain freedom of the empire. The vigorous Bishop Hartmann von Lodenburg (1225-54), a loyal adherent of Frederick II, was able to keep the citizens within bounds, but during the episcopate of his successor, Iring von Reinstein (1254-66), Würzburg joined the confederation of the cities of the Rhine as an independent city. This bishop encouraged the settlement of the Dominicans in the diocese. His successors had to wage many wars with the city. Al-

brecht von Hohenlohe (1345-72), during whose reign the diocese was ravaged with the Black Death, checked the presumption of the citizens with the aid of Emperor Charles V; Gerhard von Schwarzburg (1372-1400) by his victory over the citizens at Bergstein, in 1400, put an end to the schemes to make Würzburg a free city of the empire. John I von Egloffstein (1401-01), an excellent administrator, founded the university. John II von Brunn (1411-40) brought the diocese to the brink of financial ruin. Gottried IV von Limburg (1442-55), a zealous reformer, and John III von Grumbach (1455-6) had to fight against the claims of the Margraves of Ansbach and Bayreuth of the Brandenburg line. The able Rudolph von Scherenberg (1466-95) raised the diocese to a very flourishing condition, so that he was regarded as the second founder of the bishopric. The same spirit animated Lorenz von Bibra (1495-1519), a friend of Humanism and a patron of Trithemius, whom he appointed abbot of the Scotch monastery at Würzburg. Conrad von Thungen (1519-40) sought to the utmost of his ability to prevent the entrance of the new doctrines. During his episcopate the peasants who had revolted devastated the diocese, and the episcopal castle suffered a long siege from 20,000 peasants. Melchior von Zobel (1544-58) sought to preserve his diocese to the Catholic Faith by instituting reforms, and for this purpose he attended the Council of Trent, but the cathedral chapter, which was composed of worldly minded nobles, blocked his efforts; he was murdered by a Protestant nobleman, William von Grumbach. Frederick von Wirsberg (1558-73) brought the Jesuits to Würzburg, and in 1570 gave them charge of the seminary for boys and a boarding-school which he had established. He was followed by the greatest bishop Würzburg ever had, Julius Echter von Meselbrunn (1573-1617), during whose episcopate the diocese took on fresh life. Of his labours the university, which he refounded, and the Julius Hospital, built by him, for hundreds of years the largest charitable institution in all Germany, still exist. John Gottfried von Aschhausen (1617-22) united for the first time the dioceses of Würzburg and Bamberg. During the episcopate of Philip Adolph von Ehrenberg (1622-31) many persons were put to death, among them the bishop's nephew, for superstitious belief in witches. This led the Jesuit Frederick von Spee to write his celebrated treatise against belief in witches.

In 1631 the Swedes conquered the diocese and city, which, united with Bamberg, was given to Duke Bernhard of Saxe-Weimar as the Duchy of Franconia. It was not until the imperial troops were victorious at Nordlingen in 1634 that Bishop Frederick von Hatzfeld (1631-42) could enter his diocese. Notwithstanding their oppression by the Swedes, the population remained loyal to the Catholic Faith. During the reign of John Philip von Schönborn (1642-73) the diocese recovered from the injuries of the Thirty Years War. Francis Philip von Greiffenklau (1699-1717) had the cathedral and the Church of St. Peter ornamented in the Baroque style. The diocese ad city prospered

greatly under Philip Francis von Schönborn (1719-24), who laid the corner-stone of the episcopal palace at Würzburg, one of the finest examples of Baroque architecture in the world. Christopher von Hutten (1724-29), and Frederick Karl von Schönborn (1729-46). Adam von Seinsheim (1755- 79), during whose episcopate the Seven Years War caused the diocese great suffering, did much for the benefit of the primary schools. He was followed by the excellent Bishop Francis Ludwig von Erthal (1759-95). The last Prince-Bishop of Würzburg was George Karl von Fechenbach. In 1802 the diocese, which contained over 250,000 inhabitants, was secularized and given to Bavaria. After the Peace of Pressburg, Bavaria was obliged to cede it to the brother of Emperor Francis, the Grand Duke of Tuscany, who ruled it as the Grand Duchy of Würzburg until 1814. After the fall of Napoleon the territory reverted to Bavaria. After the death of the bishop ecclesiastical affairs were administered by the auxiliary bishop, Zirkel, who courageously and successfully maintained the rights of the Church against the Governments and statesmen.

The Bavarian Concordat of 1817 and the Bull "Dei ac Domini nostri", of 1 April, 1818, established the Diocese of Würzburg with its present boundaries, and made it a suffragan of the smaller and less ancient Diocese of Bamberg; the Bishops of Würzburg, however, were granted the right to the pallium. The new bishop, Frederick Gross von Trockau (1818-40), did much for the reorganization of the diocese and for the training of the clergy. During the episcopate of George Anthony von Stahl (1840-70) there was held in 1848 at Würzburg the conference of German bishops which inaugurated a new development of Catholic life in Germany. Bishop von Stahl died at Rome during the Vatican Council, in which he had taken an active part. He was followed by Valentine von Reissmann (1871-75), his vicar-general for many years; von Reissmann took successful measures against the spread of the Old Catholic Church. Francis Joseph von Stein (1878-98), who laboured for the improvement of the education of the clergy and courageously defended the rights of the Church, was transferred to the archiepiscopal See of Munich- Freising (see ARCHDIOCESE OF MUNICH-FREISING). The present bishop, Ferdinand von Schlor, was appointed on 5 March, 1898, and consecrated on 22 May, 1898.

JOSEPH LINS

University of Wurzburg

University of Wurzburg

John I of Egloffstein (1400-1411), Bishop of Wurzburg, obtained from Pope Boniface IX a charter, dated 10 December, 1492, for the university. The university was designed after that of Bologna, and gave special attention to the faculties of theology and canon and civil law. After the death of its founder it began to decay, as the cathedral chapter, which was composed of members of the nobility, withdrew its means of support. More than a century later, Bishop Julius Echter von Mespelbrunn re-established it, and on 28 March, 1575, Pope Gregory XIII issued the Bull granting the charter to the new university, which was to have the privileges of the universities of Paris and Bologna. The buildings were erected during 1582-91, and the university was opened on 2 January, 1582. The Julius Hospital came into close connection with the university, and thus gave the medical faculty a large field for observation and practice. In the eighteenth century the bishops who did most for the encouragement of learning were Frederick Charles Count von Schonborn, Adam Frederick Count von Seinsheim, and Francis Louis von Esthal. At the close of the eighteenth century the university was characterized as "the best Catholic university in the whole of Germany" by Magister F.C. Laukhard, a man who was well known in the universities both of Germany and of foreign countries. In its subsequent development also the university sought to maintain this reputation. The faculties of theology and philosophy were entrusted to the Jesuits until the suppression of the Society; from that time the Jesuit professors remained as secular priests. In 1803 the ecclesiastical principality of Wurzburg was secularized, and after a short period, during which it was ruled by the Grand Duke of Tuscany (1806-14), it was united with Bavaria. The reputation of the university grew,

especially of the medical faculty, which ranked very high. Since the middle of the nineteenth century separate buildings have been built for the departments of medicine and natural sciences; in 1897 the new academic building was erected. The theological faculty also has included names of note; of those in modern times mention may be made of Cardinal Joseph Hergenrother, Francis Seraph Hettinger, Anton Scholz, and Hermann Schell. The Bishops of Wurzburg during 1840-1898 (von Stahl, von Reissmann, and von Stein) had all been members of the theological faculty of the university. In the summer of 1911 the students numbered 1509.

KARL HOEBER

Wurzburg Abbeys

Würzburg Abbeys

The city of Würzburg was the seat of four Benedictine abbeys, namely, the Holy Redeemer's, or St. Kilian's; St. Andrew's, later known as St. Burchard's; St. Stephen's; and the Scotch Abbey of St. James.

Abbey of the Holy Redeemer (S. Salvatoris)

This abbey, also called after St. Kilian, who was buried there, was founded by St. Burchard, the first Bishop of Würzburg, about 745. The monks had charge of the cathedral (Salvatormünster) and the cathedral school. The latter gained considerable renown. Probably owing to laxity in observance of the rule, Bishop Bernwulf of Würzburg replaced the monks in 786 by canons who led a common life and were popularly styled Brothers of St. Kilian. The expelled monks, more than fifty in number, found a home at the Abbey of Neustadt on the Main, where Bishop Megingaud, who had resigned the See of Würzburg, was abbot.

St. Andrew's Abbey (afterwards St. Burchard's)

St. Andrew's was founded by St. Burchard shortly after 748, and soon became famous for its monastic school. After a period of decline in the tenth century it was reformed in 988 by Bishop Hugo of Würzburg, who rebuilt the church and the monastery and placed Arnold, a monk of Hirasu, as abbot over it. On 14 October, 984, this bishop had transferred thither the body of St. Burchard, and from that time the mon-

astery became known as St. Burchard's Abbey. Church and monastery having been destroyed by fire about 1030, Abbot Wilemuth rebuilt both (1033- 42), and in 1042 Bishop St. Bruno of Würzburg dedicated the new church in presence of Emperor Henry III and six bishops. Yielding to the request of the monks, Pius II, in a Bull dated 4 February, 1464, changed the abbey church into a collegiate church, and permitted the former monks to remain as canons.

St. Stephen's Abbey

Founded by Henry of Rothenburg, Bishop of Würzburg, about 1013, for canons who followed the Rule of St. Chrodegang. In 1057 Bishop Adalbero replaced the canons by thirty Benedictine monks from Ansbach. After a short period of decline in the first half of the fifteenth century, the abbey joined the Bursfeld reform in 1459. After suffering another period of decline in the latter half of the sixteenth century, it continued in a flourishing condition until its secularization in 1803. Since then the abbey church and the monastery have been used as a Protestant parish church and school. The historian Ignaz Groppe (1695-1758) was a monk of St. Stephen's. He wrote the history of several Franconian saints and monasteries, and edited "Collectio novissima scriptorum et rerum Wirecebburgensium a saecula XVI hactenus gestarum" (4 vols., Frankfort and Würzburg, 1741-50).

St. James's Abbey (St. Jakob zu den Schotten)

Founded as a Scotch monastery by Bishop Embrico of Würzburg about 1134. Its first abbot was Bl. Macarius (1139-53) who with a few other monks had come from the Scotch monastery at Ratisbon. In 1146 he went to Rome to obtain relics and indulgences for his monastery. He died in 1153, and has always been honoured as a saint. His feast is celebrated on 24 January. The monks at St. James's were all Irish or Scotch until 1497, when their number had dwindled down to one or two. The abbey was then given over to German monks, and in 1506 it was united to the Bursfeld Congregation. From 1506-16 the famous Johannes Tritheimus (q.v.) was its abbot. In 1547 the whole monastery had died out, and its revenues went to the Bishop of Würzburg. Upon the request of John Whyte, Abbot of the Scotch monastery at Ratisbon, it was again restored to the Scotch monks by Bishop Julius in 1595, and prospered for some time. Its last abbot, Placidus Hamilton, who, though very learned, lacked the qualities of a good ruler, resigned and retired to London in 1763. From that time till its secularization in 1803 it was ruled by priors. At its secularization it numbered eight monks. The buildings are now used as a military hospital.

List of abbots: Macarius, 1139-53; Christian, 1153-79; Eugene, 1179-97; Gregory, 1197-1207; Matthew, 1207-15; Teclan, 1215-17; Elias I, 1217-23; Celestine, 1223-34; Gerard, 1234-42; John I, 1242-53; John II, 1253-74; Maurice I, 1274-98; Joel, 1298-1306; Elias II, 1306-18; John III, 1318-35; Michaelas, 1335-41; Rynaldus, 1342; Philip

I, 1342-61; Donaldus, 1361-?, d. 1385; Henry, 1379; Maurice II, 1381?-88?; Timothy, 1388?-99; Imar, 1399-1409?; Rutger, 1409?-17; Thomas I, 1417-37; Roricus, 1437-47; Alanus, 1447-55; Maurice III, 1455-61; John IV, 1461-3; Otto, 1463-5; Thaddeus, 1465-74; David, 1474-83; Thomas II, 1483-94; Edmund, 1494-7; Philip II, 1397. These were followed by five German abbots: Kilian Crispus, 1504-6; Trithemius, 1506-16; Matthias, 1516-35; Erhard Jani, 1535-42; Michael Stephan, 1542-7. Since its restoration to the Scotch monks in 1595 the following were its abbots: Richard Irvin, 1595-8; John Whyte, at the same time Abbot of the Scotch monastery at Ratisbon, 1598-1602; Francis Hamilton, 1602-14; William Ogilbay, 1615-35; Robert Forbes, 1636-7; Audomarus Asloan, 1638-61; Maurus Dixon, 1661-79; Bernard Maxwell, 1679-85; Marianus Irvin, 1685-8; Ambrose Cook, 1689-1703; Augustine Bruce, who ruled as prior during 1703-13, and as abbot during 1713-16; Maurus Strachan, 1716-37; Augustine Duffus de Fochaber, 1739-53; Placidus Hamilton, 1756-63.

MICHAEL OTT

Theophile-Louis-Henri Wyart

Théophile-Louis-Henri Wyart

(In religion DOM SEBASTIAN).

Abbot of Cîteaux and Abbot-General of the Order of Reformed Cistercians, b. at Bouchain, Department of Nord, France, 12 Oct., 1839; d. in Rome, 18 Aug., 1904. Of a pious and studious disposition, he made rapid progress in the usual branches of learning, under private tutors and at both the *petits* and *grands séminaires* of the Archdiocese of Cambrai. Feeling an attraction for both the clerical and military calling, he hesitated long and was for some time professor in the college at Tourcoing, before making his final choice of a state of life. However, at the appeal of Pius IX, he put off the soutane for the pontifical uniform, serving in the pope's army from 24 Aug., 1860, until 20 Sept., 1870, having risen to the rank of major. After the dissolution of the pontifical army, he served his native country during the Franco-Prussian War, receiving the medal of the Legion of Honour for bravery, particularly on the fields of Patay and Le Mans. His service completed, he laid aside all further military ambition to enter the

Trappist Monastery of S. Marie du Mont. After he profession he was sent to Rome to complete his ecclesiastical studies, was ordained priest, 31 March, 1877, and finally made doctor in theology in 1880. Returning to his abbey, he was sent to found a monastery at Tilbourg, in Holland, whence he was recalled to fill the office of prior at St. Marie du Mont, and afterwards (1883) elected its abbot. In 1887 the choice fell on him to succeed to the abbatial chair of Septfons and become vicar-general of the congregation of Rancé. He had long had the desire of seeing the three congregations united in one order, and it was principally due to him that this was effected in 1892. In recognition of this he was elected the first "General of the Order of the Reformed Cistercians of Our Lady of La Trappe". After untiring efforts he succeeded in recovering possession of Citeaux, the cradle of the order, and making it anew the mother-house, himself becoming its abbot, after resigning that of Septfons (1899). His deep learning and unceasing labours, as well as his tried fidelity, gave him great influence at the Roman Court, where both Pius IX and Leo XIII showed him constant signs of esteem and appreciation, particularly by assigning to him various important missions.

EDMOND M. OBRECHT

John Wyclif

John Wyclif

(WYCLIFFE, or WICLIF, etc.).

Writer and "reformer", b. probably at Hipswell near Richmond, in Yorkshire, 1324; d. at Lutterworth, Leicestershire, 31 Dec., 1384. His family is said to have come from Wycliffe, on the Tees, in the same county. The traditional date of his birth is given as 1324, but some authorities put it earlier. Hardly anything is known of his early life, and his career at Oxford is obscured by the presence of at least one man of the same name and probably of more. It is certain, however, that he was educated at Balliol College and that in 1361 he must have resigned the mastership on receiving the living of Fillingham. This he exchanged a few years later for that of Ludgershall. It must not be supposed, however, that he gave up his university career, for livings were often

given to learned men to enable them to continue their studies or their teaching. Wyclif himself, for instance, received a two years' license for non-residence, in 1368, on account of his studies. Meanwhile, in 1365, a man of his name, and usually identified with the future "reformer", had been appointed warden of the new Canterbury Hall by Simon Islip, Archbishop of Canterbury, only to be turned out two years later in favor of a monk by the new archbishop. The dispossessed warden with the fellows, appealed to Rome, but failed in their appeal. A number of Wyclif's recent biographers have sought to identify this warden with another ecclesiastic, a friend of Islip's and probably a fellow of Merton; but it seems dangerous, in spite of much plausibility in this new identification, to reject the direct statements of contemporary writers, controversialists though they be, and possibly of a reference in one of Wyclif's own writings. Soon after these events, probably in 1372, Wyclif received the Degree of Doctor of Theology. He was by this time a man of repute in the university, and it is strange that his doctorate should have been so long delayed. The explanation may possibly be found in the fact that Balliol was an "Arts" college and that most of its fellows were not allowed to graduate in theology. Ecclesiastical promotion did not fail the new doctor; in 1373 he received the rich living of Lutterworth in Leicestershire, and about the same time he was granted by papal provision a prebend in a collegiate church, while he was allowed, also by papal license, to keep it as well as another at Lincoln; this latter, however, he did not eventually receive.

Though his opinions on church endowments must by this time have been well known in and out of Oxford, Wyclif cannot with certainty be connected with public affairs till 1374. In that year his name appears second, after a bishop, on a commission which the English Government sent to Bruges to discuss with the representatives of Gregory XI, and, if possible settle, a number of points in dispute between the king and the pope. The conference came to no very satisfactory conclusion, but it appears to mark the beginning of the alliance between Wyclif and the anti-clerical oligarchic party headed by John of Gaunt, Duke of Lancaster, the king's brother. This party profited by Edward III's premature senility to misgovern in their own interests, and found in the Oxford doctor, with his theories of the subjection of church property to the civil prince, a useful ally in their attacks on the Church. Wyclif must frequently have preached in London at this time, "barking against the Church", and he refers to himself as "peculiaris regis clericus". The Good Parliament, however, with the help of the Black Prince, was able, in 1376, to drive John of Gaunt and his friends from power. A year later the death of the prince gave Lancaster his opportunity, and the anti-clericals had once more the control of the Government. Under these circumstances the attempt of the Archbishop of Canterbury and the Bishop of London to bring Wyclif to book was not likely to succeed. He appeared at St. Paul's escorted by his powerful

friends, and the proceedings soon degenerated into a quarrel between Lancaster and the Bishop of London. The Londoners took their bishop's side, but the council broke up in confusion. The papal authority was next invoked against Wyclif, and a series of Bulls were issued from Rome. Nothing much came of them, however; Oxford, on the whole, took Wyclif's part, and a council of doctors declared that the propositions attributed to him, though ill-sounding, were not erroneous. When Wyclif appeared, early in 1378, at Lambeth, both the Princess of Wales and the London crowd interposed in his favor. The summons, however, led to the formulation of eighteen articles which give a fair account of Wyclif's teaching at this period. But before his next summons in 1381 his heresies, or heretical tendencies, had developed rapidly. The Great Schism may partially account for this and also the fact that Wyclif was now becoming the leader of a party. It was about this time that he began to send out his "poor priests", men who, except quite at the beginning, were usually laymen, and to lay much more stress on the Bible and on preaching. In 1380 Wyclif took the momentous step of beginning to attack Transubstantiation. It was at Oxford that he did so, calling the Host merely "an effectual sign". This open denial of a doctrine which came home to every Christian, and the reaction which followed the Peasant Revolt, lost Wyclif much of his popularity. In 1381 an Oxford council of doctors condemned his teaching on the Blessed Eucharist and a year later an ecclesiastical court at Blackfriars gave sentence against a series of twenty-four Wyclifite propositions. The Government was now against him. Westminster and Canterbury combined to put pressure on the still reluctant university authorities. A number of prominent Wyclifites were forced to make retractions (cf. LOLLARDS), but nothing seems to have been demanded from the leader of the movement except a promise not to preach. He retired to Lutterworth and, though he continued to write voluminously both in Latin and English, remained there undisturbed till his death. He was probably cited to Rome but he was too infirm to obey. Indeed he was probably paralyzed during the last two years of his life. A second stroke came in 1384 while he was hearing Mass in his church, and three days later he died. He was buried at Lutterworth, but the Council of Constance in 1415 ordered his remains to be taken up and cast out. This was done in 1428.

It is impossible to understand Wyclif's popularity, the weakness of the ecclesiastical authorities, or even the character of his teaching, without taking into account the extraordinary condition of the country at the end of the fourteenth century. The discredit which had been brought on the principle of authority in Church and State and the popularity of revolutionary ideas have been touched upon in the article LOLLARDS, and the causes which explain the spread of Lollardy are responsible, to some extent at least, for Wyclif's own mental development. His earliest writings are mainly logical and metaphysical. He belonged to the Realist School, and claimed to be a disciple of

St. Augustine, but it was his attitude in the practical and political questions of Evangelical poverty and Church government which gave him influence. The question of Evangelical poverty was a burning one throughout the fourteenth century. Originally a subject of bitter controversy within the ranks of the Friars Minor, it had received a wider extension, and the chief theological writers of the time had taken sides. When the papacy declared for the moderates, the extremists, with their literary supporters, Marsiglio of Padua, William of Ockham, and others, assumed an attitude of hostility to Rome, and soon found themselves advocating a church organization without property and practically under the control of the State. From the mendicants, then, Wyclif inherited his hatred of clerical and monastic endowments, and in this he showed no great originality. Throughout the Middle Ages the wealth of the clergy was liable to attack, and that sometimes from the most orthodox. What is, however, characteristic of Wyclif is the argument, half-feudal and half-theological, with which he supports his attack on the clergy and the monks; yet though connected with his name it was in part borrowed from Richard Fitz-Ralph, an Oxford teacher and vice-chancellor, who had since become Archbishop of Armagh. Fitz-Ralph had been himself an opponent of the "mendicants", but Wyclif found in his theory of "lordship" a convenient and a novel way of formulating the ancient but anarchical principle that no respect is due to the commands or the property of the wicked. "Dominion is founded in grace" is the phrase which sums up the argument, and *dominium* it must be remembered is a word which might be said to contain the whole feudal theory, for it means both sovereignty and property. "Dominion", then, or "lordship", belongs to God alone. Any lordship held by the creature is held of God and is forfeited by sin, for mortal sin is a kind of high treason towards God, the Overlord. Fitz-Ralph had used this argument meaning to justify the distinction between "property" and "use" which the moderate Franciscans had adopted and the extremists had rejected. Wyclif, however, brought it down into the market-place by applying it to clerical possessions. He even went further than the argument authorized him, for he came to hold that no monks or clergy, not even the righteous, could hold temporal possessions without sin, and further that it was lawful for kings and princes to deprive them of what they held unlawfully. Logically, Wyclif's doctrine of lordship should apply to temporal lords as well as to spiritual; but this logical step he never took, and he did not, therefore, contribute intentionally to the Peasant Revolt of 1381. Yet the assaults of so well known a man on church property must have encouraged the movement (of this there is a good deal of evidence), and the "poor priests", who were less closely connected with laymen of position and property, are sure to have gone further than their master in the communistic direction. Wyclif's attack on the property of the monastic orders and of the Church would necessarily bring him before long into conflict with the ecclesiastical authorities, and he was

led to guard himself against the results of excommunication by maintaining that, as he put it, "no man can be excommunicated unless he first be excommunicated by himself" (viz. by sin), a statement which may be true of the effect of excommunication on the soul, but which cannot be applied to the external government of the Church.

Thus by 1380 Wyclif had set himself in open opposition to the property and government of the Church, he had attacked the pope in most unmeasured terms, he had begun to treat the Bible as the chief and almost the only test of orthodoxy, and to lay more and more stress on preaching. Yet he would have protested against an accusation of heresy. Great freedom was allowed to speculation in the schools, and there was much uncertainty about clerical property. Even the exclusive use of Scripture as a standard of faith was comprehensible at a time when the allegiance of Christendom was being claimed by two popes. It must be added that Wyclif frequently inserted qualifying or explanatory clauses in his propositions, and that, in form at least, he would declare his readiness to submit his opinions to the judgment of the Church. It seems to have been a time of much uncertainty in matters of faith, and the Lollard movement in its earlier stages is remarkable for a readiness of recantation. Wyclif's heretical position became, however, much more pronounced when he denied the doctrine of Transubstantiation. His own position is not quite clear or consistent, but it seems to approach the Lutheran "consubstantiation", for he applied to the Blessed Eucharist his metaphysical principle that annihilation is impossible. To attack so fundamental a doctrine tended to define the position of Wyclif and his followers. Henceforth they tend to become a people apart. The friars, with whom the "reformer" had once been on friendly terms, became their chief enemies, and the State turned against them.

Old-fashioned Protestant writers, who used to treat medieval heresy as a continuous witness to the truth, found in Wyclif a convenient link between the Albigenses and the sixteenth-century reformers, and the comparison is, perhaps, of interest. Like the heretics of the twelfth and thirteenth centuries, Wyclif started with an attack on clerical wealth; he then went on to dispute the authority of the Church and, finally, its sacramental system, but unlike them he avoided those Manichæan tendencies which threatened the most elementary moral laws. That madness had been exorcised by the great Scholastics. On the other hand, Wyclif resembled the Protestant Reformers in his insistence on the Bible as the rule of faith, in the importance attributed to preaching, and in his sacramental doctrine. Like them, too, he looked for support to the laity and the civil state, and his conception of the kingly dignity would have satisfied even Henry VIII. The doctrine of justification by faith does not, however, occur in Wyclif's system. The English Lollards carried on but very imperfectly the tradition of Wyclif's teaching.

His real spiritual inheritor was John Hus, and it was through Bohemia, if at all, that he is directly connected with the Reformation.

A large number of Wyclif's Latin works have been edited and printed by the Wyclif Society. His English works have been edited by T. Arnold (Oxford, 1869-71) and by F.D. Matthew (London, 1880) for the Early English Texts Society. Many of the English tracts, however, are certainly by his followers. Besides these works Wyclif was reputed, even by contemporaries, to have translated the whole of the Bible, and two "Wyclifite" versions are in existence. Abbot Gasquet has disputed the genuineness of this authorship ("The Old English Bible", London, 1897), and F.D. Matthew has defended the traditional view (Eng. Hist. Rev., 1895). This much, at any rate, is certain: that the Bible was familiar even to laymen in the fourteenth century and that the whole of the New Testament at least could be read in translations. It is also clear that portions of the Scriptures were called Wyclifite in the fifteenth century, and sometimes condemned as such, because a Wyclifite preface had been added to a perfectly orthodox translation.

For a list of contemporary authorities, which are very numerous, see RASHDALL in Dict. Nat. Biog., s.v. Wycliffe; the most important, besides Wyclif's own works, is the Chronicon Anglie, ed. (1874) by MAUNDE THOMPSON, and the Fasciculi Zizaniorum, ed. by SHIRLEY in R. S. See also LECHLER, Johann von Wiclit (Leipzig, 1873; tr. London, 1878); SHIRLEY, Preface to Fasciculi Zizaniorum; MATTHEW, Preface to English Works (the last two are valuable); POOLE, Wycliffe and Movements for Reform (London, 1889), still useful as it connects Wyclif with the continental movements of the time; The Cambridge History of Eng. Lit., II, which contains an excellent chapter on the subject by WHITNEY. Of Catholic works the most considerable is STEVENSON, The Truth about John Wyclif. A more moderate treatment of Wyclif is given by BELLESHEIM, WETZER, AND WELTE in Kirchenlexikon, s.v. Wiclit; see also, especially for the subsequent development of the movement, GAIRDNER, Lollardy and the Reformation, I-II (London, 1906).

F. URQUHART

Andrew of Wyntoun

Andrew of Wyntoun

Scottish chronicler, born (as we know from the internal evidence of his writings) in the reign of David II, about the middle of the fourteenth century. He is conjectured to have been related to Alan of Wyntoun, who married the heiress of Seton, and is now represented by the Earl of Eglinton and Winton. He became a canon-regular of the priory of St. Andrews, and before 1395 was appointed prior of the ancient monastery

of Lochleven, in Kinross-schire, which was a subject house of St. Andrews for upwards of four hundred years (see LOCHLEVEN). Innes, in his "Critical Essay" (1729), pointed out that the register of the priory of St. Andrews contained several acts or public instruments of Wyntoun, as prior of Lochleven, from 1395 to 1413; but there is no evidence as to how long he continued in office after the latter year, or as to the date of his death. It was at the request of Sir John de Wemyss (ancestor of the Earls of Wemyss), whom he mentions as one of his intimate friends, that Wyntoun undertook to write his "Orygynale Cronykil of Scotland", so entitled, as he himself explains, not because it was his own composition, but because it begins at the beginning of things, namely with the creation of angels. How long the compilation of the work took is uncertain, but the fact that Robert, Duke of Albany, is mentioned in it as dead proves that it was finished some time after September, 1420. The author, while engaged in the latter part of it, reckoned himself already an old man, as appears from his prologue to the ninth book, so that it is not probable that he lived long after its completion. The variations in the manuscripts show that it was frequently revised and corrected, in all probability by Wyntoun's own hand.

No printed edition of the Chronicle appeared until 1795, when it was edited from the Royal manuscript in the British Museum, with a valuable critical introduction, by David Macpherson. Nearly one-third of the original was, however, omitted, and this was restored by Laing in his edition published in 1872, in the "Historians of Scotland" series. Laing describes the eleven manuscripts of the Chronicle known to exist, and the Scottish Text Society has since printed a new edition from the Cottonian and Wemyss manuscripts, with the variants of the other texts. A considerable portion of the Chronicle, it must be noted, is the work of an unknown author, who sent it to Wyntoun, and it was incorporated by him into his own narrative. Both are written in the same easy-flowing, octosyllabic rhyming verse, and the work has therefore value from a poetical as well as from an historical standpoint. Andrew Lang credits Wyntoun with "a trace of the critical spirit, displayed in his wrestlings with feigned genealogies"; but Æneas Mackay does him more justice in pointing out that he understands the importance of chronology, and is, for the age in which he wrote, wonderfully accurate as to dates. His work has thus real value as the first attempt at scientific history writing in Scotland, and philologically it is not less important as having been written in the Scots vernacular, and not (like nearly all the works of contemporary men of learning) in a dead language. Regarded as a poet, Wyntoun can hardly take high rank, certainly not equal rank to his predecessor Barbour, the father of Scottish poetry. His narrative, in truth, though written in rhyme is mostly prosaic in style; but some of his descriptions are vivid, and touched with the true spirit of poetry.

Wyntoun's *Oryginale Cronykil* of Scotland, with notes, glossary, etc., ed. MACPHERSON (London, 1795); the same, ed. LAING for *The Historians of Scotland* (Edinburgh, 1872); the same, ed. AMOURS for the *Scottish Text Society* (Edinburgh, 1902-1913); LANG, *Hist. of Scotland*, I (Edinburgh, 1900), 296; INNES, *Critical Essay on the Ancient Inhabitants of Scotland*, II (London, 1729), 622-627; MACKAY in *Dict. Nat. Biog.*, s.v.; ANDERSON, *The Scottish Nation*, III (Edinburgh, 1868), 674, 75.

D.O. HUNTER-BLAIR

Wyoming

Wyoming

Wyoming, the forty-fourth state admitted to the American Union, derives its name from the Delaware Indian word "Maughwauwama", signifying mountains with large plains between. It lies between 41 degrees and 45 degrees N. lat. and 27 degrees and 34 degrees long. west of Washington; it is bounded by Montana, South Dakota, Nebraska, Colorado, Utah, and Idaho. Its length from east to west is 355 miles and width from north to south, 276 miles. It includes an area of 97,883 square miles, a territory equal to that of the two States of New York and Pennsylvania, or greater than all of the New England states combined.

I. PHYSICAL CHARACTERISTICS

In general appearance the topography is mountainous with valleys, rolling plains, and broad plateaux. The mountains have a general direction from north-west to south-east, but are not continuous across the state, presenting more often the appearance of broken or detached spurs. The main range of the Rocky Mountains entering from the south terminates in the Wind River Range and is snow-capped throughout the year, the elevation being from 6000 to 14,000 feet. Other ranges are the Big Horn, Owl, Rattle Snake, Medicine Bow, Sierra Madre, Teton, Yellowstone, and the Black Hills extending into the state from South Dakota on the eastern border. The highest peak is Fremont's Peak in the Wind River Range, 13,790 feet. Other high points are Teton Peak, 13,690 feet, and Clouds Peak, 13,691 feet. Numerous rivers including the Yellowstone, Big Horn, Snake, Green, Cheyenne, Belle Fourche, and Powder have their headwaters within the state. The North Platte and Big Laramie enter the state from Colorado. None of these streams is navigable in a commercial sense, but their flow is utilized for irrigation and in some instances for the transportation of timber. There are several important lakes, including Yellowstone, Jackson, Shoshoni, Lewis, Madison, and Fremont. The state abounds in beautiful scenery. Great natural parks encircled by wooded slopes and majestic peaks, with numerous mountain streams, lakes, and waterfalls, form at-

tractive features. The Yellowstone National Park, set apart by Act of Congress as a public pleasure ground, has an area of 3575 square miles, and is mainly in Wyoming, extending slightly into Idaho and Montana. It represents a wonderland of geological phenomena, mineral springs, spurting geysers, lakes, and woodlands. The streams of the state are well stocked with game fish; game animals, particularly elk, deer, and antelope, are plentiful in the unsettled mountain districts. The climate is dry, healthful, and invigorating with a maximum of sunshine, and while the temperature and annual rainfall vary in different localities according to the elevation and the influence of mountain chains, the summers are cool and the winters are not severe. The average mean temperature for the year is 44 degrees. Winds prevail during portions of the winter and spring seasons, but cyclones and tornadoes are unknown. Owing to the dryness of the atmosphere, degrees of temperature do not express the extremes of heat and cold peculiar to lower and more humid localities.

II. POPULATION

The census of 1910 shows a total population of 145,965, an increase of 57.7 per cent since the last census report in 1900. The immigration during the past decade has been principally from the middle west, generally following the parallels, but prior to that time the cattle industry had attracted a large percentage from the southwest. Only a small per cent of the population is of foreign birth, and but two per cent illiterate. Wyoming, according to population, contributed a larger percentage of volunteer soldiers to the service of the Government during the Spanish-American War than any other state, and was the first state to report troops mustered in and ready for service. Cheyenne, the state capital, is the largest city, and Sheridan, Laramie, Rock Springs, Rawlins, Evanston, Basin, Cody, Casper, Lander, and Douglas are among the larger towns.

III. RESOURCES

Mining and live stock, with a rapidly increasing agricultural development as an incident to the latter, are the leading industries.

Mining

The mineral resources consist of coal, oil, gas, iron, asbestos, gold, silver, and copper, the development of which has been greatly hindered for lack of sufficient transportation. Extensive coal deposits are known to underlie a large area. Rock Springs, Hanna, Kemmerer, Diamondville, Sheridan, Newcastle, Hudson, and Kirby are coal mining centres. The coal output for 1910 was 7,385,764 tons, with a valuation of \$11,573,479; the product being lignite and sub-bituminous. Iron ore is mined extensively at Sunrise; the output for 1910 being 735,423 tons. Oil fields of wide extent are being developed in the northern, central, and extreme western portions of the state,

and extensive pipe lines for the transportation of the product are now in process of construction. Natural gas has been discovered in the vicinity of Basin and Greybull and is used there for heating and lighting. Gold, copper, and asbestos mines have been opened, but reliable statistics as to the amount and value of their product have not been compiled.

Agriculture and Live Stock

The soil of the plateaux and bench lands is a light sandy loam, that of the valleys is of a black alluvial character, both showing remarkable fertility under irrigation in the production of wheat, oats, rye, barley, potatoes, field peas, sugar beets, forage crops, apples, pears, and the different varieties of small fruits and vegetables known in the temperate zones, the yield and quality being in some instances remarkable. A yield of 974 bushels of potatoes per acre in Johnson County, a yield of 132 bushels of oats produced on one acre in Sheridan County, and a yield of 8.5 tons of alfalfa per acre for three successive years in Laramie County being well-authenticated examples. It is estimated that 10,000,000 acres within the state may be cultivated successfully by irrigation. Irrigation development has made rapid strides in recent years, and millions of dollars are expended by the United States Government and by private investors under the supervision of the state in the construction of canals and great storage reservoirs. In 1910, 76 irrigation projects were under construction within the state. Another 10,000,000 acres may be made productive by methods of soil mulch or "dry farming", a modern system of soil treatment that has produced good crop results in the semi-arid regions. The non-irrigated lands are being rapidly settled. The timbered area occupies about 10,000,000 acres in the mountain regions, most of which is included in Government forest reserves, and the manufacture of lumber, railroad, and mine timbers is carried on in these reserves under concessions from the United States Government. The reserves are also used by stock men under lease for summer grazing. Most of the remaining territory of the state is admirably adapted to the grazing of live stock. In their natural condition the plains and foot hills are generally covered with a short succulent grass, furnishing excellent pasture for live stock. This grazing area comprises from 20,000,000 to 30,000,000 acres, and as it is used in connection with agricultural lands guarantees the stability of the live-stock industry, which according to statistics for 1910 shows: cattle 546,447 head, valuation \$13,024,349; sheep 4,211,441 head, valuation \$19,895,643.50; horses 119,576 head, valuation \$5,450,795; swine 15253 head, valuation \$73,476; mules and asses 1862 head, valuation \$114,500. The wood product of 1910 had an approximate valuation of \$8,000,000.

Transportation and Communication

There are thirteen separate lines of railroad, with a mileage of 2200, in operation by the Union Pacific, Burlington, Northwestern, Colorado and Southern, Oregon,

Short Line, Saratoga and Encampment, Hahn's Peak, Colorado and Wyoming, and allied companies; twenty-nine telephone companies, chief among them being the Mountain States Telegraph and Telephone system, with lines aggregating 3900 miles; three telegraph companies with lines covering 2391 miles. Numerous stage lines are in operation between points in the interior, and nearly every rural community is served with a free delivery of mail matter.

Manufactures

The manufacturing interests include lumber, and timber products, saddles and harness, tobacco, boots and shoes, flour and grist, lime, cement, brick, malt, dairy products, and railroad supplies, some one or more lines of which are carried on in all of the towns, but reliable statistics as to output, capital, and persons employed are not available.

IV. EDUCATION

Public education is provided by a system of graded public schools, supported by a tax levied upon property within each district, and a *per capita* distribution made according to an annual enumeration of pupils, of the annual interest income from the permanent school funds and rentals from school lands. High schools are established by the districts in all of the larger towns; under a special law two or more districts are enabled to unite in the formation of a high school district by an affirmative vote of qualified electors on the question, and thereby maintain a high school. This plan makes it possible for a number of districts in sparsely settled counties to combine their resources in the establishment of a high school which is supported by a special tax. School attendance by children between the ages of six and fourteen years is compulsory, and penalties are prescribed for truancy or parental neglect in the matter of school attendance. In 1910 there were 1109 teachers employed in the state, and the total enrolment of pupils was 24,584. The district tax revenues for that year were \$739,668.88 and the earnings and income from 3,456,999 acres of school land were \$150,212.91. Other public school revenues are derived from a percentage of the receipts from government land sales and the income from forest reserves paid to the state by direction of Congress. The state university is situated at Laramie, and includes a graduate school, colleges of liberal arts, agriculture, and engineering. A normal school and departments of music commerce, home economies, and university extension are also maintained. The number of professors employed is 45, and 307 students were reported in attendance in 1910. The institution is supported by state tax, a land income fund, and certain annual donations made by the Government pursuant to Acts of Congress for the promotion of instruction in agriculture and the mechanic arts. A convent (boarding, and parochial school), was established at Cheyenne in 1886 by the Sisters of the Holy Child Jesus at a cost of \$50,000. This institution has passed through the vicissitudes of early

pioneering and grown to a prosperous condition, the average attendance being about 200. Jesuit Fathers established a mission school for Indian boys at St. Stephens on or about the same date, and Catholic sisters also conduct a mission school for Indian girls on the Shoshoni Reservation.

V. STATE INSTITUTIONS

Indigent poor are cared for and supported by the counties of their residence. The State maintains: a hospital for the insane at Evanston; a home for feeble-minded and epileptic persons at Lander; an institution for blind, deaf, and dumb at Cheyenne; a soldiers' and sailors' home at Buffalo; and general state hospitals at Rock Springs, Sheridan, and Casper. A state sanitarium is provided at Thermopolis, where a square mile of land surrounding mineral springs of great medicinal value has been granted to the state by the United States Government. The state penitentiary is situated at Rawlins, and an appropriation has been made for a reformatory to be located hereafter by a vote of the people. There are laws providing for the incorporation of charitable, educational, and religious societies, including cemetery associations; and charitable bequests are not forbidden by statute.

VI. GENERAL LEGISLATION

Freedom in the exercises and enjoyment of religious profession and worship is guaranteed to every person by the constitution, with the sole qualification that the liberty of conscience thus secured shall not excuse licentiousness, nor justify practices inconsistent with the peace and security of the state. This qualification was undoubtedly inserted to prevent the practice of polygamy as a possible incident to Mormon settlement in the state. The disturbance of religious worship is made punishable as a misdemeanour. Sunday observance prevails generally throughout the state, and places of business with a few exceptions are required to be closed on Sunday. The first day of January, twelfth and twenty-second days of February, thirtieth day of May, fourth of July, the date appointed by the president as the annual Thanksgiving Day, twenty-fifth of December, dates upon which general elections are held, and Arbor Day are declared holidays by statute; and if a legal holiday falls on Sunday the following day shall be the holiday. The use of profane or obscene language is punishable as a misdemeanour. A statutory form of oath is prescribed, concluding with the words "So help me God", and persons having conscientious scruples against taking an oath may affirm under the pains and penalties of perjury. The seal of confession is privileged. Church bodies may incorporate for purposes of administration. Property used exclusively for religious worship, church parsonages, and all denominational school property are exempt from taxation. Ministers of the Gospel of all denominations are exempt from jury service. The marriage ceremony may be performed by any judge, district court commissioner,

justice of the peace, or licensed or ordained minister of the Gospel. No particular form of ceremony is required other than an express declaration in the presence of an ordained minister or magistrate and witnesses. Desertion of wife and children is a felony. Causes for divorce are: adultery; incompetency; conviction of a felony, and sentence to imprisonment therefor after marriage; conviction of felony or infamous crime before marriage, provided it was unknown to the other party; habitual drunkenness; extreme cruelty; intolerable indignities; neglect to provide common necessities; vagrancy of the husband; and pregnancy of the wife before marriage if without knowledge of he husband. The plaintiff must reside in the state for one year immediately preceding his or her application for divorce, unless the parties were married in the state and the applicant has resided there since the marriage. Neither party is permitted to remarry within one year after a decree of divorce.

A married woman can hold, acquire, manage, and convey property, and carry on business independent of her husband. When a husband or wife dies intestate one half of the property of the deceased goes to the survivor if there be children and one half to the children collectively. If there be no children, nor descendants of any child, three-fourths of the estate goes to the survivor. If there be no children nor descendants of any child, and the estate does not exceed \$10,000, the whole of it goes to the survivor. Except as above, the estate of an intestate descends to his children surviving and the descendants of his children who are dead. If there be no children nor their descendants, then to his father, mother, brothers, and sisters, and to the descendants of brothers and sisters who are dead. If there be no children nor their descendants, nor father, mother, brothers, sisters, nor descendants of them, then to the grandfather, grandmother, uncles, aunts, and their descendants. The homestead of a householder who is the head of a family, or any resident of the state who has attained the age of sixty years, is exempt to the value of \$1500 from execution or attachment arising from any debt contracted or civil obligation incurred other than taxes, purchase money, or improvements so long as it is occupied by the owner or his or her family. And the exemption inures for the benefit of the widow or minor children. If the owner be married the homestead can be alienated only by the joint consent of the husband and wife. The family Bible, a burial lot, and \$500 worth of personal property are likewise exempt to any person entitled to a homestead exemption. One half of the earnings of a debtor for his personal services, rendered at any time within sixty days next preceding a levy of execution or attachment, is exempt when it is made to appear that such earnings are necessary for the support of debtor's family residing within the state and supported in whole or in part by his labours. A day's labour in mines and in works for the reduction of ore is limited to eight hours, except in cases of emergency. The sale of intoxicating liquors is licensed only in incorporated cities and towns.

VII. GOVERNMENT

The state is governed under its first constitution adopted in November, 1889. Amendments to the constitution may be proposed by resolution of the legislature and submitted to a vote of the people, and if approved by a majority of the electors become a part of the constitution. Suffrage is conferred upon both men and women. The principle of woman suffrage was incorporated in the act organizing the territory, and was carried into the state constitution. Women rarely seek to hold office, and are disqualified for jury service. On local issues the vote of women is generally cast on the side of morality and home protection, but in state policy and legislation no unusual results are traceable to woman suffrage. The right to vote at general elections is enjoyed by all citizens of the United States who have attained the age of 21 years, are able to read the constitution, and have resided in the state one year, and in the county sixty days immediately preceding, with the exceptions of idiots, insane persons, and persons convicted of infamous crimes. General elections are held biennially in even numbered years, the first Tuesday after the first Monday in November, and newly-elected officers assume their duties on the first Monday in the following January. The governor, secretary of state, treasurer, auditor, and superintendent of public instruction are elected for terms of four years, and all other state officers are appointive. The legislature consists of a senate and a house of representatives, and meets biennially in odd numbered years, on the second Tuesday in January, its session being limited to forty days. Each branch elects a chaplain, who opens the session and each day's proceedings with prayer. The administration of justice is vested in a supreme court, district courts, justices of the peace, and municipal courts. The supreme court consists of three justices elected by the state at large for a term of eight years. The supreme court has general appellate jurisdiction of causes tried in the district courts. The district courts have general original jurisdiction in all matters of law or equity, and have appellate jurisdiction of cases arising in justice courts and causes made appealable from administrative boards. Judges of district courts are elected by districts for terms of six years.

VIII. RELIGIOUS FACTORS

The state consists of one diocese with its see at Cheyenne. The Catholic population is estimated (1910) at about 12,000; churches with resident pastors, 18; missions with churches, 14; priests, 23. The dissemination of Catholic doctrine in this region began with the visits of French fur-traders and trappers during the first half of the eighteenth century, but there is evidence that Catholic practices had been introduced among the native tribes prior to that date by Catholic Iroquois Indians who had drifted west from Canada and New York. Father Pierre-Jean De Smet, S.J. arrived in Wyoming with an expedition of the American Fur Company in 1840, and his mission work among the Indians and scattered white settlements during the succeeding fifteen years forms an

important chapter in the history of the North-west. Fathers P. De Vos, S.J., and Hoecken, S.J. Zerbinat, Joset, and Mengarina were among the early missionaries. In 1851 Wyoming formed a part of the vicariate of the Indian territory east of the Rocky Mountains which had Rt. Rev. John B. Miege as vicar apostolic. In 1857 it comprised a part of the Vicariate of Nebraska and so remained until 1885, when it became a part of the Diocese of Omaha. It was erected into the Diocese of Cheyenne, 9 August, 1887, and the first bishop Rt. Rev. Maurice F. Burke, was consecrated on 28 Oct., 1887. He was transferred to St. Joseph, Missouri, June, 1893, and was succeeded by Rt. Rev. Thomas Lenihan, whose death occurred on 15 Dec., 1901. Rt. Rev. James J. Keane, the third bishop of the diocese, was consecrated on 28 Oct., 1902, but in 1911 was made Archbishop of Dubuque. His administration was attended by much progress in church interests. The fourth bishop is Rt. Rev. Patrick A. McGovern, appointed on 18 January, 1912, and consecrated on 11 April following. A new cathedral and bishop's residence have been erected at Cheyenne. The spiritual needs of the new diocese have been presented in frequent lecture tours to the faithful in the older communities of the east; and they have given aid by contributions to a loan fund plan, whereby numerous mission church buildings have been provided in new settlements and outlying communities. Colonization has been encouraged and the work and growth of the Church is in keeping with the rapid settlement and material advancement of the state.

IX. HISTORY

While there is some evidence that the early Spanish made expeditions into Wyoming, no written accounts of their expeditions have been found. The first authentic record of exploration by white men is that of Sieur de la Verendrye, who discovered the Yellowstone while in charge of an expedition in the interest of the French Canadian fur trade in 1743. John Colter, a member of the Lewis and Clark expedition, was the first American to enter Wyoming. He discovered Yellowstone Park and explored the Big Horn and Fremont Country in 1806. General John C. Frémont explored the central portion of the state, discovered the South Pass, and established the Overland Trail in 1842. Indian depredations incident to the California movement in 1849 induced the Government to establish a number of army posts along the Platte River, among them Fort Steele, Fort Fetterman, and Fort Laramie, the latter being an old fur-trading fort first established in 1834. The Union Pacific Railroad entered in 1867, and after a few years of Indian warfare, great herds of cattle trailed in from Texas comprised the chief industry until the early nineties, when the larger herds commenced to disappear and an era of ranch settlement began. The State of Wyoming is carved out of territory obtained from four principal annexations comprising the main land west of the Mississippi River, viz.: the Louisiana purchase (1803); the Oregon Country by discovery, settlement, and treaty (1792, 1805, 1811, 1819, 1846), the Texas annexation (1845); and the Mexico

concession (1848). Its titled interest bear the imprint of successive periods of purchase, exploration, discovery, settlement, and conquest. It has in turn formed a part of the following named territories: Louisiana in 1803; Missouri in 1812; Texas in 1845; Oregon in 1848; Utah in 1850; Nebraska in 1845; Washington in 1859; Dakota in 1861; Idaho in 1863; Dakota in 1864. Organized as Wyoming territory in 1868, it was admitted as a state, 10 July, 1890.

W.E. MULLEN

Venerable Anne de Xainctonge

Ven. Anne de Xainctonge

Foundress of the Society of the Sisters of St. Ursula of the Blessed Virgin, born at Dijon, 21 November, 1567; died at Dôle, 8 June, 1621.

She was the daughter of Jean de Xainctonge, councillor in the Dijon Parliament, and of Lady Marguerite Collard, both of noble birth and virtuous life. From a window in the Hotel Xainctonge Anne was able to see the Jesuit College and the good work carried on by the Fathers; at Mass in their church, she was edified by seeing the novices receiving Holy Communion. Hence the idea of her future work that of educating girls. She considered such an occupation fitting for religious women, who might thus unite the active with the contemplative life. To found an uncloistered order of women, to open public schools for girls, "where education should be given, not sold", were then new ideas to which the prejudices of that time, as well as the blind love of her parents, were profoundly opposed. With the help of heaven, often miraculous, under the guidance of the Jesuit Fathers de Villars and Gentil, she overcame all obstacles and succeeded. On 16 June, 1606, with Claudine de Boisset and another companion she opened her first convent at Dôle in Franche-Comté (then Spanish territory). The company was founded with "our Lady as general, St. Ursula as lieutenant", and the Rule of St. Ignatius as the basis of perfection. For fifteen years Anne was a living model of all religious virtues, in frequent and visible intercourse with her guardian angel, founding new houses as her society spread rapidly in the east of France and Switzerland. After her death her reputation for heroic sanctity and the graces obtained through her intercession led to a process of beatification, but the many wars of the period, followed closely by the French Revolution, destroyed all documents. The cause

was afterwards re-established, and Anne de Xainctonge was declared Venerable on 24 November, 1900.

MOTHER HÉLÈNE MARIE
Xaverian Brothers

Xaverian Brothers

(CONGREGATION OF THE BROTHERS OF ST. FRANCIS XAVIER).

An institute of laymen, founded under episcopal approbation by Theodore James Ryken, in Belgium, in the year 1839. To obtain the views of American prelates as to the merits of his project to establish a teaching congregation, he came to America (1837), and received approval from seven bishops, who gave him testimonial letters. Returning to Europe, he laid his plan before Mgr Boussens, Bishop of Bruges, who granted his sanction on condition that Ryken should first make a year's novitiate under the Redemptorists at St-Trond. After completing the novitiate Ryken established his congregation at Bruges. From the beginning trials and difficulties threatened the existence of the new institute. Subjects did not come or failed to persevere, and the means of subsistence were to be had only by painful effort. In June 1840, the brotherhood consisted of three members. In the following year the generosity of a banker of Bruges, Dujardin, enabled the community to purchase the property known as "Het Walletje", from the moat that surrounded it, and here the brothers established their mother-house. An unknown benefactor also left a considerable sum of money with the request that it be devoted to helping missionary work. The words of Sallust, "Concordia res parvae crescunt", were adopted by the brothers as their motto. A boys' sodality was opened at Het Walletje, followed shortly by a primary school in the same place; the work of catechizing was taken up at the Church of Notre-Dame, and some attention was given to the training of deaf-mutes. The brothers' first grammar school was opened at Bruges (1844) and in the following year a second school of the same rank was established there. Already the progressive character of the youthful institute was shown by its sending several members to St-Trond Normal School for higher professional training. In 1846 the brothers were called to England, and a school was begun at Bury, Lancashire, but in 1856 the community removed to Manchester. It was at Manchester that the brothers popularized the May devotions, and promoted the wearing of the scapular of Mount Carmel.

On 10 July, 1854, the founder sailed from Havre to take the direction of a school in Louisville, Kentucky, at the invitation of Bishop Martin J. Spalding, who had long desired the Xaverians to come to the United States. The pioneers were Brothers Paul, Hubert, Stanislaus, Stephen, and Bernardine. The Xaverians took charge of several parochial schools there, and finally (1864) opened an institution under their own auspices, which still exists as St. Xavier's College, and had an attendance of five hundred students in 1910. When Bishop Spalding became Archbishop of Baltimore (1864), he invited the congregation to conduct St. Mary's Industrial School for Boys. The Xaverians decided to make Baltimore the centre of their activities in the United States, and they purchased a site just beyond the western limits of the city, where in 1876 a novitiate for the United States was opened. The first general chapter was held at Bruges (1869); meanwhile the brothers were extending their work in England. They had established a house for novices at Hammersmith (1861), near the Normal Training College, in order that the young members might follow the courses there. Two years later a new mission was accepted. The Duchess of Leeds, an American of the Caton family of Maryland, had just founded an orphanage at Hastings, Sussex, and the Xaverians were asked to take charge. By a coincidence, the land on which St. Mary's Industrial School, Baltimore, stands is known as the Duchess of Leeds estate. The foundation at Hastings was removed to Mayfield, and was gradually diverted from its original plan as an orphanage, and became a successful boarding school, which has at present several fine buildings. The main structure, Gothic in its features, was designed by Pugin. Clapham College, adjoining Clapham Common, London, has developed from a small beginning made in the early sixties, to an influential position among English Catholic colleges. It is a centre for the Oxford local examinations. The Catholic Collegiate Institute, as the brothers' principal school at Manchester is called, was removed to an attractive site at Victoria Park, in the suburbs of that city, in 1905. The following year a new school was opened. Since 1875 England has formed one of the three provinces into which the institute was then divided; American and Belgium being the other two. In Belgium the brothers founded, in connection with the mother-house, a school, Institut St. Francois-Xavier, which has at present (1911) over seven hundred students. Other houses were founded at Thourout, Houthoulst, Heyst, and Zedelghem.

In the United States the congregation has made its greatest gains. The membership in the American province (1911) numbers 127 professed, 19 scholastics, 21 novices, and 20 aspirants. The Xaverian missions in the United States comprise 5 colleges, 6 academies, 15 parochial schools, 5 industrial schools, and 4 homes for boys. At Baltimore, Maryland, is Mt. St. Joseph's College, adjoining the novitiate. In the Archdiocese of Boston, which the congregation entered in 1882, it conducts schools at Lowell, Lawrence, Somerville, East Boston, Danvers, and Newton Highlands. Others schools

in Massachusetts are at Worcester, and Milbury. At Manchester, New Hampshire, and at Deep River, Connecticut, are Xaverian missions also. The Diocese of Richmond has a number of institutions under the care of the brothers -- two schools at Richmond, a college at Old Point Comfort, and academies at Norfolk, Portsmouth, and Newport News. In the Diocese of Wheeling there are two schools: the Cathedral High School, and Elm Grove Training School. Besides St. Xavier's College, the city of Louisville has three smaller establishments managed by the institute. In Detroit, Michigan, they conduct a boy's home. To as great an extent as possible the brothers engage in secondary school work, regarding this as their particular sphere; though it is found advantageous to undertake parochial and industrial schools also. A notable secondary school conducted by the Xaverians is St. John's Preparatory College, Danvers, Massachusetts, established in 1906.

Since its foundation the institute has had three superiors-general: the founder, Brother Francis, who resigned in 1860; Brother Vincent (1860-96); and from 1896, Brother John Chrysostom. The American province has had three provincials: Brother Alexius, from 1875 to 1900; Brother Dominic, from 1900 to 1907; and Brother Isidore, chosen in 1907. The entire congregation is under the jurisdiction of the Bishop of Bruges; and it is governed by its constitution and by a rule similar to that practised by other religious societies of laymen, having simple vows. The constitution of the society provides that all its members shall be laymen; no priests are admitted to membership. The brothers are to bind themselves by the three vows of religion, and are to dedicate themselves to the instruction of youth, in any country to which they may be sent, and in which they may live according to the spirit of their congregation. Its members are not restricted to teaching elementary branches. Candidates for membership are admitted as postulants for three months if they have attained their sixteenth year; younger applicants are rated as aspirants, and their education and training are provided for until they are old enough to become postulants. After the postulant completes his term he begins, if he is deemed a satisfactory subject, a novitiate of two years. Then the three vows are taken. These vows are final. After five years as a professed member the Xaverian brother may make application to take a fourth vow -- the vow of stability -- by which he binds himself more closely to the congregation, and becomes eligible for superiorship, and to act as delegate to the general chapter, which is held every six years and acquires the right to vote for the elective offices. The superior-general is elected by delegates chosen by the brothers who have the vow of stability. His term of office is for six years, and he is eligible for re-election. The provincials are nominated by the superior-general, assisted by the suffrages of the brothers of the province concerned, without being bound, however, to appoint the one receiving the most votes. The provincials have the same term of office as the superior-general, and may be re-appointed.

The superior-general, the provincials, and local superiors are assisted in their administrative work by councils, two or three members to a council. Father Van Kerkhoven, S. J., an early friend of the congregation, framed the Rule of the Xaverian Brothers. Pius IX granted a Brief of encouragement to the superior-general, Brother Vincent, on the occasion of the latter's visit to Rome in 1865. According to the terms of the Apostolic Constitution "Conditae a Christo", such recognition ranks the institute with the approved congregations.

BROTHER ISIDORE

Didacus Ximenes

Didacus Ximenes

A Spanish Dominican of the sixteenth century; noted as a theologian, philosopher, and astronomer; d. 1560. He took his licentiate in law at Salamanca, and there, before Christmas, 1543, received the habit of the Friars Preachers from the hands of Dominic Soto, then prior of the Dominican convent at Salamanca. The vocation of Ximenes to the religious state seemed miraculous; for, while rector of the College of Cuenca at Salamanca, the king came to esteem him so highly that he was about to honour him with judicial dignity when, all unexpectedly, Ximenes was summoned to the Dominican convent by an unknown priest of the same order, who predicted that in a short time he would give up the practice of law for the religious life in the Order of Preachers. Although this prediction was received with laughter, it was soon verified. Ximenes obtained the degree of Bachelor (in the Dominican sense) in his province, and on 11 April, 1559, was chosen *socius* to Bartholomew Carranza, Archbishop of Toledo, and by him sent to Segobia with special letters to the vicar and definitors of the provincial chapter gathered there, to dissuade the members of the chapter from re-electing Melchior Cano as provincial. His efforts, however, were fruitless. Chief among Ximenes' works are: "Calendarium perpetuum, sive Ordo recitandi divini officii juxta ritum Ordinis Praedicatorum" (Salamanca, 1563; Antwerp, 1566); "De eruditione religiosorum", in Spanish.

QUÉTIF-ECHARD, Script. Ord. Praed., II (Paris, 1721), 169.

CHAS. J. CALLAN

Francisco Ximenez de Cisneros (Cardinal Ximenez)

Francisco Ximénez de Cisneros

(Sometimes spelled JIMÉNEZ).

Franciscan, cardinal, and Primate of Spain, born at Torrelaguna in New Castile, 1436; died at Roa, near Valladolid, 1517. He was educated at Alcalá and Salamanca and, having graduated in canon and civil law, went to Rome in 1459 where he practised for some years as a consistorial advocate. Having attracted the notice of Sixtus V, that pope promised him the first vacant benefice in his native province. This proved to be that of Uzeda, which Carillo, Archbishop of Toledo, wished to bestow upon one of his own followers. Ximénez asserted his claim to it and for doing so was imprisoned by the archbishop, first at Uzeda and afterwards in the fortress of Santorczaz. He was released in 1480, after six years' confinement, and transferring to the Diocese of Sigüenza, became grand vicar to Cardinal Gonzalez, the bishop of that see. In 1484 he resigned this office to become a Franciscan of the Observantine Congregation in the Friary of St. John at Toledo. From there, after his profession, he was sent to Salzedo, where he was later elected guardian.

In 1492, on the recommendation of Cardinal Mendoza, Archbishop of Toledo, he was appointed confessor to Queen Isabella, which post he accepted on condition that he might still live in his monastery and follow the religious life, only appearing at Court when sent for. About the same time he was elected provincial of his order in Castile, which office he held for three years. In 1495 he was chosen to succeed Mendoza as Archbishop of Toledo, to which post the chancellorship of Castile had been joined by Ferdinand and Isabella. Ximénez refused the dignity out of humility, and persisted in his refusal for six months, only consenting at length to accept the position in obedience to the express command of the pope. As archbishop he continued to live as a simple Franciscan, devoting a large portion of his vast revenues to the relief of the poor and the ransom of captives. This mode of life was misunderstood by many, and, in consequence of reports that reached Alexander VI, that pontiff reprimanded him for neglecting the external splendour that belonged to his rank; but Ximénez would only consent to wear the episcopal dress in such a way that his friar's habit underneath might remain visible. His zeal found scope in an endeavour to reform the Franciscans and canons of Toledo. He obliged his own religious brethren to observe the rule against the holding of property, and many friars left Spain in consequence. As chancellor he was obliged to take a prominent part of the affairs of the State, where his prudence and wisdom were of great value to his country.

He gained renown also as a patron of learning, and about the year 1504 founded the University of Alcalá, to fill the professorial chairs of which he procured some of the most distinguished scholars from Paris, Bologna, and Salamanca. Such was the esteem in which this new university was held that all the religious orders in Spain, except the Benedictines and Hieronymites, established houses at Alcalá in connection with it. King Ferdinand visited the university in 1514 and highly approved of all that Ximénez had done. In 1502 the archbishop undertook the publication of the first Polyglot Bible, called the Complutesian, *Complutum* being the Latin name for Alcalá. This Bible had a great influence on subsequent biblical study; it was dedicated to Leo X, and its compilation occupied Ximénez fifteen years, being completed in 1517, only four months before his death, and costing him about £25,000 (\$125,000). The restoration of the ancient Mozarabic Rite at Toledo was another of his projects. For its celebration he added, in 1500, a special chapel to his cathedral and established a college of priests to serve it. Later on similar institutions arose at Valladolid and Salamanca; at Toledo its use continues to the present day.

In 1499 Ximénez accompanied Ferdinand and Isabella on their visit to the newly-conquered province of Granada, and his labours there for the conversion of the Moors met with considerable success. On the death of Isabella (1504) he was again drawn into politics in connection with the disputed succession to the throne of Castile. Philip of Burgundy died in 1506, and, Ferdinand being absent in Italy, Ximénez was appointed viceroy of the kingdom and guardian of Juana, Philip's widow, who had lost her reason. In the following year Ferdinand became regent of Castile, and one of his first acts was to procure from Julius II the cardinal's hat for Ximénez, who was at the same time named Grand Inquisitor of Castile and Leon. The establishment of the Inquisition in Spain has been wrongly attributed to him; it had been in existence fully ten years before his first appearance at Court. As grand inquisitor he initiated several reforms in its working and used every endeavour to reduce the number of cases reserved for its tribunal. He carefully watched the various officers of the Inquisition, lest they should abuse their power by undue violence or oppression, and he arranged and circumscribed the limits of their jurisdiction. He protected scholars and professors from the examination and supervision of the Inquisitors, and issued beneficent regulations regarding the instruction and conduct of new converts, so as to guard them against superstition and blasphemy. An examination of some of the various cases investigated and adjudged by Zimenez shows the care and diligence he exercised in discharging the duties of an office which has been much calumniated and misunderstood. Severe he certainly was, but always straightforward and just in the wielding of his authority as grand inquisitor.

In 1509, at his repeated request, Ferdinand fitted out an expedition against the Moors, and, accompanied by two canons of his cathedral, Ximénez himself led the

army. Inspired by his example and exhortations, the Spanish forces took the city of Oran by assault. In his untiring zeal for the propagation of the Faith, Ximénez endeavoured to make the victory a religious one; numbers of Christian captives were liberated, and several mosques turned into Christian churches. On his return to Spain the cardinal was received as a conquering hero both at Alcalá and Toledo. About this time a serious rupture occurred in the relations between France and the Holy See, owing to the growing power of Louis XII, which Julius II feared might endanger the authority of the Church. To counteract it, the pope took sides with the Venetian Republic against France, notwithstanding the fact that only a short time previously, when the Venetians had taken possession of part of the Papal States, it was by the help of Louis that they had been restored to the Church. For this ingratitude on the part of Julius, Louis vowed vengeance and, if possible, the overthrow of the pope. He attacked the spiritualities of the Church with regard to benefices, and the French army took possession of Bologna, which belonged to the pope. At the same time Louis and the Emperor Maximilian, supported by seven cardinals, chiefly French, took upon themselves to convene a council at Pisa, summoning Julius to attend. They accused him of having disturbed the peace of Europe, of having obtained the papacy by means of simony, and of having failed to keep his promise to convoke a general council of the Church. Julius determined to free Italy of the French and appealed to Ferdinand for help against Louis. By the advice of Ximénez Ferdinand agreed to suspend operations in Africa and to send his forces to assist the pope, and by the end of 1512 the French had been driven out of Italy. The schismatical Synod of Pisa was opened on 1 Nov., 1511, seven cardinals and about twenty bishops being present. the clergy of Pisa refused to have anything to do with it, as Julius had threatened them with excommunication if they did. The assembled prelates thereupon took fright and moved to Milan, so as to be under the protection of France. There they declared the pope deposed. Meanwhile Julius, whose ill health had caused delay, summoned the Fifth General Council of the Lateran to meet at Easter, 1512, at the same time pronouncing the Synod of Pisa and Milan to be null and void. Ximénez supported the pope throughout this affair, and his attitude doubtless went far towards preserving the unity of the Church in Spain. He also took an active part in procuring the publication of the Bull convening the council.

Ferdinand died in 1516, having nominated Ximénez to the regency pending the arrival of Charles V from Flanders. Adrian, dean of Louvain, also claimed the appointment on the authority of a document previously signed by Charles. The jurists who were consulted decided in favour of Ximénez, but he magnanimously proposed that he and Adrian should act jointly until further instructions should be received from Charles. Suspecting that the cardinal would be more acceptable to the Spanish people than a foreigner like Adrian, Charles confirmed Ximénez in the regency, whilst Adrian

was consoled with the Bishopric of Tortona and the post of Grand Inquisitor of Aragon. The important position of regent gave full scope to the cardinal's powers of administration and his solicitude for the peace and security of the kingdom. Jealousy and intrigues amongst the grandees, detrimental to order in the state, caused him to transfer the seat of government from Guadalupe to Madrid, as being more central, and his choice of a capital was confirmed by subsequent sovereigns. Whilst acting as regent he greatly improved the condition of both army and navy, and he forced several rebellious cities and individuals to acknowledge his authority as Charles's representative. He initiated a new system of taxation and brought about various other internal reforms. His diplomacy successfully prevented a proposed alliance between France and Portugal which would have been detrimental to Castile, and when Jean d'Albret, the exiled king of Navarre, endeavoured to recover his lost kingdom, Ximénez joined forces with Francis I of France and defeated him. Both as regent during the absence of Charles and previously as guardian of Queen Juana, his wisdom and rectitude as well as his strength of character did much towards maintaining the integrity of the Spanish Throne. He took a prominent part in the efforts made for the spiritual welfare of the Spanish possessions in America and organized a band of missionaries for the evangelization of the New World. Columbus had proved himself unfit to govern the newly-acquired territory by treating the conquered Indians as slaves, and this method of action called forth the severest condemnation from Ximénez. After he became regent further information of slavery reached Spain, and he took strong measures to repress it. He drew up a code of instructions for the well-being of the natives and used every effort to shield them from oppression and convert them to the Christian Faith.

Broken health and advancing age at length necessitated his retirement from public life, and his end is said to have been hastened by the ingratitude of Charles V for his many services to Spain. He was eighty-one when he died, and he was buried with great honours at Alcalá. Efforts were subsequently made for his canonization, but without result, though he has been honoured as a saint in many parts of Spain. The greater part of his wealth he left to his beloved University of Alcalá. His character, which has been much misunderstood, was remarkable for its great versatility. He was as much a soldier as a priest, as is shown by the share he took in the conquest of Oran. In his public life he was sternly conscientious, and fearless of the consequences to himself, in the performance of what he thought to be his duty, whilst in private he carried his austerities and mortifications so far as to endanger his health. In morals he was above reproach and most exact in all the observances of his religious state.

(See also ALCALÁ, UNIVERSITY OF; POLYGLOT BIBLES.)

The earliest lives of Ximénez, on which almost all others have been based, are those of GOMEZ (Alcalá, 1569), ROBLES (Toledo, 1604), and QUINTANILLA

(Palermo, 1633). Of the later ones the following deserve mention: FLECHIER, Hist. du Cardinal Ximénez (Paris, 1700); BARRETT, Life of Cardinal Ximénez (London, 1813); HEFELE, Der Cardinal Ximénez (Tubingen, 1844), tr. DALTON (London, 1885). Further information may be found in: WADDING, Annales minorum, XV (Rome, 1736); IDEM, Script. ord. min. (Rome, 1806); JAMES, Lives of Eminent Foreign Statesmen, I (London, 1832); ROBERTSON, Life of Charles V (London, 1856); PRESCOTT, History of the Reign of Ferdinand and Isabella (London, 1849), but in reading the last-mentioned two, allowance must be made for their Protestant prejudices.

G. CYPRIAN ALSTON

Yakima Indians

Yakima Indians

A Shahaptian tribe formerly dwelling on the banks of the Columbia, the Wénatchee, and northern branches of the Yakima (Ya-ki-má, runaway) Rivers, in the east of Washington. They called themselves Waptailmim, "people-of-the-narrows", or Pakin-tlema, "people of the gap", from the situation of their village near Union Gap on the Yakima River. They were visited in 1804 by Lewis and Clark, who called them Cutsahn-im. By the treaty of 1855 they with thirteen other tribes gave up the territory from the Cascade Mountains to the Snake and Palus River, and from Lake Chelan to the Columbia, and were to be formed into one body on the Yakima reservation under Kamaiakan, a Yakima chief. But war broke out and the plan was not executed till 1859; even then some of the Palus Indians never came to the reservation. Since then the term Yakima has been frequently applied to all the Indians who observed the treaty arrangements. In 1909 there were about 1900 Indians on the reservation, comparatively few belonging to the original tribe. The Yakima probably followed the main customs of the Shahaptian tribes; they fed on salmon, roots, and berries; carried on commerce between the west of the Cascades and the Eastern Rocky Mountains; and frequently crossed the mountains to hunt the buffalo. They lived in skin tipis and mat-covered dwellings. At present they engage in agriculture and stock-breeding, and are self-supporting. Almost all of them are Catholics, having been converted by the Jesuit pioneer missionaries in the North-West.

A.A. MACERLEAN

Yamasee Indians

Yamasee Indians

A tribe of Muskhogean stock, mentioned frequently in the history of South Carolina, residing formerly near the Savannah River and in Florida. The Spanish missionaries under Fray Antonio Sedeño began to labour among them about 1570, and little trouble arose until a rebellion of the Yamasee was provoked by an attempt of the Spanish civil authorities to send some of them to the West Indies to labour. Many of the Indians fled to English territory in South Carolina and settled there. In 1715 the extortion and cruelty of the English traders drove them to take up arms, and a general

massacre of white settlers took place. Eventually, however, the Indians were defeated at Salkiehatchen by Governor Craven and driven back into Florida, where they allied themselves with the Spaniards. In 1727 the English destroyed their village near St. Augustine and massacred most of them. They were finally incorporated with the Seminole and Hitchiti, and, though a small body still preserved the name in 1812, they have now disappeared. A Yamasee grammar and catechism were compiled by Domingo Báez, one of Fray Sedeño's fellow missionaries.

MOONEY in *Handbook of American Indians*, II (Washington, 1910).

A.A. MACERLEAN

Yaqui Indians

Yaqui Indians

A tribe of Cahita stock, formerly dwelling near the Rio Yaqui, and now dispersed throughout Sonora in Mexico. It is the only Indian tribe that has been in constant contact with the white race and has not been entirely subdued. They are first mentioned by Guzmán in his description of the expedition in 1531. In 1610 they made a treaty with the Spaniards and Catholic missions were at once started among them. They were then expert agriculturists, and manufactured cotton goods. They attacked the Spaniards in 1740, owing to the settlers interfering with their missionaries, and since then have frequently rebelled, the latest rising being in 1901. In 1907 the Mexican Government made an attempt to weaken the power of the hostile element by deporting several thousand Yaqui to Yucatán and Tehuantepec. The tribe now numbers about 23,000.

The native dwellings, some of which are still used, were generally constructed of adobe and reeds, with flat roof of grass and clay. Many of the Yaqui now labour in the Sonora mines; others manufacture palm leaf hats and mats and reed baskets. There are no secret societies and little organization in the tribe. Formerly they were accustomed to exchange wives, but now most of the Yaqui have been converted to Catholicism.

Yazoo Indians

Yazoo Indians

A small tribe formerly living on the lower course of Yazoo River, Mississippi, in close connection with several other tribes, the most important of which was the Tonica. Nothing is definitely known concerning their language, but it seems to have been akin to that of the Tonica, although not the same. In 1699 Father Antone Davion, of the Quebec Seminary of Foreign Missions, established a mission among the Tonica, giving attention also to the other allied tribes. The Yazoo, however, like the Chickasaw were under the influence of the English traders from Carolina, and in 1702 aided the Koroa in the murder of Father Nicholas Foucault and three French companions while asleep; as a result Father Davion was temporarily withdrawn. In 1718 the French established near the village a fort (St. Pierre) to command the river. In 1722 the young Jesuit Father Jean Rouel undertook the Yazoo mission, in the neighbourhood of the French post. Here he remained until the outbreak of the Natchez war in 1729, when the Yazoo and Koroa joined sides with the Natchez. On 28 November the Natchez suddenly attacked the French garrison in their country (Natchez, Miss.), slaughtering several hundred persons, including the Jesuit Father Paul Du Poisson, and carrying off most of the women and children. On learning of the event the Yazoo and Koroa, on 11 December, 1729, waylaid and killed Father Rouel near his cabin together with his negro servant, who attempted to defend him, and the next day attacked the neighbouring post, killing the whole garrison. Father Rouel's body was respected, and a captive French woman finally persuaded the Indians to give it burial. His bell and some books were afterwards recovered and restored by the Quapaw. The Yazoo shared in the destruction of the Natchez, the remnant fleeing to the Chickasaw and apparently being absorbed finally by the Choctaw.

In general culture they seemed to have differed little from the Tonica, to whom, however, they appear to have been inferior. They buried in the ground, throwing lighted torches into the grave with the corpse and wailing nightly at the spot for several months. They believed in a good and a bad spirit, but prayed only to the bad spirit, on the ground that the other would not injure them anyhow.

JAMES MOONEY

Yellow Knives

Yellow Knives

A sub-arctic Déné tribe, called the Copper Indians by Hearne and other early English writers, and Red Knives by Mackenzie and Franklin. To the number of about 500 they range today over the dreary wastes which lie to the northeast of Great Slave Lake. But about 250 years ago they hunted more usually along the banks of the Coppermine River, to the north of their present habitat. Their name is derived from the knives which they used to make in prehistoric times out of the copper which was found within their territory. This was found scattered on the slopes of a mountain which, at an early date, attracted the attention of the fur traders on Hudson Bay. This would-be mine occasioned Hearne's expedition to the mouth of the stream which flowed by the base of the copper-bearing mountain, which has since been known as the Coppermine. According to the national legend of these Indians, this treasure had been shown them by a woman who, having been abused by those who had benefited by her revelation, gradually sank in the ground, and with her disappeared most of the copper. When first met by the whites, the Yellow Knives were a comparatively bold, quite unscrupulous, and very licentious tribe, whose members too often took advantage of the gentleness of their congeneric neighbours to commit acts of high-handedness which ultimately brought on them bloody retribution. Owing to the segregation forced on them by the nature of their habitat, they have remained one of the tribes least affected by civilization. They are now Catholics, and their spiritual needs are attended to by the Oblate missionaries of two missions lying on the northern shore of Great Slave Lake.

Ancient See of York

Ancient See of York

(EBORACENSIS).

The seat of metropolitan jurisdiction for the northern province. It is not known when or how Christianity first reached York, but there was a bishop there from very early times, though there is a break in the historical continuity between these early prelates and the archbishops of a later date. At the Council of Arles (314) "Eborus episcopus de civitate Eboracensis" was present, and bishops of York ere also present

at the Councils of Nicaea, Sardica, and Ariminum. But this early Christian community was blotted out by the pagan Saxons leaving no trace except the names of three bishops, Sampson, Pyramus, and Theoducus, handed down by legendary tradition. When St. Gregory sent St. Augustine to convert the Saxons his intention was to create two archbishoprics -- Canterbury and York -- each with twelve suffragans, but this plan was never carried into effect, and though St. Paulinus, who was consecrated as bishop of York in 625, received the pallium in 631, he never had any suffragans, nor did his successors receive the pallium until 732, when it was granted to Egbert. After the flight of Paulinus in 633 the country relapsed into Paganism, and though its conversion was once more effected by the Celtic bishops of Lindisfarne, there was no bishop of York till the consecration of St. Wilfrid in 664. His immediate successors seem to have acted simply as diocesan prelates till the time of Egbert, the brother of King Edbert of Northumbria, who received the pallium from Gregory III in 735 and established metropolitan rights in the north.

This metropolitan jurisdiction was at first vague and of varying extent. Till the Danish invasion the archbishops of Canterbury occasionally exercised authority, and it was not till the Norman Conquest that the archbishops of York asserted their complete independence. At that time they had jurisdiction over Worcester, Lindsey, and Lincoln, as well as the dioceses in the Northern Isles and Scotland. But the first three sees just mentioned were taken from York in 1072. In 1154 the sees of Man and Orkney were transferred to the Norwegian Archbishop of Drontheim, and in 1188 all the Scottish dioceses except Whithern were released from subjection to York, so that Whithern, Durham, and Carlisle remained to the archbishops as suffragan sees. Of these, Durham was practically independent, for the bishops of that see were little short of sovereigns in their own jurisdiction. During the fourteenth century Whithern was reunited to the Scottish Church, but the province of York received some compensations in the restoration of Sodor and Man. At the time of the Reformation York thus possessed three suffragan sees, Durham, Carlisle, and Sodor and Man, to which during the brief space of Mary's reign (1553-58) may be added the Diocese of Chester, schismatically founded by Henry VIII, but subsequently recognized by the pope.

The mutual relations between Canterbury and York were frequently embittered by a long struggle for precedence. In 1071 the question was argued at Rome between Archbishops Lanfranc and Thomas in the presence of Pope Alexander II, who decided in favour of Canterbury. At a subsequent synod that the future archbishops of York must be consecrated in Canterbury cathedral and swear allegiance to the Archbishop of Canterbury, and that the Humber was to be the southern limit of the metropolitan jurisdiction of York. This arrangement lasted till 1118, when Thurstan, archbishop-elect, refused to make submission, and in consequence the Archbishop of Canterbury

declined to consecrate him. Thurstan thereupon successfully appealed to Calixtus II, who not only himself consecrated him, but also gave him a Bull releasing him and his successors from the supremacy of Canterbury. From time to time during the reign of Henry II and succeeding kings the quarrel broke out again, leading often to scandalous scenes of dissension, until Innocent VI (1352-62) settled it by confirming an arrangement that the Archbishop of Canterbury should take precedence with the title Primate of All England, but that the Archbishop of York should retain the style of Primate of England. Each prelate was to carry his metropolitan cross in the province of the other, and if they were together their cross-bearers should walk abreast. The Archbishop of York also undertook that each of his successors should send an image of gold to the shrine of St. Thomas of Canterbury.

The diocesan history of York apart from its archiepiscopal rights presents few features calling for special remark. For its early memories connected with its founders St. Paulinus and St. Edwin, who was baptized on the spot where the cathedral now stands, its canonized prelates St. Bosa, St. John of Beverley, and St. Oswald, its great scholars Archbishop Egbert and Aleuin, reference should be made to the articles dealing with those venerated names. At the Conquest it was Archbishop Ealdred who crowned William I at Westminster, but his successor, Thomas of Bayeux, the first Norman archbishop, found everything in confusion; the minster with its great school was in a ruinous condition, abandoned by almost all its clergy. The celebrated library had perished and the city itself had been devastated in the final Northumbrian rebellion against William. Thomas had to begin everything afresh. The pontificate of St. William gave another saint to York, and in 1284 his relics were solemnly enshrined there. With John de Thoresby (1352-73) a much needed period of reform began, and he began the present choir of the minster. Another popular archbishop was Richard Scrope, beheaded for his share in the rebellion of the Percys against Henry IV. After his death he was the object of extraordinary veneration by the people. Many of the archbishops besides Thoresby and Scrope -- Fitzalan, Lawrence Booth, Scot, among them -- held the office of lord chancellor and played leading parts in affairs of state. As Heylyn wrote: "This see has yielded to the Church eight saints, to the Church of Rome three cardinals, to the realm of England twelve Lord Chancellors and two Lord Treasurers, and to the north of England two Lord Presidents."

The following is the list of archbishops of York, but there is great difficulty in determining the exact dates before the Norman Conquest and there is no agreement on the subject. The dates of accession given below are based on the recent researches of Searle, but those earlier than the tenth century can only be regarded in most cases as approximate:

- St. Caedda;

- St. Wilfrid, 664-678;
- Bosa, 678;
- St. Wilfrid (restored), 686;
- Bosa (restored), 691;
- St. John of Beverley, 705;
- Wilfrid II, 718;
- St. Egbert, 732 or 734;
- *Æthelbearht* (Albert), 767;
- Eanbald I, 780;
- Eanbald II, 796;
- Wulfsige, after 808;
- Wigmund, 837;
- Wulfhere, 854;
- *Æthelbeald*, 900;
- Hrothweard (Lodeward or Redwald), uncertain;
- Wulfstan I, 931;
- Oseytel, 956;
- Eadwald, 971;
- St. Oswald, 972;
- Ealdwulf, 992;
- Wulfstan II, 1003;
- *Ælfric Puttoc*, 1023;
- *Ælthrie*, 1041;
- *Ælfric Puttoc*, 1042;
- Cynesige (Kinsky), 1051;

- Ealdred, 1061;
- Thomas of Bayeux, 1070;
- Gerard, 1101;
- Thomas II, 1108;
- Thurstan, 1114;
- *vacancy*, 1140;
- St. William, 1143;
- Mordac, 1147;
- St. William (restored), 1153;
- Roger de Pont l'Evéque, 1154;
- *vacancy*, 1181;
- Geoffrey, 1191;
- *vacancy*, 1212;
- Walter de Grey, 1216;
- Sewal de Bovill, 1256;
- Geoffrey of Ludham, 1258;
- Walter Giffard, 1266;
- William of Wickwaine, 1279;
- John de Romeyn, 1286;
- *vacancy*, 1296;
- Henry of Newark, 1298;
- Thomas of Corbridge, 1300;
- *vacancy*, 1304;
- William Greenfield, 1306;
- *vacancy*, 1315;

- William de Melton, 1317;
- *vacancy*, 1340;
- William la Zouch, 1342;
- John of Thoresby, 1352;
- Alexander Neville, 1374;
- Thomas Fitzalan, 1388;
- Ralph Waldby, 1397;
- Richard Scrope, 1398;
- *vacancy*, 1405;
- Henry Bowet, 1407;
- *vacancy*, 1423;
- John Kemp (Cardinal), 1426;
- William Booth, 1452;
- George Neville, 1464;
- Lawrence Booth, 1476;
- Thomas Scot (de Rotherham), 1480;
- Thomas Savage, 1501;
- Christopher Bainbridge (Cardinal), 1508;
- Thomas Wolsey (Cardinal), 1514;
- Edward Lee, 1531;
- *vacancy* during which Robert Holgate was schismatically intruded, 1544-55;
- Nicholas Heath, the last Catholic Archbishop of York, 1555-79.

The minster occupies the site of the church built by St. Edwin, which as restored by Archbishop Albert was described by Alcuin as "a most magnificent basilica". This perished in the rebellion of 1069. It was rebuilt by Thomas of Bayeux, but few portions

of this Norman building now remain. The chief features of the existing building are the Early English transepts with the lancet windows known as the Five Sisters (late twelfth and early thirteenth century) and the west front (early fourteenth century), usually regarded as the finest in England. The nave and chapter-house, containing splendid examples of medieval glass, are of the same date; the Lady chapel and choir, the latter containing one of the finest perpendicular windows in the world, were fourteenth-century work. The towers were added during the following century, and the completed cathedral was reconsecrated on 3 February, 1472.

The diocese, which consisted of the counties of York and Nottingham, was divided into four archdeaconries -- York, Cleveland, East Riding, and Nottingham -- and contained 541 parishes. The religious houses, which were very numerous, included at the time of the Dissolution (1536-39) 28 abbeys, 26 priories, 23 convents, 30 friaries, 13 cells, 4 commanderies of Knights Hospitallers, and formerly there had been 4 commanderies of the Knights Templars. The abbeys and priories included some of the largest and most famous in England, such as the Benedictine abbeys at York itself, Whitby, and Selby; Bolton Abbey, belonging to the Augustinians, and the Cistercian abbeys at Fountains, Rivaulx, Jervaulx, Sawley, and Kirkstall. The churches of York itself were remarkable for their beauty and size. Ripon and Beverley possessed large collegiate churches, and many of the parish churches in the diocese were noted for their size and architectural features. The arms of the see originally were:

gules, a pallium argent charged with four crosses formee fitche,
sable, edged and fringed or.

But subsequently another coat was used:

gules, two keys in saltire argent, in chief a mitre or.

The Anglican archbishops have, fitly enough, substituted a royal crown for the mitre. The city of York itself after the Reformation became endeared to English Catholics for two reasons, one being the large number of martyrs who suffered at the local Tyburn, the other being the establishment in 1680 of the celebrated Bar Convent founded outside Micklegate Bar by the English Virgins, now the Institute of Mary (Loreto Nuns). This community, which still carries on one of the most noted schools for girls in England, has the distinction of being the oldest convent now in England.

EDWIN BURTON

Use of York

Use of York

It was a received principle in medieval canon law that while as regards judicial matters, as regards the sacraments, and also the more solemn fasts, the custom of the Roman Church was to be adhered to; still in the matter of church services (*divinis officiis*) each Church kept to its own traditions (see the Decretum Gratiani, c. iv., d. 12). In this way there came into existence a number of "Uses", by which word were denoted the special liturgical customs which prevailed in a particular diocese or group of dio-

ceses: speaking of England before the Reformation, in the south and in the midlands, the ceremonial was regulated by the Sarum Use, but in the greater part of the north the Use of York prevailed. The general features of these medieval English Uses are fairly represented by the peculiarities of the Sarum Rite and the reader is advised to consult that article, but certain details special to York may be noted here.

Beginning with the celebration of Mass, we observe that in the reading of the Gospel the priest blessed the deacon with these words; "May the Lord open thy mouth to read and our ears to understand God's holy Gospel of peace," etc., whereupon the deacon answered:

Give, O Lord, a proper and well-sounding speech to my lips that
my words may please Thee and may profit all who hear them for Thy
name's sake unto eternal life. Amen.

Moreover, at the end of the Gospel the priest said secretly: "Blessed is he that cometh in the name of the Lord". Again while reproducing in general the features of the Sarum offertory, the York Use required the priest to wash his hands twice, once before touching the host at all and again apparently after using the incense, while at the later washing the priest said the hymn "Veni Creator Spiritus". Also, in answer to the appeal "Orate fratres et sorores", the choir replied by repeating in a low voice the first three verses of Psalm xix, "Exaudiat te Dominus", etc. By another noteworthy departure from the Sarum custom, the priest in giving the kiss of peace at York said, not "Pax tibi et ecclesiae" (Peace to thee and the Church), but "Habete vinculum", etc. (Retain ye the bond of charity and peace that ye may be fit for the sacred mysteries of God). There were also differences in the prayers which immediately preceded the Communion, while the formulae used in the actual reception of the Blessed Sacrament by the priest were again peculiar to York. It may further be noticed that the number of Sequences, some of them of very indifferent quality, retained in the York Missal, considerably exceeded that of the Sequences printed in the Sarum book. A list is given by Mr. Frere in the "Jour. Theol. Stud.", II, 583. Some metrical compositions, bearing a curious resemblance to the Carmelite "O Flos Carmeli", figure among the offertories. (See Frere, loc. Cit., 585.)

Turning to the Breviary, York employed a larger number of proper hymns than Sarum. There were also in every office a number of minor variations from the practice both of Sarum and of Rome. For example a careful comparison of the psalms, antiphons, responsories, lessons, etc. prescribed respectively by Rome, Sarum, and York for such a festival as that of St. Lawrence reveals a general and often close resemblance but with many slight divergences. Thus in the first Vespers the psalms used both at York and Sarum were the ferial psalms (as against the Roman usage), but York retained also the

ferial antiphons while Sarum had proper antiphons. So the capitulum was the same but the responsory following was different, and so on. Again the psalms, antiphons, and responsories at Matins were substantially the same, but they do not always occur in quite the same order. Both at York and Sarum the first six lessons were taken from the legend of the saint and yet they were differently worded and arranged. The most singular feature, and one common to both Sarum and York on this and one or two other festivals (notably that of the Conversion of St. Paul and the Feast of the Holy Trinity), was the use of antiphons with versicles attached to each. This feature is called in the *Aurea Legenda* "regressio antiphonarum" and in Caxton's translation "the reprysyng of the anthemys". The contents of the manual and the remaining service-books show other distinctive peculiarities. For example the form of troth-plighting in the York marriage-service runs as follows (we modernize the spelling):

Here I take thee N. to my wedded wife, to have and to hold at bed
and at board, for fairer for fouler, for better for worse, in sickness and
in health, till death us do part and thereto I plight thee my troth;; in
which may be specially noticed the absence of the words if the holy
Church it will ordain,

found in the Sarum Rite and still represented in the English Catholic marriage service.
Again in the delivery of the ring, the bridegroom at York said:

With this ring I wed thee, and with this gold and silver I honour
thee, and with this gift I dowe thee,

where again one misses the familiar "with my body I thee worship" retained in both
the Catholic and Protestant marriage service of England. Also the York rubric prescribes

Here let the priest ask the woman's dowry and if land be given her
for her dowry then let her fall at the feet of her husband.

This feature is entirely lacking in all but one or two of the Sarum books. The only
other York peculiarity that seems to call for special notice is the mention of the Blessed
Virgin in the form for the administration of extreme unction, viz.

Per istam sanctam unctionem et suam piissimam misericordiam
et per intercessionem beatae Mariae Virginis et omnium Sanctorum,
indulgeat tibi Dominus quidquid peccastic per visum. Amen.

Naturally York had also its special calendar and special feasts. They are set out at length
in Dr. Henderson's edition of the York Missal (pp. 259 sqq. And especially p. 271).

We will only note here the circumstance that the Visitation was kept at York on 2 April, a date which seems to agree better with the Gospel narrative than our present 2 July. As for the colours of vestments, York is said to have used white for Christmas, Easter, Palm Sunday, and probably for Whitsuntide, as well as on feasts of the Blessed Virgin, while black was used for Good Friday and blue for Advent and Septuagesima, etc. (see St. John Hope in "Trans. T. Paul's Eccles. Society", II, 268, and cf. I, 125) but it is very doubtful whether these data regarding colours can be trusted.

The series of York liturgical books have all been printed for the Surtees Society of Durham, the Missal in 1874, the Manual and Processional in 1875, the Pontifical in 1873, all these being edited by HENDERSON. The Breviary edited by LAWLEY appeared in two volumes in 1880-82. Much information may be derived from the prefaces and notes in these volumes. See also MASKELL, *Ancient Liturgy of the Church of England* (3rd ed., Oxford, 1882), in which the text of the Ordinary and Canon of the Mass as observed at Sarum, York, Hereford, and Bangor are printed in parallel volumes and contrasted with the text of the Roman Missal. Some account of "the newly found York Gradual" is given by FRERE, in *Jour. Of Theol. Stud.*, II, 575-86 (1901). Compare further the introductions to the three volumes of MASKELL, *Monumenta Ritualia* (Oxford, 1882), and the notes to SIMMONS, *Lay Folks Mass Book*, in *Early Eng. Text Society* (London, 1878).

HERBERT THURSTON

Youghal

Youghal

The Wardenship of Youghal, in the Diocese of Cloyne, was founded by Thomas, Eighth Earl of Desmond, the charter being dated 27 Dec., 1464, and was confirmed by the Holy See. It was endowed with a large number of rectories and vicarages in the Diocese of Cloyne, and also had four vicarages in Ardfert. By the terms of the foundation, the wardenship consisted of a warden, eight fellows, and eight singing-men (vicars choral), and the endowment was about £600 per annum. Three years later the noble founder was hanged by the Viceroy of Ireland (15 Feb. 1468), and a stormy period ensued on account of the Wars of the Roses, in which the Earls of Desmond were involved. The ninth earl was murdered by his own servants on 7 Dec., 1487. Two years later the Bishop of Cloyne resigned; and his successor, Blessed Thady MacCarthy (beatified in 1895), died in exile as a confessor at Ivrea (24 Oct., 1492). The last Catholic warden was Thomas Allen (1533), after whom came the schismatic Roger Skiddy, who had various preferments under Edward VI, and was appointed Dean of Limerick and Bishop of Cork by Queen Elizabeth in 1562. He is described as "Warden of Youghal"

in 1567. Sixty years later all the endowments were acquired by the notorious Earl of Cork, and in 1639 the rectory was united to the wardenship. A Catholic succession of wardens was maintained as late as 1709, when Father Richard Harnet held the position, which was then merely titular. The warden's house is now the picturesque residence of Sir Henry A. Blake, and is more generally known as "Sir Walter Raleigh's House".

SMITH, *History of Cork* (Dublin, 1759); HAYMANN, *Handbook for Youghal* (new ed., Youghal 1896).

W.H. GRATTAN-FLOOD

The Young Men's Institute

The Young Men's Institute

A Catholic fraternal organization, founded on 4 March, 1883, at San Francisco, California. The six founders were: John J. McDade, first grand president and subsequently the first supreme president; James F. Smith, ex-grand president, now member of the Commerce Court at Washington, D. C.; Edward I. Sheehan; William T. Ryan; William H. Gagan; and George R. Maxwell. After many preliminary meetings and much deliberation, a constitution was formed and adopted and officers were elected.

The Young Men's Institute is the only beneficial and fraternal organization originating in the West, which has become a national organization. Its objects and purposes are: "Mutual aid and benevolence, the moral, social, and intellectual improvement of its members, and the proper development of sentiments of devotion to the Catholic Church and loyalty to our country, in accordance with its motto, '*Pro Deo, Pro Patria*'" (Constitution of Supreme Council). The Supreme Council has authority essential to the exercise of supreme legislative and appellate power, and is vested with supreme authority over the several Grand Council Jurisdictions (five in number), having a uniformity of general laws, but without interfering with the local conditions peculiar to the separate jurisdictions. The Subordinate Councils stand in the same general relations to the different Grand Council Jurisdictions that the several counties stand to the respective states in which they are located. The Detached Councils are under the direct supervision and control of the Supreme Council, because they are not as yet able to sustain a Grand Council Jurisdiction. Membership is divided into three classes: (1) beneficiary, those who desire to participate in sick and funeral benefits and who are between the ages of eighteen and forty-five years; (2) active, those who do not desire to participate in either sick or funeral benefits; (3) honorary members, who may be of any age. No person is eligible to membership, or can remain a member, unless he is a practical Catholic. The organization has spread through the United States, British Columbia, Canada, the North-west Territory, the Hawaiian and Philippine Islands,

and at present has a membership of 20,000; it is strongest in California. Archbishop Patrick W. Riordan has never failed to encourage the organization, and in public, as in private, has been unstinted in his praise and commendation. In addition, the organization has received the approbation of Popes Leo XIII and Pius X, as well as the approval of the Apostolic Delegates to the United States, the Hierarchy in the United States, Canada, British Columbia, the Hawaiian and the Philippine Islands.

F.J. KIERCE GEORGE A. STANLEY

Marie-Marguerite d'Youville

Marie-Marguerite d'Youville

(*née* Dufrost de Lajemmerais).

Foundress of the Gray Nuns, or Sisters of Charity, born at Varennes, near Montreal, 15 October, 1701, of Christophe-D. de L. and Renee de Varennes, the sister of Laverendrye, discoverer of the Rocky Mountains; d. 23 December, 1771. After studying two years with the Ursulines at Quebec, she shared, at the age of twelve, in the housework of her widowed mother. She married (1722) M. d'Youville, who treated her with indifference, and eight years later left her a widow with three children and a heavy debt. She was forced to carry on a small trade in order to meet her obligations. The only two of her sons who reached manhood became priests. Out of her own poverty, she helped the needy. Mother d'Youville conceived an ardent devotion to the Eternal Father, which was to be the keynote of her life. Providence destined her to rescue from debt and ruin the hospital, founded (1694) by M. Charon, ad hitherto managed by a brotherhood bearing his name. This undertaking which was to be the cradle and groundwork of a new religious institute, the Grey Nuns, or Sisters of Charity, was destined to flourish under the wise and zealous direction of Mother d'Youville. When, in 1747, the General Hospital was entrusted to her, she had already, with a few companions living under a provisional rule, begun practicing the spiritual and corporal works of mercy. She opened the hospital to disabled soldiers, the aged of either sex, the insane, the incurable, foundlings, and orphans. When, to save the General Hospital of Quebec, the intendant Bigot, with Bishop Pontbriand's assent, decided to transfer to the former institution the property of the Montreal Hospital, Mother d'Youville submitted. The intervention of the Sulpician superior, Cousturier, maintained her rights. In 1755, Mgr. Pontbriand confirmed the rule of the institute drawn up by Father Normant. Mother d'Youville assumed the entire debt, 49,000 *livres*, and to meet the expense of restoring, rebuilding, and harbouring numerous inmates, increased by the admission of epileptics, lepers, and contagious patients excluded from the Hôtel-Dieu, she made clothing for the king's stores and for the traders of the upper country,

which constituted her chief revenue. During the Seven Years War so many English soldiers were treated at the hospital, that one of its wards was called "la salle des Anglais". Mother d'Youville ransomed from the Indians, at a great price, an English prisoner destined to torture, and saved from their fury several fugitives, one of whom, through gratitude, later prevented the bombardment of the fortress-like hospital. Owing to the exorbitant cost of necessities of life, due to unscrupulous corruption, the hospital was heavily indebted at the time of the conquest. A credit of 100,000 *livres*, due by the French Government, was redeemed with interest only under Louis XVIII, and the sum applied to the work begun by the foundress. Despite her poverty, Mother d'Youville undertook to rescue all foundlings thrown upon her charity. When, in 1766, the General Hospital was destroyed by fire, fully resigned to her loss, she knelt with her sisters and recited the "Te Deum". Her institute has spread throughout Canada and even to some of the neighbouring states. The Decree introducing the cause of her beatification, and entitling her to be called Venerable, was signed on 28 April, 1890.

FAILLON, Vie de Madame d'Youville (Ville Marie, 1852); JETTE, Vie de la Ven. Mère d'Youville (Montreal, 1900).

LIONEL LINDSAY

Nicolas Ysambert

Nicolas Ysambert

Theologian, born at Orleans in 1565 or 1569; died at Paris, 14 May, 1642. He studied theology at the Sorbonne and was made a fellow (*socius*) of the college in 1598. Thenceforth he professed theology with such success as to attract public attention. In 1616 King Louis XIII founded at the Sorbonne a new chair of theology for the study of the controversial questions between Catholics and Protestants. The professor in charge had to give on every working day an hour's lecture followed by a half hour of familiar conference with his auditors. Ysambert was appointed to this chair by the king, who in this instance had reserved to himself the nomination. This appointment, which was an honour in itself, was still more enhanced by the eulogies bestowed on Ysambert in the letters patent which designated him, wherein the king praises his competence and station, his experiences in theology, controverted matters, and other sciences. From the time of his appointment as is evident from the manuscripts of his course, one of which is preserved at the library of Toulouse, which was begun in 1618, Ysambert took as the basis of his letters the *Summa theologica* of St. Thomas Aquinas which he seems to have commentated until the end of his career of teaching. His lessons won him a wide reputation, which he retained until his death. In the councils of the theological faculty he was chiefly distinguished for his share in the censure directed

against Marc Antonio de Dominis, the apostate Archbishop of Spalatro, the author of the notorious treatise *De republica christiana*, which was intended to overthrow the whole ecclesiastical Hierarchy; he was the first to point out the heretical doctrine to the faculty and he brought about its condemnation. When Edmond Richer laboured to revive in the theological faculty a somewhat modified Gallicanism, Ysambert with the theologian Duval became the zealous defender of the rights of the Holy See. To learning Ysambert joined great strictness of life, remarkable solidity of judgment, and a precision and sense of justice much appreciated in the decision of cases of conscience. He began publishing his *Disputationes*, or commentaries on the Summa of St. Thomas, but it was not completed during his life (Paris, 1638-48). His commentary is generally esteemed.

FELIBIEN, Hist. De la ville de Paris (Paris, 1725), V; DUPLESSIS D'ARGENTRE, Collectio Judiciorum de novis erroribus II, (Paris, 1728), pt. II; FERET, La Faculte de theologie de Paris, époque moderne, III (Paris, 1906).

ANTOINE DEGERT

Archdiocese of Yucatan

Archdiocese of Yucatán

(YUCATANENSIS).

Located in the Republic of Mexico; Campeche and Tabasco are its suffragans. Its area is that of the state of the same name, 17,204 sq. miles, and its population 337,020 inhabitants (1910). There is a legend that long before the arrival of the Spanish in Mexico the Christian religion had been preached in Yucatán by Quetzacoatl (see MEXICO). Yucatán was the first region of the Mexican territory to receive the light of the Gospel in the sixteenth century; it was there that the first Mass was celebrated. It is said that in 1517 Francisco Hernández de Cordóba, the discoverer and explorer of the region, founded the first parish. Leo X, believing the newly-discovered land to be an island, by the Bull "Sacri apostolatus ministerio", dated 27 January, 1518, created the Bishopric of Yucatán, under the name "Carolense" and placed it under the protection of "Santa Maria de los Remedios". When it was known that Yucatán was part of the continent which Hernán Cortés was conquering, Clement VII made certain modifications (see TLAXCALA), and Father Julián Garcés, appointed first Bishop of Yucatán, to make his residence at Tlaxcala when he arrived in Mexico, as the Spanish had abandoned the conquest of Yucatán for this new land. The first resident bishop was Francisco Toral, a Franciscan, who took possession on 15 August, 1562, one year after his election; he assisted at the first and second Mexican councils.

Marcos de Torres y Rueda, twelfth bishop (1647), owing to dissensions between Juan Palafox, Bishop of Tlaxcala, and the Viceroy of New Spain, Count of Salvatierra, was named Viceroy of Mexico and entered into office, 13 May, 1648; he died at the capital, 22 April, 1649. Juan Gómez de Parada, twentieth bishop, governed the dioceses of Yucatán, Guatemala, and Guadalajara with great success. His successor, Ignacio Castorena y Ursúa, was the founder of the first newspaper published in Mexico (see PERIODICAL LITERATURE, CATHOLIC.-Mexico). José María Guerra, thirty-fifth bishop (d. 1863), lived during the famous war of caste which ruined almost the whole of Yucatán; his zeal, energy and firmness prevented the city of Mariti from falling into the hands of the revolting Indians. It was at the instance of Leandro Rodríguez de la Gala, his successor, that the new See of Tabasco was formed from parishes taken from the Diocese of Yucatán. The Province and Vicariate of Petén, situated in the Republic of Guatemala, which ecclesiastically had belonged to Yucatán, became a part of the See of Guatemala. Believing that the colony of Belize was his dependency, the bishop sent missionaries there in 1864; this land, however, had been under the administration of priests sent from the Vicariate Apostolic of Jamaica since 1837. The present archbishop is Mgr. Tristschler y Córdova, appointed on 11 November, 1906. The Diocese of Yucatán was suffragan of Mexico until 1891, when it became suffragan of the newly-created Archdiocese of Oaxaca. In 1895 the new See of Campeche was created from parishes taken from Yucatán, to which was added all the territory of Quintana Roo. The Archdiocese of Yucatán erected in 1906, has: a seminary and 30 students; 32 parochial schools and 9 Catholic colleges, with 6738 students. Protestants have erected 3 colleges, which have 79 students, and 2 churches.

CAMILLUS CRIVELLI

Yukon

Prefecture Apostolic of Yukon

Occupies the extreme northwestern portion of the Dominion of Canada. It extends from 54 degrees North latitude to the Arctic Ocean and from the summit of the Rocky mountains to 141° West longitude. It covers an area of about 312,000 sq. miles, comprising two distinct districts, the Yukon Territory and the north of the province of British Columbia, which, previous to the erection of the new prefecture, belonged to different jurisdictions; the former being attached to the Vicariate of Mackenzie River

and the latter o the Diocese of New Westminster. The prefecture was established on 9 March, 1908, and entrusted to the Oblate Fathers of Mary Immaculate, the first prefect, Rev. E.M. Bunoz, being appointed on 8 April of the same year. The clergy of his jurisdiction is composed of 9 Oblate Missionaries, in charge of 5 churches with resident priests and 22 missions with chapels and 6 without chapels. The principal institutions are a school and a hospital, which are conducted by 12 Sisters of St. Ann of Lacine. The Catholic population numbers about 5000. The chief missions of the prefecture are: Dawson, Prince Rupert, and Stuart's Lake.

At Dawson, the metropolis of the Klondike gold fields, the first house of worship (Church of St. Mary) and first hospital, both log buildings, were erected in 1907-08 by the Jesuit Father Judge (d. at Dawson, 1899). Previous to the Klondike rush, the Yukon was almost uninhabited by white men. The Oblate Father Gendreau, who succeeded Father Judge, enlarged and transformed the rough church besides establishing the first school of the territory. This school was rebuilt on a larger scale in the centre of the town in 1901 under the present prefect, who succeeded Father Gendreau in 1902. The hospital was also replaced in 1908 by a stately structure. The Catholic Church took a prominent place in the famous camp and always kept it. Yeoman services were rendered by prominent laymen such as the late Alex. MacDonald (the Klondike King), Judge A. Dugas, Judge C. Maculey, J. MacNamee, the late A. Noel, and F. Nolan. An ordinance recognizing and guaranteeing the rights of separate schools in conformity with the British North America Act passed the Yukon Legislature in 1902. Prince Rupert, the Pacific Terminus of the Grand Trunk, although only founded in June, 1909, possesses a Catholic church (Church of the Annunciation), parochial hall, and club rooms; it is the headquarters of the prefect. Stuart's Lake is situated in the centre of old and flourishing Indian missions, which number 2000 natives, al of which are conducted according to the system of Bishop Duricu. The Oblate Father Coccolla is in charge.

JUDGE, An American Missionary (Baltimore, 1907).

E.M. BUNOZ

Yun-Nan

Yun-nan

The Mission of Yun-nan includes the whole Province of Yun-nan which is situated in the southwestern corner of China. It adjoins Tonkin, Burma, Tibet, and the Chinese provinces of Sz-Chuen, Kwei chou, and Kwang-si. It is mountainous and its climate is like that of France. It has about 18,000,000 inhabitants, mostly Chinese, divided into

many different tribes, as Y-jen, Miao-tse, Lo-los, Shans, Lissous. The Mussulman population is 900,000.

In 1658 Yun-nan was entrusted to the first Vicar Apostolic of the Society of Foreign Missions of Paris, Bishop Pallu, who had no means at his disposal to evangelize it. In 1699, Father Leblanc was made vicar Apostolic. He arrived there in 1702 accompanied by Father Danry. They found only four Christians, whom they used as catechists. Father Leblanc settled at Yun-nan-sen, the metropolis of the province, bought a piece of ground, and began building a church. Father Danry by 1706 had baptized more than 1000 Chinese. In that year, Emperor Kang-hsi banished the missionaries and father Danry left China, while Father Leblanc sought concealment in Fokien and Tché-kiang; he died in 1720, shortly after being made Bishop of Troad. Bishop Enjobert de Marillat, Vicar Apostolic of Sz-Chuen, administrated Yun-nan till 1780 when Yun-nan was united to Sz-chuen and Father Gleyo went to Yun-nan, where he established many Christian communities. In 1810, Yun-nan was separated from Sz-Chuen. Mgr. Ponsot became vicar Apostolic and was consecrated titular Bishop of Philomedia (1843-1880). The Catholic population at this time was 4000. There was only one Chinese priest. In 1847 a persecution stopped the progress of evangelization. In 1856 the Catholics numbered 6597. The Treaty of Pekin was not published in Yun-nan until 1865. In 1874 Father Baptifaud was killed at Pien-kio by the rebels. In 1881 Father Terrasse and fourteen Christians were massacred at Chang-yu, and 20 Dec., 1910, Father Mérigot was killed at Tsing-in. The present vicar Apostolic is Mgr. De Gorostarzu, consecrated Bishop of Aila in 1907. He resides at Yun-nan-sen.

In 1889 the mission comprised 1 bishop, 25 European missionaries, 7 Chinese priests, 53 churches or chapels, 1 seminary with 25 students, and 10,221 Catholics. In 1910, there were 2 bishops, 31 European missionaries, 15 Chinese priests, 92 churches or chapels, 1 seminary with 21 students, and 102 schools with 2112 pupils and 12,234 Catholics.

V.H. MONTANAR

Yuracare Indians

Yuracaré Indians

A Bolivian tribe living between Santa Cruz de la Sierra and Cochabamba in the wooded regions and plains adjoining the mountains, on the Eastern slopes of the Andes, close to the Río Beni and Rio Marmoré. They are tall, and the women are very handsome. They have oval countenances, aquiline noses, very dark eyes, while their skin is almost as white as that of the Spaniards. The Yuracaré are excellent hunters and make good warriors; they were of a roving disposition, but the Jesuits of the

Paraguayan Reductions succeeded in establishing a mission among them, which flourished until the suppression of the Society. The standard of morality among the Yuracaré was very low. The marriage bond was readily dissolved, but polygamy was not practised. They were distributed in families, living without any form of government. Men and women were separated at meals, but there was no subordination between husband and wife or relatives, though the parents were generally treated as slaves by the children.

They were an extremely superstitious race, but they adored neither nature nor a superior being. They believed in the immortality of the soul but had no idea of future rewards or punishments. The dead, who were mourned for a long period, were buried with their bows and arrows, as they were supposed to have gone to a delightful region under the earth, where the woods abounded with peccaries and the hunting never failed. The Yuracaré live entirely by hunting; they consider it lawful to commit suicide, and practice duelling, which is carried out according to rules laid down by public authority. They make it a rule never to advise their children, leaving them to form their own standard of conduct.

RECLUS, Universal Geography ed. KEANE, XVIII (London, 378-9).

A.A. MACERLEAN

Francesco Zabarella

Francesco Zabarella

Cardinal, celebrated canonist, born at Padua, 10 August, 1360; died at Constance, 26 September, 1417. He studied jurisprudence at Bologna (1378-83) chiefly under the famous Giovanni di Lignano, and at Florence, where he was graduated in 1385. He taught canon law at Florence (1385-90) and at Padua (1390-1410). Having taken minor orders in 1385, he became vicar of Bishop Acciaiuoli of Florence and pastor at the Church of Santa Maria in Pruncta near Florence. After the resignation of Bishop Acciaiuoli in 1386, Zabarella was elected his successor, but he pope had previously appointed another as bishop. In 1398 he was made archpriest of the cathedral at Padua. The Paduan Government repeatedly employed him on diplomatic missions, and towards the end of 1404, he was one of two ambassadors sent to King Charles VI of France to obtain the latter's assistance against Venice, which was preparing to annex Padua. When Padua had become part of the Venetian Republic in 1406, Zabarella became a loyal supporter of Venice. In 1409 he took part in the Council of Pisa as councillor of the Venetian legate. On 18 July, 1410, John XXIII appointed him Bishop of Florence and papal referendary, and on 6 June, 1411, cardinal deacon with the titular church of SS. Cosma e Damiano.

Though he never received major orders, he was one of the most active and influential cardinals of John XXIII, whose interests he supported at the Council of Rome (1412-3). When this council failed to end the lamentable schism, John XXIII sent Cardinals Zabarella and De Challant as legates to King Sigismund at Como in October, 1413, with full powers to come to an understanding with the latter concerning the place and time for holding a new council. It was arranged to open the new council at Constance, 1 November, 1414, where Zabarella was one of the chief supporters of John XXIII. When the latter fled from Constance 20 March, 1415, in order to thwart the election of a new pope, Zabarella remained as his representative. It was chiefly through his influence that John XXIII finally resigned the papacy unconditionally in April, 1415. Nevertheless the council continued its proceedings against John, and commissioned Zabarella with four other cardinals to inform him of his suspension, and, later, of his formal deposition by the council. In the proceedings against the Avignonese Pope Benedict XIII, Zabarella proposed, at the session held 28 Nov., 14167, that Benedict be cited before the council. He also took part in the proceedings of the council against Huss, Jerome of Prague, and Jean Petit. His attempts to induce the two former to signed a softened form of retraction proved useless. From April till the end of July he sought to regain health and strength at a neighbouring watering place. On 28 July

he was again at Constance, and up to the time of his death exerted all his influence to hasten the election of a new pope. He is buried in the cathedral at Padua.

His most important literary production is an ecclesiastico- political treatise, "De schismatice" (Strasburg, 1515). It consists of independent portions, written at different intervals (1403-5-6- 8), and contains various suggestions for ending the schism. His chief canonical writings are: "Lectura super Clementinis" (Naples, 1471); "Commentarius in libros Decretalium" (Venice, 1502); "Consilia" (Venice, 1581). He also wrote "De felicitate libri III" (Padua, 1655); "De arte metrica"; "De natura rerum diversarum"; "De corpore Christi": and a few small juridical treatises. A large number of his letters are in the imperial library of Vienna, Cod. Lat. 5513.

Zabarella (Potenza, 1895); ZARDO, Francesco Zabarella a Firenze in Arch. stor. Ital., XXII, 1-22, and separately (Florence, 1898).

MICHAEL OTT

Zabulon

Zabulon

One of the twelve sons of Jacob and ancestor of the tribe of the same name (Gen., xlvi, 14; Num., xxvi. 26). Nothing is known of Zabulon except that Sacred, Elon, and Jahelel were his sons and the heads of three tribal families. The tribe of Zabulon plays an important part in the early history of Israel. The name is Hebrew; it occurs in the form *zebulûn*, eighteen times; *zebulûn*, twenty-six times; *zebulûn*, once; Sept., *Zaboulon*; Josephus (Ant., V, vii, 14), *Zaboules*; Vulg., Zabulon, the New Testament reading is that of the Septuagint. The meaning of the name is doubtful. There seems to be a play upon Zebed; cf. Lia's words in [Genesis 30:20](#): "God hath gifted me (*zebadani*) with a good gift (*zebed*); this time my husband shall honour me (*yizbeleni*), because I have borne him six sons; and therefore she called his name Zabulon".

At the census of the tribes, in the Desert of Sinai, during the second year of the Exodus, the tribe of Zabulon numbered 57,400 men fit for war (Num., i, 31). This army, under the command of Eliab, encamped with Juda and Issachar east of the tabernacle and with them made up the vanguard of the line of march (Num., ii, 3-9). Among the spies sent by Moses to view the land of Chanaan, Geddiel the son of Sodi represented Zabulon (Num., xiii, 11). At Settim, in the land of Moab, after 24,000 men

were slain for their crime, a second census was taken; Zabulon numbered 60,500 fighting men (Num., xxvi, 27). Elisaphan, son of Pharnach, was chosen to represent Zabulon at the division of the Land of Promise (Num., xxxiv, 25). The tribe seems to have easily conquered its portion. During the rule of Josue it received no special mention. While the judges ruled, its prowess was worthy of note. In the Canticle of Debbora the tribe is specially singled out as having "offered their lives to death in the region of Merome" (Judges, v, 18); and praised for that there came "out of Zabulon they that led the army to fight", as in Heb., "they that carry the pen of the writer", i.e. such as recruiting and inspecting officers (Jg., v, 14). The reference is to Barac's campaign against Sisara, the commander of the forces of Jabin, King of Channaan (Judges, iv, 10). They answered the call of Gedeon and joined in battle against Midian (Judges, vi, 35); and gave to Israel Ahialon, who judged her ten years (Judges, xii, 11). Among those that followed David to Hebron to make him king were 50,000 fully armed men of Zabulon with no double heart (I Par., xii, 33), who brought with them, as sign of their hearty allegiance, bounteous supplies of meat and drink to celebrate the accession of their new ruler (I Par., xii, 40). When Ezechias made reparation for the abominations of his father Achaz, he invited all Israel to keep the pasch in the house of the Lord. Mockery and ridicule met the emissaries of the reformer; yet some were true to the religion of their fathers, and, even from far away Zabulon, went up to Jerusalem, destroyed the idols, and kept the feast of the unleavened bread (II Par., xxx, 10-23).

At the division of the land between the seven tribes not yet provided for, the lot of Zabulon was third. The tribe's territory started with Sarid (Jos., xix, 10), which is supposed to have been Tell Shadud, some five miles southwest of Nazareth. Zabulon's boundaries have not been made out. Of the nineteen proper names that the book of Josue gives to guide us, only Bethleham (*Beit lahm*, seven miles northwest of Nazareth) can be identified with certainty. Josephus (Antiq. Jud., V, i, 22) assigns to Zabulon the land near to Carmel and the sea, as far as the Lake of Genesareth. To its northwest lay Aser, to the southeast Issachar. It included a part of the Plain of Esdraelon, and the great highway from the sea to the lake. Within the territory of Zabulon Christ was brought up, and did and said much that is narrated in the Gospels, especially in the Synoptics, about His Galilean ministry.

WALTER DRUM

Zacatecas

Zacatecas

(DE ZACATECAS).

Diocese in the Republic of Mexico, suffragan of Guadalajara. Its area is almost the same as that of the State of Zacatecas. Its population (1910) 475,863. The bishop and governor of the state reside in Zacatecas, which has 25,905 inhabitants (census of 1910), situated 2442 metres of above sea level. This territory was conquered and peopled by the Spanish between 1546 and 1548. The first parish, founded in 1569, belonged to the See of Guadalajara. The following orders established themselves in this famous mineral region: Franciscans in 1567; Augustinians, 1576; Dominicans, 1604; Order of St. John, 1610; Jesuits, 1616; and Mercedarians, 1701. The famous College of the Propagation of the Faith, founded by the Venerable Father Margil, and inaugurated, 4 May, 1721, sent out missionaries to Texas, to the French in Louisiana, and to Tamaulipas (1768), and took charge of various missions abandoned by the Jesuits, when expelled from Tarahumara and Lower California. When, in 1836, the Mexican Government asked that a bishopric be created at San Francisco, California, Francisco Garcia Diego of this college was consecrated first bishop in 1849. During the religious persecution in 1859 all the religious of the college were imprisoned, and all priests who denied absolution to those who had given their oath to the constitution of 1857, were liable to punishment; the few priests in the town hastily fled. The Diocese of Zacatecas was created from parishes of Guadalajara by Pius IX in 1863, and became suffragan of Guadalajara. It has: 2 seminaries with 101 students; 144 parochial schools, 19 colleges with about 7000 students. Protestants have 3 colleges with 55 students and 9 churches. The cathedral was begun in 1612 and completed in 1782. Its facade is of red stone, elegant, severe, and grandiose. On the hill known as the Bufo, on the outskirts of Zacatecas, is the venerated sanctuary of Nuestra Senora de los Remedios.

CAMILLUS CRIVELLI

Francesco Antonio Zaccaria

Francesco Antonio Zaccaria

Theologian, historian, and prolific writer, born at Venice, 27 March, 1714; died in Rome, 10 October, 1795. He joined the Austrian province of the Society of Jesus, 18 October, 1731, taught grammar and rhetoric at Gorz, and was ordained priest at Rome in 1740. He spent some time in pastoral work and Ancona, Fermo, and Pistoia, gaining renown as a preacher and controversial lecturer. In 1751 he succeeded Muratori as ducal archivist and librarian of Modena, but was removed in 1768, owing to his "Antifebronio", in which he strenuously defended the rights of the Holy See. He was now appointed librarian at the Jesuit professed house in Rome. Clement XIII allowed

him an annual pension, continued under Clement XIV, and increased by Pius VI, who appointed him professor of church history at the Sapienza and director of the Accademia de' Nobili Ecclesiastici. He was a member of at least nineteen Italian academies. Of the 161 printed works ascribed to him by Sommervogel the following are the most important. On Church History: "Series episcoporum Cremonensium" (Milan, 1749); "Laudensium" (ibid., 1763); "Auximatum" (Osimo, 1764); "Vico AEquensium" (Rome, 1778); "Caesenatium" (Cesena, 1779); "Forocorneliensium" (Imola, 1820); "De' santi martiri Fedele, Capoforo, Gratiniano, e Felino" (Milan, 1750) "Acta SS. Bollandiana apologeticis libris in unum volumen nunc primum contractis vindicata" (Antwerp, 1755); "De rebus ad historiam atque antigitates ecclesiae pertinentibus" (Foligno, 1781); "Raccolta di dissertazioni di storia ecclesiastica" (22 vols., Rome, 1792-7). Theology and Canon Law: "Thesaurus theologicus", a compilation of theological treatises by various authors, arranged so as to form an orderly exposition of the different topics of theology (13 vols., Venice, 1762); "De causuisticae theologiae originibus, locis atque praestantia", written at the instance of St. Alphonsus and prefixed to the third edition of the latter's "Moral Theology"; "Apparatus omnigenae eruditionis ad theologiam et jus canonicum" (Rome, 1773); etc. Polemics: "Antifebronio" (Pesaro, 1767), Latin edition (Cesena, 1771-2; and in Migne, "Theol. Cursus Completus", XXVII, 463-1300); "Storia polemica del celibato sacro" (Rome, 1774), German translation by Pius John (1783); "Storia polemica delle proibizione de' libri" (Rome, 1777); "Difesa di tre Sommi Pontefici Benedetto XIII, Benedetto XIV, e Clemente XIII, e del Concilio Romano tenuto nel 1775" (Ravenna, 1784). Liturgy: "Dell' anno santo" (Rome, 1774); "Bibliotheca ritualis" (2 vols., Rome, 1776-8); "nuovo effermerologio universale" (Rome, 1780); "Onomasticon rituale selectum" (Faenza, 1787). Archaeology: "Istituzione antiquario-lapidaria" (Rome, 1770); "Istituzione antiguario-numismatica" (Rome, 1772). Literary History: "Storia Letteraria d'Italia", a literary review edited by Zaccaria with the assistance of Leonard Ximenes, Dominicus Froili, and Joachim Gabardi (14 vols., Modena, 1750-57); "Excursus litterarii per Italiam" (Venice, 1754); "Iter Litterarium per Italiam" (Venice, 1762); "Saggio critico della corrente letteratura straniera" (3 vols., Modena, 1576), written by Zaccaria, conjointly with Gabardi and Froili; "Annali letterarii d'Italia" (3 vols., Modena, 1762-3); "Biblioteca antica e moderna di storia letteraria" (3 vols., Pesaro, 1766-8). He furthermore issued annotated editions of: Menochius, "Commentarius totius s. Scripturae" (Venice, 1743); Dante, "La Divina Comedia" (Verona, 1749); Tamburini, "Theologia Moralis" (Venice, 1755); Busenbaum-LaCroix, "Theologia Moralis" (1755); Viva, "Opuscula omnis theologicoo-moralia" (Ferrara, 1757); Abelly, "Medulla theologica" (Venice, 1757); Petavius, "Opus de ulla theologica" (Venice, 1757); Pichler, "Jus Cononicum" (Pesaro, 1758); Tirinus, "In universam Scripturam Commentarius" (Venice, 1759); Gavanto, "Opera theologicoo-canonica" (Ferrara, 1760);

Tournely, "Praelectiones" (Venice, 1765); Natalis Alexander, "Historia Ecclesiastica" (Venice, 1776-7); Ferraris, "Bibliotheca canonicjuridica" (Rome, 1748-90); Pallavicino, "Istoria del Concilio di trento" (Faenza, 1797-7).

SOMMERVOGEL, Bibliotheque de la Compagnie de Jesus, VIII (Brussels, 1898), 1381-1435; CUCCAGNI, Elogio storico dell' abate Francesantonio Zaccaria (Rome, 1769); HURTER, Nomenclator, V (Innsbruck, 1911), i, 484-498.

MICHAEL OTT

Lucovico Zacconi

Lucovico Zacconi

Musical theorist, born at Pesaro about 1550; died at Venice, after 1623. He became an Augustinian friar at Venice, where he was ordained priest. In 1585 we find him as *maestro di capella* at the Augustinian church in Venice; and in 1592 he was attached to the chapel of Wilhelm, Duke of Bavaria. In 1596 he was *Kapellmeister* to the Archduke Charles at Vienna, but in 1618 he returned to Venice. Zacconi's fame rests on his great work "Prattica di Musica", first published in 1592 at Venice, of which a second volume appeared in 1619. These two volumes -- containing four works -- treat exhaustively of musical theory, and are copiously illustrated. The directions for rendering polyphonic music are of the highest value, especially the Palestrina illustrations. He deals fully with the six Authentic and six Plagal Modes, studiously omitting the Locrian and Hypolocrian Modes. But he also treats of orchestral instruments -- their compass and method of playing -- and gives valuable information as to the scoring of early operas and oratorios. In fact he covers the whole ground of music, as practised at the close of the sixteenth century.

W.H. GRATTAN-FLOOD

Zacharias

Zacharias

(Heb. *zekharyahu* and *zekharyah*; meaning "Yahweh remembers", Sept. *Zacharia* and *Zacharias*), son of Barachias, son of Addo, a Prophet who rose in Israel in the eighth month of the seventh year of the reign of King Darius, 520 B.C. (Zach., i, 1) just two months after Aggeus began to prophesy (Agg., i, 1). The urgings of the two Prophets brought about the building of the second temple (1 Esdr., v and vi). Addo

was one of the chief priests who, in the first year of the reign of Cyrus 538 B.C., returned with Zorobabel from captivity (II Esd., xii, 4). Sixteen years thereafter, during the high priesthood of Joacim (verse 12), Zacharia, of the family of Addo (Heb. of verse 16), is listed as a chief priest. This Zacharia is most likely the Prophet and author of the canonical book of the same name. It is not at all probable that the Prophet Zacharias is referred to by Christ (Matt., xxiii, 35; Luke, xi, 51) as having been slain by the Jews in the Temple; that Zacharias was the son of Joiada (II Par., xxiv, 20). Moreover, the Jews of Zorobabel's time obeyed the Prophet Zacharias (Zach., vi, 7); nor is there, in the Books of Esdras, any trace of so heinous a crime perpetrated in the Temple court.

THE BOOK

The prophecy of Zacharias is one of the books admitted by both Jews and Christians into their canon of Sacred Writings, one of the Minor Prophets. This article will treat its contents and interpretation, canonicity, author, time, place, and occasion.

I. CONTENTS AND INTERPRETATION

A. Part First (Chapters 1-8)

Introduction. The purpose of the book, the return of the people to Yahweh (i, 1-6).

(1) The eight visions of the Prophet, on the night of the twenty-fourth day of the eleventh month of the second year of the rule of Darius in Babylon (i, 7-vi, 8).

- *The horsemen in the myrtle grove* (i, 7-17). Their mounts are chestnut, bay, and white. They bring the news from far and wide; all lands are at rest, nor is there any sign of an impending upheaval of the nations such as is to precede the liberation of Israel from thraldom. And yet Yahweh will comfort Sion, He will rebuild the city and the Temple.
- *The four horns and four smiths* (i, 18-21). The former are the nations that have tossed to the winds Juda and Israel and Jerusalem; the latter are the powers that in their turn will batter down the foes of Yahweh.
- *The man with the measuring line* (ii, 1-13). He is bidden not to measure Jerusalem. The new Jerusalem will have no need of walls; Yahweh Himself will be unto it a wall of fire, He will dwell within it. The vision now becomes Messianic, extends far beyond the immediate future, and represents all the nations of the world about the new Jerusalem.
- *Jesus the high priest before the angel of Yahweh* (iii, 1-10). Clothed in filthy garments, accused by Satan, the high priest stands in shame. His shame is taken away. Clean raiment is put upon him. The promise is made to the rehabilitation of the high priest

in the temple that Zorobabel is to build; and the Messianic forecast is uttered of the sprout (Heb. *çémáh*), the servant of Yahweh (cf. Is., iv, 2; Jer., xxiii, 5; xxxiii, 15), who will be sent in the stead of the Levitic priesthood.

- *The seven branched lamp of the temple* (iv, 1-14). An olive tree on either side feeds the lamp. The seven lamps and their lights are the seven eyes of Yahweh that run to and fro over the whole earth (verse 10). The olive trees are "the two sons of oil", the anointed priest Jesus and King Zorobabel. The picture is that of the providence of Yahweh and His two agents in the theocratic government of restored Jerusalem; this providence is a type of the economy of grace in the Messianic kingdom. Verses 6b-10a seem to be out of place and to belong rather to the end of the chapter or after iii, 10; this latter is the opinion of Van Hoonacker, "Les douze petits prophètes" (Paris, 1908).
- *The flying parchment-roll* (v, 1-4). Upon it is the curse of Yahweh that enters in to consume the house of every thief and perjurer. The scene of the prophetic vision has shifted backward several hundred years to the days of the thunderings and denunciations of Isaias, Amos, and Osee; from that distant viewpoint are seen the effects of Israel's sins and Yahweh's maledictions -- the Babylonian exile.
- *The woman in the epha* (v, 5-11). She is forced into the measure, the lid is shut to, a leaded weight is laid thereon; she is hurried off the land of Sennaar. The picture is symbolic of the wickedness of Israel transported perforce to Babylon.
- *The four chariots* (vi, 1-8). Bearing the wrath of Yahweh, to the four corners of the earth they are driven; and the one that goes to the north takes the vengeance of Yahweh upon the nations of the North who have kept His chosen people in captivity. It is to be noted that this series of eight visions begins and ends with similar pictures -- the horses of varied hues whose riders bring back work that all the earth is at rest and whose drivers, in like manner, are the bearers of the message of Yahweh.

(2) Sequel to the eight visions

As a sequel to the eight visions, especially to the fourth and fifth, Yahweh bids Zacharias take of the gold and silver brought from Babylon by a deputation of Jews of the captivity, and therewith to make crowns; to place these crown upon the head of Jesus the high priest, and then to hang them as a votive-offering in the Temple (vi, 9-15). The critics generally insist that it was Zorobabel and not Jesus who was to be crowned. They err in missing the prophetic symbolism of the action. It is the high priest rather than the king that is the type of the priest of the Messianic kingdom, "the

Man Whose name is the Sprout" (Heb. text), Who shall build up the Temple of the Church and in Whom shall be united the offices of priest and king.

(3) The prophecy of the fourth day of the ninth month of the fourth year of the rule of Darius in Babylon (vii and viii)

Almost two years after the eight visions, the people ask the priests and Prophets if it be required still to keep the fasts of the exile. Zacharias makes answer as revealed to him; they should fast from evil, show mercy, soften their hard hearts; abstinence from fraud and not from food is the service Yahweh demands. As a motive for this true service of God, he pictures to them the glories and the joys of the rebuilt Jerusalem (vii, 1-9). The Prophet ends with a Messianic prediction of the gathering of the nations to Jerusalem (viii, 20-23).

B. Part Second (Chapters 9-14): The Two Burdens

Many years have gone by. The temple of Zorobabel is built. The worship of Yahweh is restored. Zacharias peers into the faraway future and tells of the Messianic kingdom.

(1) First burden, in Hadrach (ix-xi)

- *The coming of the king (ix-x).* The nations round about will be destroyed; the lands of the Syrians, Phoenicians, and Philistines will fall into the hands of invaders (ix, 1-7). Israel will be protected for the sake of her king, Who will come to her "poor and riding upon an ass". He Who was spoken of as the Sprout(iii, 8; vi, 12) will be to the new Jerusalem both priest and king (iii, 8; vi, 3).
- *The shepherds of the nations (xi).* The literal, and typical meanings of this passage are very obscure, and variously interpreted by commentators. The spoilation of the pride of the Jordan, the destruction of the land from the cedars of Lebanon to the oaks of Basan, south of the Sea of Galilee (verses 1-3) seems to refer to an event long passed -- the breaking up of the independence of the Jewish state 586 B.C. -- in the same way as does Jer., xxii, 6, 7. The allegory of the three shepherds cut off in one month (verses 4-8) is remarkably like to Jer., xxii and xxiii. Probably these wicked rulers are: Sellum, who was deported into Egypt (Jer., xxii, 10-12); Joakim, son of Josias, who was "buried with the burial of an ass" (*ibid.*, 12-19); and his son Jechonias who was cast out into the land of the stranger (*ibid.*, 24-30). The foolish shepherd (verses 15-17) is probably Sedecias. In verses 9-14 we have Zacharias impersonating the shepherd of Juda and Israel, trying to be a good shepherd, falling outcast, sold for thirty pieces of silver, and in all this typifying the Good Shepherd of the Messianic kingdom.

(2) Second burden, the apocalyptic vision of Jerusalem's future (xii-xiv)

- *The nations shall be gathered against Jerusalem (xii, 1-3); but Yahweh shall smite them in His power, by means of the house of David (verses 4-9); and the inhabitants of Jerusalem will mourn as one mourneth for an only son (verses 10-14).* The prayers of the people of Jerusalem to Yahweh, Who says "they shall look upon me, whom they have pierced", and their grief at the wrongs that they have done Him are all typical of the Messianic kingdom. Yahweh is the type of Jesus, the prayers and mourning of Jerusalem are the type of the prayers and mourning that Jesus will inspire in the Church while its members look upon Him Whom they have pierced (cf. John, xix, 37). As a result of Yahweh's victory over the nations, idolatry will be stamped out of Juda (xiii, 1-6).
- *The theme of the shepherds is taken up again.* Yahweh's shepherd shall be smitten; the sheep shall be scattered; two-thirds of them shall perish; one-third shall be gathered, to be refined as silver and tested as gold (xiii, 7-9). The prophetic scene suddenly shifts. Zacharias vividly depicts the details of the destruction of Jerusalem. In the first part of his burden, he had foreseen the transference of the Holy City from Seleucids to Ptolemys and back again, the hellenizing and paganizing of Judaism under Antiochus Epiphanes (168 B.c.), the profanation of the temple by Pompey and its sacking by Crassus (47 B.C.). Now, after the casting out of the shepherd of Yahweh, the city is again in the power of the enemy; but, as of after "the Lord shall be king over all the earth: in that day there shall be one Lord, and his name shall be one". The punishment of the foe shall be terrible (verses 8-19). All things shall be holy to Yahweh (verses 20-21).

II. CANONICITY

Zacharias is contained in the canons of both Palestine and Alexandria; Jews and all Christians accept it as inspired. The book is found among the Minor Prophets in all the canonical lists down to those of Trent and the Vatican. The New Testament writes often refer to the prophecies of the Book of Zacharias as fulfilled. Matthew (xxi, 5) says that in the triumphal entrance of Jesus into Jerusalem on Palm Sunday, the details were brought to pass that Zacharias (ix, 9) had predicted; and John (xii, 15) bears like witness. Although, in xxvii, 9, Matthew makes mention of Jeremias only-yet he refers to the fulfilment of two prophecies, that of Jeremias (xxxii, 6-9) about the purchase of the potter's field and that of Zacharias (xi, 12, 13) about the thirty pieces of silver, the price set upon the type of the Messias. John (xix, 37) sees in the Crucifixion a fulfilling of Zacharias's words, "they shall look upon me, whom they have pierced"

(xii, 10). Matthew (xxvi, 31) thinks that the Prophet (xiii, 7) foretold the scattering of the Lord's disciples.

III. AUTHOR

In the foregoing analysis of the contents of Zacharias, we have stated the author, time, place and occasion of the book. The author of the entire prophecy is Zacharias. The time of part first is the second and fourth years of the reign of Darius in Babylon (520 and 522 B.C.). The time of part second is probably toward the end of the reign of Darius or the beginning of that of Xerxes (485 B.C.). The place of the entire prophecy is Jerusalem. The occasion of the first part is to bring about the building of the second Temple; that of the second part is perhaps the approach of the Prophet's death. The traditional view taken by Catholic exegetes on the unity of authorship of the book is due in part to the witness of all manuscripts of the original text and of the various versions; this unanimity shows that both in Judaism and the Church there has never been a serious doubt in the matter of the unity of authorship of Zacharias. Solid reason, and not mere conjecture, are necessary to shake confidence in this traditional view. No such solid reasons are forthcoming. Internal evidence is appealed to; but internal evidence does not here favour divine criticism. Quite the reverse; scope and style are one in the prophecy.

A. Unity of scope

The entire prophecy has the same scope; it is permeated throughout with the very same Messianic forecasting. The kingdom and priesthood of the Messias are obscurely depicted in the visions of the first part; vividly in the two burdens of the second part. Both sections insist upon the vengeance to be wrought against foes of Juda (cf. i, 14, and vi, 8, with ix, 1 sq.); the priesthood and kingship united in the Christ (cf. iii, 8 and vi, 12 with ix, 9-17); the conversion of the gentiles (cf. ii, 11; vi, 15, and viii, 22, with xiv, 16, 17); the return of Israel from captivity (cf. viii, 7, 8, with ix, 11-16; x, 8 sq.); the holiness of the new kingdom (cf. iii, 1, and v, 1 sq., with xiii, 1); its prosperity (cf. i, 17; iii, 10; viii, 3 sq., with xi, 16; xiv, 7 sq.).

B. Unity of style

Whatever slight differences there are in the style of the two sections can be readily enough explained by the fact that the visions are in prose and the burdens in poetry. We can understand that one and the same writer may show differences in form and mode of expression, if, after a period of thirty-five years, he works out in exultant and exuberant poetical form the theme which, long before and under very different circumstances, he had set forth in calmer language and prosaic mould. To counterbalance these slight stylistic differences, we have indubitable evidence of unity of style. Modes of expression occur in both parts which are distinctive of Zacharias. Such are, for instance: the very pregnant clause "and after them the land was left desolate of any that

crossed over and of any that returned into it" -- Heb. *me'ober umisshab* (vii, 14, ad ix, 8); the use of the Hiphil of 'abar in the sense of "taking away iniquity" (iii, 4, and xiii, 2); the metaphor of "the eye of God" for His Providence (iii, 9; i, 10; and ix, 1); the designations of the chosen people, "house of Juda and house of Israel", "Juda, Israel, Jerusalem", "Juda and Ephraim", "Juda and Joseph" (cf. i, 2, 10; vii, 15 etc., and ix, 13; x, 6; xi, 14 etc.). Moreover, verses and portions of verses of the first part are identical with verses and portions of verses of the second part (cf. ii, 10, and ix, 9; ii, 6, and ix, 12, 13; vii, 14, and ix, 8; viii, 14, and xiv, 5).

C. Divisive criticism

It is generally allowed that Zacharias is the author of the first part of the prophecy (chapters i-viii). The second part (ix-xiv) is attributed by the critics to one or many other writers. Joseph Mede, an Englishman, started the issue, in his "Fragmenta sacra" (London, 1653), 9. Wishing to save from error Matt., xxvii, 9, 19, he attributed the latter portion of Zacharias to Jeremias. In this exegesis, he was seconded by Kidder, "The demonstration of the Messias" (London, 170), 199, and Whiston, "An essay towards restoring the true text of the Old Testament" (London, 1722), 92. In this way was the Deutero-Zacharias idea begotten. The idea waxed strong as was prolific. Divisive criticism in due time found many different authors for ix-xiv. By the end of the eighteenth century, Flugge, "Die Weissagungen, welche den Schriften des Zacharias beigegeben sind" (Hamburg, 1788), had discovered nine disparate prophecies in these six chapters. A single or a manifold Deutero-Zacharias is defended also by Bauer, Augusti, Bertholdt, Eichorn (4th. ed.), De Wette (though not after 3rd ed.), Hitzig, Ewald, Maurer, Knobel, Bleck, Stade, Nowack, Wellhausen, Driver etc. The critics are not agreed, however, as to whether the disputed chapters are pre-exilic or post-exilic. Catholic Biblical scholars are almost unanimous against this view. The arguments in its favour are given by Van Hoonacker (op. cit., pp. 657 sq.) and answered convincingly.

The prophecy of Zacharias has been interpreted by ST. EPHRAIM and ST. JEROME; cf. the commentaries on the Minor Prophets by RIBERA (Antwerp, 1571, etc.); MONTANUS (Antwerp, 1571, 1582); DE PALACIO (Cologne, 1588); MESSAN (Antwerp, 1597); SANCTIUS (Lyons, 1621); DE CASTRO (Lyons, 1615, etc.); DE CALANO (Palermo, 1644); MAUCORPS (Paris, 1614); SCHOLZ (Frankfurt, 1833); SCHEGG (Ratisbon, 1854 and 1862); TROCHON (Paris, 1883); KNABENBAUER (Paris, 1886); GRIESBACH (Lille, 1901); LEIMBACH in Bibl. Volksbucher, IV (Fulda, 1908), PATRIZI (Rome, 1852) treated the Messianic prophecies of Zacharias. The Protestant commentaries have been mentioned in the course of the article. The Catholic writers of general introductions are of service in regard to the authorship of Zacharias; cf. CORNELY; KAULEN, GIGOT.

WALTER DRUM

Zacharias Chrysopolitanus

Zacharias Chrysopolitanus

A famous exegete of the Premonstratensian Order; born at Chrysopolis (Besançon); died about 1155. He was first headmaster of the Cathedral School at Resancon; then joined the order of the Premonstratensians at the Abbey of Saint Martin in Laon, where he gave himself up to literary pursuits. He published a Gospel-Harmony with a grammatical and etymological explanation of the Greek, Hebrew, and some Latin words found in the text, under the title "Unum ex Quattuor, sive De Concordia Evangelistarum" (cf. P.L., XLCCCVI, 11-20). The work is introduced by three prefaces, the fist of which shows the relation of the Gospel to the Jewish Law, to philosophy, and to the symbols of the Evangelists; the second describes the Evangelists and their view of the mission of Christ; the third enumerates the authorities which he uses. The Gospel-Harmony is divided into one hundred and eighty-one chapters. As to the original Harmony, Zacharias attributes it to Ammonius of Alexandria. For his main sources he relies on the Latin Fathers for the most part. Among the teachers of the Middle Ages, he employs mostly Aleuin and Remigius of Auxerre. From the commentaries on the sacraments the work is shown to be the product of the early days of Scholasticism. In his explanations he tries to give as literal a sense as possible to the Biblical text. He differs in one notable exception from Ammonius, where he assumes that Christ made another journey to Samaria after His triumphant journey into Jerusalem. Zacharias's work is to be commended for his taste in selecting passages from the Fathers, and his endeavours to keep to the literal sense of the Scriptures. His work compares very favourably with the "Catena Aurea" of Saint Thomas.

HURTER, Nomenclator Literarius; P.L., CLXXXVI, 11-620; DE MAS LATRIE, Tresor de Chronologie, 2119; SCHMID, Zacharias Chrys. und sein Kommentar zur Evangelienharmonie, LXVIII, 531.

LEO T. BUTLER

Pope St. Zachary

Pope St. Zachary

(ZACHARIAS.)

Reigned 741-52. Year of birth unknown; died in March, 752. Zachary sprang from a Greek family living in Calabria; his father, according to the "Liber Pontificalis", was called Polichronius. Most probably he was a deacon of the Roman Church and as such

signed the decrees of the Roman council of 732. After the burial of his predecessor Gregory III on 29 November, 741, he was immediately and unanimously elected pope and consecrated and enthroned on 5 December. His biographer in the "Liber Pontificalis" describes him as a man of gentle and conciliatory character who was charitable towards the clergy and people. As a fact the new pope always showed himself to be shrewd and conciliatory in his actions and thus his undertakings were very successful. Soon after his elevation he notified Constantinople of his election; it is noticeable that his *synodica* (letter) was not addressed to the iconoclastic Patriarch Anastasius but to the Church of Constantinople. The envoys of the pope also brought a letter for the emperor. After the death of Leo III (18 June, 741) his successor was his son Constantine V, Copronymus. However, in 742 Constantine's brother-in-law Artabasdos raised a revolt against the new emperor and established himself in Constantinople; thus when the papal envoys reached Constantinople they found Artabasdos the ruler there. As late as 743 the papal letters were dated from the year of the reign of Constantine V; in 744, however, they are dated from the year of the reign of Artabasdos. Still the papal envoys do not seem to have come into close relations with the usurper at Constantinople, although the latter re-established the worship of images. After Constantine V had overthrown his rival, the envoys of the pope presented to him the papal letter in which Zachary exhorted the emperor to restore the doctrine and practice of the Church in respect to the worship of images. The emperor received the envoys in a friendly manner and presented the Roman Church with the villages of Nympha and Normia (Norba) in Italy, which with their territories extended to the sea.

When Zachary ascended the throne the position of the city and Duchy of Rome was a very serious one. Luitprand, King of the Lombards, was preparing a new incursion into Roman territory. Duke Trasamund of Spoleto, with whom Pope Gregory III had formed an alliance against Luitprand, did not keep his promise to aid the Romans in regaining the cities taken by the Lombards. Consequently Zachary abandoned the alliance with Trasamund and sought to protect the interests of Rome and Roman territory by personal influence over Luitprand. The pope went to Terni to see the Lombard king who received him with every mark of honour. Zachary was able to obtain from Luitprand that the four cities of Ameria, Horta, Polimartium, and Blera should be returned to the Romans, and that all the patrimonies of the Roman Church that the Lombards had taken from it within the last thirty years, should be given back; he was also able to conclude a truce for twenty years between the Roman Duchy and the Lombards. A chapel to the Saviour was built in the Church of St. Peter at Rome in the name of Luitprand, in which the deeds respecting this return of property were placed. After the pope's return, the Roman people went in solemn procession to St. Peter's to thank God for the fortunate result of the pope's efforts. Throughout the entire affair

the pope appears as the secular ruler of Rome and the Roman territory. In the next year Luitprand made ready to attack the territory of Ravenna. The Byzantine exarch of Ravenna and the archbishop begged Pope Zachary to intervene. The latter first sent envoys to the Lombard king, and when these were unsuccessful he went himself to Ravenna and from there to Pavia to see Luitprand. The pope reached Pavia on the eve of the feast of Sts. Peter and Paul. He celebrated the vigil and the feast of the princes of the Apostles at Pavia, and was able to induce the king to abandon the attack on Ravenna and to restore the territory belonging to the city itself. Luitprand died shortly after and after his first successor Hildebrand was overthrown, Ratchis became King of the Lombards. The pope was on the best of terms with him. In 749 the new king confirmed the treaty of peace with the Roman Duchy. The same year Ratchis abdicated, with his wife and daughter took the monastic vows before the pope, and all three entered the monastic life.

In 743 Pope Zachary held a synod at Rome which was attended by sixty bishops. This synod issued fourteen canons on various matters of church discipline. On this occasion the pope took up the question of the impediments to marriage of relationship in the fourth degree, in regard to which the Germans claimed to have obtained a dispensation from Pope Gregory II. The year previous Zachary had written on this point to the bishops and kings of that province. An active correspondence was kept up between Zachary and St. Boniface. The latter in his zealous labours had organized the Church in the German territories, and while doing this had kept in close connection with the Papal See. Early in 742, soon after his elevation, Zachary received a letter from Boniface in which the saint expressed his full submission to the possessor of the Chair of Peter and requested then confirmation of the three newly established Bishoprics of Wurzburg, Buraburg, and Erfurt; Boniface also sought authority to hold a synod in France and to suppress abuses in the lives of the clergy. The pope confirmed the three dioceses and commissioned Boniface to attend, as papal legate, the Frankish synod which Karlmann wished to hold. In a later letter Zachary confirmed the metropolitans of Rouen, Reims, and Sens appointed by Boniface, and also confirmed the condemnation of the two heretics Adelbert and Clement. Various questions in which the pope and Boniface disagreed were discussed in letters. In 745 was held the general synod for the Frankish kingdom called by Pepin and Carloman. Here decrees were passed against unworthy ecclesiastics, and the two heretics, Adelbert and Clement, were again condemned. Boniface sent a Frankish priest to Rome to make a report to the pope, and the latter held on 25 October, 745, a synod at the Lateran at which, after exhaustive investigation, an anathema was pronounced against the two heretics. Zachary forwarded the acts of the synod with a letter to Boniface. Pepin and the Frankish bishops sent a list of questions respecting the discipline of the clergy and of the Christian population

to Pope Zachary, and the latter answered in a letter of 746 in which decisions respecting the various points are given. These decisions were communicated to Boniface so that he might make them generally known at a Frankish synod. The following year, 747, Carloman resigned his authority and the world, went to Rome, and was received by Pope Zachary into a monastic order. At first he lived in the monastery on the Soracte, later at Monte Cassino. Thanks to the efforts of St. Boniface all the Frankish bishops were now agreed in submission to the See of St. Peter. Zachary sent still other letters to the bishops of Gaul and Germany, and also to Boniface as the papal legate for the Church of this region. Boniface was constantly in intercourse with Rome both by letters and envoys and sent important questions to the pope for decision. An important proof of the recognition by the Franks of the high moral power of the papacy is shown by the appeal to papal authority on the occasion of the overthrow of the Merovingian dynasty. Pepin's ambassadors, Bishop Burkard of Wurzburg and Chaplain Folrad of St. Denis, laid the question before Zachary: whether it seemed right to him that one should be king who did not really possess the royal power. The pope declared that this did not appear good to him, and on the authority of the pope Pepin considered himself justified in having himself proclaimed King of the Franks (cf. SAINT BONIFACE; and PEPIN THE SHORT). The ecclesiastical activity of the pope also extended to England. Through his efforts the Synod of Cloveshove was held in 747 for the reform of church discipline in accordance with the advice given by the pope and in imitation of the Roman Church.

Zachary was very zealous in the restoration of the churches of Rome to which he made costly gifts. He also restored the Lateran palace and established several large domains as the settled landed possessions (*domus cultoe*) of the Roman Church. The pope translated to the Church of St. George in Velabro the head of the martyr St. George which was found during the repairs of the decayed Lateran Palace. He was very benevolent to the poor, to whom alms were given regularly from the papal palace. When merchants from Venice bought slaves at Rome in order to sell them again to the Saracens in Africa, the pope bought all the slaves, so that Christians should not become the property of heathens. Thus in a troubled era Zachary proved himself to be an excellent, capable, vigorous, and charitable successor of Peter. He also carried on theological studies and made a translation of the Dialogues of Gregory the Great into Greek, which was largely circulated in the East. After his death Zachary was buried in St. Peters.

J.P. KIRSCH

Janos Zadori

János Zádori

(DREXLER).

Ecclesiastical writer, born at Katloez, County of Neutra, Hungary, 6 March, 1831; died at Gran, 30 Dec., 1887. He studied at the Pazmaneum of the University of Vienna. His favourite branches were modern languages, literature, and the natural sciences. Ordained priest in Dec., 1854, he was chaplain at Balassa-Gyarmat for ten years, and from 1864 to the end of his life taught dogmatic theology at the archiepiscopal seminary at Gran. He was a member of the metropolitan chapter and a domestic prelate of Leo XIII. He declined an appointment to the See of Neusohl. Thirty-eight of his works have appeared in print, among them some of a devotional character and memorial sermons, one on Count Stephen Széchényi. His principal works are: "A társadalom alapoloci" (The fundamental principles of human society), Budapest, 1864, in which he develops the ideas of Lacordaire and others against modern errors; "Utvázlatok Oloszországban" (Sketches of Italy), Budapest, 1867; "A rimai katakombák" (The Roman catacombs), with 19 plates, Budapest, 1868; "Spanyol út" (Journey through Spain), Budapest, 1868; "IX Pius pápa élete" (Life of Pius IX), Gran, 1869; "A Jesus Szive ajtatossázanak története, mivolta, hittani alapja" (The devotion to the Sacred Heart of Jesus, its nature, history, and theological foundation), Gran, 1878; "Szus Mária szeplőtelen sivének" (The veneration of the Immaculate Heart of Mary), Gran, 1879; "Szent Peter ket levele" (The two letters of St. Peter), Budapest, 1881, for which he received great praise from the theological faculty at Gran; "Syntagma theologiae fundamentalis", Gran, 1882 (see "Theol. Quartalschrift", Tübingen, 1887, 691, and "Zeitschrift für kath. Theol.", Innsbruck, 1884, 584). From 1870-86 he edited the theological magazine "Uj magyar Sion" (New Hungarian Sion).

FRANCIS MERSHMAN

Zahle and Forzol

Zahle and Forzol

A Greco-Melchite diocese. In the seventeenth, or perhaps in the sixteenth, century the diocese of Seleucia Pieria was for greater safety transferred by the Patriarch of Antioch to Maaloula in the Lebanon. The reason of this transfer was forgotten at a later date, and a town of Seleucia Libani=1F was invented and identified with Maaloula, though such a town never existed. When the see was transferred from Maaloula to Forzol, the title of Seleucia accompanied it. The transfer had already taken place in 1760, for the Catholic titular Euthymius then signed as Bishop of Forzol and Beqaa (*Echos d'Orient*, V, 86). In October, 1790, a Catholic bishop of Zahlé assisted at a council held in the Convent of Saint-Sauveur (*Echos d'Orient*, X, 227). The Diocese of Zahle is identical with that of Forzol, under which name it often appears. Since 1849 (Council of Jerusalem), at least among Catholics, the bishop bears the titles of Zahle, Forzol, and Beqaa. Since 1768 his residence has been at Zahle. Among the schismatics the bishop always bears the title of Seleucia. Zahle itself dates only from the end of the seventeenth century, when Catholics fled thither in great numbers, the locality being under the protection of the emirs of Lebanon, by whom they were protected from schismatics and Mussulmans. Gradually the place grew larger; it is now a city of about 20,000 inhabitants, nearly all Catholics of the Greco- Melchite Rite. In 1860 the Druses destroyed 2000 houses, and several Christians were massacred, among them four Jesuits. There are to-day a Jesuit residence and a school, similarly a residence and a school in the Molallaqa quarter. The diocese comprises 30,000 Catholics, 47 priests, 33 churches and chapels, 9 primary schools, 3 convents of Salavatorians, Alepins, and of Chouerites, with 43 religious.

S. VAILHE

Zakho

Zakho

A diocese of Chaldea. It corresponds to the ancient Diocese of Maalta, formerly a suffragan of Adiabene or Arbela. Some Nestorian bishops are mentioned from the

fifth to the seventh century (Chabot, "Synodicon orientale", 676). It was reunited with the dioceses of Akra and Amadia until the middle of the nineteenth century, when the province was divided into three dioceses: Amadia, Zakho, and Akra-Zehbar. Zakho dates from 1859. Today Zakho is a province of the vilayet of Mossul. The city has 2500 inhabitants, 1500 of whom are Jews and 100 Christians. It is situated on an island formed by the Little Khabour. The diocese comprises 3500 Catholics, 10 resident priests, 5 religious of the Congregation of St. Hormisdas, 15 parishes or stations, 20 churches and chapels, and 1 primary school.

Jacob Anton Zallinger Zum Thurn

Jacob Anton Zallinger zum Thurn

Philosopher and canonist, born at Bozen, 26 July, 1735, died there, 11 January, 1813. He studied at Innsbruck and Munich, entered the Jesuit Order on 9 October, 1753, was ordained priest on 1 June, 1765, then taught philosophy at Munich, Dillingen, and Innsbruck. Shortly after the suppression of the Jesuits in 1773, Prince-bishop Clemens Wenceslaus engaged him as professor of canon law at Augsburg. He held this position for thirty years (1777-1807), with the exception of four months, during which he was theologian at the papal nunciature at Ratisbon, and sixteen months, which upon invitation of Pius VII he spent in Rome as papal councillor in German affairs (1805-6). In 1807 he returned to Bozen, devoting the rest of his life to literary labours. As a canonist he defended the papal rights against the Febronian tendencies in Germany, and as a philosopher he endeavoured to replace the Scholastic method by the empiricism of Newton. His chief canonical works are: "Institutionum juris naturalis et ecclesiastici publici libri V" (Augsburg, 1784; Ghent, 1823; Rome, 1832); "De usu publici commentarioulus" (Augsburg, 1784; Ghent, 1823); "Historische Bemerkungen über das sogenannte Resultat des Emser Congressus" (Frankfort and Leipzig, 1787); "Institutiones juris ecclesiastici, maxime privati, ordine Decretalium" (5 vols., Augsburg, 1792-3; 3 vols., Rome, 1832). His chief philosophical works are: "Lex gravitatis universalis ac mutuae cum theoria de sectione coni" (Munich, 1769); "Interpretatio naturae, seu philosophia Newtoniana methodo exposita" (3 vols., Augsburg, 1773); "Disquisitiones philosophiae Kantianae" (2 vols., Augsburg, 1799).

MICHAEL OTT
Gregor Zallwein

Gregor Zallwein

Canonist, born at Oberviechtach, Oberpfalz, 20 October, 1712; died at Salzburg, 6 or 9 August, 1766. After studying the Humanities at Ratisbon and Freising he took vows at the Benedictine Abbey of Wessobrunn, on 15 November, 1733, and was ordained priest on 27 October, 1731. He studied canon law at Salzburg, 1737-9, became master of novices at his monastery in 1739, and prior in 1844. Upon the request of the Prince-bishop of Gurk, Joseph Maria Count of Thun, he was sent as professor of canon law to the newly-erected seminary at Strasburg in Carinthia. From 1749 till his death he was professor of canon law at the Benedictine University of Salzburg, where he held at the same time the office of "Rector magnificus" from 1759. Unlike most German canonists of his time, he laid great stress on the sources and historical development of canon law. Though his juristic writings are at times not clear, his lectures were valued very highly and attended even by students from foreign countries. His chief work is "Principia juris eccles. universalis et particularis Germaniae" (4 vols., Augsburg, 1763; 2nd ed. by Kleimayern, Augsburg, 1781; 3rd ed., Augsburg, 1831). His other canonical works are: "Disputatio prima de jure canonico . . ." (Salzburg, 1753); "Fontes originarii juris canonici, adjuncta historia ulare Germaniae" (Salzburg, 1757); "Dissertatio de statu ecclesiae, de hierarchia . . ." (Salzburg, 1757).

MICHAEL OTT
Jose Maria de Zalvidea

José María de Zalvidea

Born at Bilbao, Vizcaya, Spain, 2 March, 1780; d. in 1846. He became a Franciscan at the convent of San Mames, Cantabria, 13 December, 1798, joined the College of San Fernando de Mexico in 1804, and entered the California Indian mission field in August, 1805. He served at Mission San Fernando till 1806; at Mission San Gabriel till 1826; at San Juan Capistrano till 1842; and at Mission San Luis Rey to the day of his death. He was a model missionary as well as an energetic and wise manager of the

mission temporalities. Under his administration Mission San Gabriel especially reached its highest prosperity. From 19 July to 14 August, 1806, Father Zalvidea accompanied an expedition from Santa Barbara east and then south to San Gabriel in search of new mission sites, meanwhile baptizing many dying savages. He was well versed in the languages of the Indians. While his superiors regarded him as one of the best and most zealous of friars, the people looked upon him as a saint. "There is no evidence", says Bancroft, "that he ever had an enemy, or said an unkind word to any man." Even when quite old Father Zalvidea refused to avail himself of the privilege of retiring, because there would be no one to take his place, for the Mexican Government had declined to let any but Mexicans serve in the missions. Like all the other missionaries he would not approve of the methods of the Mexican politicians by swearing allegiance, refusing to do so on the grounds that he did not meddle with politics, but he offered to swear obedience in everything not against conscience.

Santa Barbara Archives: Records of missions San Gabriel and San Juan Capistrano; ENGELHARDT, The Franciscans in California (Harbor Springs, Michigan, 1897); The Missions and Missionaries of California, II (San Francisco, 1912).

ZEPHYRIN ENCELHARDT

Zama

Zama

Titular see of Numidia. There were two sees of this name: Zama Major and Zama Minor.

Zama Minor, represented at the Conference of Carthage, 255 by the Bishop Marcellus, is commonly identified with the ruins Henshir Sidi-Amor el Djedidi near Furni, on the frontier, southeast of Tunis.

Zama Major, or Zama Regia, located by the majority of historians and archaeologists on the borders of Silvana at the village of Djama, south of Tunis, sent the Bishop Dialogus to the Conference of Carthage, 411. It was here that Scipio defeated Hannibal in the famous battle which decided the fate of Africa, 19 October, 202 B.C. A fragment of an inscription showing the former existence of a colony was found there, and, according to a decree of the year A.D. 322, Zama was called Colonia Aelia Hadriana Augusta Zama Regia, thus verifying the identification.

S. VAILHÉ

Zambesi Mission

Prefecture Apostolic of the Zambesi Mission

The prefecture comprises all Rhodesia south of the Zambesi, that part of Bechuanaland which is north of the Tropic of Capricorn and east of the 22nd degree of longitude, that part of Rhodesia north of the Zambesi, south of the Congo Free State, and west of the 30th degree longitude. Originally it also included a part of North-eastern Rhodesia, which is now included in the Vicariate Apostolic of Nyassa. All this territory is under British rule, by far the larger portion being administered by the British South Africa Chartered Company. The Zambesi mission was founded in 1877, and entrusted to the English Province of the Society of Jesus; its limits were defined by Propaganda in 1879. It was in this latter year that the first party of missionaries under Father Henry Depelchin, the first superior, started from Grahamstown in Cape Colony, with four wagons drawn by oxen, on a journey of five or six months to Bulawayo, a thousand miles in the interior. There were then no railways in the country; communications were slow and difficult, and the prices of the necessaries of life were enormous. Many lives were lost from fever and privations. The Matabele natives were not yet prepared to receive Christianity, and the cruel rule of their despotic king, Lobengula, rendered fruitless every effort of the missionaries. An expedition led by Father Depelchin himself pushed further north beyond the Zambesi in quest of more promising fields; but from various causes this attempt failed. Another unsuccessful expedition under Father Augustus Law went three hundred miles east to the Portuguese border. With the advent of the British South Africa Company a new era opened for the mission. In 1893 Lobengula was deprived of his power, Bulawayo, his capital, seized, and Matabeleland conquered. Missionaries availed themselves of the advantages which the new rule guaranteed. Sites suitable for mission stations were selected. The Sisters of St. Dominic entered the country about the same time, took charge of the public hospitals, and later opened schools for the children of the settlers.

The progress of the mission has been necessarily slow. Little is to be expected from the adult native population owing to their pagan practices, especially polygamy; hence the hopes of large and successful communities must be built mainly on the education of children. Moreover, the work has been hampered again and again by those difficulties which have retarded the material development of Rhodesia: wars within and without the borders, cattle plagues, famine, locusts, etc. Meanwhile, the introduction of railways has removed one great obstacle to the establishment of mission stations; one line traverses the mission from south to north. Father Henry Depelchin has been succeeded by Fathers Alfred Weld, Alphonsus Daignault, of the Canadian Province, Henry

Schomberg-Kerr, Richard Sykes, Ignatius Gartlan, and R. Sykes who has lately returned to the post. There are 32 Jesuits and 22 Jesuit lay brothers, and 3 priests and 6 brothers of the Missionaries of Mariannhill. The towns of Bulawayo, Salisbury, Gwelo, and Umtali have each a church and a resident priest. At Chishawasha and Driefontein in Mashonaland, Empandeni in Matabeleland, and Monze, north of the Zambesi, there are large mission stations for the natives. The Sisters of St. Dominic (numbering 82) have schools for the Europeans at Salisbury, Bulawayo, and Gwelo, and a school for native girls at the mission station of Chishawasha. The Sisters of Notre-Dame (9 in number) have two schools for natives at the mission station of Empandeni. There are 10 Sisters of the Precious Blood in the prefecture. The Jesuits conduct a school for European boys at Bulawayo, receiving a small annual grant from the Government. There is also at Bulawayo an observatory under the care of Father Edmund Goetz, S.J.; it has a small annual subsidy from the Government. The Europeans number about 1300; in Southern Rhodesia the native population has not yet been estimated with even approximate accuracy. The Catholic population comprises about 740 Europeans and Indians, 1400 natives. Several books have been written in the four languages spoken in Rhodesia, mostly by the Fathers of the mission-grammars, catechisms, prayer-books, Bible stories. Besides these Father Julius Eorrend has published an important work entitled: "A Comparative Grammar of the South African Bantu Languages".

SCHREIBER, Life of Father Augustus Law (London, 1893); Missiones catholicae (Rome, 1907), 423; MAXWELL-SCOTT, Life of Father Henry Schomberg-Kerr (London, 1901); History of the Zambesi Mission in Zambesi Mission Record, I-III (London, 1898-1909); SPILLMAN, From Cape to Zambesi, The Beginnings of the Zambesi Mission, compiled from the diaries of Father P. Eorrde and from the reports of the other missionaries (Freiburg).

A. LANGOUET

Zamboanga

Diocese of Zamboanga

(ZAMBOANGENSIS).

Philippine Islands. It includes the islands of Basilan, Camiguin, Dinagat, Mindanao, Siargao, and the Sulu Archipelago. The area of the diocese is 39,000 sq. miles, the population about 670,000. Mindanao, the second largest of the Philippine group, has an area of 36,292 sq. miles. The Catholic population of the diocese is 290,000. There are 300,000 Moros or Mohammedan Malays and 80,000 pagans of various tribes. Mindanao was evangelized at the end of the sixteenth century by the Jesuits and the Recollects. Members of both these religious orders met their death at the hands of the

fanatical Moros. When the Jesuits were permitted to re-enter the country, they again devoted themselves to the missions of Mindanao. Their labours among the savage tribes and even among the Moros were crowned with wonderful success (cf. article PHILIPPINE ISLANDS). The establishments they conducted at Tamontaxa for the abandoned children of the Moros resembled somewhat the famous Jesuit Reductions of Paraguay. As the Spanish Government supported the priests and their missions (finding this the most economical, as well as the most humane, way of civilizing the island), the evangelization of Mindanao met with a great setback when the Philippines were ceded to the United States. Many of the Jesuit missionaries had to be recalled from Mindanao, and a number of their mission-posts were abandoned. At present there are sixty mission parishes in the diocese and forty-five priests, most of them members of the Society of Jesus. The Congregation of the Missionaries of the Sacred Heart of Jesus has charge of Surigato Province, in the northeastern part of Mindanao. Native nuns of the Society of Mary conduct schools in some of the larger towns. Zamboanga, the residence of the bishop, has a population of 24,000. The territory comprising the Diocese of Zamboanga was formerly attached to the Dioceses of Cebu and of Boilo. Pius X erected the new diocese by the Bull "Novas erigere dioeceses", 10 Apr., 1910. The Right Rev. Michael O'Doherty, D.D., rector of the Irish College of Salamanca, was consecrated its first bishop.

PHILIP M. FINEGAN

Giuseppe Zamboni

Giuseppe Zamboni

Priest and physicist, born at Venice, June, 1776; died there 25 July 1846. Shortly after completing his studies in the seminary at Verona, Abate Zamboni was appointed to the chair of physics in the lyceum of that city. Zamboni is known to students of physics by the "dry" pile which he invented in 1812, and which consists of a number of paper discs coated with zinc foil on one side and manganese binoxide on the other, the moisture of the paper serving as conductor. By pressing a large number of such discs together in a glass tube, an electromotive force can be obtained sufficient to deflect the leaves of an ordinary electroscope. By bringing the terminal knobs of the pile near each other and suspending a light brass ball between them, Zamboni devised what was called an electric clock, the ball oscillating between the knobs like a pendulum. In the Claredon Laboratory, Oxford, the terminals of such a pile are fitted with bells which have been continuously ringing for the last fifty years. The Zamboni pile is not, however, a perpetually-going motor, as all action when the zinc is completely oxidized or the manganese exhausted. Among Zamboni's works are: "Della pila elettrica a secco"

(Venice, 1812); "L'elettromotore perpetuo" (Venice, 1820); "Descrizione d'un nuovo galvanometro" (Venice, 1833).

BROTHER POTAMAIN

Diocese of Zamora (Spain)

Diocese of Zamora

(ZAMORENSIS), suffragan of Valladolid. It is bounded on the north by Leon, on the east by Valladolid, south by Salamanca, west by Orense and Portugal. It comprises the greater part of the province of Zamora and some towns of the provinces of Valladolid and Salamanca. The See-city has 12,000 inhabitants.

Zamora belonged originally to the Vacos, but it is doubtful to which of their cities it corresponds (Sentica, Sarabis, Sisapona, Orcelis); most probably it was the ancient capital, Occloduri (Ocellus-Duri. "Eye of the Duero"), which is mentioned in the "Itinerary" of Antonius as situated at the intersection of the three roads and affording a resting place for travellers from Merida and Astorga to Saragossa. About a quarter of a mile from the ancient walls there have been found some curious sepulchres hewn out of the rocks with a cavity for the head to rest in. The foundations of the ancient bridge, now in a ruined condition, seem to be Roman, and in the portal of the city hall an ancient inscription to Viacus (Mercury) has been preserved denoting its position at the crossroads. In the Middle Ages, owing to the imperfect knowledge of geography, Zamora was confounded with the ancient *Numantia*, also situated on the Duero, but at a distance of fifty leagues, and, owing to this confusion, the Diocese of Zamora has been called Numantina in some documents. During the dispersion of the Jews some of them settled in Zamora, and Christians inhabited it as early as the persecution of Diocletian, for several martyrs, among them St. Baudilius, suffered martyrdom there. No record has been preserved of Zamora in the time of the Goths, but early in the Saracenic period the name of Medina Zamorati is found, which points clearly to Arabic etymology. From the eighth to the eleventh century the city was alternately in possession of the Moors and of the Christians. It was first reconquered by Alfonso I or his son Fruela, but Abderraman reconquered it in 813. After its reconquest Alfonso III undertook its restoration in 893, but on 9 July, 901, the Mussulmans once more furiously attacked it. They were totally vanquished, and the day was henceforth known as *el dia de Zamora*.

In 905 Alfonso III established an episcopal see, whose first bishop was St. Atilanus (905-15). He had been the companion of St. Froilan of Leon, first in the desert and then in the monastery of Morerucla which they founded on the banks of the Esla. Sts. Atilanus and Froilan were consecrated on the same day. St. Atilanus was succeeded

by Joannes, Dulcidius, Dominicus, Joannes II, and Salomon, in whose time Zamora fell once again into the hands of the Moors. In 981 it was besieged by the lieutenant of Alamanzor, Abdalla-ben-Abdallasis, and finally taken by Alamanzor himself, who completely destroyed it, and later (999) repopulated it with Mohammedans. Ferdinand I definitively reconquered it, and set about its restoration in 1062, granting a special charter to its colonizers. When he divided his territories among his children he gave the city of Zamora to his daughter Dona Urraca. Her brother Don Sancho attempted to wrest it from her and held the city in a state of siege for seven months, but he was treacherously assassinated by Bellido Dolfos, who pretended to have deserted to his ranks. The Cid, Rui Diaz de Bivar, compelled King Alfonso VI to swear publicly that he had no part in this treason, and on the spot where Don Sancho fell wounded the monastery of San Miguel del Burgo was built. The see being vacant, Alfonso VI and Bernardo, Archbishop of Toledo, agreed to appoint Jerénimo, a native of Perigord and Bishop of Valencia, but after the death of the Cid he was not able to hold his see. Calixtus II at once re-established the see, and the line of bishops since then has come down uninterruptedly to the present day. After the restoration, the Archbishop of Braga, to whose archdiocese the territory had belonged, and the Archbishop of Toledo, who had consecrated Bishop Jerénimo, disputed for the right of jurisdiction over the new diocese. Eugenius III decided in favour of the Archbishop of Braga; Adrian IV and Alexander III confirmed this decision, notwithstanding the fact that the Archbishop of Santiago had also put forward a claim to jurisdiction. It was not until after the separation of Portugal that Zamora recognized the claims of the Metropolitan of Santiago. Since the Concordat of 1851 it has belonged to the ecclesiastical province of Valladolid.

Jerénimo died in 1124, and was succeeded by Bernardo, a native of Aquitaine, in whose time Alfonso VII transferred the Church of S. Tome with its holdings to the bishop, to be used in the construction of the new cathedral, and granted to the canons of Zamora the privileges enjoyed by those of Santiago, Leon, and Palencia. Estéban, who succeeded Bernardo in 1149, laid the foundations, and on 15 Sept., 1174, the new cathedral was consecrated. This event was commemorated in verse by the by the bishop's successor, Guillermo. Upon Pedro I (1239-54) was conferred the title of Familiar to the King St. Ferdinand III. In the time of his successor, Suero Perez, the body of St. Ildefonsus was found in the Church of San Pedro. Bishops Pedro Gomez Barroso (fourteenth century), Juan de Mela (fifteenth century), and Rodrigo de Castro (sixteenth century) were raised to the cardinalitial dignity. Gonzalo Rodriguez Osorio assisted in 1310 at the council held at Salamanca to deal with the suppression of the Knights Templars. Alvaro was commissioned by Henry II to bring about a reconciliation between his daughter Dona Leonor and her husband Charles III of Navarre. Diego Fernandez de Fuen Salida (d. 1426) was sent to the Emperor Sigismund to endeavour

to bring the schism to an end. Fray Diego de Deza, the protector of Columbus, was also Bishop of Zamora. Antonio Acuna was executed in the castle of Simancas (1526) for having taken part in the rebellion of the Comuneros against Charles I (V). Juan Coello de Rivera (1642) defended the city, with the aid of the secular clergy and the monks, against the Portuguese. The Benedictine, Fray Alonso de San Vitores, died a reputed saint in 1660. In the time of the Catholic sovereigns, the Court of la Beltraneja resided at Zamora during the war which the latter waged, supported by the King of Portugal, against Isabella for possession of the Crown.

Among the ancient monuments of interest at Zamora is the fourteenth century bridge over the Duero, with its sixteen pointed arches, and its famous towers which served as a fortress in the time of Isabella the Catholic. These, however, have lost some of their characteristic features, owing to subsequent additions. The ruined tower has a figure on the top commonly called Gobierna, which serves as a vane. On the highest point of the city stands the ancient palace of Dona Urraca. This enormous building stands near one of the city gateways which opens towards the north, and has a portcullis fortified by two small towers. It was used during the civil wars of the past century. The cathedral is a handsome Romanesque building of the twelfth century. One of its prominent features is a striking cupola flanked on four sides by small towers terminating in lantern-like openings. The whole is dominated by a majestic quadrangular tower, with projecting spires, and three tiers of windows. A modern clock tower has been added. The exterior of the principal chapel is Florid Gothic. The main facade has a great Graeco-Roman arch with Corinthian columns and an Attic pediment. The facade of the south transept, called *del obispo*, is a fine specimen of architecture in pure Byzantine. The interior of the church carries out the same style of architecture. In the space behind the choir there are three very notable arches, and each of the three naves opens into three chapels, those of San Ildefonsus, San Juan Evangelist, and San Miguel. One of the treasures of the cathedral is a monstrance, an exquisite work of art in the Gothic style ornamented with innumerable small figures, the pedestal bearing the date 1598.

Among the other churches of Zamora which are worthy of special mention is that of La Magdalena, Romanesque in style, which belonged to the Knights of St. John. On the Gospel side is a beautiful sepulchre, finer than anything of the same kind to be seen in the south of France, according to the testimony of Emile Berteaux. The Church of San Pedro possesses the relics of St. Ildefonsus and St. Atilanus, the shrines containing the sacred remains having been opened for Juan II in 1427, for Charles V in 1522, Philip II in 1554, and Philip III in 1602. The episcopal palace, rebuilt at the end of the eighteenth century by Bishop Cabanillas, is spacious and has a beautiful view overlooking the river. The conciliar seminary of San Atilano was founded by Bishop Ramon

Falcon y Salcedo, in 1797, and incorporated at once with the University of Salamanca. At present it is independent and occupies the former college of the Jesuits. There are in Zamora: an institute for secondary education, a normal college for teachers of both sexes, good hospitals, and a poor house.

RAMÓN RUIZ AMADO

Diocese of Zamora (Mexico)

Diocese of Zamora

(ZAMORENSIS).

The Diocese of Zamora, located in the Republic of Mexico, comprises almost one half of the State of Michoacan and has a population of 400,000. The city of Zamora, founded in 1540 by Antonio de Mendoza, and built with fortifications (a privilege at that time) to serve as a barrier against the onslaughts of the Chichimecas Indians, has a population of 14,000. Vasco de Quiroga, first Bishop of Michoacan (d. at Urapan, 14 Mar., 1565), made it a parish and placed a rector in charge. It was there, in fact, that the Franciscan Fathers had baptized the Indians many years before. When Michoacan became an archbishopric Zamora was made an episcopal see with the mountainous part of the State of Michoacan under its jurisdiction. The diocese has: 2 seminaries and 288 students, 159 parochial schools, and 12 Catholic colleges, with about 11,000 pupils. Protestants have neither churches nor colleges in this diocese. A new cathedral is being built in the city of Zamora, the birthplace of Mgr. Labastida y Dávalos, Archbishop of Mexico, who took such an active part in the affairs of Mexico during the wars of reform and under the empire. Uruapan, founded by Father Juan de S. Miguel (one of the first Franciscans in Mexico), belongs to the Diocese of Zamora.

CAMILLUS CRIVELLI

Zamora

Zamora

Vicariate Apostolic in South Ecuador, created 3 February, 1893, by Leo XIII. The second Provincial Council of Quito (1869) established for the savages of that territory

a mission with four chief residences, Napo, Macas, Gualاقiza, and Zamora, entrusted to the Society of Jesus, whose activity was much hampered by rebellious tribes. In 1889 Zamora came under the jurisdiction of the Franciscans, and at the end of 1892 Father Luis Torra took up his residence among these savages, in number from 700 to 1000, and with difficulty evangelized them, as they were cruel and loath to live in villages. The vicariate takes its name from a former Spanish settlement destroyed in 1559. The country is beautiful, and its fertile plains are watered by fine rivers. Recent revolts of the savages have compelled the missionaries to withdraw to the Franciscan convent of Loja.

Missiones Catholicae (Rome, 1907).

ALBERTO ODONEZ

Roman Sebastian Zangerle

Roman Sebastian Zängerle

Prince-Bishop of Seckau, born at Ober-Kirchberg near Ulm, 20 January, 1771; died at Seckau, 27 April, 1848. Having studied the Humanities with the Benedictines at Wiblingen, he became novice at that monastery in 1788, took vows, 5 Feb., 1792, and was ordained priest, 21 Dec., 1793. From 1794-5 he studied Oriental languages at the monastery of Zwiefalten, taught Holy Scripture at Wiblingen, 1796-9, at Mehrerau, 1799-1801, at Wiblingen, 1801-3, at the Benedictine University of Salzburg, 1803-7, at the University of Cracow, 1807-9, at the University of Prague, 1811-13, and at the University of Vienna, 1813-24. In 1824, fifteen years after the suppression of his monastery, when there was no further hope of its restoration, he obtained dispensation from his religious vows in order to accept a canonry at Vienna. On 24 April, 1824, he became Prince-Bishop of Seckau and administrator of the Diocese of Leoben. These two dioceses, with a population of 800,000, had been without a bishop for twelve years, during which time the Government had free scope to infuse Josephinistic ideas into the clergy and the laity. The monasteries, almost without exception, had relaxed in discipline; the clergy, both secular and regular, were for the most part worldly minded and exceedingly lax as pastors of the faithful. Despite governmental opposition, Zängerle inaugurated a thorough religious renovation in both dioceses, reformed the existing monasteries, introduced the Redemptorists, Jesuits, Carmelites, and Vincentian Sisters, founded the School Sisters of the Third Order (1843) erected a *Knabenseminar* for both dioceses at Leoben, thoroughly renovated the diocesan seminary religiously and educationally, introduced annual retreats for the clergy, and in many other ways provided for the welfare of both dioceses.

SENTZER, Roman Sebastian Zängerle, Fürstbischof von Sekau und Administrator der Leobener Diocese (Graz, 1901); Hist. Polit. Blätter, CXXIX (Munich, 1902), 589-604, 621-632; St. Benedikts- Stimmen, XIII (Prague, 1899), 266-272, 302-310.

MICHAEL OTT

Diocese of Zante

Diocese of Zante

(ZACYNTHOS).

This Greek diocese, the only suffragan of the Archdiocese of Corfu, is permanently united with the Diocese of Cephalonia. The diocese includes the Islands of Cephalonia, Zante, Ithaca, Santa Maura or Leucas, and Cerigo or Cynthera. Among 170,000 inhabitants there are scarcely 1200 Catholics of the Latin Rite. The diocese contains 2 secular priests, 4 Capuchin Fathers, 1 brother, 3 main stations and 1 auxiliary station, 7 churches and chapels. As early as the fourth century the Island of Zante was the see of a Catholic bishop, whose successors fell away to the Greek Schism. About 1200 a Catholic Latin diocese was again established in Zante, and in 1222 this was united with the Diocese of Cephalonia, which is also mentioned in the fourth century and later became schismatic. In 1386 both dioceses were made suffragans of the Archdiocese of Corfu. After the union of the Ionian Island with Greece in 1863, the Catholics were much oppressed by the schismatics. At the present time the diocese has no bishop of its own but is administered by the Archbishop of Corfu, and does not seem to increase in strength.

JOSEPH LINS

Francesco Zantedeschi

Francesco Zantedeschi

Priest and physicist, born 1797; died at Padua, 29 March, 1873. For some time Abate Zantedeschi was professor of physics and philosophy in the Liceo of Venice; later he accepted the chair of physics in the University of Padua, which he held in 1853 being then obliged to resign on account of failing sight. He was an ardent worker and prolific writer, 325 memoirs and communications appearing under his name in the Biblioteca Italiana and the Bibliotheque Universelle de Geneve. In 1829 and again in 1830 Zantedeschi published papers on the production of electric currents in closed

circuits by the approach and withdrawal of a magnet, thereby anticipating Faraday's classical experiments of 1831. While carrying out researches the solar spectrum, Zantedeschi was among the first to recognize the marked absorption by the atmosphere of the red, yellow, and green rays; he also thought that he had detected in 1838 a magnetic action on steel needles of ultra-violet light. Though this effect was not confirmed, it is interesting to note that a connection between light and magnetism was suspected so many years before the announcement in 1867 by Clerk-Maxwell of the electro-magnetic theory of light. In a tract of 16 pages, published in 1859, Zantedeschi defended the claims of Romagnosi, a physician of Trent, to the discovery in 1802 of the magnetic effect of the electric current, a discovery which is usually accredited to Oersted of Copenhagen in 1820. Zantedeschi's experiments and papers on the repulsion of flames by a strong magnetic field (discovered by Padre Bancalari of the Pious Schools in 1847) attracted general attention at the time. In his later years Zantedeschi dictated an autobiography which is kept in the archives of the Academy of Verona. His principal works are: "Ricerche sul termo-elettricismo dinamico" (1838) and "Trattato del Magnetismo e della Elettricità" (1843).

BROTHER POTAMIAN

Zanzibar

Zanzibar

At a very remote unknown period the eastern coast of Africa was colonized by Asiatic nations, notably Persians and Arabs, who intermingled with the native blacks and produced the race known as the Swahilis (Arabic, *Sahel*, coast). The best known political, commercial, and religious centre of this colonization, was, besides Lamu, Malindi, Mombasa, and Kilwa, the island and town of Zanzibar, situated a little south of lat. 5° S. The neighbouring coast from Somaliland to Cape Delgado was often called Zanquebar. The two names are identical, being derived from *Zendj*, a word of Persian origin, meaning "blacks", and *bara*, "country". The old Arabic writers spoke of *Zendjibar*, the "country of the blacks", as they called the land across the ocean *Hindubar*, the country of the Hindus.

The little Island of Zanzibar -- called by the natives *Ungudya* -- has an area of only 570 sq. miles, and a population of about 100,000, of whom more than half reside in the capital. It is comparatively healthy and well cultivated, and contains the usual intertropical flora, its plantations of clove trees and coconut trees being especially remarkable. As a rule these belong to Arabs and Swahilis; the commerce, centralized in the town, is in the hands of Hindus, Banyans of Katch and Bombay, Parsees, Goanese, and, for some years past, of Europeans. The natives are of the Bantu race, like the tribes

of the adjoining portions of the mainland; they speak Swahili, a language kindred to the idioms of Equatorial Africa. In former days Zanzibar received from all the ports of the Great Land, especially Bagamoyo and Kilwa, the exports of ivory, copal, skins, grain, and slaves, especially the latter, who, after sale in the public markets, were dispersed all over the Muslim territories bordering on the Indian Ocean. There also were formed the caravans that penetrated into the distant interior, as far as the Great Lakes, and even beyond, bearing the produce of Europe and Asia, cottons, glass, steel, and copper wire, pickaxes, hatchets, knives, salt, powder, guns, etc. Here and there little colonies were established on the coast or in the interior, centres of Muslim propaganda, which was carried on by every means, commerce, slavery, war, intrigue, unions, and alliances. In that way, little by little, the vast regions of Eastern Africa were falling under the influence of the sultan of Zanzibar, when suddenly, the European powers came upon the scene, seeking to divide them up between themselves. It was towards the close of the fifteenth century that the first whites appeared upon these coasts. Vasco de Gama, sailing from Lisbon on 8 July, 1497, doubled the Cape of Good Hope and east anchor before Mozambique in March 1498. He proceeded thence to Kilwa and Mombasa, then flourishing cities, and set out for Malindi, from which port a pilot conducted him to Calicut in India (28 May, 1498). In 1499 Gama returned and took possession of Zanzibar, where he established an Augustinian convent. These religious settled at Paté and Mombasa, while the Dominicans settled at Mozambique and the Jesuits in the valley of the Zambesi.

The Portuguese were not destined to long retain the immense stretch of coast; after varying fortunes they were definitely expelled in 1698 by the Arabs of Maskat. In 1858 Seiyd Medjid, Sultan of Zanzibar, declared himself independent. However, explorers and missionaries were beginning to attract attention to these regions: we may mention in particular the names of Krappft and Rebmann, Father Horner, Livingstone, Speke, and Grant, Burton, Baker, and later Cameron and Stanley. After the foundation of the Association Internationale Africaine by Leopold II, King of the Belgians, Germany and England decided to divide up these lands, leaving France to assert its ancient claims over Madagascar, and Italy to attempt a settlement on the Somali coast. At present, British East Africa (or Imperial British East Africa), comprises the Islands of Zanzibar and Pemba, British protectorates, and the portion of the continent lying between the River Djuba on the north and on the south a line running from Vanga, round the northern base of Kilima-Ndjara, to Victoria Nyanza about 20° N. lat. South of this line lies German East Africa, extending to the River Ruvuma. The chief port in the British section is Mombasa, the terminus of a railway running through the high plateaus of Kikukyu to the north of Victoria Nyanza, thus connecting the Indian Ocean with the basin of the Nile; and in the German, Tanga and Dar-es-Salaam,

the termini of two railways, one running through the regions of Sambara, Paré, and Kilma-Ndjaro, and the others towards Tanganyika. European cultivators are gradually arriving, plantations extending, industries developing, and the face of the country changing year by year.

The old Portuguese religious do not seem to have worked among the natives; at least no trace of their influence survives. They were chaplains to the European garrisons rather than missionaries: one hundred and thirty years after their disappearance, Father Fava, Vicar-General of St-Denis (Réunion) was sent by his bishop, Mgr. Maupont, to take up the interrupted work. Accompanied by two priests, a physician, and six nuns, he arrived at Zanzibar about the end of 1860; the first Mass was celebrated at midnight on Christmas, in a large Arab house, where the beautiful cathedral now stands. Three years later the house was confided to the Congregation of the Holy Ghost, and Father Horner took possession of it. His first work was the repurchasing of slaves in the market -- where from fifty to sixty thousand were sold annually -- and the education of children. The missionaries soon went to Bagamoyo, on the opposite coast, and began to establish from year to year, in suitable localities, little Christian colonies, which spread their influence around, in proportion to the number of catechists that could be supported. In 1883 the mission was erected into a vicariate Apostolic, with Mgr. R. de Courmont as first titular. It extended originally from Cape Guardafui to Cape Delgado, with a coastline of about 1500 leagues, and no limits in the interior. But in 1880 the lake district had been confided to the Missionaries of Notre-Dame d'Afrique (of Algiers) -- the White Fathers; by a Decree of 16 Nov., 1887, the southern region, from 7° S. lat. to Cape Delgado, was detached and entrusted to the German Benedictine Congregation of Ste-Odile, with its headquarters at Dar-es-Salaam (see below); in 1904 the Prefecture Apostolic of Benadir was erected for the Trinitarians; in 1905 the Mission of Kenia was separated, being recently made a vicariate Apostolic and entrusted to the Italian missionaries of the Instituto de la Consolata (Turin). Finally, the Congregation of the Holy Ghost divided its original mission of Zanquebar into three vicariates: Zanzibar, under British protectorate, except the enclave of Kenia and the interior missions; Bagamoyo, erected in 1906; and Kilima- Ndjara, established in 1910.

These newly-created vicariates show the relatively rapid development of the Catholic missions for some years past in this part of Africa, with Zanzibar as its centre. At the same time Protestant missions were being established and multiplying. At Zanzibar the Universities' mission, whose beautiful church is erected on the site of the ancient slave-mart, dates from the same time as the Catholic mission: its influence extends towards Nyassa and the Usambara. At Mombasa and its environs the Church Missionary Society has been well established since 1840. Other English societies are

spread through the interior. But it is especially in German East Africa that different German Protestant societies are found in large numbers, displaying a jealous and too often aggressive activity. After all, Catholics and Protestants have in all these regions a common enemy, Islamism, the spread of which has been facilitated rather than retarded by the European conquest, especially in the German territory. In face of all these elements, the native fetishism is bound to disappear rapidly, not doubtless in all its practices, but as a distinct religious element. East Africa in a comparatively short time will be partly Muslim, and partly Christian. At present there are between thirty and forty thousand Catholics in the five Vicariates Apostolic of Zanzibar, Kenia, Kilima-Ndjaro, Bagamoyo (q.v.), and Dar-es-Salaam. The latter, called also Southern Zanquebar, comprises about a million inhabitants; in 1912 there were 3967 Catholics, 2600 catechumens, 14 missionary priests, 18 lay-brothers, 56 catechists, 11 principal stations, 36 secondary posts, 66 schools, 2577 pupils, 15 orphanages, and 464 orphans.

A. LE ROY

Zapoteca Indians

Zapoteca Indians

A powerful and numerous Mexican tribe located chiefly in Oaxaca and Guerrero, forming with the Mixteca and Mazateca the Zapotecan linguistic stock. At the time of the conquest of Mexico they were independent of the Aztec, whom they resembled in customs; they were defeated by the Spaniards only after several campaigns between 1522 and 1527, not submitting finally till 1551. They were a sedentary race and well advanced in civilization, living in large villages and towns, in houses constructed with stone and mortar. They recorded the principal events in their history by means of hieroglyphics, and in warfare they made use of a cotton armour. The well-known ruins of Mitla have been attributed to them and were claimed by them to be the tombs of their ancestors.

They had an elaborate religious system, and human sacrifices were offered. The modern Zapotecas are very intelligent, progressive, and hard-working; they make good soldiers and political leaders, and are excellent citizens. Benito Juarez, President of Mexico, was a full-blooded Zapoteca. They number almost 300,000, and with their kinsmen 750,000. Many of them still speak only their native Indian language. Though they are now Catholics, some of their ancient beliefs and practices, such as burying

money with the dead, still survive. The first missionaries among the Zapotecas were Bartolomé de Olmeda, a Mercedarian, and Juan Díaz, a secular priest, who was martyred by the natives in Quechula near Tepeaca for having overthrown their idols.

GILLOW, *Apuentes historicos* (Mexico, 1889).

A.A. MACEARLEAN

Archdiocese of Zara

Archdiocese of Zara

(JADERA).

Located in Dalmatia. Zara has been a diocese since A.D. 381 and since 1146 an archdiocese. Its succession of bishops numbers eighty without noteworthy interruption. Bishop Sabinianus is mentioned in the "Register" of Gregory the Great. In one of his letters John VIII names St. Donatus as patron of Jadera. Archaeologists find in Zara many traces of ecclesiastical sculpture with German characteristics dating from the migration of the German tribes. The Church of St. Donatus is the most important structure of its period preserved in Dalmatia. The massive dome of the rotunda is surrounded by a vaulted gallery in two stories which also extends around the three apses to the east. Zara was the capital of Byzantine Dalmatia, but the fact that an example of Carolingian architecture is found there shows that Zara must once have belonged to the Franks and explains the visit of Bishop Donatus to Charlemagne in Dietenhofen. Since Zara belonged to Venice the bishops of Grado have exercised patriarchal jurisdiction over it. In 1276 Patriarch Ægidius summoned Archbishop John with his suffragans to the Council of Grado where they were, however, represented by deputies. Archbishop Nikolaus III of Zara was present at the synod convened by Cardinal Guido of St. Cecilia at Padua in 1350. Twenty constitutions were published, chiefly against the civil life of the clergy and the power of the laity as used against the clergy and church property. Worthy of high respect was AEgidius of Viterbo who governed the archdiocese for two years. In the first session of the Fifth Lateran Council he says: "Homines per sacra immutari fas est non sacra perhomines" (Man must be changed by what is holy, not what is holy by man). He had also the courage to address the following words to the warlike Julius II, who sought to increase the possessions of the Church. "That the states of the Church number a few thousand more or less, matters not, but it does matter greatly that its members be pious and virtuous. The Church knows no weapons other than faith, virtue, and prayer." Archbishop Godeassi attended the Synod of Vienna in 1849. Peter Alexander Maupas was present at the Vatican Council. The Archdiocese of Zara has: 86,000 Catholics, 150 secular priests, 5 religious houses for men with 20 inmates, 4 religious houses for women with 23 inmates.

FARLATI, Illyrici Sacri tom.; Ecclesia Jaderina, V (Venice, 1775), 1-181; THEINER, Monum., 74, 76, 99, 109, 113 sq. 116, 131, 152, 188, 311, 404, 539; GAMS, Series epp., 425 sq.

CÖLESTIN WOLFSGRÜBER

Zarai

Zarai

Titular see of Numidia in Africa, mentioned by the "Itinerarium Antonini", 35, and by the "Tabula Peutingerii". Ptolemy (IV. 2) calls it Zaratha, and wrongly plades it in Mauretania Caesariensis. It is probably the Zaratha of Apulcius (*Apologia*, 23). These two forms and the term "Zaraitani" found in an inscription (Corp. Inscript. Lat. 4511) seem to indicate that the name Zarai which appears on another inscription (Corp. Inscript. 2532) must have lost a final dental letter. The ruins of Zarai, called Henshir Zaria, to the south-east of Setif in Algeria, crown an eminence which commands all the country on the left bank of the Oued Taourlatent, which the Arabs in the Middle Ages called Oued Zaraoua; remains in the Middle Ages called Oued Zaraoua; remains of a Byzantine citadel and of two Christian basilicas are yet visible. Two bishops of Zarai are known: Cresconius, present at the Conference of Carthage, 411, where he had as a rival the Donatist Rogatus; and Adeodatus, exiled by Hunerie after the Conference of Carthage, 484, and who died in exile for the Faith.

S. PÉTRIDÈS

Gioseffe Zarlino

Gioseffe Zarlino

Italian musical theorist, born at Chioggia in 1517; died at Venice, 4 February, 1590. He studies for the Church and was ordained deacon in 1541, but became so devoted to music that he placed himself under the direction of Willaert at Venice. In 1564 he was elected successor to di Rore as first *maestro di cappella* at St. Mark's, Venice, a position he held till his death. One of his earliest compositions was an ode for the victory of Lepanto, 7 October, 1571. Between the years 1566 and 1578 he composed seven masses and madrigals. In 1582 he was made a canon of Chioggia, and in the following year was elected bishop of that see, but declined the honour. He was buried

in San Lorenzo, Venice, and, though his monument has disappeared, his bust is in the doge's palace. A medal was struck in his honour while still alive. His principal title to fame is his work as a musical theorist. He published three remarkable treatises at Venice, between the years 1558 and 1589. He only admitted twelve modes, beginning with the Ionian, thus practically laying the foundation of our present major and minor scales. His theories were disputed by his pupil, Galilei; Zarlino was, however, right. He suggested the division of the octave into twelve semitones, and also equal temperament for keyed instruments.

GROVE, Dict. of Music and Musicians (New York, 1910), s.v.; DUNSTAN, Cyclopaedic Dict. of Music (London, 1909).

W.H. GRATTAN-FLOOD

Ulric Zasius

Ulric Zasius

A famous jurist, born at Constance in 1461; died at Freiburg, 24 Nov., 1536. After studying at Tubingen he first became episcopal notary at Constance, then town clerk at Baden in Aargau in 1489, and at Freiburg in 1493. From 1496-9 he directed the Latin school at Freiburg. In 1499 he studied law at the University of Freiburg, was appointed lecturer of rhetoric and poetry there in 1500 and professor of jurisprudence in 1506. In 1502 he was also clerk of court at Freiburg; in 1503, legal adviser to the university; and in 1508, imperial councillor. Applying the tendencies of the Humanists to jurisprudence, he scouted the strained and barbarous comments of the glossators and endeavoured to restore the genuine text. It was probably due to the literary controversies which he had with Eck, that he at first favoured the doctrines of Luther. After 1521 he was a zealous opponent of Luther and died a firm adherent of the Old Faith. His juridical works were published posthumously (Lyons, 1548, 1550-1; 3 vols., Frankfort, 1590).

SCHMIDT, Zasius und seine Stelle in der Rechtswissenschaft (Leipzig, 1904); NEFF, Udalricus Zasius, Ein Beitrag zur Gesch. des Humanismus am Oberhein (Program of the University of Freiburg, 1890-1); STINTZING, Ulrich Zasius (Basle, 1857).

MICHAEL OTT

Zeal

Zeal

(From *delos*, a derivative of *deo* "to boil", to "throb with heat"), is "a necessary effect of love", being "the vehement movement of one who loves to [secure] the object of his love" (*vehemens motus amantis in rem amatam*, St. Thomas, Summa Theol. I-II:28:4). Here the distinctive note is in the vehemence, or intensity, of the action to which love impels, an intensity which is proportioned to that of the love felt. As there are two kinds of love, the *amor concupiscentiae*, which is self-regarding, and the *amor amicitiae*, which is altruistic, two corresponding kinds of zeal might be distinguished, but by usage the term is restricted to the zeal prompted by the *amor amicitiae*; indeed in its religious sense it is applied solely to the zeal inspired by the love of God, to the ardent endeavours and works undertaken to promote His glory. Here again we can subdivide according as this zeal for God manifests itself in works of devotedness directed towards the fulfillment of the first or the second of the two great Commandments. In the Bible (cf. Psalm lxiii, 10; Num., xxv, 11; Tit., ii, 14, etc.) it is mostly used in the first of these applications; in the phrase "zeal for souls" it is used in the second, and in this sense it is much the more common among religious writers.

Zeal, being love in action, just on that account tends to remove as far as lies in its power all that is injurious or hostile to the object of its love; it has thus its antipathies as well as its attractions. Moreover, since, though itself appertaining to the will, it presupposes an exercise of judgment as to the appropriate means for the attainment of its object, we must further distinguish true and false zeal, according as the judgment guiding it is sound or unsound. Thus St. Paul's zeal was zeal throughout, but it was false zeal in the days when he persecuted the Church, true zeal when he became its Apostle. "Caritas Christi urget nos" are the words with which this Apostle described the promptings within his own breast of this zeal which contributed so powerfully to lay the foundations of the Catholic Church. And it is a zeal of like nature which, enkindled in the breasts of so many generations of ardent followers of Christ, has, in its co-operation with the lavish gifts of the Holy Spirit, built that Church up into the greatest marvel of human history. For it is the zeal of all those devout souls which, as distinguished from the lukewarmness of the ordinary Christian, has sent forth the Apostles and missionaries to their lives of self-sacrifice, has filled the sanctuaries with an unfailing supply of good priests and the cloisters with throngs of fervent religious, which has organized, sustained, and developed so splendid an array of works of charity to meet almost every conceivable need of suffering humanity.

Zeal, which contains a full bibliography and numerous extracts bearing on the subject.

SYDNEY F. SMITH

Nicholas Tacitus Zegers

Nicholas Tacitus Zegers

Famous exegete, born either at Diest or Brussels during the latter half of the fifteenth century; died at Louvain, 25 August, 1559. After receiving a scientific education at Louvain, he entered the Franciscan Order, joining the Province of Cologne. At the division for that province; he was assigned to the Low German Province. There, coming under the influence of Francis Titelmann, professor of exegesis in the convent of Louvain, he devoted himself to the study of Scriptures and succeeded Titelmann in the chair of exegesis in 1536. In 1548 he gave up his chair to devote himself to writing. His solid foundation in Greek and Hebrew enabled him to exercise sound critical judgment on the explanation of the different passages of Holy Writ, a quality at that time very rare. Memeranus writes of him:

Vir pietatis amans, semper studiosus honesti,
Et bona qui semper publica ubique juvat.

The fruits of his literary labours were very numerous. Besides many translations of ascetical works from the Flemish and French into Latin, he also wrote: "Proverbia Teutonica Latinitate Donata" (Antwerp, 1550 and 1571); "Scholion in omnes Novi Testamenti libros" (Cologne, 1553); "Epanorthotes, sive Castigationes Novi Testamenti" (Cologne, 1555); "Dye Collegie der Wysheit ghefundeert in dye universiteit der deughden" (Antwerp, 1556); "Inventorium in Testamentum Novum", a kind of concordance (Antwerp, 1558 and 1566); "Novum Jesu Christi Testamentum juxta vetorem ecclesiae editionem" (Louvain, 1559); and finally a catechism in Flemish.

LEO T. BUTLER

Zela

Zela

Titular see of Asia Minor, suffragan of Amasea in the Helenopontus. In pagan times the city, which was situated on the Seylax, belonged to priests, equal in dignity to the princes of Pontus, lords of the territory. On the eminence which rises in the middle of the city stood a famous temple, consecrated by the Persian kings to their national divinities, Anahita, Vohu-Mano, and Anadates. Zela is famous for the victory of Mithridates Eupator over Valerius Trianus, lieutenant of Lucullus (67 B.C.), also for that of Caesar over Pharnaces (47 B.C.), after which he wrote his famous letter, "Veni, Vidi, Vici" (I came, I saw, I conquered). At first a mere hamlet, Zela obtained from Pompeii the title of city, and became the capital of a district allotted to Queen Pythadoris (Strabo, XI, viii, 4; XII, iii, 37; Pliny, "Hist. Nat.", VI, 8). It was finally ceded to Nero, with all Pontus Polemoniacus, by its last king, and remained part of the Greco-Roman empire until 1397, when the Turks seized it. According to a letter (72) of St. Basil, a council was held there by the Arians in the fourth century. Le Quien (Oriens christ., I, 541) mentions several bishops: Heraclius, at Nice (325); Atticus, at Chalcedon (451); Hyperechius (458), Georgius (692); Constantine (787); Paul (879). According to the "Acta Patriarchatus Constantinopolitani" of Miklosich and Muller (I, 69), there was a bishop at Zela in 1315; he was then named Metropolitan of Amasea; later the see was suppressed. Zela (now Zilch) is caza in the sandjak of Tokat and the vilayet of Silvas; the city numbers 20,000 inhabitants, 5000 of whom are Christians, the rest being nearly all schismatic Armenians.

S. VAILHÉ

Karl Zell

Karl Zell

Statesman, philologist, and defender of the rights of the Church, b. at Mannheim, 8 April, 1793; d. at Freiburg, 24 January, 1873. He attended the high-school of his native town, and studied philology at the Universities of Heidelberg, Gottingen, and Breslau (1810-14). In 1814 he became professor at the lyceum at Rastatt, in 1821 pro-

fessor of classical philology at the University of Freiburg, where he soon attained prominence by his work as teacher and author. As representative of the university in the Upper Chamber of the Diet of Baden during the years 1831-35, he advocated a thorough reform of the high-school system of Baden and the establishment of a special board for the supervision and encouragement of the higher studies. Zell undertook the execution and completion of the new system, having been appointed ministerial councillor and member of the new council of higher studies. In 1848 he returned to academic work as professor of archaeology at the University of Heidelberg, in which capacity he developed a large and many-sided activity. He was elected (1848) a member of the Lower Chamber of the Diet of Baden, in which he was a deputy until 1855. In the severe struggles for its rights which the Church had at that time in Baden, then ruled by the Liberals, Zell courageously and unweariedly defended it by speech and writing, a championship in which he stood almost alone. The fame he won far beyond the boundaries of Baden led to his election as president of the congresses for Catholic Germany held at Munster in 1852 and at Vienna in 1853. During the Revolution of 1848-49 his loyalty to the grand-duke never wavered, just as his loyalty to the Church never changed. He refused to recognize the provisional revolutionary government which ruled Baden after the flight of the grand-duke or to take the oath to it. In 1855 Zell retired from the service of the State, and in 1857 settled at Freiburg. In the ecclesiastico-political battles in which Archbishop Hermann Bikari became involved with the Government of Baden for its active adherence to the Kulturkampf policy, Zell was the archbishop's constant adviser and active assistant. As a speaker at assemblies, in pamphlets and articles for periodicals and newspapers, like the "Freiburger Kirchenblatt" and the "Historisch-Politische Blätter", he constantly defended the rights of the Church, Christian schools, religious orders, and refuted the calumnies circulated against the Church. A permanent memorial of his labours for the head of the Church is the St. Michaelsverein (St. Michael's Association) for the Archdiocese of Freiburg, which he founded, in order to organize the gifts of the faithful for the Holy Father (Peterspence); the society still flourishes in the archdiocese. As an author he wrote on a great variety of subjects, devoting himself especially to Aristotle, Calderon, Shakespeare, and the history of Baden. Works still valuable are: "Fereinschriften" (3 vols., Freiburg, 1826-33; new series, 1857); "Treatise on St. Lioba" (Freiburg, 1860); and historical articles for the "Freiburger Diözesanarchiv".

WEECH, Badische Biographien, 534-37, contains a list of his most important writings; HANSEN, Lebensbilder deutscher Katholiken, V (Paderborn, 1910)

JOSEPH LINS

Ulrich Zell

Ulrich Zell

Publisher, the first printer of Cologne, born at Hanau-on-the-Main, date unknown; died about 1507. He learned the art of printing before 1462 in the printing establishment of Fust and Schöffer, and seems, shortly after the catastrophe of 1462, to have gone to Cologne, whose university gave promise of a market for printed works. Zell was printing at Cologne apparently as early as 1463, although his first dated book is of the year 1466. His work as printer and publisher can be traced up to the year 1502; altogether about 120 of his publications are known. Of these, however, only nine bear his name, but in all probability he printed and published many more. In outline and cut his six kinds of type are strikingly similar to the "Durandus" and "Clements" types of Fust and Schoffer; it would even seem that a number of the matrices of the "Clements" type had been used. Most of the books printed by Zell were text-books in quarto form for the university. Among the fine productions of his printing shop is an undated edition of the Latin Bible in two volumes. At first he called himself *clericus* (of the lower orders), but as early as 1471 he married and became a citizen and householder of Cologne. In 1473 he bought the important manorial estate of "Lyskirchen", to which he transferred the main part of his business. In the colophons of his books the place of business is called "apud Lyskirchen". The purchase, sometime later, of various houses, lands, and properties yielding revenues, show that Zell had become a prosperous man. It is also a proof of his importance that for a long time he filled the office of *Kirchenmeister* (church-master) of "S. Maria an Lyskirchen". Of much importance in the history of the discovery of printing is Zell's statement, preserved in the Chronicle of Cologne of 1499, that the year 1450 was the date of the beginning of printing, that the country-squire Johann Gutenberg was the inventor of it, and that the first book printed was the Latin Bible, the Vulgate.

Allgemeine deutsche Biographie, XLV, 19 sq.

HEINRICH WILHELM WALLAU

Diocese of Zengg-Modrus

Diocese of Zengg-Modrus

(SEGANIENSIS ET MOD-RUSIENSIS SEU CORBAVIENSIS).

Located in Hungary; suffragan of Agram. The year of its foundation is not known. Miraeus, about 1150-1160, was the first bishop. The See of Modrus was established at

Corbavia (Krbava) 1185. Pius II moved the former see from Corbavia to Modrus, as it suffered from the advance of the Turks. From that time it was known as the See of Modrus. Urban VIII united the See of Zengg with that of Modrus. Gregory XVI in 1836 confirmed this union "per aequalitatem". Until 1600 the see was suffragan of Spalato, later of Gran, then of Kaloesa; since 1852 it is suffragan of Agram. The diocese consists of Fiume, of some parts of the "Komitat" of Agram, and of the Military Frontier. It is divided into 5 archdeaneries and 15 vice-archdeaneries, and 137 parishes. The language at Mass and during the services was ancient Slavic, by reason of a papal privilege. There are two chapters which belong to Zengg and to Modrus, and one collegiate chapter at Fiume. The seminary is situated at Zengg; it was established by Bishop Osegovich in 1857. Tersato, a place of pilgrimage, is situated in the neighbourhood of Fiume.

FARLATI, Illyricum sacrum, IV, 106; Povesu Biskupijah Senjske I Modruske II Krbavske trudon Manoila Sladovica (Trieste, 1856); In Hungarian: A Katolikus Magyarorszag (Budapest, 1902).

A. ALDASY

St. Zeno

St. Zeno

Entered in the Roman Martyrology on 12 April as a Bishop of Verona martyred under Gallienus. Probably, however, he was a confessor who governed the Church of Verona from 362-380. At Verona a basilica, San Zenone, is dedicated to his honour, and some thirty churches and chapels bear his name. In the basilica his statue, bearing the episcopal insignia, is prominent in the choir; coins with his likeness and an inscription were in use. On 21 May and 6 Dec. the translation of his body and his consecration were formerly commemorated. In "De viris illust." Of St. Jerome and Gennadius, Zeno is not mentioned, but St. Ambrose (Ep. v) speaks of him as an *episcopus sanctae memoriae*, and St. Gregory (Dial., III, 19) relates a miracle wrought at the Church of St. Zeno at Verona. Mabillon ("Vetera analecta", Paris, 1675) published an anonymous poem, "De landibus Veronae", taken from the writing of Ratherius, Bishop of Verona (d. 974), found in the abbey at Lobbes in Belgium (P.L., XI, 154, 225), which gives a list of the bishops of Verona and makes Zeno eighth. In the Monastery di Classe at Ravenna was found an eighth-century chasuble (*casula diptycha*) with the names and pictures of thirty-five bishops of Verona on its front and back; among them was that of Zeno. This list was accepted by Gams in his "Series episcoporum" (Bigelmair, p. 27). Zeno had not been known as a writer before 1508, when two Dominicans, Albertus Castellanus and Jacobus de Leuco, edited at Venice 105 *tractatus* or sermons found

in the episcopal library of Verona fifty years earlier. In 1739 the brothers Ballerini published "S. Zenonis episcopi Veronae sermones", with an elaborate prolegomena. From these it appears that Zeno was a native of Africa, eighth Bishop of Verona (362-80), an able speaker, and an untiring champion of Christianity against the heathens and of orthodoxy against the Arians. Much controversy arose as to the time at which St. Zeno lives, whether two bishops of Verona of this name were to be admitted or but one, and on the authorship of the sermons. Various opinions were held by Sixtus of Siena, Baronius, Ughelli, Dupin, Tillemont, Fabricius, and others. Of the 105 sermons 12 have been rejected as belonging to other authors. Of the rest 16 are larger sermons, the others merely sketches or perhaps fragments. They contain valuable material on Catholic doctrine, practice, and liturgy; they treat of God, creation, the Blessed Virgin, Holy Scriptures, the Church, the sacraments, etc., and warn against the vices of the day.

DANIELL in Dict. Christ. Biog., s.v. Zeno (6); BARDENHEWER, Patrologie (Freiburg, 1910), 362; Zeitschrift fur kath. Theol. (Innsbruck, 1884), 233; Acta SS., II April, 68; HURTER, Nomenclator, I (1903), 362; BIGELMAIR, Zeno von Verona (Munster, 1904).

FRANCIS MERSHMAN

St. Zenobius

St. Zenobius

Bishop of Florence and one of the patrons of that city, b. there in the latter part of the reign of Constantine I; d. 337. Carefully educated by pagan parents, he came early under the influence of the holy bishop Theodore, was baptized by him, and succeeded, after much opposition, in bringing his father and mother to the Christian Faith. He embraced the clerical state, and rapidly rose to the position of archdeacon, when his virtues and notable powers as a preacher made him known to St. Ambrose, at whose instance Pope Damasus (366-86) called him to Rome, and employed him in various important missions, including a legation to Constantinople. On the death of Damasus he returned to his native city, where he resumed his apostolic labours, and on the death of the bishop of that see, Zenobius, to the great joy of the people, was appointed to succeed him. The ancient legends of his episcopal career -- in which, however, there are many interpolations of a later date -- are unanimous in their description of his saintly life and supernatural gifts. Extraordinary miracles, including several instances of the restoration of the dead to life, are attributed to him, and during his prolonged episcopate his fervour and zeal for souls never for a moment flagged. According to his biographer and successor in the See of Florence, Antonius, he died in his ninetieth

year, in 424; but, as Antonius says that Inocent I (d. 417) was at the time pope, the date is uncertain. There is ground for believing that he actually died in 417, on 25 May, on which day the ancient tower where he is supposed to have lived, near the Ponte Vecchio, is annually decorated with flowers. His body was first buried in the Basilica of St. Laurence (consecrated by St. Ambrose in 393), and was later translated to San Salvador's church, on the site of the present cathedral. Beneath the high altar is the silver shrine of the saint, designed by Ghiberti about 1440, in the same style as his famous bronze gates. There is a statue of Zenobus in San Marco, and other memorials of him in the city, where his name and memory are still venerated.

Acta SS., XIX, 49-69; the Bollandists have brought together all the ancient biographies of Zenobius: (1) that attributed to St. Simplicianus; (2) the life by ST. ANTONIUS OF FLORENCE (from his Summa Historialis, tit. X. cap. xii); (3) that by the monk BLASSIUS (from a Florentine MS.); that by LAURENCE, Archbishop of Amali (1040-1048); and various narratives of the translation of his body. See also GAMS, Series episcoporum (Ratisbon, 1873), 747; BUTLER, Lives of the Saints, X (London, 1814), 436-438; HORNER, Walks in Florence (London, 1873), I, 5, 79, 118, 177; II, 177.

D.O. HUNTER-BLAIR

Zenonopolis

Zenonopolis

Titular see of Asia Minor, suffragan of Seleucia, Trachaea in Isauria. The abbreviated form used in the Roman Curia is *Zenopolis*. It was the native village of Emperor Zeno, and was formerly known as Codissos. In the "Notitia Episcopatum" of Antioch (sixth century) Zenononpolis is among the suffragans of Seleucia (*Echos d'Orient*, X., 145). About 732 the province of Isauria was joined to the Patriarchate of Constantinople, and Zenopolis appears about 940 in the "Notitia Episcopatum" of Constantine Porphyrogenitus, but is situated in Pamphylia (*Georgius Cyprius, "Descriptio Orbis Romani"*, ed. Gelzer, 1606). The city is again mentioned by George of Cyprus in the seventh century (*op. cit.*, 847) and by Constantine Porphyrogenitus (*De Themat.*, I, 13) as a city of the Decapolis. Le Quien (*Oriens Christ.*, II, 1033) mentions two bishops: Eulalius, present at the Council of Constantinople, 681; Marcus, at that of Nice, 787. Gennadius, who assisted at the fifth council, 553, as bishop of Zenonopolis in Pamphylia, was very probably a prelate of this see (*Mansi, "Concil. Coll."*, IX, 176, 393). Zenonopolis is to-day Isnebol in the caza of Ermenek and the vilayet of Adana (Ramsay, "Asia Minor", 365). It must not be confounded with another of the same name situated in Lycia.

S. VAILHÉ

Zeno of Elea

Zeno of Elea

Greek philosopher, born at Elea, about 490 B.C. At his birthplace Xenophanes and Parmenides had established the metaphysical school of philosophy known as the Eleatic School. The chief doctrine of the school was the oneness and immutability of reality and the distrust of sense-knowledge which appears to testify to the existence of multiplicity and change. Zeno's contribution to the literature of the school consisted of a treatise, now lost, in which, according to Plato, he argued indirectly against the reality of motion and the existence of the manifold. There were, it seems, several discourses, in each of which he made a supposition, or hypothesis, and then proceeded to show the absurd consequences that would follow. This is now known as the method of indirect proof, or *reductio ad absurdum*, and it appears to have been used first by Zeno. Aristotle in his "Physics" has preserved the arguments by which Zeno tried to prove that motion is only apparent, or that real motion is an absurdity. The arguments are fallacious, because as Aristotle has no difficulty in showing, they are founded on false notions of motion and space. They are, however, specious, and might well have puzzled an opponent in those days, before logic had been developed into a science. They earned for Zeno the title of "the first dialectician," and, because they seemed to be an unanswerable challenge to those who relied on the verdict of the senses, they helped to prepare the way for the skepticism of the Sophists. Besides, the method of indirect proof opened up for the sophist new possibilities in the way of contentious argument, and was very soon developed into a means of confuting an opponent. It is, consequently, the forerunner of the Eristic method, or the method of strife.

WILLIAM TURNER

Pope St. Zephyrinus

Pope St. Zephyrinus

(Reigned 198-217).

Date of birth unknown; died 20 Dec., 217. After the death of Pope Victor in 198, Zephyrinus was elected his successor and consecrated. The pope is described by Hippolytus in the "Philosophymena" (IX, xi) as a simple man without education. This is evidently to be understood as meaning that Zephyrinus had not taken the higher studies and had devoted himself to the practical administration of the Church and not to theological learning. Immediately after his elevation to the Roman See, Zephyrinus

called to Rome the confessor Callistus, who lived at Antium and who had received a monthly pension from Pope Victor, and intrusted him with the oversight of the *coemeterium*. It is evident that shortly before this the Roman Christian community had, under Victor, become the owner of a common place of burial on the Via Appia, and Zephyrinus now placed Callistus over this cemetery which was given the name of Callistus. Undoubtedly Callistus was also made a deacon of the Roman Church by Zephyrinus. He was the confidential counsellor of the pope, whom he succeeded. The positions of the Christians, which had remained favourable in the first years of the government of Emperor Septimus Severus (193-211), grew constantly worse, and in 202 or 203 the edict of persecution appeared which forbade conversion to Christianity under the severest penalties. Nothing is known as to the execution of the edict in Rome itself nor of the martyrs of the Roman Church in this era.

More, however, is certain concerning the internal disputes in the Roman Church over the doctrine of the Trinity. The adherents of the heretical teacher Theodosius the Tanner had been excommunicated with their leader by Pope Victor. They formed an independent heretical community at Rome which was ruled by another Theodosius, the Money Changer, and Aselepodotus. These men persuaded a confessor of Rome named Natalis, who had acknowledged his faith without wavering before the heathen judge and had suffered torture, to permit himself to be made the bishop of the sect for a monthly payment of 170 denarii. Natalis, however, received many warnings in dreams. At first he paid no attention to these visions, but on one occasion he believed that he had been severely tortured by angels and now he began to ponder the matter. Early in the morning he put on a penitential garment, covered himself with ashes, and threw himself with tears at the feet of Zephyrinus. He confessed his wrong-doing and begged to be received again into the communion of the Church, which was finally granted him (Eusebius, "Hist. eccl.", V, xxxii). In the same era the adherents of Montanus also worked with great energy at Rome. The Montanist Proculus (or Proclus) published a work in defense of the new prophecies. A refutation of Proclus in the form of a dialogue was written by a learned and rigidly orthodox Roman Christian named Caius, wherein he refers to the grave of St. Peter on the Vatican Hill and of St. Paul on the Via Ostiensis. Caius rejects the Apocalypse of St. John, which he regards as a work of the heretic Cerinthus. In opposition to Caius, Hippolytus wrote his "Capita contra Caium" (cf. Eusebius, "Hist. eccl.", III, xxviii; VI, xx).

Hippolytus was the most important theologian among the Roman presbyters of this era. He was an avowed adherent of the doctrine of the Divine Logos. He taught that the Divine Logos became man in Christ, that the Logos differs in every thing from God, that he is the intermediary between God and the world of creatures. This doctrine in the form in which it was set forth by Hippolytus and his school aroused many doubts,

and another theological school appeared in opposition to it. This latter school was represented at Rome in this era by Cleomenes and particularly by Sabellius. These men were rigid opponents of the Theodotians, but were not willing to acknowledge the incarnation of the Logos, and emphasized above all the absolute unity (*monarchia*) of God. They explained the Incarnation of Christ in the sense that this was another manifestation (*modus*) of God in His union with human nature. Consequently they were called Modalists or Patriconians, as according to them it was not the Son of God but the Father Who had been crucified. The Christian common people held firmly, above all, to the Unity of God and at the same time to the true Godhead of Jesus Christ. Originally no distrust of this doctrine was felt among them. Pope Zephyrinus did not interpose authoritatively in the dispute between the two schools. The heresy of the Modalists was not at first clearly evident, and the doctrine of Hippolytus offered many difficulties as regards the tradition of the Church. Zephyrinus said simply that he acknowledged only one God, and this was the Lord Jesus Christ, but it was the Son, not the Father, Who had died. This was the doctrine of the tradition of the Church. Hippolytus urged that the pope should approve of a distinct dogma which represented the Person of Christ as actually different from that of the Father and condemned the opposing views of the Monarchians and Patriconians. However, Zephyrinus would not consent to this. The result was that Hippolytus grew constantly more irritated and angry against the pope and particularly against the deacon Callistus whom, as the councillor of the pope, he made responsible for the position of the latter. When after the death of Zephyrinus Callistus was elected Roman bishop, Hippolytus withdrew from the Church with his scholars, caused a schism, and made himself a rival bishop.

Zephyrinus was buried in a separate sepulchral chamber over the cemetery of Calistus on the Via Appia (cf. Wilpert, "Die papstgruber und die Suciliengruft in der Katakombe des hl. Kallistus", Freiburg, 1909, 91 sqq.). The "Liber Pontificalis" attributes two Decrees to Zephyrinus; one on the ordination of the clergy and the other on the Eucharistic Liturgy in the title churches of Rome. The author of the biography has ascribed these Decrees to the pope arbitrarily and without historical basis.

Liber Pontificalis, ed. DUCHESNE, I, 139; DUCHESNE, Histoire ancienne de l'eglise, 292 sqq.; LANGEN, Geschichte der romischen Kirche, I (Bonn, 1881), 200 sqq.; BAGEMANN, Die romische Kirche und ihr Einfluss auf Dissiplin und Dogma in den ersten drei Jahrhunderten (Freiburg in Mr., 1864), 84 sqq.; cf. also the bibliography to HIPPOLYTUS.

J.P. KIRSCH

Zephyrium

Zephyrium

A titular see in Cilicia Prima, of Tarsus. Nothing is known of the history of Zephyrium, lying off the coast of Cilicia, between Cilicia Tracheia and Pedias. This city is mentioned, however, by numerous ancient authors -- it had many coins; here was prepared the best molybdenum (white lead), drawn from the neighbouring mines of Coreyra. It was situated on the road from Selinus to Rhossus. It is to-day Mersina, chief town of a caza of the vilayet of Adana; having about 14,000 inhabitants, of whom 3,000 are Greeks, 1,000 Armenians, 650 Catholics; the population seems to increase quite rapidly. The sea-port exports agricultural products; it is joined to Tarsus and Adana by a railway line, which will soon be connected with the Constantinople line to Bagdad. Le Quien (*Oriens Christ.*, II, 883) names four bishops of Zephyrium: Aerius, present at the Council of Constantinople, 381; Zenobius, a Nestorian, at the Council of Constantinople, 432-34; Hypatius, present at Chalcedon, 451; Peter, at the Council in Trullo, 692. The Latin parish of Mersina is administered by Capuchins; there are likewise Sisters of St. Joseph of the Apparition; schools for boys and girls, and hospitals.

LEAKE, *Asia Minor* (London, 1824), 214; SMITH, *Dict. Greek and Roman Geog.* s. v.; MULLER, *Geographi graeci minores*, ed. DIDOT, I (Paris, 1882) 481; CUINET, *La Turquie d'Asie*, II (Paris, 1894), 50-58.

S. PÉTRIDÈS

Zeugma

Zeugma

A titular see of Syria, suffragan of Hierapolis, in the Province of the Euphratensis. The city is often called Zeuma (see the texts in Gelzer's ed. of "Georgii Cyprii Descriptio Orbis Romani", 149). A bridge uniting the two banks of the Euphrates suggested the name, the Greek word meaning "a yoke". Pliny (*Hist. Nat.*, XXXIV, 150) says that Alexander the Great was the first to build a bridge at this point, no doubt a pontoon bridge. Seleucus Nicator repaired it (Pliny, *op. cit.*, V, 86). The Parthians were accustomed to cross the river at this place (Dio Cassius, XLIX, 19) it being the easiest crossing (Tacitus, "Annals", 12). Cassius camped here in his campaign against the Parthians during the reign of Claudius. In early times two distinct cities, Seleucia and Apamea, had each its opposite bank of the river (Pliny, *op. cit.*, V, 86, 119; "Corp. Inser. Græc.", 2548). It became customary to say that both cities were on the passage of the

"Zeugma", and from the first century of our era this name was in current use. Procopius (*De Ædificiis*, II, 9) says that Justinian built a wall about the city and strongly fortified it. The "Notitia Episcopatum" of Antioch (sixth century; see "Echos d'Orient", X, 145), mentions Zeugma among the suffragans of Hierapolis. Le Quien (*Oriens Christ.*, II, 941-44) mentions several of its bishops: Bassus at Nicaed (325); Antonius, an Arian, present at the Council of Philippopolis (344); Sabinianus (363); Aphthonius, at first abbot of a local monastery, later bishop; Heliades, at Ephesus (431); Evocrius at Chalcedon (451); Julian (553). Theodoret ("Hist. Relig.", V; P.G., LXXXII, 1352-57) deals at length with St. Publius, a monk of Zeugma, and with his monastery. The site of Zeugma has not yet been found; doubtless it is near Birekik, and facing that place.

S. VAILHÉ

Johann Kaspar Zeuss

Johann Kaspar Zeuss

Born at Vogtendorf, in Upper Franconia, 22 July, 1806; d. there, 10 Nov., 1856. He was the founder of Celtic philology, an eminent philologist, and studied at the gymnasium of Bamberg. His parents wished that he should enter the priesthood, but the young man chose the scholarly career, inclining particularly to historic and linguistic study. He entered the University of Munich and after finishing his studies, taught there at the gymnasium. In 1837 appeared his book "Die Herkunft der Baiern von den Markomannen" (2nd ed., 1857), which brought him the honorary degree of Ph.D. from the University of Erlangen. The same year he went to Speyer to teach history at the lyceum and remained there until 1847, when he accepted a professorship of history in the University of Munich. But this he resigned on account of his poor health and was transferred to the lyceum in Bamberg. In 1853 appeared his monumental "Grammatica Celtica", which established his fame. Two years later he took a leave of absence to recover his health, but he died the following year.

Zeuss was a scholar of tremendous erudition, combining a knowledge of philology with that of history and ethnology. His Germanic studies had taught him the necessity of a knowledge of the Celtic languages and so he went to work to investigate this neglected field. To get at the sources, the old manuscripts, particularly those in Old Irish, he journeyed to Karlsruhe, Wurtzburg, St. Gall, Milan, London, and Oxford, and everywhere made excerpts or copies. Not only the ancient, but also the modern, dialects received his attention. As a result appeared the great "Grammatica Celtica", which proved beyond doubt that the Celtic languages were a group of the Indo-European

family and which put Celtic philology on a sound scientific basis. After the author's death the work was revised and re-edited by Hermann Ebel (Berlin, 1871). It is even to-day of fundamental importance to all Celtic scholars. Other works of Zeuss are the "Traditiones possessionesque Wirzenburgenses" (Speyer, 1842), and "Die Freie Reichstadt Speyer vor ihrer Zerstörung".

ARTHUR F.J. REMY

Magnoald Ziegelbauer

Magnoald Ziegelbauer

Historian, born at Ellwangen, Swabia, 1689; died at Olmütz, 14 January, 1750. He took vows at the Abbey of Zwiefalten 21 November, 1707, was ordained priest, 21 March, 1713, and became professor of theology at his monastery. Soon, however, some of the illiterate monks of Zwiefalten manifested their aversion to the learned and studious Ziegelbauer, who obtained his abbot's permission to reside at another monastery of his order. At first he went to Reichenau, where he taught theology. About 1730 the prior of this imperial monastery sent him to the court of Vienna on business pertaining to the monastery, after the successful accomplishment of which he taught moral theology at Göttweig from 1732-33, then returned to Vienna to devote himself to literary labours. In 1734 he became tutor of the young Barons von Latermann. From 1747 he resided at Olmütz as secretary of the learned club "Societas incognitorum". His chief literary production is "Historia rei literariae ordinis S. Benedicti", which was published posthumously by his friend and collaborator Oliverius Legipontius (4 vols., Augsburg, 1754) and still remains the standard literary history of the Benedictine Order. His other 19 printed works (see list in Lindner, loc. cit. below) include "Mancipatus illibatae virginis deciparae" (Constance, 1726); "Lebengeschichte des ertz-martyrers Stephani" (Vienna, 1736; "Epitome historica regii, liberii et exempti in regno Bohemiae antiquissimi monasterii Brevnoviensis" (Cologne, 1740); and other historical and theological treatises of minor importance. Among his unprinted works are "Olomucium sacrum", an ecclesiastical history of Moravia and its bishops, and "Bibliotheca Bohemica", a collection of writers on Bohemia.

LEGIPONTUS, Elogiuim historicum, prefixed to vol. I. of Hist. rei literariae O.S.B., and reproduced by MONSE, Infulae doctae Moratiae (Brunn, 1779), 151-92; LINDNER in Studien und mitteilungen aus dem Ben. Un Cist. Orden, IV (Wurzburg, 1883), I, 70-78; BERLIERE in Revue Benedictine, XV (Maredsous, 1898).

MICHAEL OTT
Gregorius Thomas Ziegler

Gregorius Thomas Ziegler

Bishop of Linz, born at Kirchheim near Augsburg, 7 March, 1770; died at Linz, 15 April, 1852. He joined the Benedictines at Wiblingen in 1788, was ordained priest, 25 May, 1793, teaching in various Benedictine institutions until 23 October, 1892, when he became prior of his monastery. After the suppression of Wiblingen in 1806 he removed with some of his confreres to Tiniec in Poland and taught theology at the neighbouring University of Cracow. When the Benedictines were forced to leave Tiniec in 1809 he was engaged as professor of church history at the Lyceum of Linz, 1809-15, and of theology at Vienna, 1815-22. On 2 February, 1822, he became Bishop of the new Diocese of Tiniec, but transferred his see to Tarnow, where he began the erection of a seminary and renovated the cathedral. On 13 April, 1827, he was promoted to the Diocese of Linz. He laboured successfully for the emancipation of the Church from governmental encroachments, fostered the religious life of the clergy and laity by introducing clerical retreats and popular missions, and advanced the religious education of the laity by introducing religious orders. He is the author of "Die Feier der heil. Firmung in der Kath. Kirche" (Vienna, 1817); "Das Kath. Glaubensprincip" (Vienna, 1823); "Zuge und Schilderungen aus dem Leben des sel. Seb. Franz Job" (Linz, 1835) and various minor works, pastoral letters, occasional lectures, and sermons. He also re-edited Klypfel's "institutiones theologiae dogmaticae" (Vienna, 1819-21) and contributed various theological treatises to Frint's "Theologische Zeitschrift" (Vienna, 1813-16).

LINDNER in Studien und Mitteilungen aus dem Ben. und Cist. Orden, IV (Wurtzburg, 1883), i, 418-23; Scriptores O.S. Lexikon des Kaiserthums Oesterreich, LX (Vienna, 1891), 50-2; HIPTMAIR, Geschichte des Bisthums Linz (Linz, 1885), 179-214.

MICHAEL OTT
Cornelius van Zierikzee

Cornelius van Zierikzee

Born at Zierikzee (whence he takes his surname), a town in the Province of Zeeland, Holland, about 1405, d. 21 Feb., 1462. The strict observance of the Franciscan Rule,

upheld and propagated throughout Italy by St. Bernardine of Siena and St. John Capistran, was early introduced into Germany. At twenty Cornelius entered the Franciscan Order in the Province of Cologne, which at that time included the greater part of the Netherlands. It was famous for the number and sanctity of its members, among whom were several Scotsmen who had been educated at the universities on the Continent.

This revival of the Franciscan life under the guidance of St. Bernardine no doubt came to the knowledge of King James I of Scotland, whose poetic spirit was in harmony with the Franciscan ideal. In 1436 the king requested the superiors of the order that he might have Friars of the Observance sent into his kingdom; but it was not until after the provincial chapter of the Observants held at Gouda in 1447, and apparently because of a fresh application by his son King James II, that it was decided to comply with the royal wishes. John Perioche de Mauberg, Vicar-general of the Ultramontine Observants, selected Fr. Cornelius as head of the mission. Fr. Cornelius was accompanied by six associates, of whom at least one, Fr. John Richardson, a graduate of the University of Paris, was a Scot; they were received with enthusiasm by all classes. Within a few years after the arrival of the Observants in Scotland they established nine convents in different towns; the postulants for admission to the order were numerous; youths belonging to the best families renounced the world to embrace the Franciscan life of poverty. Among those who received the habit from Fr. Cornelius were: Jerome Lindsay, U.J.D., of Paris, son of the Earl of Crawford, commemorated in the Franciscan Martyrology with title of blessed, pre-eminent for his humility, mortification, and spirit of prayer; David Crannok, who was physician to King James II and his consort Queen Margaret; he succeeded Fr. Cornelius in the government of the convents; Robert Keith, renowned for the sanctity of his life, a member of the family of the Earl Marishal; later on Robert Stuart, kinsman of King James V. The General Chapter of the Observants held at Mount-Luzon (Bourbonnais) erected the Scottish convents into a province, and granted it a seal representing St. Bernardine holding a tablet with the Holy Name painted on it and three mitres at his feet, to mark that the Scottish province owed its origin to the companions of the saint.

The Scottish Franciscans enjoyed a great reputation throughout Europe for adhering most conscientiously and strictly to the poverty and austerity of the order. James IV wrote to the pope in 1506 in praise of the Observants in his kingdom and their works. The Scottish province was in a flourishing state when the religious revolution broke out and the convents were destroyed. In 1560 Father John Patrick, Minister Provincial, accompanied by over one hundred fathers, left Scotland for the Netherlands, where they were hospitably recognized and incorporated in the provinces of Holland and Belgium. In 1462 Father Cornelius, worn out by his labours and austerities, left Scotland for his own province of Cologne, where he died in the convent at Antwerp.

It is said that many miracles took place at his tomb. The writings of Father Cornelius, which consist of "Conciones ad populum Scotiae", "Sermones ad Fratres", "Epistolas plures", have never been published.

GREGORY CLEARY

Tommaso Maria Zigliara

Tommaso Maria Zigliara

(Baptismal name, FRANCESCO).

Cardinal, theologian, and philosopher, b. at Bonifacio, a seaport town of Corsica, toward the end of October, 1833; d. in Rome, 11 May, 1893. His early Classical studies were made in his native town under the Jesuit teacher, Father Aloysius Piras. At the age of eighteen he was received into the Dominican Order at Rome, and in 1852 he made his religious profession. From the beginning Zigliara was a student of uncommon brilliancy. He studied philosophy in Rome and theology at Perugia, where, 17 May, 1856, he was ordained by Cardinal Joachim Pecci, then Archbishop of Perugia. Soon afterwards the young priest was appointed to teach philosophy, first in Rome, then at Corbara in his native Corsica, and later in the diocesan seminary, at Viterbo, being at the same time master of novices in the neighbouring convent at Gradi.

When his work at Viterbo was finished, he was called to Rome, again made master of novices, and shortly appointed regent, or head professor, of the Minerva college. Before assuming this latter duty, he was raised to the dignity of master in sacred theology. When his community was forced by the Italian Government in 1873 to give up the convent of the Minerva, Zigliara with other professors and students took refuge with the Fathers of the Holy Ghost, who had charge of the French College in Rome. Here the lectures were continued until a house near the Minerva was secured. Zigliara's fame was now widespread in Rome and elsewhere. French, Italian, German, English, and American bishops were eager to put some of their most promising students and young professors under his tuition. Between Cardinal Pecci, Archbishop of Perugia,

and Zigliara there had existed for many years the closest friendship, and when the former became pope as Leo XIII, in his first consistory (1879) he created Zigliara a cardinal. Zigliara was first numbered among the cardinal-deacons, then he became a cardinal-priest, and in 1893 he was appointed Bishop of Frascati, one of the seven suburban sees; but, owing to the sickness which ended in his death, he never received episcopal consecration.

He was a member of seven Roman congregations, besides being prefect of the Congregation of Studies and co-president of the Academy of St. Thomas Aquinas. He was a man of deep piety and devotion, and a tireless student to the end of his life. In addition to his many duties as cardinal, he was entrusted with the superintendence of the Leonine edition of the works of St. Thomas, the first volume of which contains his own commentary. He also found time to publish his "Propaedeutica ad Sacram Theologiam" and to write an extensive work on the sacraments, of which only the tracts on baptism and penance received final revision before his death. The most important, however, of Zigliara's works is his "Summa Philosophica", which enjoys a world-wide circulation. For many years this has been the textbook in a great number of the seminaries and colleges of Europe, Canada, and America; and not very long ago it was adopted as the textbook for the philosophical examination in the National University of Ireland. His other works are: Osservazioni su alcune interpretazioni di G.C. Ubaghs sull' ideologia di San Tommaso d'Aquino" (Viterbo, 1870); "Della luce intellettuale e dell' ontologismo secondo la dottrina di S. Bonaventura e Tommaso d'Aquino" (2 vols., Rome, 1874); "De mente Concilii Vienensis in definiendo dogmate unionis animae humanae cum corpore" (1878); "Commentaria S. Thomae in Aristotelis libros Perhermencias et Posteriorum analyticorum", in fol. vol. I new edit. "Opp. S. Thomae": (Rome, 1882); "Saggio sui principi del tradizionalismo"; "Dimittatur e la spiegazione datane dalla S. Congregazione dell' Indice".

By his teaching and through his writings, he was one of the chief instruments, under Leo XIII, of reviving and propagating Thomistic philosophy throughout the entire Church. In his own order and in some universities and seminaries, the teaching of St. Thomas had never been interrupted, but it was reserved for Zigliara to give a special impetus to the movement which has made Thomistic philosophy and theology dominant in the Catholic world.

CHARLES J. CALLAN

Patrick Benedict Zimmer

Patrick Benedict Zimmer

Philosopher and theologian, b. at Abtsgmund, Wurtenberg, 22 Feb., 1752; d. at Stenheim near Dillingen, 16 Oct., 1820. He studied the Humanities and philosophy at Ellwangen, theology and jurisprudence at Dillingen; was ordained priest, 1 April 1775; became *repetitor* of canon law at the College of St. Jerome at Dillingen in 1777, and professor of dogmatic theology at the University of Dillingen in 1783; in 1791 also pastor of Steinheim. In 1795 he was dismissed from the faculty of the university, ostensibly because as pastor of Steinheim he should reside at that place, but, in reality, because he was an extreme idealist. In 1799 he was appointed professor of dogmatic theology at the University of Ingolstadt, and when this university was removed to Landshut the following year, he was transferred thither in the same capacity.

Though Zimmer rendered great service to the Church and religion by his fearless and successful combat against the Kantian Rationalism which was prevalent at Ingolstadt, he was himself a passionate adherent of the idealistic pantheism of Schelling, without, however, compromising his Catholic convictions in practice. To lessen the danger of inculcating his philosophical tenets in his lectures, he was relieved of the professorship of positive theology and given that of Biblical archaeology and exegesis in 1807. In 1819 he became rector of the university and deputy to the Second Chamber of the Bavarian Parliament. His chief theological work, "Theologiae christianaee specialis et theoreticae" (4 parts, Landshut, 1802-6), is to a great extent permeated with Schellingian pantheism. His other noteworthy works are: "Dissertatio dogmatica de vera et completa potestate eclesiastica illiusque subjecto" (Dillingen, 1784); "Fides existentiae Dei" (Dillingen, 1791); "Philosophische Religionslehre: part I. Lehre von dem Absoluten" (Landshut, 1805); "Philosophische Untersuchung über den allgemeinen Verfall des menschlichen Geschlechtes" (Landshut, 1809); "Untersuchung über den Begriff und die Gesetze der Geschichte etc." (Munich, 1817).

Zimmer's kurtzgefasster Biogr. oder desselben Theologie und Philosophie (Uri, 1823); LAUCHERT in Allgemeine deutsche Biographie, XLV (Leipzig, 1900), 242-8; NEUER in Philosophisches Jahrbuch, XVII (Fulda, 1905), 61-67; HURTER, Nomenclator Literarius, V (Innsbruck, 1911), i, 647-9.

MICHAEL OTT

Niccolo Antonio Zingarelli

Niccolò Antonio Zingarelli

Composer, born at Naples, 4 April, 1752; died at Torre del Greco, 5 May, 1837.

Having studied at the Loreto Conservatory under Fenaroli and Speranza, his first opera, "Montesuma", was given at San Carlo, 13 August, 1781. He then went to Milan, where he remained until 1794, when he took up the post of *maestro di cappella* at Santa Casa, Loreto (1794-1804), after which he succeeded Gugliemi as choir master of the Sistine Chapel in Rome. For refusing to conduct a "Te Deum" for Napoleon in St. Peter's, Rome, in 1811, he was taken a prisoner to Paris, but released soon after; and in 1816 he replaced Paisiello as choir master of Naples cathedral, a position he held until death. Whether as a composer of operas or of sacred music Zingarelli holds a high place, but, being a deeply religious Catholic, he devoted most of his attention to masses, oratorios, cantatas, and motets. For Loreto he composed 541 works, including 28 masses. In 1829 he wrote a cantata for the Birmingham Festival. Less than a month before his death he produced an oratorio, "The Flight into Egypt", a wonderful feat for a man of eighty-five. Of his operas "Giulietta e Romeo" (1796) is regarded as his best; and his requiem mass, composed for his own funeral, is said to embody his most devoted church style. Bellini and Mercadante were among his pupils.

W.H. GRATTAN-FLOOD

Pius Zingerle

Pius Zingerle

Celebrated Orientalist, born at Meran, in the Tyrol, 17 March, 1801; died at the Abbey of Marienberg near Meran, 10 January, 1881. After studying the Humanities at Meran, philosophy and two years of theology at Innsbruck, he joined the Benedictines at Marienberg in 1820, took vows, 20 October, 1822, and was ordained priest, 4 April, 1824. With the exception of six years (1824-7 and 1837-9) during which he was assistant pastor at Platt and at St. Martin, two parishes in the Valley of Passeier, he was professor, since 1852 also director at the gymnasium of Meran. Upon the invitation of Pius IX, he became professor of Oriental languages at the Sapienza in Rome in March, 1862. While in Rome he was also consultor of the Propaganda for Oriental Affairs and scriptor of the Vatican Library.

Unable to accustom himself to the Roman climate, he returned to Marienberg in 1865, where he was made sub-prior and professor of theology. He had a fair knowledge

of Hebrew, Arabic, and Persian, was an acknowledged master of Syriac, and gained considerable fame through his German versions of the writings of St. Ephraem. The following are his chief works: "Echte Akten heiliger Martyrer des Morgenlandes", translated from the Syriac (2 vols., Innsbruck, 1836); "Ausgewhlte Schriften des heiligen. Ephrǟm", translated from the Greek and the Syriac (6 vols., Innsbruck, 1837; new ed., Augsburg, 1845-of which vols. IV and V are German martial versions of Ephraem's Syriac hymns, "Ephrǟm's Reden wider dir Ketzer", in vol. XXVIII of "Sammtliche Werke der heil. Väter" (Kempten, 1859); "Harfenklänge vom Libanon" (Innsbruck, 1840); "Festkr̄nze aus Libanon's Garten" (Dillingen, 1846); "Marien-Rosen aus Damaskus" (Innsbruck, 1853; 2nd ed., Augsburg, 1955); "Leben und Wirken des heil. Simeon Stylites" (Innsbruck, 1855); "Monumenta Syriaca ex romanis codd. collecta" (Innsbruck, 1869); "Chrestomathia Syriaca cum indice vocabularum" (Rome, 1871); "Lexicon Syriacum in usum Chrestomathiae" (Rome, 1873); "Ausgewählte Schriften des heil. Ephrǟm" (3 vols., Kempten 1970-6). He contributed various essays on the Ephraemic metre and on the Syrian metre in gneral to "Zeitschrift der deutschen morgenlandischen Gesellschaft", vols. II-XIX, and other Syrian studies to "Tübinger Theol. Quartalschrift" in the years 1853 and 1870-71. He is also the author of two volumes of German poems (vol. I, Innsbruck, 1843; vol. II, Mainz, 1860) and of a few ascetical and other works of minor importance.

Scriptores Ord. S. Ben. qui 1750-1880 fuerunt in Imperio Austriaco-Hungarico (Vienna, 1881), 531-1; STAMPFER in *Studien une Miteillungen aus dem Ben. und Cist. Orden, II* (Würzburg, 1881), I, 355-360; SIEGFRIED in *Allg. Deutsche Biographie*, XLV (Leipzig, 1900), 320-3; WÜRZBACH, *Biogr. Lexikon des Kaiserthums Oesterreich*, LX (Vienna, 1891), 151-4.

MICHAEL OTT

Zionists

Zionists

Zionists are followers of the movement to segregate the Jewish people as a nation and to give it a national home either in Palestine or elsewhere. Orthodox Judaism holds to a Zionism pure and simple, the return of the Jews to Palestine, the coming of the Messias, the overthrow of hostile powers by Him, the restoration of the Temple and its worship, the Messianic reign. The Reformed Jews reject this idea of a return to Zion. The conference of rabbis, at Frankfort-on-the-Main, 15-28 July, 1845, deleted from the ritual all prayers for a return to Zion and a restoration of a Jewish state. The Philadelphia conference, 1869, followed the lead of the German rabbis and decreed that the Messianic hope of Israel is "the union of all the children of God in the confes-

sion of the unity of God". The Pittsburg conference, 1885, reiterated this Messianic idea of reformed Judaism.

The practical carrying out of Zionism by orthodox Jews has until recently been attempted only fitfully and very ineffectually, and often with no return to Zion as an objective. In the middle of the sixteenth century Joseph Nasi tried to gather the Portuguese Jews to an island owned by the Republic of Venice. In the seventeenth century Shabbethai Zebi (1626-1676) announced himself as the Messias and gained over many Jews to his side; among these, the philosopher Baruch Spinoza. Jewish settlements were established in the upper Mississippi region by W.D. Robinson, 1819; near Jerusalem, by the American Consul Warder Cresson, a convert to Judaism, 1850; in Prague, by Steinschneider, 1835; and elsewhere. Sir Moses Montefiore tried to colonize Jews in Palestine (1840). Laurence Oliphant failed in a like attempt to bring to Palestine the Jewish proletariat of Poland, Lithuania, Rumania, and the Turkish Empire (1879 and 1882). The man who gave dignity, form, and permanence to the Zionist movement was Theodor Harzl. In 1896 his "Jüdenstaat" appeared in Vienna. He soon won over such Jewish leaders as Israel Zangwill, Max Nordau, Alexander Marmorek, and others. The ideas of "Jüdenstaat" spread throughout the Jewish world. Six successive Zion congresses were held. By 1899 there were more than 100,000 shekel-payers. The Sultan of Turkey removed the ban whereby Jews had been prevented from staying longer than three months in Palestine. The now flourishing colony of Mikweh Israel was established near Jaffa. All attempts failed to get from the sultan for the Jews in Palestine any kind of corporate political existence, and any form of provincial or municipal autonomy. Harzl died on 3 July, 1904. At the next, the seventh, Zionist congress, Max Nordau was elected president (1905). Since then the movement has gone on and has remained true to the first, or Basle, congress platform of Jewish autonomy in the new Jewish state.

GOTTHEIL, *The Aims of Zionism* (New York, 1899); articles by NORDAU in the International Quarterly (1902); by ZANGWILL in Lippincott's Magazine (1899); HERZL, *Zionitische Schriften* (Berlin, 1905).

WALTER DRUM

Zionites

Zionites

A sect of visionary fanatics which flourished in the eighteenth century at Ronsdorf in the Duchy of Berg, now part of the Prussian province of the rhine. The sect sprang from a Philadelphian society founded at Elberfeld in 1726 by Elias Eller and the pastor Daniel Schleiermacher. Eller was the foreman of a factory owned by a rich widow. He

read eagerly the writings of ancient and modern visionaries, and then formed an apocalyptic, millenarian system of his own. He made such an impression on the widow, twenty years his senior, that she married him. Thus he obtained the means and influence to draw adherents around himself. The pastor Schleiermacher, grandfather of the celebrated theologian, was also duped by Eller. The prophetess of the society was the daughter of a baker, Anna van Bushel, who had dreams and visions and saw apparitions. After the death of his wife, Eller married her. She called herself mother of Zion, her husband father of Zion, and prophesied that she would bear the saviour of the world. The new order of things was to begin in 1730. Her first child was a daughter, but Eller was able to console the society with Scriptural texts. A son born in 1733 died two years later. Eller made himself the central point of theology. Christian morality was replaced by the craving for coarse and sensual pleasures. In 1737 the sect left Elberfeld and founded Ronsdorf which soon prospered, and, through Eller's influence, was raised by the State in 1745 to the rank of a city. Eller took the most important offices for himself, lived with his wife in great pomp, and governed tyrannically. When Eller's wife died suddenly in 1744 doubts arose in the mind of Schleiermacher, who was pastor at Ronsdorf. He confessed his mistake, and sought to open the eyes of the deceiving leader, but Eller managed to maintain himself until death. The sect was carried on by the pastors who took Schleiermacher's place, by Eller's stepson Bolckhaus, and continued to exist until 1768. The new pastor chosen in this year and his successors brought back the inhabitants of Ronsdorf to Protestantism. The after effects of the movement could be traced into the nineteenth century.

KRUG, Kritische Geschichte der protestantischen religiösen Schwarmerci im Herzogtum Berg (Elberfeld, 1851); GOBEL, Geschichte des christlichen Lebens in der rheinischen u. westfälischen evangelischen Kirche, III (Coblenz, 1860), 450- 598.

KLEMENS LOFFLER

Diocese of Zips

Diocese of Zips

(SZEPEST; SCEPUSIENSIS).

A diocese in Hungary, suffragan of Agria (Eger), founded by Maria Theresa in 1776, and composed of the exempt provostship of St. Martin, the date of foundation of which is unknown, but probably in the beginning of the thirteenth century. Besides the provostship, a collegiate chapter also existed at Zips. The bishops of Zips were among the most prominent ecclesiastical dignitaries of Hungary, and were appointed by the chapter; in later times the bishops were appointed by the kings of Hungary. The provostship was directly subject to the Holy See, and the provost exercised quasi-

episcopal functions. In 1291 Provost Jacobus is mentioned as Bishop of Zips, but this dignity was not transmitted to his successors. The chapter consisted originally of four members. In the thirteenth century, the Tatars destroyed the church and burnt the archives. After the departure of the Tatars, Béla IV had the church rebuilt. A great number of parishes were established by the Saxons who settled in Zips. In 1271 they received from King Stephen V the privilege of free election to the parishes. This privilege was exercised by thirteen towns of the Diocese of Zips pledged to Poland by King Sigismund in 1412, as well as by other towns not pledged. Protestantism found a fertile soil in Zips, and spread especially under Stanislav Thurzo. Vigorous steps towards the re-establishment of the Catholic Faith were not taken until 1641. After that Catholicism made better progress. In 1776 the see was established, and Karl Salbeck appointed first bishop. Among his successors may be mentioned: Ladislav Pyrker, 1816-21, an eminent poet, later Archbishop of Agria and Patriarch of Venice; Joseph Samassa, 1871-73, later Archbishop of Agria; George Császka, 1874-91, later Archbishop of Kalocsa. Alexander Parvy is the present bishop (1910). The diocese includes the *Komitate* of Zips, Arva, and Lipto. It is divided into three archdeaconries and has in its territory one abbey and five titular abbeys, one provostship and thirteen titular provostships. The number of parishes is 165; that of the clergy 245. In the diocese there are 11 monasteries, with 83 inmates. The patronage is exercised by 34 patrons. The chapter includes 10 canons and 6 titular canons. The Catholic population is 237,140.

A. ALDASY

Zircz

Zircz

ZIRCENSIS or BOCCON.

Cistercian abbey, situated in the Diocese of Veszprem, Hungary. The early history of the monastery is enveloped in much obscurity, as regards both names and dates, on account of its being so often referred to under both these titles. Whether Zircz and De Boccon were separate abbeys cannot now be definitely determined. It seems most probable that the foundation was made by Bela III, King of Hungary (1182), as the monastic domain was formerly a royal farm. Besides this grant, on which now stands the city of Zircz, many other donations were made to the nascent abbey, which soon became one of the most celebrated in the country. It was rich not only in temporal possessions but also in the spirit of fervour and religious regularity. This happy state

continued for three centuries, but decadence set in before the end of the fifteenth century, and by 1526 the ravages of heresy had depopulated the monastery, not one religious remaining at the end of the year; the buildings and possessions passed into the hands of laymen. In the seventeenth century (1609) it was acquired by Canon Michael Monoszloy; thenceforth it remained the property of ecclesiastics, and in 1659 it was given to Holweis, Abbot of the Cistercian abbey at Lilienfeld, who appointed Martin Ujfalusy (1660) its abbot. From the jurisdiction of Lilienfeld it was transferred successively to that of Borsmonostor (1678) and Heinrichau (1700). From this latter abbey came a number of religious who gradually restored first the monastic buildings and church (consecrated 1745) and then regular observance in its primitive vigour. In 1810 the community, in common with many others, was expelled, but was restored in 1814 under Abbot Antonius Dreta, from which time the abbey prospered more than ever before. Under his administration the abbeys at Pilis and Pasto were united to Zircz; as was likewise, in 1878, the abbey at Szentgotthard. Zircz is now governed by Dom Edmund Paul Vajda, elected 9 May, 1891, and is one of the most flourishing abbeys in Hungary. It contains 105 priests, 35 clerics, and 11 novices; in all 151 choir members.

EDMOND M. OBRECHT

St. Zita

St. Zita

Model and heavenly patroness of domestic servants, born early in the thirteenth century of a poor family at Montsegradi, a little village near Lucca, in Tuscany; died at Lucca, 27 April, 1271. A naturally happy disposition and the teaching of a virtuous mother, aided by Divine grace, developed in the child's soul that sweetness and modesty of character and continual and conscientious application to work which constituted her especial virtues. At the age of twelve she entered the service of the Fatinelli family

of Lucca. Her piety and the exactitude with which she discharged her domestic duties, in which she regarded herself as serving God rather than man, even supplying the deficiencies of her fellow servants, far from gaining for her their love and esteem and that of her employers rather brought upon her every manner of ill-treatment of both the former and, through their accusations, of the latter. The incessant ill-usage, however, was powerless to deprive her of her inward peace, her love of those who wronged her, and her respect for her employers. By this meek and humble self-restraint she at last succeeded in overcoming the malice of her fellow-servants and her employers, so much so that she was placed in charge of all the affairs of the house.

In her position of command over all the servants she treated all with kindness, not exacting from them any reckoning for the wrongs she had for so many years suffered from them. She was always circumspect, and only severe when there was a question of checking the introduction of vice among the servants. On the other hand, if any of them had been guilty of shortcomings, she took upon herself to excuse or defend them to their employers. Using the ample authority given her by her employers, she was generous in almsgiving, but careful to assist only those really in need. After her death numerous miracles were wrought at her intercession, so that she came to be venerated as a saint in the neighbourhood of Lucca, and the poets Fazio degli Uberti (*Dittamonde*, III, 6) and Dante (*Inferno*, XI, 38) both designate the city of Lucca simply as "Santa Zita". The office in her honour was approved by Leo X.

In 1580 her tomb was discovered in the Church of S. Frediano; thus was suggested the solemn approbation of her cult, which was granted by Innocent XII in 1696. The earliest biography of the saint is preserved in an anonymous manuscript belonging to the Fatinelli family which was published at Ferrara in 1688 by Monsignor Fatinelli, "*Vita beatif Zitf virginis Lucensis ex vetustissimo codice manuscripto fideliter transumpta*". For his fuller "*Vita e miracoli di S. Zita vergine lucchese*" (Lucca, 1752) Bartolomeo Fiorito has used this and other notices, especially those taken from the process drawn up to prove the immemorial cult.

U. BENIGNI

St. Zita's Home For Friendless Women

St. Zita's Home for Friendless Women

Founded at 158 East 24th Street, New York, by Ellen O'Keefe (Mother Zita) in 1890. Born in County Limerick, Ireland, Miss O'Keefe emigrated to New York in 1864. She selected nursing as a career, and during her two years' training at the city hospital, Blackwell's Island, first conceived the idea which was to give a direction to her life. Moved with pity for the unfortunate women with whom she there came in contact

and whose previous records were so fatal an obstacle to their securing employment, she determined to found a home where they could find shelter and an opportunity to reform their lives. With her personal savings she started single-handed the home in 24th Street, but was later joined by two friends (Mary Finnegan and Katherine Dunne). Every woman who sought admission was received without formal application and regardless of her religious views or previous character. This charitable work had from the first the approval of ecclesiastical authorities, and as it became more widely known the greatly increased number of applicants necessitated its transference to larger quarters.

Miss O'Keefe had always treasured the thought of forming a regular community for the perpetuation of her work and to make reparation to Our Saviour in the Blessed Sacrament. Archbishop (Cardinal) Farley approved her institute in September, 1903, under the title of the "Sisters of Reparation of the Congregation of Mary". Miss O'Keefe was named superioress of the congregation under the title of Mother Zita, Katherine Dunne (Sister Mary Magdalen) taking the habit on her death-bed. A postulant of one year and a novitiate of two years had to be served; perpetual vows were made after five years. In 1906 Mother Zita visited her native land and returned with six novices, bringing the number of members to fifteen by 1912. In 1907 a branch house was opened at East 79th Street. A sister always slept near the door, since it was a rule of the community that no one was to be refused admission at any hour, day or night; the observance of this rule frequently rendered it necessary to the sisters to give up their own beds to their humble guests. The women were kept as long as they desire to stay; if able-bodied they had to help in the laundry or at sewing, the sole support of the home; if ill, they were cared for or sent to the hospital. Catholic inmates were required to attend Mass on Sundays and holy days of obligation, but this was the sole distinction between the inmates of the different religions. The sisters also visited the poor in the hospitals, and supplied free meals to men out of employment. The number of women accommodated each night was from 100 to 125; the meals supplied to men out of work averaged daily 65.

MOIRA K. COYLE

Zoara

Zoara

A titular see of Palestina Tertia. It is the ancient Bala or Segor, one of the five cities of the Pentapolis (Gen., xiv, 2, 8), which escaped the thunder and lightning for having sheltered Lot and his family (Gen., xix, 22, 30). It is mentioned by Josephus ("Ant. Jud.", XIII, xv, 4; "Bell. Jud.", IV, viii, 4); Ptolemy (V, xvi, 4); and by Eusebius and Saint

Jerome in the "Onomasticon". The "Notitiae dignitatum", 72, places at Zoara, as a garrison, the resident *equites sagitkarii indigenae*; Stephen of Byzantium (De urbibus, s.v. Addana) speaks also of its fort, which is mentioned in a recently-discovered Byzantine edit of the fifth century (Revue biblique, 1909, 99). In a Mosaic map of Madaba, of the sixth century, it is represented in the midst of a grove of palm trees under the names of Balac or Segor, now Zoara; near the city is a sanctuary to St. Lot. Hierocles (Syneedemus) and George of Cyprus (Description of the Roman World) both mention it. Some bishops have been ascribed to Zoara; Musonius, at Ephesus (449), and at Chalcedon (451); Isidore in 518; and John in 536 (Le Quien, "Oriens christ.", III, 737-746). At the end of the fourth century one of its bishops accompanied the western pilgrim, wrongly named Silvia (Geyer, "Itinera hierosolymitana", 54). The pseudo-Antonius in the sixth century describes its monks, and extols its palm trees (op. cit., 166, 181). Owing to its tropical climate and to the waters coming down from the mountains of Moab, Zoara is a flourishing oasis where the balsam, indigo, and date trees bloom luxuriantly. During the French occupation it took the name of Palmer, or of Paumier. William of Tyre (XXII, 30) and Foulcher of Chartres (Hist. hierosol., V) have left beautiful descriptions of it, as well as the Arabian geographers, who highly praise the sweetness of its dates (Guy Le Strange, "Palestine under the Moslems", 289). It is not known when the city disappeared; it is now very difficult to find any traces of it. Search may be made in the Ghor-es-Safieh at the mouth of Wadi el-Qrah, the ancient torrent of Zared.

S. VAILHÉ

Jorgen Zoega

Jörgen Zoega

(GEORGE).

Archaeologist and numismatist, born at Daler near Tönder, near the west coast of northern Schleswig, 20 December, 1755; died in Rome, 10 February, 1809. His father, whose family came originally from Northern Italy, was Christian Zoega, Protestant pastor of Vilhad; his mother was Henriette Clausen. When a boy Jörgen was taught at home, and then attended the gymnasium at Altona. He went in 1773 to the University of Göttingen and later to Leipzig, studying philosophy and the Classics. Repeated journeys to Italy developed the interest for archaeology which had awokened early in him. In 1782, by the good offices of the Danish minister Guldberg, he received

for two years a pension from the State. From Vienna, where he studied under the celebrated numismatist Eckhel, Zoega went to Rome early in 1783. Through introductions he received here a kindly welcome from Stefano Borgia, then a prelate and later cardinal. On his way home Zoega heard at Paris of the political overthrow of his patron Guldberg. He, therefore, returned to Rome, and took up his permanent abode in the Eternal City, which a man, as he said, should never see or else never leave. He had before this catalogued and exhaustively described Borgia's fine collection of coins; the prelate now gave him hearty support and Pius VI granted him a pension of 400 *scudi*. With the aid of influential friends Zoega also received permanent assistance from Denmark, and in 1790 was made an honorary member of the Academy of Art at Copenhagen. When his patron, Cardinal Borgia, was exiled from Rome in 1798, Zoega, grateful for the cardinal's hospitality to Danes who had gone to Rome, obtained a pension for Borgia from the state revenues of Denmark. From 1798 Zoega was Danish consul at Rome and a member of the Academy of Sciences at Copenhagen. His labours in numismatics led him to take up Egyptological and Coptic studies, which he carried on with success. By his power of penetration and sound judgment he pointed out to later investigators the path to be followed in the interpretation of hieroglyphics. He is regarded as the associate of Winckelmann and Visconti in establishing scientific archaeology. His services to learning were also acknowledged in foreign countries by his election in 1806 to membership in the Academies of Science at Berlin and Vienna.

Zoega's most important works are: "Nummi aegyptii imperatorii" (Rome, 1787); "De origine et usu obeliscorum" (Rome, 1797); "Bassirilievi antichi di Rome" (2 vols., Rome, 1808), translated into German by Welcker (1811); "Catalogus codicum copticorum manuscriptorum, qui in musco Borgiano Velitris adservantu" (Rome, 1810), a posthumous work. He also wrote several treatises on classical archaeology, translated into German by Welcker, "Georg Zoegas Abhandlungen" (Gottingen, 1817). A work on the topography of Rome was left unfinished in manuscript.

WELCKER, Zoegas Leben (Stuttgart, 1819); JORGENSON, Georg Zoega (Copenhagen, 1881).

PHILIPP VON KETTENBURG

Stanislaus Zolkiewski

Stanislaus Zolkiewski

Chancellor of Poland, born in Tuyrnka (Red Russia), 1547; died at Cecora, 6 Oct., 1620. He studied at Lemberg with great distinction, and it is said that he knew all Horace by heart. With his friend Zamoyski he fought under King Stephen Báthori in the wars against Tsar Ivan the Terrible. Both distinguished themselves greatly, and

rose into high favour. Zolkiewski became castellan of Lemberg in 1593. Unfortunately Sigismund III was unfriendly to him from the outset; he mistrusted him and would have none of his advice. When the Cossacks began to revolt, Zolkiewski was for treating them gently, but he received orders to put down Nalewajck and Toba, the rebel leaders. His loyalty shone brightly when Zembrzydowski's rising took place. Although Zolkiewski knew that the nobles had many just grievances against King Sigismund, by whom he himself was disliked, yet he came to his aid, and defeated the rebels at Guzow. Again he advised his master against war with Muscovy, at the time of the "False Demetrius", as both unjust and impolitic; but, as he says in his famous memoirs, "His Majesty's ears were closed to the hetman's arguments". Ordered to lead the army he obeyed, only to find the influence of his enemies and rival everywhere predominant, interfering with the campaign, making him besiege Smolensk against his better judgment, and at last sending him to Moscow with only 6000 men. At Kluszyn he met and cut into pieces the army of Szujsko, 50,000 strong, entered the city, and, after much parleying with the people and the clergy, made terms by which Wladislaw, King Sigismund's son, was to become Tsar of Muscovy. But even this did not please Sigismund; he reproached Zolkiewski, refused to ratify the agreement, and it became clear that he himself wished to become Tsar of Muscovy. This was an impossibility, and by this refusal all the victories and diplomatic triumphs of Zolkiewski were rendered null, as he pointed out to the Diet at Warsaw, when he returned with the Tsar Demetrius and two of the greatest Russian princes, his captives. In 1613 he at last received the grand hetman's staff (withheld from him until then), and went to fight the Turks. In Busza, forced by the superior strength of the enemy, he made a convention with them, for which he was put on his defence in the Diet, and ordeal from which he came forth victorious once more. He died in battle on the disastrous field of Cecora, borne down by Turkish hordes, abandoned by his own troops, but fighting like a hero to the very last. He was a great patriot, a faithful servant of the nation and of a weak king who hated him, an ardent Catholic, and one who did much to promote the union of the Ruthenian Church. The memoirs of his expedition to Moscow, written by himself, are extant, a masterpiece of modesty and sincerity, as invaluable for the history of those times as Caesar's "Commentaries" are for his own. In them we find the sadness of a man whose life has been one long disappointment, striving unsuccessfully and almost alone to hold back the nation that he loves, and that is still mighty, from its impending fall and destruction.

ORGELBRAND, Encyclopedia, s. v. Zolkiewski (Warsaw); TARNOWSKI, Historya literatury Polskiej, II, (Cracow, 1903); Hetman Zolkiewski (Warsaw, 1852).

S. TARNOWSKI

John Zonaras

John Zonaras

Byzantine chronicler and canonist, lived from the latter part of the eleventh to about the middle of the twelfth century. Under Emperor Alexis Comnenus he was commander of the imperial body-guard and first secretary of the imperial chancery. Later he became a monk at Hagia Glykeria (one of the Princes' Islands now known as Niandro). Here he wrote his compendium of history: *Epitome ton istorion*, superior in form and contents to most other Byzantine chronicles, and extensively used during the Middle Ages. It is a chronicle of the world from its creation to the accession of John Comnenus in 1118, and is of especial value for its excerpts from the lost books of Dio Cassius. It was edited by Pinder and Buttner-Wobst (3 vols., Bonn, 1841-97) and by Lindorf (6 vols., Leipzig, 1868-75). Another important work of his is a commentary on the canons of the Apostles, and of various oriental synods, and on the canonical letters of the Fathers of the third and four centuries. A complete edition of his works is found in P. G., CXXIV-CXXV and CXXXVII-CXXXVIII.

KRUMBACHER, Gesch. der byzantin. Literatur (Munich, 1897), 370-6; HEINEMANN, Quaestiones Zonareae (Dresden, 1895); BROISSEVEN, PATZIG, and PRACHTER in Byzant. Zeitschrift (Leipzig, 1895-7).

MICHAEL OTT

Zoque Indians

Zoque Indians

A Mexican tribe dwelling in the western part of Chiapas, north of the Sierra Madre, and part of Tabasco and Oaxaca. Their capital was called Ohcahnay, in Mexican *Tecpanatl* or the "place of the palaces." When the Spaniards first met them, they were addicted to cannibalism. Most of the Zoque are now Christianized, but they retain not a few of their traditional beliefs and customs. Their language is akin to that of the Mixe, with whom they form the Zoquean linguistic stock. The Zoque-Mixe family numbers about 50,000, of whom about half are Zoque, engaged chiefly in cultivating maize and tobacco and in growing oranges.

A.A. MACERLEAN

Pope St. Zosimus

Pope St. Zosimus

(Reigned 417-18).

Year of birth unknown; died 27 December, 418. After the death of Pope Innocent I on 12 March, 417, Zosimus was elected his successor.

According to the "Liber Pontificalis" Zosimus was a Greek and his father's name was Abram. Harnack (*Sitzungsberichte der Berliner Akademie*, 1904, 1050) wished to deduce from this name that the family was of Jewish origin, but the statements of the "Liber Pontificalis" in respect to the families of the popes of this period cannot always be regarded as exact (Duchesne, "*Histoire ancienne de l'église*", 111, 228, note).

Nothing is known of the life of Zosimus before his elevation to the papal see. His consecration as Bishop of Rome took place on 18 March, 417. The festival was attended by Patroclus, Bishop of Arles, who had been raised to that see in place of Bishop Hero, who had been forcibly and unjustly removed by the imperial general Constantine. Patroclus gained the confidence of the new pope at once; as early as 22 March he received a papal letter which conferred upon him the rights of a metropolitan over all the bishops of the Gallic provinces of Viennensis and Narbonensis I and II. In addition he was made a kind of papal vicar for the whole of Gaul, no Gallic ecclesiastic being permitted to journey to Rome without bringing with him a certificate of identity from Patroclus.

In the year 400 Arles had been substituted for Trier as the residence of the chief government official of the civil Diocese of Gaul, the "Prefectus Praetorio Galliarum". Patroclus, who enjoyed the support of the commander Constantine, used this opportunity to procure for himself the position of supremacy above mentioned, by winning over Zosimus to his ideas. The bishops of Vienne, Narbonne, and Marseilles regarded this elevation of the See of Arles as an infringement of their rights, and raised objections which occasioned several letters from Zosimus. The dispute, however, was not settled until the pontificate of Pope Leo I (see AIX). Not long after the election of Zosimus the Pelagian Coelestius, who had been condemned by the preceding pope, Innocent I, came to Rome to justify himself before the new pope, having been expelled from Constantinople. In the summer of 417 Zosimus held a meeting of the Roman clergy in the Basilica of St. Clement before which Coelestius appeared. The propositions drawn up by the Deacon Paulinus of Milan, on account of which Coelestius had been condemned at Carthage in 411, were laid before him. Coelestius refused to condemn these propositions, at the same time declaring in general that he accepted the doctrine expounded in the letters of Pope Innocent and making a confession of faith which was

approved. The pope was won over by the shrewdly calculated conduct of Coelestius, and said that it was not certain whether the heretic had really maintained the false doctrine rejected by Innocent, and that therefore he considered the action of the African bishops against Coelestius too hasty. He wrote at once in this sense to the bishops of the African province, and called upon those who had anything to bring against Coelestius to appear at Rome within two months. Soon after this Zosimus received from Pelagius also an artfully expressed confession of faith, together with a new treatise by the heretic on free will. The pope held a new synod of the Roman clergy, before which both these writings were read. The skilfully chosen expressions of Pelagius concealed the heretical contents; the assembly held the statements to be orthodox, and Zosimus again wrote to the African bishops defending Pelagius and reproving his accusers, among whom were the Gallic bishops Hero and Lazarus. Archbishop Aurelius of Carthage quickly called a synod, which sent a letter to Zosimus in which it was proved that the pope had been deceived by the heretics. In his answer Zosimus declared that he had settled nothing definitely, and wished to settle nothing without consulting the African bishops. After the new synodal letter of the African council of 1 May, 418, to the pope, and after the steps taken by the Emperor Honorius against the Pelagians, Zosimus recognized the true character of the heretics. He now issued his "Tractoria", in which Pelagianism and its authors were condemned. Thus, finally, the occupant of the Apostolic See at the right moment maintained with all authority the traditional dogma of the Church, and protected the truth of the Church against error.

Shortly after this Zosimus became involved in a dispute with the African bishops in regard to the right of appeal to the Roman See clerics who had been condemned by their bishops. When the priest Apiarius of Sicca had been excommunicated by his bishop on account of his crimes he appealed directly to the pope, without regard to the regular course of appeal in Africa which was exactly prescribed. The pope at once accepted the appeal, and sent legates with letters to Africa to investigate the matter. A wiser course would have been to have first referred Apiarius to the ordinary course of appeal in Africa itself. Zosimus next made the further mistake of basing his action on a reputed canon of the Council of Nicaea, which was in reality a canon of the Council of Sardica. In the Roman manuscripts the canons of Sardica followed those of Nicaea immediately, without an independent title, while the African manuscripts contained only the genuine canons of Nicaea, so that the canon appealed to by Zosimus was not contained in the African copies of the Nicene canons. Thus a serious disagreement arose over this appeal, which continued after the death of Zosimus.

Besides the writings of the pope already mentioned, there are extant other letters to the bishops of the Byzantine province in Africa, in regard to a deposed bishop, and to the bishops of Gaul and Spain in respect to Priscillianism and ordination to the

different grades of the clergy. The "Liber Pontificalis" attributes to Zosimus a Decree on the wearing of the maniple by deacons and on the dedication of Easter candles in the country parishes; also a Decree forbidding clerics to visit taverns. Zosimus was buried in the sepulchral Church of St. Laurence in Agro Verano (cf. De Rossi, "Bulletino di arch. christ.", 1881, 91 sqq.).

J.P. KIRSCH

Zosimus

Zosimus

Byzantine historian of the fifth and sixth century; dates of birth and death unknown. Nothing further is known of the circumstances of the life of this writer, to whom we owe a history of the era of the Roman empire up to 410, than that he was a lawyer connected with the treasury at Constantinople and was an upholder of Paganism. The era in which he lived is also uncertain. Formerly he was assigned to the first half of the fifth century, but now it is generally assumed that he was a contemporary of the Emperor Anastasius I (491-518). There are two chief reasons for this opinion. The later chronographer, Eustathius of Epiphania, who made use of the work of Zosimus, carries his history up to 503; consequently it is inferred that Zosimus must have lived at this period. More weight is attached to another argument drawn from the history of Zosimus itself; this work refers (II, xxxviii) to the suppression of the oppressive tax laid by Chrysargyron in the Byzantine Empire, and this tax was abolished in 501. Therefore the historian was still at work on his history shortly after 501. Perhaps he is identical with the Sophist Zosimus of Gaza, or Ascalon, mentioned by Suidas in his lexicon; opposed to this view, however, is the fact that Suidas mentions no historical work written by this Sophist. Zosimus is the author of a history of the Roman emperors ("Historia romana" or "Historia novae") in six books. It begins with Augustus, and sketches briefly the period up to 270 (I, i-xxxvi); from this date the work is more copious and detailed. It closes with the negotiations which preceded the conquest of Rome in 410. It is evident that the author intended to continue the history, and was prevented from carrying out his purpose by some circumstance, perhaps his death. The work is one of the chief authorities for Roman history of the fourth century, and individual statements concerning the preceding period are also of importance. The work does

not lack sensible criticism, and shows the philosophical acuteness of the author. He was a heathen and devoted to the worship of the old Roman gods. He describes, in particular, the gradual decay of the Roman Empire, and attributes this to the fact the Romans had ceased to worship the ancient gods (II, vii). He also adhered to heathen superstitions, i.e. as the influence of the stars on man's life and pagan sooth-sayings. The last editions of the history were edited by Immanuel Becker, in "Corpus scriptorum historiae Byzantinae" (Bonn, 1837), and by Ludwig Mendelssohn (Leipzig, 1867).

Zucchetto

Zucchetto

(*zucca*, head).

The small, round skullcap of the ecclesiastic. The official name is *pileolus*; other designations are: *berettino*, *calotte*, *subbiretum* (because worn under the biretta), *submitrale* (because worn under the mitre), *soli-deo*. The pope's zucchetto is white, that of the cardinals red, even when the cardinal is a member of an order. Cardinals who had been secular priests received the red zucchetto and also the red biretta in 1464 from Paul II; the cardinals taken from the regulars were granted both in 1591. If the newly-appointed cardinal is at Rome he receives the zucchetto from the *Sotto-guardaroba* as he leaves the throne room where he has received the mozzetta, and biretta from the pope; otherwise the zucchetto is brought to him, along with the decree of appointment, by one of the pope's Noble Guard. The *pileolus* of the bishops is violet, that of other ecclesiastics, including the prelates, unless a special privilege to wear violet is granted, black. Bishops and cardinals wear it at Mass, except during the Canon; other ecclesiastics may not wear it at Mass without special papal permission. However, according to a decision of the Sacred Congregation of Rites (23 September, 1837), a bishop also may not wear it while giving Benediction.

It cannot be said positively when the zucchetto became customary, but it was probably not before the thirteenth century. It appears on the cardinals in the fresco, "St. Francis before Honorius III", painted about 1290 in the upper church of St. Francis at Assisi. It is seen also under the tiara in the effigy on the tomb of Clement VI (d.

1352) at La Chaise-Dieu. The figures on the several tombs of bishops of the fifteenth century in the Roman churches show the zucchetto under the mitre. In the "Ordo" of Jacobus Gajetanus (about 1311) the zucchetto is mentioned in connection with the hat of the cardinals (cap. cxviii), and with the mitre in the "Ordo" of Petrus Amelii (cap. cxliv.), which appeared about 1400. It is shown in the pictures and sculpture of the late Middle Ages sometimes as a round skullcap, sometimes as a cap that covers the back of the head and the ears. In this shape it was called *camauro*; this designation was given especially to the red velvet cap of this kind bordered with ermin that was peculiar to the pope. There was great confusion as to the proper use of the zucchetto and hence the Sacred Congregation of Rites has delivered several decisions on the Subject ("Decr. auth. Congr. SS. Rit.", V, Rome 1901, 382).

Diocese of Zulia

Diocese of Zulia

(Zuliensis.) Comprises the State of Zulia in the Republic of Venezuela. The Diocese of Zulia was erected by Leo XIII on 28 July, 1897, its territory being detached from the See of Merida. Francesco Marvez, the first bishop, was elected, 17 May 1897, and consecrated, 16 Jan., 1898. At his death the see remained vacant from 17 Dec., 1904, to 16 Aug., 1910, being administered during this time by the capitular vicar Felipe S. Jiménez. Arturo Celestino Alvares, consecrated 6 Nov., 1910, is the present bishop. Zulia is suffragan of Santiago de Venezuela, the episcopal residence being at Maracaibo. Its most notable buildings are: the cathedral, the churches of the Immaculate Conception and Our Lady of Chiquinquirá, the poor-house, and the insane asylum. The diocese possesses a preparatory seminary, the Colegio Don Bosco directed by the Salesian Fathers for boys, and an academy directed by the Sisters of Charity of St. Anne for girls, besides other Catholic schools. Among its charitable houses may be mentioned a lazaretto, two hospitals, a poor-house, an orphan asylum for boys and girls, an insane asylum, a house of refuge for poor girls, a school for beginners and one for poor children, all of which are under the care of the Sisters of Charity. Several Catholic periodicals are published in the diocese: "Boletín Eclesiástico", the official organ of the diocese; "El Avisador", daily; "La Propaganda Católica", fortnightly; "El Adalid", monthly.

FELIPE S. JIMÉNEZ

Zululand

Zululand

A territory in South Africa lying between 28° and 29° S. Latitude and inhabited by the Zulus or Amazulus, who belong to the Bantu family. Since 1897 this region has been a province of the British colony of Natal, and comprises only two-thirds of the ancient Zulu possessions. It is bounded on by the Tugela on the south, the Transvaal on the west, Swaziland on the north, the Indian Ocean on the east, and has an area of 10,450 sq. miles.

In the beginning of the nineteenth century, the Zulus were a small tribe numbering hardly more than two or three thousand souls. Ten years later they could put 100,000 warriors in the field, and from that time until recently they devastated a great part of South Africa, and even terrorized the Boers and the British settlers. This was due to the appearance in their ranks of a great military genius, Tchaka, "the Zulu Napoleon". Having succeeded his father in 1810, he joined with Dinghwiswayo, King of the Umtewa, introduced military discipline among his men, and incorporated into his army the young men of the tribes he conquered. By 1818 these conquerors had exterminated or subjugated all their neighbours, except the great tribe of the Umdwandwe, whose chief was named Zuidi. Zuidi captured Dinghwiswayo and put him to death, but was in turn overcome by Tchaka, whose power was thereafter unchallenged. His empire in 1820 extended from Delagoa Bay to the St. John River, thus embracing the present territories of Natal, Zululand, Swaziland, Tongaland, and a part of the Transvaal.

After Zuidi's defeat several great migrations took place: members of his family and his principal officers, preferring exile to slavery, assembled some of their warriors and went north. Moselekietzi (in Zulu Umzilikazi) placed himself at the head of a clan, the Matabele, and, destroying everything in his path, settled between the Limpopo and the Zambesi Rivers. He died in 1867, leaving his throne to his son Lobengula, the founder of Bulawayo. This branch of the Zulus was conquered by the British in 1893, and Lobengula fled to the banks of the Zambesi where he died miserably. The Basutos were also attacked by the Zulus, but with the assistance of the French missionaries, Cassatis, Arbousset, and Gosselin, they preserved their independence. Through the vast plain lying along the Indian Ocean between the Natal and the mouth of the Zambesi, the Zulu tribes fled before Tchaka, devastating as they went. Among the chieftains of these savage hordes mention may be made of: Segondaba, who founded

Mombera, west of Nyassa; Mozilla, who allied himself with the Portuguese of Lorenzo Marques, and ceded to them the region south of the Nkomati; Gungunyanc, his son, who made war on the Portuguese, was defeated by them in 1898, and was exiled to Cape Verde.

Tchaka's empire, founded on massacre and pillage, could not last. In 1824 he came into contact with a number of English from the Cape, who helped him in his operations against the Pondos in the south. To these he granted trading facilities in his territory, and ceded to them Port Natal, which had been discovered by Vasco de Gama in 1497; near this district, the capital Durban (called after Urban, a governor of the cape) was established in 1846. In 1828 Tchaka was treacherously slain by his brother Dingaan, who succeeded him. The Boers were then beginning to cross the Drakenberge, and in 1837 almost a thousand of their wagons had passed over the mountains. Dingaan was startled by this foreign invasion, and, having invited several of them to a feast, treacherously massacred them. This was a signal for a merciless war. In a first encounter, on a tributary of the Tugela, Zulus surprised and killed nearly 700 Dutch men, women, and children. The name Weenen (tears) still points out the site of this butchery. The Boers did not yield. In 1840, Dingaan having been slain by his brother Pande, they allied themselves with the latter, and founded the Republic of Natal, making Pietermarit (named after two of their heroes Pieter Retief and Gevrit Maritz) their capital. The Boers, having gained the upper-hand, began at once to drive all the blacks out of Natal. The Cape Government, however, intervened "in the name of humanity", and, "protecting" the Zulus against the Boers, and the Boers against the Zulus, soon became the master of both.

In 1872 Pande died, leaving the chieftainship to his son Cettiwayo (in Zulu Ketsh-wayo). The latter in 1879 ventured to make war against the British. Despite the inferiority of their weapons, the Zulus were victorious. In one of these conflicts Prince Louis Napoleon fell. But, finally, the Zulu army was overthrown on the banks of the Umvolosi, at the very spot where the tribal tradition placed the birthplace of their founder. Brought to England, and afterwards re-installed as chief in 1883, Cettiwayo died in 1884. His son, Dini zulu, attempted a rebellion in 1889, but was captured and exiled to St. Helena. Since then, the Zulus, dispersed throughout the Natal and the territory left to them, seem to have lost, with their lack of cohesion, all idea of revolt and independence.

Though comprising different elements, the Zulus, disciplined and united by their terrible chieftains, are, generally speaking, handsome, tall, skilful and strong, athletic, and capable of advancement. No longer given to warfare, they have engaged in stock-raising and agriculture, and have made rapid progress in the ordinary trades. Most of them are fetishists, but the Catholic and Protestant missions have gathered around them a fair number of converts. Zululand does not form a distinct religious unit: it

depends on the Vicariate Apostolic of Natal, which is confided to the Oblates of Mary Immaculate. Lately a Zulu priest, a doctor of theology, was ordained in the College of the Propaganda, Rome, and is engaged in missionary work among his fellow Zulus.

A. LE ROY

Juan de Zumárraga

Juan de Zumárraga

Born at Durango in the Basque provinces in 1468; died in Mexico, 3 June, 1548. He entered the Franciscan Order, and in 1527 was custodian of the convent of Abrojo, where he received Charles V. Shortly afterwards he was appointed one of the judges of the court for the examination of witches in the Basque province. From his writings it would appear that he looked upon witches merely as women possessed of hallucinations. By this time more detailed accounts of the importance of the conquest of Hernan Cortes began to be received, and on 20 December, 1527, Zumárraga was recommended by Charles V for the dignity of first bishop of Mexico. Without having been consecrated and with only the title of bishop-elect and Protector of the Indians, he left Spain with the first civil officials, auditors (*Oidores*), towards the end of August, 1528, and reached Mexico, 6 December. Thirteen days after, two auditors, Parada and Maldonado, persons of years and experience, died. Their companions, Matienzo and Delgadillo, assumed their authority, which was also unfortunately shared by Nuno de Guzmán, who had come from his territories in Panuco. Their administration was one of the most disastrous epochs in new Spain and one of great difficulty for Bishop Zumárraga. Cortes had returned to Spain just previous to this and in his absence no limits seem to have been placed to the abuses of the auditors. They impoverished the Indians by taxes, sold them into slavery, branded them with hot irons, sent shiploads to the Antilles, offered violence to Indian girls, and persecuted with incredible fury the followers of Cortes.

Bishop Zumárraga, as Protector of the Indians, endeavoured vainly to defend them. His position was a critical one; the Spanish Court had not defined the extent of his jurisdiction and his faculties as Protector of the Indians. Moreover, he had not received episcopal consecration, and was thus at a disadvantage. The Indians appealed to him as protector with all kinds of complaints, sometimes greatly exaggerated. His own Franciscans, who had so long laboured for the welfare of the Indians, pressed him to put an end to the excesses of the auditors. It was clear that he must have an open

conflict with the civil officials of the colony, relying only on his spiritual prerogatives, which commanded no respect from these immoral and unprincipled men. Unfortunately, some members of other religious orders, envious perhaps of the Franciscans, upheld the persecutors of the Indians. Bishop Zumárraga attempted to notify the Spanish Court of the course of events, but the crafty auditors had established a successful censorship of all letters and communications from New Spain. Finally, a Biscayan sailor concealed a letter in a cake of wax which he immersed in a barrel of oil.

Meanwhile news reach Mexico that Cortés had been well received at the Spanish Court and was about to return to New Spain. Fearful of the consequences, Guzmán left Mexico, 22 December, 1529, and began his famous expedition to Michoacan, Jalisco, and Sinaloa. The two other auditors remained in power and continued their outrages. In the early part of 1530 they dragged a priest and a former servant of Cortés from a church, quartered him and tortured his servant. Bishop Zumárraga place the city under interdict, and the Franciscans retired to Texcoco. At Easter the interdict was removed, but the auditors were excommunicated for a year longer. On 15 July, 1530 Cortés, invested with the title of Captain General of New Spain, reached Vera Cruz. The Court appointed new auditors, among them Sebastian Ramirez de Fuenleal, Bishop of Santo Domingo, and the lawyer Vasco de Quiroga, afterward the first bishop of Michoacan. In December of the same year the new "Audiencia" reached Mexico, and with their arrival began an era of peace for both Bishop Zumárraga and the Indians. Matienzo and Delgadillo were sent as prisoners to Spain, but Nuño de Guzmán escaped, being then absent in Sinaloa. According to ancient and constant tradition it was at this time (12 December, 1531) that the apparition of Our Lady of Guadalupe took place.

Meantime the calumnies spread by the enemies of Zumárraga and the partisans of the first auditor had shaken the confidence of the Spanish Court, and the bishop received an order to repair to Spain. He set sail in May, 1532. On his arrival he met his implacable enemy Delgadillo, who, though still under indictment, continued his calumnies. Owing to this no doubt, Charles V had held back the Bull of Clement VII, dated 2 September, 1530, naming Zumárraga bishop. Zumárraga had, however, little difficulty in vindicating his good name, and was solemnly consecrated at Valladolid on 27 April, 1533. After another year in Spain, busied with matters relative to the welfare of the colony and favourable concessions for the Indians, he reached Mexico in October, 1534, accompanied by a number of mechanics and six women teachers for the Indian girls. He was no longer Protector of the Indians, as the paternal administration of the new auditors rendered this office unnecessary. On 14 November, 1535, with the arrival of the first viceroy, Antonio de Mendoza, the rule of the new auditors ended, but Mendoza was no less paternal in his treatment of the Indians. According

to Fray Toribio de Motolinia the number of baptized Indians in Mexico in 1536 numbered five millions.

They were a flourishing community, but the difficulties of the situation must be borne in mind in order to appreciate the task that confronted the first Bishop of Mexico. The great multitude of Indians who asked for baptism, said to have greatly increased after the apparition of Our Lady of Guadalupe in 1531, forced the missionaries to adopt a special form for administering this sacrament. The catechumens were ranged in order, the children in front, the prayers were recited in common over all, the salt, saliva, etc., applied to a few, and then water was poured on the head of each one without using the holy oils nor chrism, because these were not to be had. So long as the Franciscans were in charge of the missions there was no question raised, but as soon as members of other religious orders and some secular ecclesiastics arrived, doubt began to be cast upon the validity of these baptisms. To put an end to dispute Bishop Zumárraga submitted the case to Rome, and on 1 June, 1537, Paul III issued the Bull "Altitudo divini consilii", which declared that the Friars had not sinned in administering baptism under this form, nothing being said with regard to its validity since on this score there could be no doubt, but decreed that in future it should not be thus administered except in cases of urgent need.

Other difficulties arose apropos of marriage. In their pagan condition the Indians had many wives and concubines, and when they were converted the question arose which were wives and which were concubines, and if perchance there had been a valid marriage with any one of these women. The Franciscans knew that certain rites were observed for certain unions; that in some cases where separation or divorce was desired, it was necessary to obtain the consent of the authorities, and that in other cases the consent of the interested parties sufficed; that therefore there were valid marriages among the Indians. Others denied that this was the case. Bishop Zumárraga took part in all these discussions until the case was submitted to the Holy See and Paul III in the same Bull "Altitudo" decreed that the converted Indians should keep the first woman they had taken to wife.

A third important difficulty concerned the position of the regulars and their privileges. Adrian VI on 9 May, 1522, directed to Charles V the famous Bull "Exponi nobis fecisti", by which he transferred to the Franciscans and other mendicant orders his own Apostolic authority in all matters in which they judged it necessary for the conversion of the Indians, excepting for such acts as required episcopal consecration. This provision affected regions where there was no bishop, or where it required two or more days of travel to reach him. Paul III confirmed this Bull on 15 January, 1535. The bishops found their authority much limited, and a series of assemblies followed in which Zumárraga with his customary prudence tried to arrive at an understanding

with the regulars without openly clashing with them. Various modifications were adopted with the consent of the regulars on condition that these "should not impair the privileges of the regulars". The question therefore remained open. In 1535 Bishop Zumárraga received from the Inquisitor General, Alvaro Manrique, Archbishop of Seville, the title of Apostolic Inquisitor of the city of Mexico and of the entire diocese with extensive faculties, including that of delivering criminals to the secular courts. He never availed himself of this title nor established the tribunal, although he did indict and deliver to the secular courts a resident of Tezcoco who was accused of having reverted to idolatry and offering human sacrifices.

Meanwhile Las Casas had gone to Spain and obtained from the famous Junta of Valladolid (1541-1542) the approbation of the celebrated "Nuevas Leyes". These laws conclusively and decisively prohibited the enslavement of the Indians, withdrew all grants from all kinds of corporations, ecclesiastical or secular, and from those who were or had been viceroys, governors, or employees of any description whatsoever; previous grants were reduced; Indians were taken from owners who had ill-treated them; all governors were deprived of the faculty to "encomendar" (a system of patents which amounted to a virtual enslavement of the Indians); owners were compelled to live upon their own possessions; and in all newly discovered territory no grants could be made. Francisco Tello de Sandoval, commissioned to carry out the new laws, reached Mexico on 8 March, 1544. The gravest difficulties confronted him. Those affected by the new laws were almost all the Spaniards of the colony, many of them far advanced in years, who had passed through all the trying period of the conquest, and whom the new laws would leave in abject poverty. These had recourse to Bishop Zumárraga to intercede with Tello to obtain a suspension of the order until they could be heard before the Spanish Court. The representatives of the colonists found the emperor, Charles V, at Mechlin, on 20 October, 1545. In virtue of the situation as explained to him, he modified the general tenor of the laws so that while still correcting the principal abuses, they would not bear too heavily on the Spaniards of the colony. Through the prudent intervention of Bishop Zumárraga and the compliance of Tello, Mexico was undoubtedly saved from a bloody civil struggle such as engulfed Peru on account of the enforcement of these same laws and from which the Indians emerged worse off than they were before.

The last years of Bishop Zumárraga's life were devoted to carrying out the numerous works he had undertaken for the welfare of his diocese. Among the chief of these should be mentioned: the school for Indian girls; the famous Colegio Tlaltelolco; the introduction of the first printing press into the New World; the foundation of various hospitals, especially those of Mexico and Vera Cruz; the impetus he gave to industries, agriculture, and manufactures, for which he brought trained mechanics and labourers

from Spain; and the printing of many books. At the instance of the emperor, Paul III separated (11 February, 1546) the See of Mexico from the metropolitan See of Seville, and erected the Archdiocese of Mexico, appointing Bishop Zumárraga first archbishop and designating the dioceses of Oaxaca, Michoacan, Tlaxcala, Guatemala, and Ciudad Real de Chiapas, as suffragans. The Bull of appointment was sent on 8 July, 1548, but Bishop Zumárraga had died one month previously.

CAMILLUS CRIVELLI

Zuni Indians

Zuñi Indians

A Pueblo tribe residing at Zuñi on the bank of the Rio Zuñi near the boundary of New Mexico, and in the adjoining villages of Nutria, Ojo Caliente, and Pescado. The name Zuñi is a Spanish corruption of the Keresan *Sunifisti*, and was first used by Antonio de Espajo in 1583; the natives however called themselves Ashiwi (from *Shiwi*, flesh) and their territory Shiwona. They were discovered by Fray Marcos de Niza, a Franciscan missionary in 1539. Fray Marcos accompanied by a negro Estavanico and some Indian guides had set out in that year to prepare the way for his fellow missionaries in unexplored regions. Estavanico had been sent forward to inspect the unknown lands; when Fray Marcos arrived in Arizona after passing through Sonora he learned that Estavanico had been killed. Nevertheless, he continued his journey and got sight of Hawikuh, one of the seven Zuñi villages or pueblos. Owing to the hostility of the inhabitants, he was forced to return to Mexico, where he published an account of his journey, relating what he had heard of the Kingdom of Cívolá. This glowing description of the region led to the expedition of de Coronado in 1540, the little army being accompanied by Fray Juan de Padilla.

Coronado, after storming Hawikuh, discovered that Fray Marcos had been misled by the reports of the Indians, and that Cívolá's rich cities were only seven ordinary Indian *pueblos*, none containing over 500 houses. In 1598 Fray Andres Corchado was sent to preach to the Zuñi and the neighbouring tribes. This first permanent mission among the former was begun at Hawikuh in 1629 by the Franciscans. On 22 February, 1632, Fray Francisco Letrado, and, five days later, Fray Martin de Arvide were martyred by the Zuñi. When the Apache attacked Hawikuh on 7 August, 1670, and destroyed the Zuñi church, another Franciscan, Fray Padro de Avila y Ayala, gained a martyr's crown. In 1680 the Zuñi joined in the Pueblo rising, killed their missionary, and fled,

as they usually did when stricken with fear, to their fortress of Taaiyalone. The mission was continued until the nineteenth century, when it decayed from a want of priests and resources.

Recently, under the care of the United States Government, the Zuñi, who now number about 1640 souls, are becoming civilized, and are learning to speak English. Catholic missionaries are again working among them. Of the twenty-two Zuñi pueblos mentioned in historical times only Nutria, Ojo Caliente, Pescado, and Zuñi are still in existence. The Zuñi were the first of the Pueblo tribes met by the Spaniards, and have changed but little in character since that time. They were in general peaceful unless much provoked, tenacious of their traditional practices and beliefs, intellectual and serious, yet at times very witty. Their features are clear cut, noses aquiline, and lips thin; contrary to most of the Pueblo tribes very many of them are long-headed. Albinos, with light golden hair and pink-gray or blue eyes, are not unfrequently met among them.

The term Pueblo Indians (so called from the Spanish *pueblo*, a village) was applied to denote those Indian tribes living permanently in groups of adobe or stone houses in Arizona, New Mexico, and the adjoining part of Mexico, and in prehistoric times in Utah and Colorado. It now includes 5 tribes of Keresan, 6 of Shoshonean, 15 of Tanoan stock, and the Zuñi. The first great exploration of the Pueblo country was by de Coronado in 1540-2. In 1581 Francisco Sánchez Chamuscado and three Franciscans, Augustin Rodríguez, Francisco Lopez, and Juan de Santa María, were slain by the Tigua Indians near the Rio Grande. Seventeen years later Juan de Onate visited this region, and, dividing it up into districts, had each district entrusted to the care of a missionary, thus definitively bringing the Pueblo into contact with civilization; but the scarcity of priests available retarded the spread of Christian truth. In 1630, in answer to an appeal, thirty more franciscans came to the mission and worked with great success, until August, 1680, when disputes having arisen between the civil and ecclesiastical authorities, the Indians broke into rebellion, destroyed the missions and the religious archives, and murdered twenty-one of the thirty-three Franciscans as well as several hundred colonists. Again in 1696 an insurrection occurred and some more of the friars lost their lives, but since then the Indians have in general remained tranquil, though in 1847 Governor Bent was murdered by the Taos, incited by Mexicans; on the other hand the Zuñi in particular have been very friendly and faithful to the Americans, supporting them in the Mexican War.

In the northern part of the Pueblo region the village dwellings were generally constructed of sandstone or lava blocks; in the southern most of the houses were of adobe. The houses were generally several stories high, with ladders or steps on the outside, the roof of one story serving as a kind of veranda for the story above. The

ground floor, evidently for reasons of defence, had no door, entrance being made by means of movable ladders. The houses were owned and built by the women, the men supplying the materials. The pottery and weaving of the Pueblo Indians are the finest in the present territory of the United States; while the basket work of the Hopi in particular is highly esteemed. The northern Pueblo were adept agriculturists, and made use of a system of irrigation. Corn and cotton were extensively grown. At present, beans, chile, melons, and pumpkins are carefully cultivated. Fish is never eaten, and there are few domesticated animals except the turkey and dog. The Pueblo men usually wore a jacket and trowsers of deerskin, though now they use woollens; the women wear a cotton shirt and a woollen blanket passing over the right and under the left shoulder, and caught at the waist with a long coloured sash.

Each tribe is formed of a certain number of clans, descent being through the maternal line; formerly the clan was presided over by a priest. The Zuñi had many secret societies dealing with agriculture, magic, religion, war, etc. These societies could be entered only after severe ordeals had been successfully borne. As part of an initiation ceremony among this tribe chosen men clad only in the breech-cloth had to walk to a lake forty-five miles distant, under the blazing sun, to deposit a plume-stick and pray for rain; while one of the trials to be undergone by a candidate for admission to the priesthood of the Bow, was to sit unclad for hours on a large ant-hill. The rituals of the Pueblo contain many prayers; thus the Zuñi have prayers for food, health, and rain. Prayer-sticks, that is sticks with feathers attached as supplicatory offerings to the spirits, were largely used by the Pueblo. These sticks are usually made of cottonwood about seven inches long, and vary in shape, colour, and the feather attached, according to the nature of the petitions, and the person praying. The stick is intended to represent the god to whom the feathers convey the prayers that are breathed into the spirit of the plumes. The Hopi had a special prayer-stick to which a small bag of sacred meal was attached. Green and blue prayer-sticks are often found in the Pueblo graves and especially in the ceremonial graves of Arizona. Polygamy among the Indians is unknown; the woman is the more important element in married life; she has the power to divorce the husband for trifling reasons, and he then returns to his parents' home, the children, if any, belonging to the mother. In former times the government was in the hands of the Indian priests; since the Spanish conquest, however, purely civil affairs are controlled by an elected body. The population of the Pueblo has remained practically stationary for the last hundred years, New Mexico containing about 8400 inhabitants in the year 1887.

A.A. MACERLEAN

Francisco Zurbaran

Francisco Zurbaran

Born in the suburb of Fuente de Cantos in Estremadure, on the boundaries of Andalusia, Nov., 1598; died probably at Madrid about 1662. From his early years he showed great aptitude for drawing. His parents, honest peasants, placed no obstacle to his artistic tastes. While a young boy he frequented the studio of Juan de las Rocas, of whom he became a favourite pupil. It has been claimed that he made the pilgrimage to Italy, but there is no evidence of his having done so. In 1616, at the age of eighteen, he signed an Immaculate Conception. This is the only picture of his youth; but it has not been preserved, and we do not find another work of his until 1625. The Marquess de Malagan commissioned him to decorate the retable of San Pedro in the Cathedral at Seville; even in this early work the painter brilliantly displays his powerful and very individual manner. After the retable of San Pedro he painted for the convent of the Mercenarios Descalzos, which was then recently built at Seville, five or six of the twelve pictures which recount the life of St. Peter Nolasco, founder of the Order of Mercy. The others are by his pupil Juan Martinez de Gradillas. The museum of the Prado at Madrid contains two of Zurbaran's pictures: the Vision of St. Peter Nolasco and the Apparition of the crucified Prince of the Apostles to St. Peter Nolasco. These two canvases are remarkable for their serenity, strength, and nobility. Zurbaran's vigorous manner, which aimed at fidelity of expression, appear here in bold relief. The success of these pictures at the convent of the Mercenarios was such that the ayuntamiento of Seville begged the artist to fix his residence in the capital of Andalusia. It is

said that Alonso Cano and the other painters protested, demanding that Zurbaran should be subjected to a preliminary examination according to custom. The latter haughtily retorted by requesting the municipality to declare that the unanimous approval of his works was sufficient evidence of his capacity. Commissions flowed in from all sides. About 1625 he painted several canvases in honour of St. Bonaventure in the church dedicated to the saint at Seville: St. Bonaventure presiding at the chapter of the Friars Minor; the Burial of St. Bonaventure (now at the Louvre); St. Bonaventure visited by an Angel (Dresden); and St. Bonaventure showing the crucifix to St. Thomas Aquinas (Berlin). About the same period he began to paint the Apotheosis of St. Thomas Aquinas for the chapel of the college which bore his name. This is the finest of his most beautiful works, and it is certainly one of the highest and noblest productions of the Spanish school. It was finished in 1636; it is now at the provincial museum of Seville. In the same year Zurbaran produced another masterpiece, Bl. Alonso Rodriguez (Academy of San Fernando, Seville). Between 1633 and 1638 he executed for the Carthusian monastery at Xeres a large number of pictures drawn from the Gospels and the life of St. Bruno, which formed a splendid assemblage; they are now scattered (Provincial Museum of Cadiz, has St. Bruno at prayer, St. Hugh, Bishop of Grenoble, etc.; the Departmental Museum of Grenoble, possesses the Adoration of the Shepherds and the Adoration of the Magi). In the centre of a chain of mountains covered with oaks and chestnuts which separate Estramadura from Castile, on a peak less sharp than its neighbours, rises the monastery of Guadalupe. Belonging to the Order of Hieronymites this monastery was for a long time the centre of a much frequented pilgrimage, whither people came to venerate a miraculous image of the Blessed Virgin Mary which St. Leander, Archbishop of Seville, had brought from Rome. In the church of this convent, almost inaccessible is hidden what is "perhaps Zurbaran's most important work" (Lafond, "Ribera et Zurbaran", 100). It consists of thirteen pictures. Two, representing St. Ildefonso and St. Nicholas of Bari, adorn the side altars at the entrance to the choir. The others relate to the life of St. Jerome. The pictures of Guadalupe mark the culminating point of Zurbaran's career. Thenceforth his activity slackened, but still produced masterpieces. About 1650 the Marquess de Campo Alanza commissioned him to paint for the Capuchin convent at Castellon the series of great founders of religious orders from Elias to St. Ignatius Loyola. These pictures are still in the same place. Zurbaran also composed a very beautiful collection of full length portraits of Hieronymite monks; these are now scattered (San Fernando Academy, Museum of Pau, Stafford House, residence of the Duke of Sutherland, London). Besides these pictures Zurbaran painted a great many pictures of monks at prayer; one of the most striking is the "Kneeling Monk" at the National Gallery. At the instance of Velazquez, who had been Zurbaran's comrade at Seville, Philip IV invited Zurbaran

to Madrid in 1650 and commissioned him to take part in the decorations of the hall of Buen Ratio. His share consisted in representing the "labours of Hercules" in ten pictures; his thoroughly religious talent was but little adapted to mythological conceptions, and after having painted three or four canvases he merely sketched the others, which were completed by his pupils (1658). However, these naked figures are remarkable for correctness of drawing and powerful appearance. In 1659 he painted St. Francis of Assisi kneeling (property of Don A. de Beruete). The museum at Buda-Pesth has an Immaculate Conception painted in 1661, a year before his death. Mention may be made of many other of his works, e.g. Christ crowning St. Joseph (Seville), the Portiuncula (Cadiz), the Blessed Virgin and St. John on Calvary (Munich), a St. Francis of Assisi (Dresden), a St. Lawrence (St. Petersburg), an Adoration of the Shepherds (National Gallery), long attributed to Velazquez, but now commonly restored to Zurbaran.

G. SORTAIS

Zurich

Zurich

The capital of the Swiss canton of the same name which is the second largest and richest of the twenty-five Swiss cantons. The city is the largest in Switzerland, and has 200,000 inhabitants. It has a commanding position on the beautiful outlet of Lake Zurich; to the west and east are the wooded heights of the Uetliberg and Zurichberg, and there is a fine view of the thickly settled and fruitful banks of the lake with handsome villages along the shore; in the background towards the south and south-east is an imposing circle of lofty mountains in Glarus, Schwyz, Nidwalden, etc. The climate is mild and healthful. The prehistoric history of the city and its vicinity extends back to the Stone Age, the first and second Bronze Age, and the iron Age, as is proved by the discovery of numerous lake-swellings and remains of graves. Probably even as far back as the time of the ancient Helvetii a town existed on the site of Zurich.

Historically the city first appears under the name of Turicum, during the period of the Roman supremacy in Switzerland at the beginning of the Christian era. Christianity was probably also introduced during this period. According to legend the Faith was brought to Zurich by members of the Theban Legion. Felix, Regula, and Exuperantius are the patron saints of the city. After the Alamanni had conquered the northern part of Switzerland during the era of the migration (fourth and fifth centuries), Zurich became the capital of the districts or hundreds of Zurich. In the early medieval period Zurich was ruled by the abbess of Fraumunster, the abbess being called "the great lady of Zurich". At a later date it was a free city of the empire, and in 1351 it joined the Swiss Confederation, then the "union of the eight old towns". Like Berne and Schwyz, Zurich has an important place both in the early history of Switzerland and in its modern history. At the beginning of the sixteenth century it became the cradle and leading power of the Reformation in German Switzerland under the guidance of its pastor Huldreich Zwingli, who joined the Reformers; the city was also the main supporter of Zwinglianism (as opposed to Lutheranism and Calvinism).

The city is built on the banks at the end of the lake and along the River Limmat, its outlet, and climbs the lower heights on both sides of the river. It is divided into the Old Town and the New Town; the latter is mainly composed of suburbs and surrounding townships which were formerly independent but which now are united with the Old Town. In the Old Town many houses still exist that are historically and architecturally interesting. The New Town has some very fine streets, notably the street leading to the railway station, which is considered one of the finest in Europe. There are large and small parks, finely situated. The city is governed by an executive council of seven members, the head of which is the chief official of the city; the executive council is aided by the "great council", a form of town parliament. Both official boards are elected by the citizens for three years; all citizens twenty years of age who are capable of bearing arms have the right to vote. In religious belief the inhabitants are: 130,000 Protestants, 50,000 Catholics, 3000 Old Catholics, 5000 Jews, and 10,000 belong to no denomination. The most active religious body is the Catholic. The Protestants possess eight large churches, of which the Grossmunster and the Fraumunster are of much historical interest. The Catholics have three churches and various chapels, and two new churches are in course of construction; they are cared for by twenty-four priests.

Zurich is celebrated for its schools. The sum assigned by the budget to the primary and middle schools of the city for 1913 was five million francs (\$1,000,000). Among the schools are a large cantonal gymnasium, a commercial high-school, the cantonal university, the Federal polytechnic school, and the conservatory for music. In addition there are a large number of private schools and educational institutions, mainly attended by foreigners. The city possesses large scientific, technical, and art collections, and

important libraries. The famous Swiss national museum is also situated at Zurich. As the banking centre of Switzerland, Zurich contains the main Office of the Swiss National Bank; of the Swiss loan and Mortgage Company, of the Swiss Banking Association, etc. It also contains an important stock-exchange, and silk, cotton, and grain exchanges. Zurich is a great centre of continental traffic and a railway junction for traffic between the east and west and north and south of Europe. There are large numbers of religious and charitable societies and associations for the benefit of the public, besides learned, professional, and athletic organizations. The city contains large numbers of benevolent institutions, administered by the canton, city or private organizations; there are excellent hospitals and sanatoriums. There is a fine hall for music with an excellent orchestra; Zurich has also places for athletic contests and exhibitions of aviation.

GEORG BAUMBERGER

Giacinto Placido Zurla

Giacinto Placido Zurla

Cardinal Vicar of Rome, writer on medieval geography, born at Legnano, of noble parents, 2 April, 1769; died at Palermo, 29 Oct., 1843.

At the age of eighteen Zurla entered the Camaldolesian Monastery of San Michele di Murano at Venice, where he found a life-long friend in Mauro Cappellari (afterwards Gregory XVI), a young monk of his own age. He became lector in philosophy and theology, and in 1802 published a theological textbook. As librarian, his attention was attracted by the map of the world executed between 1457 and 1459 by the famous Camaldolesian geographer Fra Mauro, and in 1806 he published an account of it entitled "Il Mappamondo di Fra Mauro". This led to further studies on early travellers, of which the most important result was the work, "Di Marco Polo e degli altri viaggiatori veneziano" (2 vols., Venice, 1818-19). In 1809 Zurla was elected a defensor of his congregation and given the title of abbot. The next year the monastery was suppressed by order of Napoleon, but the monks carried on their college dressed as secular priests. Of this institution Zurla acted as rector and Cappellari as lector of philosophy until its dissolution in 1814. From this year he taught theology in the patriarchal seminary till 1821, when he journeyed to Rome and resumed the white habit of St. Romuald at S. Gregorio Cappellari was now abbot. By Pius VII he was named consultor of various congregations and prefect of studies in the Collegio Urbano; in 1821 he received the cardinal's hat, and in the following year the titular Archbishopric of Edessa. He was Cardinal Vicar to Leo XII and his two successors, and took an active interest in the organization of the Roman seminary, the reform of criminal tribunals, the delimitation

of Roman parishes, and the affairs of the many congregations of which he was a member. Cardinal Zurla was greatly loved by his friends, but his zeal for the reform of abuses made him some enemies in Rome.

Sanseverino, *Notizie sulla vita e le opere di Placido Zurla* (Milan, 1857)

RAYMUND WEBSTER

Cistercian Abbey of Zwettl

Cistercian Abbey of Zwettl

(CLARAVALLIS AUSTRIAEC).

A filiation of Heiligenkreuz, of the line of Morimond, situated in Lower Austria, in the Diocese of St. Hippolyte. This monastery was founded in 1137 by Hadmar I of Kuenring, with Herrmann, a monk of Heiligenkreuz, as its first abbot (1137-47). The foundation was confirmed by Innocent II (1140) and by several other popes and emperors. It made rapid progress, soon becoming one of the most important monasteries in the order. Extensive buildings were erected, and the church, chapter-room, and dormitory were blessed in 1159, though the entire monastery was not completed until 1218. For more than two centuries its spiritual, as well as temporal, state was most flourishing; towards the end of the fourteenth century, however, its prosperity was on the decline; it was repeatedly plundered, especially in 1426, when 4000 sacked and burned it down, one brother being martyred. It was rebuilt under Abbot John (1437-51), and regained a part of its former splendour, having over forty priests near the end of the fifteenth century, and so continued until reduced to six monks and one secular priest under the Lutheran Reformation, when also a fourth part of its possessions, which were very large, were ordered to be sold by an imperial rescript. Under Abbot Erasmus (1512-1545) and his successors it flourished anew, notwithstanding the Thirty Years War and the Turkish invasion, during which it was saved from destruction by the friendship of Count Thurn for Abbot Siegfried. During the administrations of Abbot Linck (1646-71), author of "Annales Austrii Claravallenses", and Abbot Melchior (1706-1747), who rebuilt a great part of the abbey and enriched it with many precious vessels and vestments, it reached its zenith. The latter encouraged study, and opened schools of philosophy, theology, etc., in the monastery, and founded the library. During the period of Josephinism Abbot Rainer was obliged to resign, to be succeeded by a commendatory abbot (1786), but after 1804 the community was allowed to elect its own abbot. Since 1878 the abbey has been administered by Abbot Stephen Roessler, the sixty-first from its foundation; besides him two other noted historians were members of Zwettl during the nineteenth century; John von Frast (d. 1850) and Leopold Janauschek, the author of "Originum Cisterciensium". The abbey is justly proud of its

great library, which contains over 60,000 volumes, 500 *incunabula*, and 420 manuscripts. The community is now formed of over 40 priests, who have care of fifteen incorporated parishes.

LINCK, Annales Austria Claravallenses (Vienna, 1723); SARTORIUS, Cistercium bis-tertium (Prague, 1700); VON FRAST, Stiftungsbuch des Cistercienser Klosters Zwettl (Vienna, 1851); IDEM, Urkunden u. geschichtiche Notized des Stiftes Zwettl (Vienna, 1849); ROESSLER in Xenia Bernardina Verzeichniss der Handschriften des Stiftes Zwettl (Vienna, 1891); IDEM, Das Stift Zwettl (Vienna, 1893); MANRIQUE, Annales cistercienses (Lyons, 1642-49); JONGELINUS, Notitia abbatiarum ord. cisterciensis (Cologne, 1640); KOLL, Chronicon breve monasteriorum o. cist. ad S. Crucem in Austria et S. Gotthardum in Hungaria (Vienna, 1834); WATZL, Die Cistercienser von Heiligenkreuz (Graz, 1898); BRUNNER, Ein Cistercienser-buch (Wurtzburg, 1884); JANAUSCHEK, Originum cisterciensium, I (Vienna, 1877); Catalogus personarum religiosarum s. ord. cisterciensis (Rome, 1906).

EDMOND M. OBRECHT

Ulrich Zwingli

Ulrich Zwingli

(Also, *Huldreich*)

Founder of the Reformation in Switzerland, born at Wildhaus in Switzerland, 1 January, 1484; died 11 October, 1531. Zwingli came from a prominent family of the middle classes, and was the third of eight sons. His father Ulrich was a district official of the little town of Wildhaus, and a cousin of his mother, Margaret Meili, was abbot of the Benedictine monastery in Fischingen in Thurgau. A brother of the elder Zwingli, Bartholomew, was pastor of Wildhaus until 1487, but then became pastor and dean of Wesen on the Walensee. Zwingli received his early education at Wesen under the guidance of this uncle, by whom he was sent, at the age of ten, to Gregory Bunzli of Wesen who was studying at Basle and also teaching in the school of St. Theodore, which Zwingli henceforth attended. For his higher studies he went to Berne, whither the celebrated Swiss Humanist Schuler was attracting many students for Classical studies. Zwingli's name is entered on the roll of the University of Vienna for the winter term of 1498-99, but he was excluded from the university. The reason for his exclusion is unknown. Zwingli appears, however, to have overcome the difficulty, for he was again matriculated in 1500. Two years later he returned to Basle, where, among others, Thomas Wyttbach encouraged him to devote himself to the serious study of theology. In 1506 he completed his studies and received the degree of Master of Theology. Shortly before his graduation the parish of Glarus had selected him as its pastor, although he

had not yet been ordained priest. Apart from his exclusion from the University of Vienna, his student life presents no unusual features, though his later friends and followers relate much that is laudatory about this period. His studies at Berne, Vienna, and Basle, where Humanism was eagerly cultivated, made Zwingli one of its zealous supporters.

As pastor of Glarus from 1506 to 1516, the continuation of his humanistic studies was one of Zwingli's chief occupations. He studied Greek, read the Classics and the Fathers of the Church, and entered into familiar intercourse with the Humanists of the time, especially with Heinrich Loriti (Glareanus), Erasmus, and Vadian. He also engaged in teaching, and the later chroniclers Aegidius and Valentine Tschudi were his pupils. In public life he was chiefly conspicuous for his political activity, in this respect following the example of many ecclesiastics of his day. In the Italian campaigns of 1513 and 1515, when the Swiss won the victories of Novara and Marignan, he acted as army chaplain. His earliest literary attempts - the rhymed fables of the ox (about 1510), "De Gestis inter Gallos et Helvetios relatio" (1512), "The Labyrinth" (1516?) - are all concerned with politics. These works, which reveal Zwingli as the devoted adherent and champion of the papal party, won him the friendship of the powerful Swiss cardinal Matthew Schinner and an annual pension of fifty gulden from the pope. So zealously indeed did he then espouse the cause of the pope that his position in Glarus became untenable when the French party became predominant there in 1516. Diebold von Geroldseck, the administrator and sole conversual in the Benedictine monastery at Einsiedeln, entrusted him with the position of a secular priest there, and at the end of 1516 Zwingli left Glarus.

As secular priest at Einsiedeln, the celebrated place of pilgrimage for Switzerland and South Germany, Zwingli's chief office was that of preacher. For the fulfilment of this task he devoted himself to the study of Holy Writ, copied the Epistles of St. Paul, and learned Hebrew, but did not meanwhile neglect the Classics, a fact which won him flattering praise from the Humanists. Erasmus was keenly aware of the laxity of ecclesiastical life (the abuses in external worship, the degeneracy of a large proportion of the clergy), and rightly agitated a reform within the Church, impressing its necessity on the ecclesiastical authorities. Zwingli worked in the same spirit at Einsiedeln from 1516 to 1518. In disputing Luther's priority, Zwingli later claimed (and most historians have supported his claim) that while at Einsiedeln he already preached against the old Faith. His claim is, however, negatived by the facts that he continued to draw his pension, that at the end of 1518, at his own petition, he was appointed by the pope acolyte chaplain of the Roman See (cf. the document in "Analecta reformatoria", I, 98), and that his friendly intercourse with Cardinal Schinner still continued when he was engaged at Zurich in 1519.

Towards the end of 1518, when the post of secular preacher at Münster became vacant, Zwingli applied for the vacancy at the invitation of Oswald Myconius (a friend of his youth), who was engaged as teacher in the monastery school of that place. Like many other clerics, Zwingli was suspected of offences against celibacy. These reports, which were current even in Zurich, made his position there difficult. When his friend Myconius questioned him on this point Zwingli wrote from Einsiedeln that it was not, as had been asserted, a respectable girl, but a common strumpet with whom he had been intimate. His friends in Zurich succeeded in suppressing these reports, and on 11 Dec., 1518, the chapter elected Zwingli by a great majority. He was then thirty-five years old, "in body a handsome and vigorous person, fairly tall, and of a friendly aspect". In his intercourse with others he was an agreeable companion, of pleasant address and gay temperament, a good singer and musician, and a skilled orator. Accused by his contemporaries of no slight moral offences, he made no attempt to clear himself of the charges. As a scholar he was a Humanist rather than a theologian. Under the influence of Erasmus, he saw clearly the defects of ecclesiastical life, but could not himself claim to be spotless, and his talents led him to engage rather in disputes concerning secular affairs than to devote himself to clerical reforms. So far he had no intention of introducing doctrinal innovations; such an idea occurred to him first in Zurich after 1519. Luther had already hung up his ninety-five theses against indulgences at the church of the castle in Wittenberg, 31 Oct., 1517.

On 1 January, 1519, Zwingli preached for the first time in the cathedral at Zurich. He began with the exposition of the Bible, taking first the Gospel of St. Matthew, and by going back to the sources showed himself especially a Humanist. Of doctrinal innovation he had still scarcely any thought. Even his stand against the indulgence preacher, Bernhardin Sanson, at the beginning of 1519, was taken with the consent of the Bishop of Constance. The transformation of Zwingli the Humanist and politician into a teacher of the new faith was facilitated by the ecclesiastical and political conditions of the people and public authorities at Zurich and in Switzerland in general. The populace displayed great religious zeal externally, e.g., in pious foundations and pilgrimages. This zeal, however, was insufficient to counteract the decay of morals, which resulted especially from the mercenary army system. The clergy to a great extent neglected their obligations, many of them lived in concubinage, and joined in the shameless pursuit of spiritual prebends, thus damaging their prestige. Worthy clerics, however, were not wanting. The Bishop of Constance, Hugo von Hohenlandenberg, was a man of stainless conduct; he endeavoured to do away with abuses, and issued various mandates, but unfortunately without permanent results. This failure was due to the lack of cooperation on the part of the civil rulers, who then enjoyed in ecclesiastical matters very extensive rights acquired, especially by Zurich and Berne, from the popes

and bishops in consequence of the Burgundian, Swabian, and Milanese wars (1474-1516). Rome, like France, had endeavoured to secure, by the outlay of much money, the services of Swiss mercenaries. In Zurich, the "foremost and supreme place", the council espoused the cause of the pope, and opposed the French party. Zwingli did the same and came into prominence first as a politician, a fact which makes his case essentially different from that of Luther. It was only in 1520 that he voluntarily renounced his papal pension. He then attacked the ruinous mercenary system, and through his efforts Zurich alone of all the cantons refused to enter the alliance with France on 5 May, 1521. However, 2000 mercenaries entered the service of the pope. On 11 Jan., 1522, all foreign services and pensions were forbidden in Zurich. By the publication, 16 May, 1522, of his "*Vermahnung an die zu Schwyz, dass sie sich vor fremden Herren hutend*", Zwingli succeeded in extending his influence beyond Zurich, although only temporarily.

Owing to his success as a politician his prestige and importance increased. From 1522 he came forward as sponsor of the religious innovations. His first reformatory work, "*Vom Erkiesen und Fryheit der Spysen*", appeared when the bookseller Froschauer and his associates publicly defied the ecclesiastical law of fasting, and a controversy concerning fasts broke out. Zwingli declared the fasting provisions mere human commands which were not in harmony with Holy Writ; and the Bible was the sole source of faith, as he asserted in his second writing, "*Archeteles*". Through the medium of a delegation the Bishop of Constance exhorted the town to obedience on 7 April. On 29 Jan., 1523, the council, on whose decision everything depended, held a religious disputation at Zwingli's instigation, and agreed to base its action on the result of the debate. In sixty-seven theses (his most extensive and important work) Zwingli now proposed a formal programme for the innovations; according to his view the Bible with his interpretation was to be the sole authority. The arguments brought against this view by the most important champion of the old Faith, the vicar-general Johann Faber of Constance, who appealed to the teaching and tradition of the early Church, were disregarded; the council in whose hands Zwingli reposed the government of the Church, forthwith declared in favour of the innovation.

A second religious disputation in October, 1523, dealt with the practical institution of a state church, the veneration of the saints, the removal of images, good works, and the sacraments. No notable representative of the ancient Faith was present. Zwingli urged the adoption of his doctrines so successfully that even his devoted adherent, Commander Schmid of Kusnacht, warned him against the too sudden abolition of ancient customs and usages. The first steps having been taken in 1522-23, the reforms were carried into effect in Zurich in 1524-25. About Easter, 1524, indulgences and pilgrimages were abolished, the sacraments of Penance and Extreme Unction rejected,

and pictures, statues, relics, altars, and organs destroyed, regardless of their artistic value. Sacred vessels of great value, such as chalices and monstrances, were melted into coin. Church property was seized by the State, which gained most by the suppression of the monasteries; the Fraumünster Abbey, founded in 853, was voluntarily surrendered to the secular authorities by the last abbess. Celibacy was rejected as contrary to Holy Writ, and monks and nuns were married. As early as 1522 Zwingli with ten other ecclesiastics assembled at Einsiedeln and addressed a petition to the Bishop of Constance and to the diet asking freedom for priests to marry "Your honourable wisdom", they declared, "has already witnessed the disgraceful and shameful life we have unfortunately hitherto led with women, thereby giving grievous scandal to everyone." From 1522 the marriage of priests in Zurich became ever more frequent; Zwingli himself on 2 July, 1524, married Anna Reinhard (the widow of Hans Meyer von Knonau), who bore him his first daughter on 31 July. A new marriage law of 10 May, 1525, regulated these innovations. In the spring of 1525 the Mass was abolished; in its place was introduced the memorial service of the Last Supper.

The new doctrines were not introduced without opposition. The first opponents of the Reformers were from the ranks of their own party. The peasants could find no reason in the Bible, the sole principle of faith, why they should contribute to their lords' taxes, tithes, and rent, and they refused any longer to do so. The greatest unrest prevailed everywhere, and was only quelled after long negotiations and some concessions by the Government. The Anabaptists were not so easily silenced. From the Bible, which Zwingli had placed in their hands, they had deduced the most marvellous doctrines, much more radical than Zwingli's and questioning even the authority of the state. Zwingli persecuted them mercilessly with imprisonment, torture, banishment and death; their leader Felix Manz was drowned. The war against these visionary spirits was more serious for Zwingli than that against Rome. At first Rome allowed itself to be soothed by evasive words; the "Lutheran sects" were aimed at and the Zwinglians clung to the word of God, was the information supplied to Clement VII by Zurich on 19 August, 1524. Soon, however, the breach with the ancient Church was too plain to be doubted. The cantons of Uri, Schwyz, Unterwalden, Lucerne, Zug, and Fribourg remained true to the old Faith, and offered determined opposition to Zwingli. They could not see that Zwingli was more favoured by God than the ancient saints and teachers; in his clerical life he was not superior to others, and he was inclined rather towards disturbance than towards peace.

The Catholic cantons, however, also strove to abolish abuses, issuing in 1525 a Concordat of Faith with important reforms which, however, never found general recognition. From 21 May to 8 June, 1526, they held a public disputation at Baden, to which they invited Dr. Johann Eck of Ingolstadt. Zwingli did not venture to appear.

The disputation ended with the complete victory for the old Faith, but those who believed that the teaching of Zwingli could be driven out of the world by disputations deceived themselves; it had already taken too deep root. In St. Gall the Humanist and burgomaster Vadian worked successfully in Zwingli's interest - in Schaffhausen, Dr. Sebastian Hofmeister; in Basle, (Ecolampadius. For Berne which, notwithstanding the efforts of Berchtold Haller, had previously maintained a non-committal attitude, the religious disputation held at Zwingli's suggestion, in Jan., 1528, was decisive. Zwingli himself came to the city, and the Catholic cause was but weakly represented. The new doctrines were then introduced as sweepingly into Berne as they had been at Zurich, and many places and counties which had previously wavered followed its example. Zwingli could also point to brilliant successes in 1528 and 1529. He ensured the predominance of his reforms through the "Christian Civic rights", agreed upon between Zurich and the towns of Constance (1527), Berne and St. Gall (1528), Biel, Mulhausen, and Schaffhausen (1529). To compel the Catholic cantons to accept the new doctrines, he even urged civil war, drew up a plan of campaign, and succeeded in persuading Zurich to declare war and march against the Catholic territories. The Catholic districts had endeavoured to strengthen their position by forming a defensive alliance with Austria (1529), the "Christian Union." At this juncture, however, they received no assistance. Berne showed itself more moderate than Zurich, and a treaty of peace was arranged, which, however, was very unfavourable for the Catholics.

In Zurich Zwingli was now the commanding personality in all ecclesiastical and political questions. He was "burgomaster, secretary, and council" in one, and showed himself daily more overbearing. His insolence indeed prevented an agreement with Luther regarding the doctrine of the Lord's Supper, when a disputation was arranged between the two heresiarchs at Marfurt in October, 1529. As a statesman, Zwingli embarked in secular politics with ambitious plans. "Within three years", he writes, "Italy, Spain and Germany will take our view". Even the King of France, whose greatest enemy he had previously been, he sought to win to his side in 1531 with the work "Christiana fidei expositio", and was even prepared to pay him a yearly pension. By prohibiting intercourse with the Catholic cantons he compelled them to resort to arms. On 9 Oct., 1531, they declared war on Zurich, and advanced to Kappel on the frontiers. The people of Zurich hastened to oppose them, but met a decisive defeat near Kappel on 11 Oct., Zwingli falling in the battle. After a second defeat of the Reformed forces at Gubel, peace was concluded on 23 Oct., 1531. The peace was of long duration, since the Catholic victors displayed great moderation. Zwingli's death was an event of great importance for all Switzerland. His plan to introduce his innovations into the Catholic cantons by force had proved abortive. But even Catholics, who claimed the same rights in religious matters as the people of Zurich, regarded him as the "governor of all con-

federates". Zwingli is regarded as the most "liberal" of all the Reformers, and was less a dogmatist than Calvin. His statue, with a sword in one hand and the Bible in the other, stands near the municipal library at Zurich, which has also a Zwingli museum.

Heinrich Bullinger (1504-75), Zwingli's successor, undertook the internal development of the new doctrines. His father (also named Heinrich) who was pastor at Bremgarten and embraced the Reformation early, sent Bullinger to Emmerich and Cologne, where he received a thorough Humanistic training. Even from his earliest activity as teacher in the Cistercian monastery near Kappel (1523-29) and later as pastor in Bremgarten (1529-31), Bullinger proved himself a zealous lieutenant of Zwingli's. In 1528 he accompanied the latter to the religious disputation at Berne. On 9 Dec., 1531, he was chosen as Zwingli's successor, pastor of the Grossmünster at Zurich, a position which he held to the end of his life (1575). Bullinger regarded union with Luther on the question of the Lord's Supper as his chief task. For this purpose he composed in 1536, with Myconius and Grynæus, the "First Helvetic Confession", a profession of faith which was recognized by the Evangelical towns of Switzerland. In the same year also appeared the "Wittenberg Concordia". When Bullinger refused to subscribe to this agreement, which was brought about by Butzer, Luther burst out into abuse of Zwingli. The attempt to bring about an agreement between Bullinger and Calvin on this question at Geneva was more successful, the "Consensus Tigurinus" being concluded between them in 1545. As the expression of his personal religious conviction Bullinger composed the "Second Helvetic Confession", which was printed in 1566, and was recognized by all the Evangelical churches except that of Basle.

Besides discharging the office of preacher, Bullinger displayed great literary activity. He carried on a large correspondence with several crowned heads, with Lady Jane Grey in London, Vadian, Graubundenn, and many others. More than 100 sermons and theological treatises from his pen are known, as well as one drama, "Lucretia and Brutus". His "Diarium" and his extensive history of the Reformation are still valuable. It is an undecided question how far his history is independent and how far a compilation of other writings. In character Bullinger was particularly hospitable, and many fugitives from England and France found refuge with him. Although less overbearing than Zwingli and Luther, he was still intolerant; he approved the execution of Servetus at Geneva. He died on 17 September, 1575.

Zwingli's works were first collected and published by his son-in-law, Rudolf Gwalter, and entitled: "Opera D. H. Zwingli vigilantissimi Tigurinae ecclesiae Antistitis, partim quidem ab ipso Latine conscripta, partim vero e vernaculo sermone in Latinum translata: omnia novissime recognita, et multis adiectis, quae hactenus visa non sunt" (4 fol. vols., Zurich, 1545; reprinted, 1581). The first complete edition was edited by Melchior Schuler and Johannes Schulthess (8 vols., Zurich, 1828-42). Volumes

VII and VIII, containing Zwingli's correspondence, are especially important. A new edition of his complete works prepared by Emil Egli (d. 1908), George Finsler, and Walther Kohler is appearing in the "Corpus Reformatorum", LXXXVIII (Berlin, 1905); three volumes I, II, and VII, have already (1912) appeared.

Ernst Friedrich Zwirner

Ernst Friedrich Zwirner

Architect, born at Jakobswalde in Silesia in 1802; died at Cologne in 1861. He studied at Breslau and Berlin, and worked at the latter place under Schinkel. From 1833 he was the architect of the cathedral at Cologne. At Cologne he was next to Statz the most important practical representative of Gothic architecture. From the time it was recognized that the completion of the great cathedral at Cologne was the task which would bring the highest honour to the Gothic style, Schinkel's school was drawn on for men to carry out the work, first Ahlert, and after his death, Zwirner being called to Cologne. Before long more confidence was placed in Zwirner than had been given to his predecessor, because he showed a more perceptive grasp of the work of the old masters. After the work of restoration was finished, he presented his plans for the completion of the structure in 1841 to King Frederick William IV; upon the approval of the plans the work began the next year. However, neither Zwirner, nor his able successor Voigtel, who completed the work, succeeded in uniting the charm of free play of imagination with technical correctness and architectural sequence. There is no doubt that Zwirner was one of the finest judges of the medieval style. What he had learned from his work on the cathedral of Cologne he used in designs of his own with the same fine skill and energy. His best building is probably the church of St. Apollinaris at Remagen, to which, however, the same objection of monotony of plan has been made. He also built a church at Mulheim on the Rhine, and one at Elberfeld. He restored the castle of Argenfels on the Rhine, built the castle of Herdringen in the style of the ancient fortress castles on the Rhine for Count von Furstenberg, and also the castle of Moyland near Cleves. His last work was the synagogue at Cologne.
